KEY POINTS

BALANCE ON GOODS AND SERVICES

- In trend terms, *the balance on goods and services* was a deficit of \$400m in July 2012, a fall of \$106m (21%) on the deficit in June 2012.
- In seasonally adjusted terms, the *balance on goods and services* was a deficit of \$556m in July 2012, a rise of \$329m (145%) on the deficit in June 2012.

CREDITS (EXPORTS OF GOODS & SERVICES)

 In seasonally adjusted terms, goods and services credits fell \$728m (3%) to \$25,757m. Non-monetary gold fell \$420m (25%), non-rural goods fell \$244m (1%) and rural goods fell \$81m (3%). Net exports of goods under merchanting rose \$5m (23%). Services credits rose \$12m.

DEBITS (IMPORTS OF GOODS & SERVICES)

In seasonally adjusted terms, goods and services debits fell \$399m (1%) to \$26,313m.
 Capital goods fell \$495m (8%). *Intermediate and other merchandise goods* rose \$102m (1%), *consumption goods* rose \$13m and *non-monetary gold* rose \$2m.
 Services debits fell \$20m.

INQUIRIES

For further information contact Selvi Sekhar on Canberra (02) 6252 5540 for Goods, and Lee Taylor on Canberra (02) 6252 6377 for Services.

REVISIONS

REVISIONS

Goods and services debits data, on a balance of payments basis, have been revised to align with the data published in the June quarter 2012 issues of *Balance of Payments and International Investment Position, Australia* (cat. no. 5302.0) and *Australian National Accounts: National Income, Expenditure and Product* (cat. no. 5206.0). Revisions have been applied to the following components:

- capital goods n.e.s. component of goods debits, revised back to January 2012
- legal, accounting, management consulting, public relations and other professional services component of services debits, revised back to October 2011
- architectural, engineering and other technical services component of services debits, revised back to April 2012
- waste treatment and de-pollution, agricultural and mining services component of services debits, revised back to October 2011.

No other components in the balance of payments series have been revised.

Table 17 summarises revisions to goods and services on a balance of payments basis, in original current price terms, since the last issue of this publication. In original terms, the revisions have decreased the surplus on goods and services for 2011–12 by \$791m.

CHANGES IN THIS ISSUE

IMPROVEMENT TO SEASONAL ADJUSTMENT OF CURRENT PRICE VALUE COAL SERIES

An improvement has been applied to both the monthly and quarterly 'coal, coke and briquettes' current price value series (seasonally adjusted). For the quarterly series (included in *Balance of Payments and International Investment Position, Australia* (cat. no. 5302.0)), from July 2005 onwards, seasonal factors used to construct the corresponding chain volume series have been applied to the current price coal estimates in original terms to derive the seasonally adjusted series. Although chain volume measures are not available on a monthly basis, a similar method is being used to create the monthly current price value seasonally adjusted series. As a result of this methodological improvement, trend break corrections previously applied to the 'coal, coke and briquettes' trend series have been removed. A length–of–month adjustment continues to be applied to seasonally adjust the 'coal, coke and briquettes' component prior to July 2005. This change in methodology will be closely monitored as part of an ongoing improvement program.

UPDATES TO THE MAJOR COMMODITIES LISTING

Tables 12 and 13 of this publication present the major commodities for international merchandise trade exports (table 12) and imports (table 13). As part of an annual review, the major commodities for the last 12 months are identified and the lists updated as appropriate. There were no changes required for the major commodities exports listing (table 12).

In table 13, International merchandise imports major commodities:

• 625 Rubber tyres, treads, flaps and inner tubes for wheels

replaces:

761 Televisions, monitors and projectors.

CHANGE TO DATA ITEM DESCRIPTION FOR STANDARD INTERNATIONAL TRADE CLASSIFICATION (SITC) CODE 289

The data item description of SITC code 289 has been changed from 'Ores and concentrates of precious metals and waste, scrap and sweepings of precious metals (excl. of gold)' to 'Ores and concentrates of precious metals; waste, scrap and sweepings of precious metals (excl. of gold)'. This is to clarify that gold ores and concentrates are included in SITC 289. Waste, scrap and sweepings of gold are included in SITC 971, 'Gold, non–monetary (excl. gold ores and concentrates)'. This will only impact the data item description for the detailed data available from the Information and Referral Service and the data presented in the following Time Series Spreadsheets available on the ABS website with this publication:

- Series ID: A1828438R Table 12b MERCHANDISE EXPORTS, Standard International Trade Classification (3 digit), FOB Value; and
- Series ID: A1828796R Table 13b MERCHANDISE IMPORTS, Standard International Trade Classification (3 digit), Customs Value.

