PREFACE

The 1966 Census publication programme is made up of five individual Volumes, four consisting of a number of separate Parts, together with a series of supplementary statements in mimeographed form. The actual titles of the 1966 Census Volumes and Parts are listed in the back of this publication; the content of each is briefly as follows:

Volume 1. Single characteristics of the population for Australia, Parts 1–11.—Age, marital status, birthplace, nationality, period of residence, education, religion, occupational status, industry, occupation and race.

Volume 2. Related characteristics of the population for Australia, Parts 1–5.—Growth and distribution of the population, demographic data, overseas-born population, the work force, and families and households.

Volume 3. Housing.

Volume 4. Single characteristics of the population and dwellings in Local Government Areas, Parts 1–7.—New South Wales, Victoria, Queensland, South Australia, Western Australia, Tasmania, and Northern Territory and Australian Capital Territory.

Volume 5. Population and dwellings in localities, Parts 1–7.—States and Territories as for Volume 4, and Part 8.—Australia.

This publication is Volume 3 and contains details of dwellings enumerated in each State and Territory of Australia at 30 June 1966, together with comparative data for previous censuses, and a series of tables showing characteristics of householders for 1966 only.

EXPLANATORY NOTES

Dwellings definitions

The following definitions were used as a basis for the Census of Dwellings.

(*a*) an 'occupied dwelling' is any habitation occupied by a 'household group' and may comprise the whole or only a part of a building.

(*b*) A 'household group' is a person or group of persons living as a domestic unit with common eating arrangements.

The number of 'occupied dwellings' and the number of 'households' are therefore identical by definition.

The lack of a structural definition of a dwelling is not considered a significant disadvantage in Australia as the majority of households do in fact each occupy one distinct dwelling structure (i.e. a house or a self-contained flat).

Class of dwelling

Details of the numbers of each class of dwelling have been obtained from householder's statements made in accordance with the following instructions.

State below whether the dwelling is a—

Private house (including semi-detached and terrace house).

* Share of a private house.

† Self-contained flat (including home unit).

* Share of a flat.

Room(s), apartment or flat (not self-contained).

Shed, hut, caravan, tent, boat, etc.

Licensed hotel, motel, hostel, boarding house, institution, barracks, staff quarters, etc.

* Where a private house or flat is shared without structural subdivision by two or more household groups each householder should fill in a separate Householder's Schedule.

† 'Self-contained' means able to be completely closed off and with own cooking and bathing facilities.

Dwellings are classified as follows:

Private dwellings—private house
share of private house
self-contained flat
share of self-contained flat
tent, shed, hut, garage, caravan
other private dwellings

Non-private dwellings—licensed hotel
motel
boarding house
educational institution
religious institution
charitable institution
hospital
staff barracks, etc.

Where the class of dwelling was 'not stated' a class was allocated prior to tabulation on the basis of other information in the Householder's Schedule or answers given for neighbouring dwellings.

Persons not enumerated in dwellings

Persons, who on Census night were camping out, travelling on board ships in Australian waters, or ships which had left an Australian port prior to Census night with a next port of call in Australia, or were enumerated on long-distance trains, motor coaches or aircraft, are not regarded as living in a dwelling for census purposes. Persons classified as 'camping out' include those living temporarily (e.g. on holidays) in tents, caravans or houseboats, or who were 'camped out' on Census night. If a tent, caravan or houseboat constituted a semi-permanent dwelling it was classified as a dwelling and is included as such in this publication.

Number of inmates

The number of inmates of a dwelling relates to the number of persons actually enumerated in that dwelling (i.e. the number of persons who spent the night of 30 June 1966 in the dwelling, or who returned to or arrived at the dwelling on 1 July 1966, without having been counted elsewhere) and does not include persons who normally reside at that dwelling but spent Census night, and were enumerated, elsewhere.

Number of rooms

Each householder was asked to state the number of rooms in the dwelling in accordance with the following instructions.