CHANGES IN THIS ISSUE continued

AUSTRALIAN HARMONIZED EXPORT COMMODITY CLASSIFICATION (AHECC) CODES FOR 1 JULY 2012

The ABS implements minor updates to the statistical codes of the AHECC on 1 January and 1 July each year. There are no changes to AHECC codes for 1 July 2012.

AUSTRALIAN CUSTOMS TARIFF CODES FOR 1 JULY 2012

On 1 July 2012, there were changes to statistical codes under subheadings 0406.40.10, 8443.31.00, 8443.32.00, 8471.30.00, 8471.60.00 and 8528.72.00 in the Customs Tariff, which can be found on the Australian Customs and Border Protection website at *http://www.customs.gov.au/tariff/tariff2012.asp.*

A list of the new codes and their correspondences to previous codes can be found on the Australian Customs and Border Protection Notice No. 2012/31 which was released on 25 June 2012. The notice can be found on the Australian Customs and Border Protection website *http://www.customs.gov.au*. From the menu select *media, publications and forms* and then *customs notices*, then select the link *Australian Customs Notices* and follow the link *2012/31*. Alternatively you can access this notice directly through the following link *http://www.customs.gov.au/notices/acn/default.asp*.

Separate statistical codes for Roquefort and Stilton cheeses in Chapter 4 have been introduced to support food inspection requirements of the Department of Agriculture, Fisheries and Forestry.

The changes to the statistical codes for Chapters 84 and 85 facilitate the clearer identification of multifunction devices, laptops / other portable computers, scanners and televisions and will assist in the administration of the National Television and Computer Recycling Scheme (Product Stewardship (Televisions and Computers) Regulations 2011). The Department of Sustainability, Environment, Water, Population and Communities is responsible for providing regulatory oversight of the Scheme. CHANGES IN THIS ISSUE continued

.

AMENDMENTS TO EXISTING CUSTOMS TARIFF CODE CORRESPONDENCES

Changes have been made to Customs Tariff correspondences. These changes rectify errors in the correspondences published in the *Information paper: Changes to AHECC and Customs Tariff, 2012* (cat. no. 5368.0.55.017) released on 8 December 2011.

The following are the correct correspondences for the Customs Tariff 2012 codes commencing with 8523.29.00.

There were changes to the free standing descriptors for the following codes: 7210300050, 7210300051, 7210300052, 7210610060, 7210610061 and 7210610062.

A full correspondence is available from the Classification Manager, International Trade.

Email: *international.trade@abs.gov.au* alternatively phone: (02) 6252 5409 or fax: (02) 6252 8003.

CHANGES IN THIS ISSUE continued

These changes also impact correspondences to ANZSIC 2006 and BoPBEC classifications for the following codes. SITC and BEC correspondences are not impacted.

		CURRENT CORRESP	ONDENCE	REVISED CORRESPONDENCE				
	Customs Tariff code	ANZSIC 2006	BoPBEC	ANZSIC 2006	BoPBEC			
	8523290081	2429	CE04	2429	CE04			
	8523290082	2429	CE04	2429	CE04			
	8523290083	1620	CE05	2429	CE04			
	8523290084	1620	CE05	2429	CE04			
	8523290085	1620	CE05	2429	CE04			
	8523290086	2429	CE04	1620	CE05			
	8523290087	2429	CE04	1620	CE05			
	8523290088	2429	CE04	1620	CE05			
•								

These changes will result in the ANZSIC 2006 and BoPBEC series being revised back to January 2012. The revisions will be reflected in the following time series released with this issue:

- Table 34 Merchandise imports by Balance of Payments Broad Economic Categories (BoPBEC)
- Table 35a Merchandise imports, Industry (ANZSIC 2006), Customs Value from July 2005 onward.

CHANGES IN FORTHCOMING ISSUES

SEASONALLY ADJUSTED AND TREND ESTIMATES

The seasonally adjusted and trend estimates of goods and services on a balance of payments basis will be reviewed in the August 2012 issue of this publication as a result of the annual seasonal re–analysis. This re–analysis reviews the seasonal and trading day factors and assesses the appropriateness of any prior corrections.

COMMODITY VALUE ADJUSTMENT

VALUE ADJUSTMENTS	International merchandise trade exports data (on an international merchandise trade
	basis) presented in tables 12–15 of this publication are based on information provided by
	exporters to the Australian Customs and Border Protection Service (Customs and Border
	Protection). At the time of initial reporting to Customs and Border Protection estimated
	quantity and unit price information may be reported for commodities such as iron ore
	and coal. Final quantity and unit price information are updated progressively in
	merchandise trade data as exporters revise the information provided to Customs and
	Border Protection. When additional information on quantity and unit price for these
	commodities are available, the ABS may adjust the balance of payments series to
	minimise future revisions.
Goods credits	Iron ore and coal (in original terms)
	 a negative \$250m adjustment has been applied to the 'metal ores and minerals'
	component for July 2012. A previous adjustment of negative \$150m applied to
	June 2012 remains.
	no adjustment has been made to the 'coal, coke and briquettes' component for
	July 2012.
Goods debits	Capital expenditure
	 the balance of payments goods debits component 'capital goods n.e.s.' includes an
	estimate of expenditure on capital goods that have changed ownership but have not
	yet crossed the customs frontier.

TIME SERIES DATA

TIME SERIES DATA	Tables 1 to 16 of this publication are available free on the ABS website <i><http: www.abs.gov.au=""></http:></i> from the 'Downloads' tab of this issue with longer time series. A number of these tables present more detailed breakdowns than included in the publication. A number of additional tables are available free on the ABS website.
Tables with more detailed	11a Services credits: Original – Quarter ¹
breakdowns:	11b Services debits: Original – Quarter ¹
	12b Merchandise exports by Standard International Trade Classification (3 digit), FOB Value

TIME SERIES DATA continued

TRADE IN SERVICES DATA CUBES	Trade in services data cubes are usually updated on an annual basis. Calendar year (cat. no. 5368.0.55.004) statistics are updated following the March issue of this publication and financial year (cat. no. 5368.0.55.003) statistics are updated following the September issue of this publication.
	The following tables were included in the calendar and financial year data cubes:
	1 International trade in services, credits, state by year
	2 International trade in services, credits, year by state
	3 International trade in services, debits, state by year
	4 International trade in services, debits, year by state
	5 International trade in services, credits, year by country and service
	6 International trade in services, credits, service by year and by country
	7 International trade in services, debits, year by country and service
	8 International trade in services, debits, service by year and by country
	9 International trade in services, credits, year by country and travel service
	10 International trade in services, debits, year by country and travel service
	11 International trade in services, credits, education related travel, by educational sector, by type of expenditure by year.

ANALYSIS AND COMMENTS

BALANCE ON GOODS AND Services	In trend terms, the balance on goods and services was a deficit of \$400m in July 2012, a fall of \$106m (21%) on the deficit in June 2012.
	In seasonally adjusted terms, the balance on goods and services was a deficit of \$556m in July 2012, a rise of \$329m (145%) on the deficit in June 2012.
EXPORTS OF GOODS AND SERVICES	Between June and July 2012, the trend estimate of goods and services credits rose \$206m (1%) to \$26,352m.
	In seasonally adjusted terms, goods and services credits fell \$728m (3%) to \$25,757m. Non–monetary gold fell \$420m (25%), non–rural goods fell \$244m (1%) and rural goods fell \$81m (3%). Net exports of goods under merchanting rose \$5m (23%). Services credits rose \$12m.
Exports of goods	GOODS CREDITS

(a) Trend breaks have been applied to April 2009 and April 2010.

RURAL GOODS

In trend terms, exports of rural goods rose \$61m (2%) to \$3,014m.

In seasonally adjusted terms, exports of rural goods fell \$81m (3%) to \$2,985m.

The main component contributing to the fall in seasonally adjusted estimates was other rural, down \$78m (6%).

NON-RURAL GOODS

In trend terms, exports of non-rural goods rose \$58m to \$17,483m.

In seasonally adjusted terms, exports of non-rural goods fell \$244m (1%) to \$17,143m.