> State below the number of rooms in this dwelling. Count all rooms (including permanently enclosed sleep-out) except bathroom, toilet, pantry, laundry or storeroom.
>
> **Note:** Rooms in non-attached buildings should be included only if used for living or sleeping purposes by members of this household. A combined living-dining room or combined kitchen-living or kitchen-dining room should be counted as one room.
>
> A shared kitchen or shared living room in a shared house should be included only by the owner or principal tenant.

The specific instructions relating to non-attached buildings were included at the 1961 Census but those relating to combined-usage rooms were introduced at the 1966 Census.

Where the number of rooms in a dwelling was not stated a number was allocated prior to tabulation, on the basis of the answer given for the geographically nearest dwelling of the same class except in the case of tents, sheds, huts, garages, caravans and houseboats, where allocation was made by the use of a series of random numbers. The random numbers, which ranged from 1 to 8 rooms, were based upon the distribution of the number of rooms recorded in these types of dwellings at the 1961 Census.

The number of cases for which number of rooms was not stated was relatively small.

Material of outer walls

At the 1966 Census each householder was asked to state the material of which the outer walls of the dwelling were built, in accordance with the following instructions.

> State below whether brick, brick veneer, fibro-cement, wood, stone, concrete, iron, or other material (please specify). If more than one material state the one most largely used.

In the small number of cases where the material of outer walls was not stated, a material was selected during the processing of the Householder's Schedules. Selection was based upon the answer given for the geographically nearest dwelling of the same class as the dwelling for which material of outer walls was not stated.

Nature of occupancy

At the 1966 Census each householder was asked to state the nature of occupancy of the dwelling according to the following instructions.

> Indicate the basis on which the dwelling is occupied (mark with a cross in the appropriate box)—
>
> Owner (including persons buying or paying off the dwelling) . . . . ☐
>
> Tenant or Subtenant
>
> of Government Authority . . . . . ☐
>
> of other Landlord . . . . . ☐
>
> Caretaker . . . . . ☐
>
> Other (please specify).....

Weekly rent

Each householder was asked to state the weekly rent of the dwelling in accordance with the following instructions.

> If rented, state weekly rent. Include any rates payable separately by the tenant or subtenant; e.g. sanitation, garbage or water rates (other than excess water, etc.).
>
> $ c
>
> Unfurnished
> (If so rented) . . . .
>
> Furnished
> (If so rented) . . . .

Facilities

At the 1966 Census each householder was asked to state the facilities installed in the dwelling according to the following instructions.

> State 'Yes' or 'No' whether the dwelling has the following facilities;
>
> (a) Gas (i) Mains.....
> (ii) Bottled.....
>
> (b) Electricity (i) Mains.....
> (ii) Home generated.....
>
> (c) Television Set.....
>
> (d) Kitchen * .....
>
> (e) Bathroom * .....
>
> * If shared with another household add 's'.

Data relating to kitchens and bathrooms were sought for office use only and have not been tabulated.

Dwellings for which electricity was not stated but which had television have been classified as having electricity and therefore included as such in this volume.

Number of motor vehicles

At the 1966 Census each householder was asked to state the number of motor vehicles at the dwelling in accordance with the following instructions.

> State below the number of motor vehicles (excluding motor cycles and scooters) used by members of this household that were garaged or parked at or near this dwelling for the night of Thursday, 30 June. If no motor vehicles, write 'NIL'.
>
> **Note:** This question need not be answered in respect of hotels, motels, boarding houses, hospitals and other institutions.

Unoccupied dwellings

For dwellings not occupied on the night of the Census, collectors were required to determine as many particulars as possible and to enter on the Schedule the reasons why the dwelling was unoccupied.

Unoccupied dwellings include vacant dwellings available for sale or renting; dwellings such as weekenders or holiday homes and seasonal workers' quarters which were not occupied on Census night; dwellings normally occupied but whose occupants were temporarily absent on the night of the Census; newly completed dwellings whose owners or tenants had not entered into occupation on Census night; dwellings described as 'to be demolished', 'condemned', 'exhibition home', etc. The total number of unoccupied dwellings does not, therefore, represent the number of vacant houses and flats available for sale or renting.