The main components contributing to the fall in seasonally adjusted estimates were:

- metal ores and minerals, down \$181m (3%)
- other non-rural (incl. sugar and beverages), down \$151m (14%).

Partly offsetting these falls were:

- transport equipment, up \$42m (12%)
- other mineral fuels, up \$41m (2%).

For price and volume details, see the Selected commodities section on page 16.

Exports of goods continued NET EXPORTS OF GOODS UNDER MERCHANTING

In trend terms, net exports of goods under merchanting rose \$2m (9%) to \$24m.

In seasonally adjusted terms, net exports of goods under merchanting rose \$5m (23%) to \$27m.

NON-MONETARY GOLD

In trend terms, exports of non-monetary gold rose \$79m (5%) to \$1,516m.

In original and seasonally adjusted terms, exports of non-monetary gold fell \$420m (25%) to \$1,283m.

Exports of services

SERVICES CREDITS

In trend terms, services credits rose \$7m to \$4,315m.

In seasonally adjusted terms, services credits rose \$12m to \$4,319m.

The main component contributing to the rise in seasonally adjusted estimates was travel, up \$24m (1%).

In seasonally adjusted terms, tourism related services credits rose \$23m (1%) to \$2,798m.

ANALYSIS AND COMMENTS continued

IMPORTS OF GOODS AND SERVICES

Between June and July 2012, the trend estimate of goods and services debits rose \$100m to \$26,752m.

In seasonally adjusted terms, goods and services debits fell \$399m (1%) to \$26,313m. Capital goods fell \$495m (8%). Intermediate and other merchandise goods rose \$102m (1%), consumption goods rose \$13m and non–monetary gold rose \$2m. Services debits fell \$20m.

Imports of goods

GOODS DEBITS

(a) A trend break has been applied to December 2008, January 2011 and July 2011.

CONSUMPTION GOODS

In trend terms, imports of consumption goods rose \$6m to \$5,657m.

In seasonally adjusted terms, imports of consumption goods rose \$13m to \$5,623m.

The main components contributing to the rise in seasonally adjusted estimates were:

- textiles, clothing and footwear, up \$42m (6%)
- toys, books and leisure goods, up \$41m (14%).

Partly offsetting these rises was the non-industrial transport equipment component, down \$83m (5%).

CAPITAL GOODS

In trend terms, imports of capital goods rose \$63m (1%) to \$6,295m.

In seasonally adjusted terms, imports of capital goods fell \$495m (8%) to \$6,026m.

The main components contributing to the fall in seasonally adjusted estimates were:

- industrial transport equipment n.e.s., down \$169m (18%)
- civil aircraft and confidentialised items, down \$89m (14%)
- ADP equipment, down \$86m (11%).

Imports of goods continued INTERMEDIATE AND OTHER MERCHANDISE GOODS In trend terms, imports of intermediate and other merchandise goods rose \$25m to \$9,293m.

In seasonally adjusted terms, imports of intermediate and other merchandise goods rose \$102m (1%) to \$9,168m.

The main component contributing to the rise in seasonally adjusted estimates was fuels and lubricants, up \$223m (8%). This follows a fall of \$729m (20%) between May and June 2012.

Partly offsetting this rise was the processed industrial supplies n.e.s. component, down \$96m (5%).

NON-MONETARY GOLD

In trend terms, imports of non-monetary gold rose \$11m (2%) to \$509m.

In original and seasonally adjusted terms, imports of non-monetary gold rose \$2m to \$531m.

Imports of services

SERVICES DEBITS

In trend terms, services debits fell \$5m to \$4,998m.

In seasonally adjusted terms, services debits fell \$20m to \$4,965m.

The main components contributing to the fall in seasonally adjusted estimates were:

- transport, down \$57m (4%), with passenger transport down \$38m (7%)
- travel, down \$54m (3%)
- maintenance and repair services n.i.e., down \$19m (45%).

Partly offsetting these falls was the other services component, up \$110m (7%).

In seasonally adjusted terms, tourism related services debits fell \$93m (4%) to \$2,490m.

(a) Data in this table are on a revised international merchandise trade basis and exclude value adjustments applied to balance of payments series.

On an international merchandise trade basis, in original terms (noting the footnote in the above table), between June and July 2012 large value movements were recorded for the following selected commodities:

Iron ore lump rose \$47m (4%) with quantities up 6% and unit values down 2%. Exports to:

- China rose \$90m (12%), quantities up 15% and unit values down 2%
- Republic of Korea fell \$35m (26%), with quantities down 25% and unit values down 1%.

Iron ore fines fell \$42m (1%) with quantities up 4% and unit values down 5%. Exports to:

- China rose \$54m (2%), with quantities up 8% and unit values down 6%
- Taiwan fell \$43m (47%), with quantities down 44% and unit values down 5%.

Hard coking coal fell \$383m (24%) with quantities down 22% and unit values down 2%. Exports to:

- Taiwan fell \$132m (92%) driven by quantities
- Republic of Korea fell \$84m (52%), with quantities down 51% and unit values down 1%
- China fell \$81m (100%), driven by quantities.

Selected commodities continued

Semi–soft coal rose \$19m (3%) with quantities up 7% and unit values down 3%. Exports to:

- China fell \$53m (31%), with quantities down 28% and unit values down 4%
- India rose \$17m (26%), with quantities up 23% and unit values up 3%.

Thermal coal rose \$122m (9%) with quantities up 13% and unit values down 4%. Exports to:

- China fell \$143m (37%), with quantities down 32% and unit values down 6%
- Republic of Korea rose \$125m (86%), with quantities up 100% and unit values down 7%
- Japan rose \$63m (9%), with quantities up 14% and unit values down 4%.

(a) For all time periods, estimates for sugar, sugar preparations and honey are included in Other non-rural.

(b) From July 1971 to June 2005, only a length–of–month adjustment has been applied to this component. From July 2005, this component is seasonally adjusted using seasonal factors derived from a monthly volume series.

(c) In using these seasonally adjusted series, care should be exercised because of the difficulties associated with reliably estimating the seasonal pattern.

(d) This component is not seasonally adjusted.

.

(a) This table is presented consistent with BPM6 sign conventions. This means for the balance on goods and services a negative revision indicates a decrease in a surplus or an increase in a deficit. For debits a negative revision indicates an increase in debits while a positive revision indicates a decrease in debits.

EXPLANATORY NOTES

INTRODUCTION

1 This publication presents preliminary estimates of Australia's international trade in goods and services on a balance of payments basis (tables 1–11 and 17) and merchandise import and export statistics on an international merchandise trade basis (tables 12–15). In addition, table 16 Exchange rates and trade–weighted indexes (TWI) are derived by using exchange rates and indexes provided by the Reserve Bank of Australia (RBA). As of December 2011 the RBA has changed the methodology for compiling the TWI to include both merchandise and services trade, rather than merchandise trade only. This takes advantage of country–level services trade data that have been published by the Australian Bureau of Statistics (ABS).

2 Merchandise trade statistics on an international merchandise trade basis are compiled from information submitted by exporters and importers or their agents to the Australian Customs and Border Protection Service (Customs and Border Protection). Adjustments for coverage, timing and valuation are made to international merchandise trade data to convert them to a balance of payments basis. The services data are sourced from the quarterly Survey of International Trade in Services and a range of administrative data and indicator series.

3 More comprehensive quarterly estimates of Australia's trade in goods and services, together with comprehensive details of Australia's balance of payments are included in the quarterly publication, *Balance of Payments and International Investment Position, Australia* (cat. no. 5302.0). Detailed monthly statistics on merchandise trade are available in Time Series Spreadsheets on the ABS website or by subscription to tailored services. More information on the *International Trade in Services by Country, by State and by Detailed Services Category* are available on a financial year basis (cat. no. 5368.0.55.003) following the September issue of this publication and calendar year basis (cat. no. 5368.0.55.004) following the March issue of this publication.

CONCEPTS, SOURCES AND **4** Can

4 The conceptual framework used in compiling Australia's merchandise trade statistics can be found in *International Merchandise Trade, Australia: Concepts, Sources and Methods, 2001* (cat. no. 5489.0).