Individual Characteristics of Householders

Age

Persons were asked to state age in accordance with the following instructions.

> State age in years and completed months. If aged under one year, state age in completed months (for example, a child of eleven months should be shown as '0' years '11' months). If aged under one month, write '0' years '0' months.

This question is more specific that that asked at the 1961 Census, which sought 'age last birthday' (in years). The change should overcome some mis-statement of age due to rounding. Similarly, it is expected that confusion in the reporting of ages of young children (which are conventionally thought of in 'months' up to the age of about two years) should be now largely obviated.

Prior to the 1954 Census ages 'not stated' were tabulated as such for urban and rural sections of each State and later distributed to specific ages in accordance with the frequency of stated ages. In the 1954 and later Censuses, 'not stated' ages were individually estimated prior to tabulation by first establishing the minimum range of ages within which the 'not stated' age most probably lay (as indicated by other information supplied in the Householder's Schedule) and by then selecting an age from within that range from a table of random ages according to sex. This table had been compiled previously using the latest estimates of the age distribution of the population which were available at the time.

The proportion of persons who failed to state an age is very small.

Marital status

Persons were asked to state marital status in accordance with the following instructions.

> If never married, write 'N.M.'; at present married, write 'M'; married but permanently separated (legally or otherwise), write 'P.S.'; divorced and not remarried, write 'D'; widowed and not remarried, write 'W'.

A very small proportion of persons omitted to state any marital status. In such cases, marital status was assessed as follows.

Males under 20 years of age and females under 18 years of age were classified 'never married' unless there was definite evidence of marriage given in the Schedule, in which case they were classified 'married'. All other persons were classified 'married' if there was any evidence of marriage given in the Schedule. Otherwise a marital status was allocated from a random list according to the age and sex of the person concerned. The random list for the allocation of 'not stated' marital status had been compiled previously using the latest available statistics of the distribution of the population by marital status.

Education

At the 1966 Census persons were asked to state the highest level of schooling completed in accordance with the instructions below. This question had not been asked at previous censuses.

NEW SOUTH WALES

> For **each** person state the highest level of schooling completed.
> If passed at Leaving or Matriculation level, write 'M'. If passed at Intermediate level, write 'J'. If attended secondary school (e.g. high, technical, non-Government) but passed no examinations at Intermediate level or above, write 'H'. If attended or completed infants' or primary school or passed final primary examinations such as Qualifying Certificate (Q.C.), Merit or High School Entrance, write 'P'. If never attended school, write 'N'.

VICTORIA

> For **each** person state the highest level of schooling completed.
> If passed at Leaving or Matriculation level, write 'M'. If passed at Intermediate level, write 'J'. If attended secondary school (e.g. high, technical, non-Government) but passed no examinations at intermediate level or above, write 'H'. If attended or completed infants' or primary school or passed final primary examinations such as Qualifying Certificate (Q.C.), or Merit, write 'P'. If never attended school, write 'N'.

QUEENSLAND

For **each** person state the highest level of schooling completed.
If passed at Senior or Matriculation level, write 'M'. If passed at Junior level, write 'J'. If attended secondary school (e.g. high, technical, non-Government) but passed no examinations at Junior level or above, write 'H'. If attended or completed infants' or primary school or passed final primary examinations such as the Scholarships or High School Entrance, write 'P'. If never attended school, write 'N'.

SOUTH AUSTRALIA

For **each** person state the highest level of schooling completed.
If passed at Leaving or Leaving Honours level, write 'M'. If passed at Intermediate level, write 'J'. If attended secondary school (e.g. high, technical, non-Government) but passed no examinations at Intermediate level or above, write 'H'. If attended or completed infants' or primary school or passed final primary examination such as Qualifying Certificate (Q.C.), Progress Certificate or Inspectors' Examination, write 'P'. If never attended school, write 'N'.