5 The conceptual framework used in compiling Australia's balance of payments statistics is based on the International Monetary Fund's *Balance of Payments and International Investment Position Manual, Sixth Edition* (BPM6). Descriptions of the underlying concepts and structure of the balance of payments and the sources, methods and terms used in compiling estimates are presented in the publication *Balance of Payments and International Investment Position, Australia: Concepts, Sources and Methods, 1998* (cat. no. 5331.0). This version reflects the international standards prior to BPM6 and is currently being revised. The first part of the revised document was released on 8 March 2011, featuring only the Goods Account. Other components will be released as they become available. Further information on the key changes introduced with BPM6 can be found in the *Information paper: Implementation of new international statistical standards in the ABS National and International Accounts, September 2009* (cat. no. 5310.0.55.002).

6 To bring merchandise trade statistics on an international merchandise trade basis to a balance of payments basis, timing adjustments are made to ensure that the transaction is recorded in the period in which ownership changed, rather than in the period in which the transaction was recorded by Customs and Border Protection or the period in which the goods arrived in/departed from an Australian port. Adjustments are also made to account for the change of ownership of goods not included in merchandise trade statistics. Chapter 6 of cat. no. 5331.0 provides more detail on the relationship between statistics on an international merchandise trade basis and on a balance of payments basis.

CONCEPTS, SOURCES AND METHODS <i>continued</i>	7 International merchandise trade exports data presented for recent months in tables 12–15 of this publication are based on information initially reported by exporters to Customs and Border Protection. At the time of initial reporting to Customs and Border Protection the final prices may not be known for some commodities. Therefore, the information recorded for recent months for commodities like iron ore and coal can include a variety of prices including previous or current contract prices and the prevailing spot prices. Newly negotiated contract prices may not be fully reflected in the data first reported to Customs and Border Protection, and to compensate for this, the balance of payments series may reflect adjusted price levels.
	8 The Concepts, Sources and Methods publications and information papers are available to download for free from the ABS website. Select <i>Statistics</i> , then select <i>By Catalogue Number</i> , and then the catalogue numbers as above.
CLASSIFICATIONS	 9 The merchandise trade data on an international merchandise trade basis are presented using the following commodity classifications: the Harmonized System 2012 (available on request) the Standard International Trade Classification (SITC Revision 4) the Classification by Broad Economic Categories (BEC) the industry classification: Australian and New Zealand Standard Industrial Classification, 2006 (ANZSIC 06) from July 2005.
	 10 The balance of payments 'goods and services' series are presented according to three classifications with the goods classifications derived from SITC Revision 4 and BEC. The classifications are: for goods: the Balance of Payments Commodities for Exports (BoPCE) the Balance of Payments Broad Economic Categories (BoPBEC) for Imports for services: the Extended Balance of Payments Services Classification (EBOPS).
ACCURACY, RELIABILITY AND REVISIONS	11 While every effort is made to ensure the accuracy and reliability of estimates, most series are subject to revision as more complete and accurate information becomes available. Care should be exercised in the use and interpretation of estimates in this publication. The transactions occurring in international trade in goods and services are of many different kinds, and therefore the compilation of trade estimates entails the use of a very wide range of statistical data of varying degrees of accuracy and timeliness. For further information on the monthly services series, see paragraph 25.
	12 The revisions are applied differently for merchandise trade and balance of payments series. Each month, merchandise trade data are revised for the previous six months to incorporate latest available data.
	13 For the balance of payments 'goods and services' series, in original terms, revisions are not usually applied in the July, October, January or April issues. This is to ensure the monthly series align with the comparable series in the <i>Balance of Payments and International Investment Position, Australia</i> (cat. no. 5302.0). In the September issue revisions can be applied to the four previous financial years. In other issues revisions can be applied to the previous and current financial years to incorporate the latest available survey and administrative data.
	14 In seasonally adjusted and trend terms, revisions may occur at any time point but tend to focus on the most recent estimates. Please also refer to paragraphs 17 (seasonal adjustment) and 19 (trend estimates) below.

SIGN CONVENTION	15 In keeping with BPM6 conventions, balance of payments basis credit entries are shown with an implied positive sign and debit items are shown as negative entries. For statistics on an international merchandise trade basis, both imports and exports are shown without sign. The calculation of percentage changes on balance of payments debit items are made without regard to sign. References to balance of payments debit items in Key Figures, Key Points, and Analysis and Comments are also made without regard to sign.	
SEASONALLY ADJUSTED AND TREND ESTIMATES	16 The estimates of international trade in goods and services on a balance of payments basis are seasonally adjusted, however the merchandise exports and imports statistics on an international merchandise trade basis are not. Monthly original estimates are volatile, being subject to calendar–related and large irregular influences. Seasonally adjusted estimates are derived by estimating and removing from the original series systematic	

estimates are derived by estimating and removing from the original series systematic calendar related effects, such as seasonal (e.g. Christmas), trading day and moving holiday (e.g. Easter) influences. Seasonal adjustment does not aim to remove the irregular or non–seasonal influences which may be present in any particular month. These irregular influences may reflect both random economic events and difficulties of statistical recording.

17 The seasonally adjusted statistics in this publication use the concurrent seasonal adjustment technique and Autoregressive Integrated Moving Average (ARIMA) modelling to estimate factors for the current and previous months. Under concurrent seasonal adjustment, the estimates of seasonal factors are fine tuned as new or revised original estimates become available each period. The seasonally adjusted estimates are subject to revisions at each reference month as the estimates of seasonal factors are improved.

18 ARIMA modelling relies on the characteristics of the series being analysed to project future period data. ARIMA modelling is used on a case–by–case basis where it results in reduced revisions to seasonally adjusted series when subsequent data becomes available. The projected values are temporary, intermediate values, that are only used internally to improve the estimation of the seasonal factors. The projected data do not affect the original estimates and are discarded at the end of the seasonal adjustment process. The ARIMA model is assessed as part of the annual review and, following the 2011 annual review, the majority of directly seasonally adjusted trade in goods and services time series use an ARIMA model.

19 The month–to–month movements of the seasonally adjusted estimates may not be reliable indicators of underlying behaviour because they include irregular or non–seasonal movements. Trend estimates reduce the effect of these movements as they are derived by applying a 13–term Henderson moving average to the seasonally adjusted series. The 13–term Henderson moving average (like all Henderson averages) is symmetric, but as the end of a time series is approached, asymmetric forms of the average are applied. While the asymmetric weights enable trend estimates for recent months to be produced, it does result in revisions to the estimates for the most recent six months as additional observations become available. Revisions to trend estimates can also occur because of revisions to the original data and as a result of the re–estimation of the seasonal factors. Trend estimates should be used with caution, especially around the time of unusual influences, until these have been appropriately taken into account.

20 Information papers and articles on time series methods are available on the ABS website:

 for seasonal adjustment methods, see Information Paper: An Introductory Course on Time Series Analysis, Jan 2005 (cat. no. 1346.0.55.001) and Time Series Analysis Frequently Asked Questions, 2003 (cat. no. 1346.0.55.002)

SEASONALLY ADJUSTED AND TREND ESTIMATES continued	 for ARIMA modelling, see <i>Feature article: Use of ARIMA modelling to reduce revisions</i> in the October 2004 issue of <i>Australian Economic Indicators</i> (cat. no. 1350.0) for trend estimates methods, see <i>Information Paper: A Guide to Interpreting Time Series – Monitoring Trends</i> (cat. no. 1349.0) alternatively contact the Assistant Director, Time Series Analysis on (02) 6252 6345 or e-mail: <i>time.series.analysis@abs.gov.au</i>. 		
ECONOMIC TERRITORY	 21 In accordance with BPM6 definitions, Australia's economic territory, on a balance of payments basis, is the area under the effective control of the Australian government. It includes the land area, airspace, territorial waters, including jurisdiction over fishing rights and rights to fuels and minerals. Australian economic territory also includes territorial enclaves in the rest of the world. These are clearly demarcated areas of land, located in other countries and which are owned or rented by the Australian government for diplomatic, military, scientific or other purposes. Specifically, the economic territory of Australia consists of: Geographic Australia which includes Cocos (Keeling) Islands and Christmas Island; Norfolk Island; Australian Antarctic Territory; Heard Island and McDonald Islands; Coral Sea Islands; Australia's territorial enclaves overseas; and the Joint Petroleum Development Area (joint territory between Australia and East Timor (Timor-Leste)). 		
	22 Because of administrative complexities and measurement difficulties, Norfolk Island transactions with the rest of the world will not always be captured in all relevant balance of payments statistics. Most of the transactions involving Norfolk Island are not material to Australia's trade performance and not capturing these transactions will not distort these statistics. However, any significant transactions will be identified and included in the relevant statistics.		
COMMODITY BREAKDOWN OF GOODS	23 For details of the classifications used to present goods exports (credits) and imports (debits) on a balance of payments basis, see tables 6.6 and 6.7, respectively, in <i>Balance of Payments and International Investment Position, Australia: Concepts, Sources and Methods</i> (cat. no. 5331.0).		
	24 The international merchandise trade statistics shown in tables 12 and 13 are classified by the Standard International Trade Classification (SITC). Imports and exports of goods at a more detailed level are available from the time series spreadsheets on the ABS website. All data from July 2005 are presented according to SITC Rev 4 and data prior to July 2005 are presented according to SITC Rev 3. For details refer to the 'Classifications and Standards Update' in the July 2008 issue of this publication.		
MONTHLY SERVICES SERIES	25 Monthly indicators for many of the services components that are only surveyed quarterly are not available. Monthly estimates for the freight and other transportation components of services credits in table 9 are derived by dividing the quarterly estimate by three. Freight debits are derived directly from imports data for the reference month as a difference between total merchandise cost, insurance and freight (CIF) and free on board (FOB), adjusted to reflect timing and processing adjustments. For freight credits and other transportation credits and debits, estimates are derived by extrapolating the last quarter's data by an average of movements for the same quarter over the three previous years, and then dividing the estimate by three. Similarly other services estimates are derived by extrapolating the last quarter's data by an average of movements for the same quarter over the previous three years, and then dividing the estimate by three.		