WESTERN AUSTRALIA

For **each** person state the highest level of schooling completed.
If passed at Leaving or Matriculation level, write 'M'. If passed at Junior level, write 'J'. If attended secondary school (e.g. high, technical, non-Government, post primary) but passed no examinations at Junior level or above, write 'H'. If attended or completed infants' or primary school or passed final primary examinations such as Qualifying Certificate (Q.C.), or Scholarship, write 'P'. If never attended school, write 'N'.

TASMANIA

For **each** person state the highest level of schooling completed.
If passed at Matriculation or Schools Board (A and B certificate) level, write 'M'. If passed at Secondary School Certificate or Schools Board (C certificate) level, write 'J'. If attended secondary school (e.g., high, technical, non-Government) but passed no examinations at Secondary School Certificate level or above, write 'H'. If attended or completed infants' or primary school or passed final primary examinations such as Qualifying Certificate (Q.C.), Scholarship or Merit, write 'P'. If never attended school, write 'N'.

NORTHERN TERRITORY

For **each** person state the highest level of schooling completed.
If passed at Leaving, Matriculation, Senior or Schools Board (A and B certificate) level, write 'M'. If passed at Intermediate, Junior or Secondary School Certificate level, write 'J'. If attended secondary school (e.g. high, technical, non-Government, post primary) but passed no examination at Intermediate, etc., level or above, write 'H'. If attended or completed infants' or primary school or passed final primary examinations such as Qualifying Certificate (Q.C.), Merit, High School Entrance, Scholarship, etc., write 'P'. If never attended school, write 'N'.

AUSTRALIAN CAPITAL TERRITORY

For **each** person state the highest level of schooling completed.
If passed at Leaving, Matriculation, Senior or Schools Board (A and B certificate) level, write 'M'. If passed at Intermediate, Junior or Secondary School Certificate level, write 'J'. If attended secondary school (e.g. high, technical, non-Government, post primary) but passed no examination at Intermediate, etc., level or above, write 'H'. If attended or completed infants' or primary school or passed final primary examinations such as Qualifying Certificate (Q.C.), Merit, High School Entrance, Scholarship, etc., write 'P'. If never attended school, write 'N'.

Persons who received their highest level of schooling overseas, or in another Australian State or Territory were asked to give what they considered to be the equivalent in terms of the above categories.

It was intended that persons *attending* secondary school who had not passed examinations at Intermediate level should answer 'H'. However, this intention was obscured by the use of the past tense in the instruction, with the result that some secondary school students were either recorded as having attended primary school ('P') or the level of schooling was not stated.

To provide for this misunderstanding, all 12, 13 and 14 year olds shown as 'P' were redistributed as 'P' or 'H' in proportion with age distributions obtained from the Department of Education.

In the cases where education level was not stated for children aged 0–16 years the level was determined as follows. Children aged 0–11 years were classified 'never attended school' or 'primary' according to relevant information on the Schedule (particularly activity). Children aged 12–14 years were allocated in accordance with the proportion of children of each age in primary and secondary school as recorded by the Department of Education during the intercensal period. Children aged 15 or 16 years were classified 'secondary' where other information on the Schedule showed them to be still attending school.

Qualifications

In addition to the above, which relates to level of schooling, persons with qualifications received after completion of formal schooling were required to supply information in accordance with the following instructions.

State the person's qualifications, trade training or other qualifications and the institution at which obtained, e.g., Bachelor of Engineering, University of Sydney; Diploma of Architecture, South Australian Institute of Technology; A.A.S.A.; Certificate of Management, Hobart Technical College; Five years' Apprenticeship.

The information obtained was used to determine two additional levels of completed education, namely: University degree and other tertiary qualifications. Particulars of individual qualifications are not available.

Birthplace

Persons were asked to state birthplace in accordance with the following instructions.

> For persons born in Australia write name of the State or Territory where born. For persons born outside Australia write the name of the country where born (not town or locality).

For the small number of cases where no reply was given, the allocation of a birthplace was made in accordance with other information on the Schedule (usually nationality).

Period of residence in Australia

Persons were asked to state period of residence in Australia in accordance with the following instructions.

> For persons born outside Australia write the number of completed years of continuous residence in Australia ignoring absences of less than twelve months. If resident less than twelve months, write '0'.

Work force

At the 1961 and previous Censuses the work force was determined as:

'Those who are engaged in an industry, business, profession, trade or service at the time of the Census (including those on long service leave, etc.).....'; and

'.....those out of a job at time of the Census but who are usually engaged in an industry, business, profession, trade or service.....'

At the 1966 Census an additional set of four questions was asked in order to obtain information on the basis of which the work force could be determined more precisely. The *questions* were as follows.

> Did the person have a job or business of any kind last week (even though he may have been temporarily absent from it)? ANSWER 'YES' or 'NO'.
>
> Did the person do any work **at all** last week for payment or profit? ANSWER 'YES' or 'NO'. Persons working without pay as a helper in a 'family business' or farm and members of the clergy and of religious orders (other than purely contemplative orders) should answer 'YES' to this question. **Persons doing only unpaid housework should answer 'NO'.**
>
> Was the person temporarily laid off by his employer without pay for the **whole** of last week? ANSWER 'YES' or 'NO'.
>
> Did the person look for work last week? ANSWER 'YES' or 'NO'. (**Note:** 'Looking for work' means (i) being registered with Commonwealth Employment Service, or (ii) approaching prospective employers, or (iii) placing or answering advertisements, or (iv) writing letters of application, or (v) awaiting the result of recent applications.)

The work force includes all persons for whom the answer 'yes' was given to any one of these four questions. Except that persons helping but not receiving wages or a salary who usually worked less than 15 hours a week were excluded from the work force.

This approach conforms closely to the recommendations of the Eighth International Conference of Labour Statisticians held in Geneva in 1954 and the information so obtained has been used in determining the work force for the purposes of the 1966 Census.

The net effect of the new definition is to include approximately 74 and 1,200 additional persons in the work force in the Northern Territory and in the Australian Capital Territory respectively, i.e. a proportionate increase in the work force of the Northern Territory and the Australian Capital Territory of 0.39 and 2.72 per cent respectively. The major factor in this change was females working part-time (sometimes for only a few hours a week) some of whom, in 1961, did not consider themselves as '.....engaged in an industry, business, profession, trade or service'.

Occupation

Persons in the work force were asked to state occupation in accordance with the following instructions.

> State in precise (or award) terms the person's main occupation last week, using where possible two or more words. For example, '**Builder's** Labourer', '**Dairy** Farm Hand', '**Clothing** Machinist', '**Wood** Machinist', '**Motor** Mechanic', '**Electrical** Fitter', '**Coal** Wheeler', '**Dairy** Farmer', etc. Employees of Government Departments or Authorities should be described by their official designation, such as 'District Employment Officer', 'Shire Clerk', etc., and not by such terms as 'Public Servant', etc.

The precise classification of persons in the work force according to occupation and industry is extremely difficult but is subject to continuing efforts to improve the quality of the data from census to census. Consequently the comparison of data compiled at the 1966 Census with that obtained at previous censuses is not only influenced by changes in the definition and content of the work force but also by the different responses which may have been evoked by efforts to improve the questions on the census schedule, and by some changes in coding rules designed to rectify known deficiencies in the data. Classification according to occupation and industry is difficult mainly because of the problem of conveying through a printed form the exact nature of the information required (e.g. the conceptual difference between 'occupation' and 'industry') and the consequential inadequacy of many replies.

Classification according to occupation is particularly difficult because: (*a*) the range of occupations is so extensive; (*b*) there is a lack of uniformity in occupational terms, which vary between industries, locations and States; and (*c*) respondents fail to give precise descriptions, especially of other members of the family, either through carelessness or ignorance of occupational designations. Similarly, classification according to industry is complicated by the development of new fields of industrial enterprise and the splitting and overlapping of previously identifiable fields.

While it is not intended to revise any of the statistics relating to occupation and industry contained in this publication, it is proposed to undertake a detailed analysis of the information obtained at the 1966 Census to evaluate the precision of the data and as an aid to the framing of classifications and the wording of instructions for the next census.

Delimitation of urban centres

The principles and criteria used for the delimination of urban centres in Australia at the 1966 Census were as follows:

A boundary was defined for all settlements with a population of 1,000 or more and these were named 'urban centres' except for the State capitals and Canberra which were named 'Metropolitan areas'. This boundary is one which, from census to census, as urbanisation proceeds, will be moved outwards to encompass any peripheral urban development.

For urban centres with a population of 30,000 and over and for a few smaller centres, the following criteria were adopted for delimiting the urban centres.

(*a*) The Metropolitan Area or urban centre was delimited by including all contiguous census collector's districts with a population density of 500 or more persons per square mile.

(*b*) Certain collector's districts, although not reaching the required population density, were also included by virtue of—

(i) land use (e.g. factory areas),

(ii) being surrounded by urban collector's districts,

(iii) forming a 'bridge' between two urban centres less than two miles apart so that they could be regarded as one single urban centre.

For urban centres of less than 30,000 population, local government area boundaries were adopted, unless they contained a large rural component or urban development was known to extend beyond the local government boundary. In these cases they were delimited by inspection of aerial photographs, by field inspection, or by consideration of any other information available, and the boundaries were set as closely as possible to the periphery of the built-up area without regard to local government boundaries.

In areas with large numbers of holiday homes, many of which are unoccupied at the mid-winter census date, dwelling rather than population criteria were used. These criteria were 250 dwellings (in lieu of the 1,000 population mentioned above) and 125 dwellings per square mile (in lieu of the 500 persons per square mile mentioned above). Around each metropolitan area and urban centre with a population of at least 75,000 and a regional population of at least 100,000, a further boundary was defined, designed to circumscribe an area which would contain the urban development of that centre for at least twenty years and which would generally be socially and economically oriented to the centre. These areas were designated 'Statistical Divisions' (for State capital cities) or 'Statistical Districts' (for Canberra, Newcastle, Wollongong and Geelong).

Because the new criteria for the delimitation of urban boundaries were adopted only shortly prior to the 1966 Census a few collector's districts containing urban growth were not split into their rural and (potentially) urban components, with the result that significant urban population remained included in large, predominantly rural, collector's districts, which did not meet the density criterion. Such cases occurred mainly around the Sydney Metropolitan Area and Urban Toowoomba. The effect on the Sydney Metropolitan Area is small, probably not more than 5,000 urban population having been omitted. In Toowoomba the effect is proportionately much greater, the urban population probably being understated by up to 3,000 persons.

Migratory population

The migratory population consists of persons who, at midnight between 30 June 1966 and 1 July 1966, were enumerated on board ships in Australian ports, or ships which had left an Australian port prior to census night with a next port of call in Australia. It also includes persons enumerated on long-distance trains, motor coaches or aircraft.

Aborigines

Tables in this Volume exclude persons who described themselves as being more than 50 per cent Aboriginal or who described themselves as being 'Aboriginal'. Dwellings occupied solely by such persons are also excluded.

Diplomatic dwellings

Persons having diplomatic immunity (diplomatic and home-based staff of diplomatic missions, and their families) are not included. Dwellings occupied by persons having diplomatic immunity have also been excluded.

Note

(1) Although careful efforts are made to keep errors in a census to a minimum, the large and complex task of processing the data may result in minor discrepancies between tabulations produced at different stages of the programme. Because of the complexity of processing, and the fact that tabulations are produced progressively, it is frequently not practicable to rectify such small discrepancies. Consequently, some differences may be evident between tables included in a particular census publication, as well as between a particular publication and previous publications. In all such cases the differences are small (generally no more than 0.02 per cent) and in no way affect the general validity of the data.

(2) Any discrepancies between totals and sums of components in tables showing percentages are due to rounding.