CONFIDENTIALITY OF
MERCHANDISE TRADE
STATISTICS

26 The release of statistics for certain merchandise trade commodities is restricted in order to prevent the identification of the activities of an individual business, where this is requested by the business concerned. These restrictions do not affect the total value of exports and imports, but they can affect statistics at the country, state and commodity levels. Imports data that have the confidentiality restrictions 'No commodity details' or 'No value details' are aggregated into a single confidential commodity code. For data prior to September 2008, these data are added back into the appropriate state total and country total (i.e. these totals show the correct level of trade). From September 2008 these confidential data are not added back. Instead the confidential data are published as 'No country details' in the country totals and 'State not available for publication' in the state totals. Therefore, country and state totals from September 2008 may not represent the actual amount of trade in each country/state but only the trade in commodities without a 'No commodity details' or 'No value details' restriction. For information on the confidentiality restrictions applied to the merchandise trade statistics in this publication, refer to the current issue of International Merchandise Trade: Confidential Commodities List (CCL) (cat. no. 5372.0.55.001).

TOURISM RELATED SERVICES 27 The tourism related services memorandum items provide timely indicators of the movements in tourism related activities, not an absolute measure of the level of these activities. The tourism related indicator has been derived by combining total travel services (business, education–related and other personal travel) and passenger transportation services (which includes agency fees and commissions for air transport).

SERVICES BY STATE AND BY28Annual services data by state, by country and detailed services are released twice
yearly. Calendar year data are usually released following the March issue of this
publication and financial year data are usually released following the September issue.
Refer to time series data under trade in services data cubes for details.

29 Services credits are classified by the state of provision, while services debits are classified by the state of consumption. The state allocations for transportation, travel, postal and courier, and telecommunication services are based on a number of indicators including merchandise trade statistics by state, overseas passenger arrivals and departures by state of clearance and data provided by the Department of Immigration and Citizenship. The allocation for other services (about 25% of all trade in services) is primarily based on the location of the business reporting the information, which serves as a proxy for the state of provision/consumption of that service. The data should be used with care but are considered suitable for analysis over time.

30 A comprehensive explanation of the data sources used and the methodology applied in the compilation of partner country statistics is provided in Chapter 17 of *Balance of Payments and International Investment Position, Australia: Concepts, Sources and Methods* (cat. no. 5331.0). Approximately 5% of total services credits and debits for both 2009–10 and 2010–11 were either confidential, or unable to be allocated to individual countries.

ABS DATA AVAILABLE **31** More detailed balance of payments and international merchandise trade data, including forward seasonal factors are available as time series spreadsheets or data cubes from the ABS website. Merchandise trade data by commodity, country and state that are not on the ABS website may be available on request. Inquiries should be made to the National Information and Referral Service as shown on the back of this publication.

RELATED PRODUCTS AND**32** Users may also wish to refer to the following publications which can be
downloaded free of charge from the ABS website by using the 'Statistics' tab and
selecting the relevant catalogue number:
