## INTRODUCTION

### STATISTICS PRESENTED IN THIS PUBLICATION

This publication presents a range of social and housing statistics produced from the 2001 Census of Population and Housing for Australia, its States and Territories and their regions. For comparative purposes, it includes 1996 Census data presented on 2001 Census geography. In addition, selected 1901 Census data are included in table 1 to mark Australia's Centenary of Federation in 2001.

The tables in this publication provide selected characteristics of the population and their housing arrangements for Statistical Divisions and Statistical Subdivisions. The purpose of these tables is to allow a broad comparison of characteristics between geographic areas.

This publication also contains the Basic Community Profile (BCP) for Australia in total. This set of tables is provided to illustrate the wide range of data available from the Census. The BCP consists of 33 tables. This publication contains the first 21 tables which focus on the social and housing characteristics. The remainder of the BCP, tables 22 to 33, will be published in *Selected Education and Labour Force Characteristics* (Cat. nos 2017.0–8).

The statistics in this publication are mostly presented on the basis of where people were counted on Census Night ('as enumerated' counts). Counts of people based on where they usually live ('usual residence' counts) are also provided.

### POPULATION MEASURES

Census counts should not be confused with the Australian Bureau of Statistics' (ABS) official population estimate, the Estimated Resident Population (ERP) which is used for electoral purposes and in assisting in the distribution of government funds to state and local governments. ERP is the definitive population estimate and is derived from the census counts. For example, ERP includes an estimate of Australians temporarily overseas. For a fuller description of population measures and the derivation of ERP, please see paragraphs 7, 8 and 9 of the Explanatory Notes. Appendix 1 includes a table showing census counts and ERP for each State and Territory.

One of the important features of the Census is that it describes the characteristics of Australia's population and housing for small geographic areas and small population groups. While not available in this publication, data at the smallest geographic level (Collection District) are available in a range of census products. For more information on these products, please refer to Appendix 2—Census Products and Services. Concepts and definitions used in this publication are explained in the Glossary and more detailed information is available in the *Census Dictionary* (Cat. no. 2901.0). The Explanatory Notes in this publication provide a discussion of the scope and coverage of the Census, the different measures of population, and the limitations of census data.

Similar publications will be available for each State and Territory (Cat. nos 2015.1–8), providing data at Statistical Local Area level.

## SUMMARY OF FINDINGS

### AUSTRALIAN OVERVIEW

The Census of Population and Housing conducted on 7 August 2001 counted 18,972,350 people in Australia on Census Night. This represents an increase of 6.0% (1,079,927 people) in Australia's population since the 1996 Census (17,892,423 people). Queensland's population showed the largest growth since 1996, increasing by 8.5%, while Tasmania's population decreased by 0.7%.

#### *Selected person characteristics*

Australia's population is continuing to age as a result of low fertility and increased life expectancy. The median age in Australia was 35 years in 2001 compared to 34 years in 1996. The proportion of people aged 65 years and over increased to 12.6% (2,388,563 people) in 2001, from 12.1% in 1996. The proportion of people aged 0–14 years decreased to 20.7% (3,934,011 people) in 2001, from 21.5% in 1996. The proportion of males and females in the population has remained stable, with slightly more females (50.7%) than males (49.3%).

#### *Selected ethnic characteristics*

The majority of people counted in Australia were Australian born (71.8% or 13,629,685 people), down from 73.9% in 1996. People born in the United Kingdom represented 5.5% (1,036,245 people) of the population, a decrease from 6.0% in 1996. English was the only language spoken at home by 79.1% of the population, a decrease from 81.4% in 1996. Of those people who spoke a language other than English at home, the highest proportion (1.9% or 353,605 people) spoke Italian, a decrease from 2.1% in 1996.

#### *Indigenous people*

The number of people who identified as being of Indigenous origin increased by 16.2% to 410,003 people in 2001, up from 352,970 people in 1996. The Indigenous population represented 2.2% of the total Australian population, up from 2.0% in 1996.

#### *Housing characteristics*

There were 7,810,352 dwellings counted in Australia, an increase of 8.5% (615,179 dwellings) since 1996. Of these dwellings, 90.5% were occupied private dwellings, 9.2% were unoccupied private dwellings and 0.3% were non-private dwellings.

#### *Occupied private dwellings*

Dwellings which were fully owned or being purchased accounted for 66.2% of the 7,072,202 occupied private dwellings in Australia. Of the occupied private dwellings being purchased (1,872,132 dwellings), the median monthly housing loan repayment was \$870. The median weekly rent for the 26.3% of occupied private dwellings being rented (1,858,324 dwellings) was \$154.

#### *Household characteristics*

Of the 7,072,202 households counted in 2001, 68.8% (4,866,031 households) were family households, a decrease from 70.6% in 1996. The proportion of lone person households increased to 22.9% (1,616,213 households), up from 22.1% in 1996. The proportion of group households fell to 3.7% (262,551 households) in 2001, down from 4.1% in 1996.

New topics for the 2001 Census included Computer use at home and Internet use. The Census shows that nearly half of all households (48.6% or 3,436,287 households) used a personal computer at home in the week prior to the Census. For the same period, over one third of all households (36.1% or 2,550,051 households) reported using the Internet at home.

## SUMMARY OF FINDINGS *continued*

*Family type* The 2001 Census counted 4,936,828 families in Australia, an increase of 6.0% since 1996. In 2001, almost half (47.0% or 2,321,165 families) of all families were couples with children, down from 49.6% in 1996. There were corresponding increases in the proportion of couple families without children (35.7%), up from 34.1% in 1996, and lone parent families (15.4%), up from 14.5% in 1996. This trend in changing family structure is examined in more detail below.

*Topical issues* The following two sections, *Changing family structure* and *Living alone*, are included to provide a more detailed insight into two of the issues that were topical at the time of the 2001 Census. Some of the figures cited do not appear in tables in this publication, however all data are available from the ABS on request.

*Changing family structure* There have been substantial changes in family structure in the last 30 years. While the proportion of couples with children and couples without children living with them have remained relatively stable over time, the proportion of lone parent families and lone person households have increased. Two of the factors which may be contributing to these changes are the ageing of the population, and divorce. There has been a steady increase in the proportion of divorced people in the population since the 1971 Census, although the divorce rate has remained stable since the mid-1970s.

In 2001, lone parent families represented 15.4% (762,632 families) of all families, a slight increase since 1996, but a significant increase from 5.7% (178,417 families) in 1971. This is due to the steady rise in the proportion of divorced people since the 1971 Census. In 2001, 7.4% (1,107,005 people) of people aged 15 years and over were divorced, compared to 6.4% in 1996 and less than 2% (133,170 people) in 1971. There has been a corresponding decrease in the proportion of couple families with children who represented 47.0% (2,321,165 families) of all families in 2001, down from 49.6% in 1996, and 50.2% (1,569,868 families) in 1971.

The proportion of couple families without children has increased to 35.7% (1,764,167 families), up from 34.1% in 1996, but a decrease from 37.9% of all families in 1971. The recent increase in couple families without children is partly due to the ageing of the population. In particular, the oldest of the 'baby-boomers' are in their mid-fifties and are likely to become 'empty nesters' as their children leave home. In the younger age groups, this increase can be attributed to the trends of remaining childless or having children later in life.

In 2001, the proportion of other family types, such as two brothers living together, has remained stable at 1.8% (88,864 families) of all families since 1996, but has shown a large decrease since 1971 when they represented 6.2% of all families.

The average household size in 1971 was 3.3 people, decreasing to 2.7 people in 1996, with a further drop to 2.6 people in 2001. This decrease in average household size is related to the increase in the number of people living alone, and the declining fertility rate, a factor in which is delayed marriage. In 2001, 75.6% of 20–29 year olds (1,981,247 people) had never been married, increasing from 70.3% in 1996, and a significant increase since 1971 when only 35.7% (725,116 people) had never been married.

## SUMMARY OF FINDINGS *continued*

### Living alone

Of the 18,363,310 people who lived in occupied private dwellings in 2001, 8.8% (1,616,213 people) were living alone, up from 8.3% in 1996 and 5.5% (665,938 people) in 1971. Lone person households accounted for 22.9% of all households in 2001, up from 22.1% in 1996 and 18.1% in 1971. While older people are more likely to be living alone than younger people, more young people are likely to be living alone than in the past. This is one indicator of social change in Australia.

Under the age of 50 years, men are more likely to live alone than women, but after the age of 50, women are much more likely to live alone than men. In 2001, 6.0% (395,997 men) of all males aged less than 50 years lived alone, compared to 3.9% (255,691 women) of all females in this age group. In comparison, 13.7% (336,550 men) of all males aged over 50 lived alone, compared to 23.3% (627,975 women) of all females in this age group.

PROPORTION LIVING ALONE BY 5-YEAR AGE GROUP—2001

### YOUNGER PEOPLE LIVING ALONE

While the number of younger people (aged 20–29 years) living alone has almost doubled in the past 30 years, the majority still live in family households. Over two thirds (71.2% or 1,765,435 people) of younger people were living in family households in 2001. This compares to 71.8% in 1996, and 88.2% living in family households in 1971.

The proportion of younger people living alone in 2001 was 7.1% (176,485 people) and while relatively stable since 1996, this is a rise from 4.7% (86,772 people) in 1971. This is part of a wider trend, with the proportion of people living alone increasing in each of the five year age groups, from 20–25 years to 60–64 years, since 1971. For younger people, this may be because living alone is seen as a practical option between leaving the family home and moving into a couple or group household.

### OLDER PEOPLE LIVING ALONE

Of people aged 75 years and over in occupied private dwellings (942,855 people), more than one third (36.9% or 348,307 people) were living alone, down slightly from 38.3% in 1996, but an increase from 33.2% in 1971. There are large differences in the proportion of men and women in this age group who live alone. In 2001, 21.5% (83,014) of men

## SUMMARY OF FINDINGS *continued*

### *Living alone continued*

aged 75 years and over were living alone. In contrast, almost half (47.7% or 265,293) of all women aged 75 years and over were living alone in 2001. This is due to higher female life expectancy, with almost two thirds (61.9% or 410,443 women) of women in this age group being widowed.

Although all people aged 75 years and over represent only 5.8% of the Australian population, they represent 21.6% of people living alone. This is an increase from 20.1% in 1996, and 16.3% in 1971.

### HOUSING OF PEOPLE LIVING ALONE IN 2001

More than one quarter (26.2% or 424,146 people) of people who live alone, live in flats, units or apartments. Around 40% (69,978 people) of younger people (aged 20–29 years) who live alone, live in these types of dwellings.

Fifty five percent (893,173 people) of people who live alone, live in separate houses. Of all people who live alone, older people (aged 75 years and over) are more likely to live in this type of dwelling. Older people represent 58.7% (204,289 people) of the people who live alone in separate houses, an indication that many widowed people remain in the family home.

A significant proportion (44.4% or 717,172 dwellings) of dwellings occupied by people living alone are fully owned, with a further 14.2% (228,975 dwellings) being purchased. Of the 348,307 dwellings occupied by older people (aged 75 years and over) who live alone, 72.9% (253,777 dwellings) are fully owned.

More than one third (36.4% or 588,813 dwellings) of dwellings occupied by people who live alone are rental dwellings. Younger people living alone are more likely to be renting than older people living alone. Of the 176,485 dwellings occupied by younger people (aged 20–29 years) who live alone, 65.7% (115,969 dwellings) are rented. In contrast, only 18.0% (62,644 dwellings) of dwellings occupied by people aged 75 years and over who live alone, are rented.

## HOW WE'VE CHANGED, 100 YEARS OF FEDERATION

---

### CENTENARY OF FEDERATION

Federation of the colonies into the Commonwealth of Australia took place on 1 January 1901. In the same year, Australia's States conducted a census. This article uses data from the censuses of 1901 and 2001 to sketch a picture of how we have changed in the last 100 years.

The States at Federation were New South Wales, Victoria, Queensland, South Australia, Western Australia and Tasmania. The Northern Territory and the Australian Capital Territory were not established as separate entities until 1911. In this article data for 1901 for the areas covered by the Northern Territory and the Australian Capital Territory are included in South Australia and New South Wales respectively.

#### *The Census*

The Census of 1901 was conducted cooperatively by the States with each publishing their results separately. The 1901 data in this article have been obtained from those reports and from two publications:

*Official Yearbook of the Commonwealth of Australia No. 1, 1901–1907*, published by the Commonwealth Statistician; and

*A Statistical Account of the Seven Colonies of Australasia 1901–1902*, by T.A. Coghlan, Statistician of New South Wales.

#### *History*

In 1901 and during the reign of Queen Victoria, Australia became a Federation. Edmund Barton was appointed as Australia's first Prime Minister in the newly formed Federal Parliament, opened in Melbourne by the Duke of Cornwall and York. The first Governor General, Lord Hopetoun, was instated as the Queen's representative.

At the time of Federation, Australian contingents were assisting British forces against the Boer Republics in Africa and were also sent to assist the British in China.

#### *Population*

From an estimated 1,030 people at European settlement in 1788, Australia's population, as counted in the Population Census, grew to 3,773,801 by 1901 and to 18,972,350 by 2001.

#### *Indigenous population*

In 1901, the new Commonwealth acquired the constitutional power to make laws concerning 'census and statistics'. There was some debate concerning the inclusion of tribal Aborigines in the calculation of Australia's population. The debate concluded with section 127 of the Constitution, which stated that in reckoning population, 'Aboriginal natives' would not be included in the calculation, although they may have been counted in the Census. Section 127 was introduced principally so that the numbers of Federal politicians per State, as well as per capita Commonwealth grants, would be based on the total population of European and assimilated part-Aboriginal people. Section 127 was removed from the Constitution following a referendum in 1967. From 1971 Aboriginal people were included in the Census count.

In 2001, the Census counted 410,003 people of Indigenous origin, 2.2% of the population.

### *State distribution*

Australia's most populous State in 1901 was New South Wales (which included the area now called the Australian Capital Territory) with 35.9% of the population. It was also the most populous State in 2001. The combined population of New South Wales and the Australian Capital Territory in 2001 represented 35.2% of the Australian population.

While the proportion of the population in New South Wales remained steady over the past century, the distribution in other States has changed. The proportion of the population in Victoria and Tasmania decreased from 31.8% to 24.5% and from 4.6% to 2.4% respectively. The proportion of the population of South Australia and the Northern Territory decreased from 9.6% to 8.8%. Queensland and Western Australia were the States to gain in proportion. Queensland grew from 13.2% in 1901 to 19.3% in 2001, while Western Australia grew from 4.9% to 9.8%.

### *The West*

Between 1891 and 1901 the population of Western Australia increased nearly three fold due to the discovery of gold. The gold rush predominantly attracted adult males, including married men who left their families behind. Consequently, in the 1901 Census Western Australia had the highest proportion of males to females, the highest average income and the highest median age.

Over the century Western Australia's rate of population increase was greater than any other state and by the 1986 Census it had overtaken South Australia to become Australia's fourth most populous State.

### *Sex*

In 1901 there were more males than females in Australia with males making up 52.4% of the population. In 2001, females make up the greater proportion of Australia's population at 50.7%.

### *An Ageing Nation*

Australia had a younger population in 1901. Over the century the median age of Australia's population has increased from 22 years to 35 years.

The proportion of people aged 0–14 years has decreased from 35.1% in 1901 to 20.7% in 2001 and the proportion of people aged 65 years and over has increased from 4.0% to 12.6%.

### *Birthplace*

Australia was the birthplace of 77.1% of the population in 1901, with 18.0% born in the United Kingdom. In the 2001 Census, 71.8% of people were born in Australia. The largest overseas born group in 2001 comprised people born in United Kingdom and Ireland at 5.8%, followed by New Zealand at 1.9% and Italy at 1.2%. No other country accounted for one or more percent.

### *Income*

Income figures were not collected in the 1901 Census but were estimated from various sources at the time. The mean annual income per inhabitant (including children aged under 15 years) for Australia was £46. The highest *annual* mean income (£64 per inhabitant) was estimated for Western Australia and the lowest (£42 per inhabitant) for Tasmania.

## HOW WE'VE CHANGED, 100 YEARS OF FEDERATION *continued*

---

### *Income continued*

Australia changed to decimal currency in 1966, with an exchange of \$2 for £1.

Of the States that existed at Federation, New South Wales had the highest median *weekly* individual income (\$386) in 2001 for people aged 15 years and over. The lowest median *weekly* individual income was recorded by Tasmania (\$314).

### *Religion*

In 1901, data on Christian religions were released for all States and Australia, but data for other religions were available for some States only. Christians represented 95.9% of the population, with four major religious denominations accounting for 87.1% of the population. These were the Church of England (39.7%), Roman Catholic (22.7%), Wesleyan and other Methodists (13.4%) and Presbyterian (11.3%).

In 2001, Christians represented 68.0% of the population, with the two major denominations, Anglican and Catholic, accounting for 46.5% of the population. Buddhism accounted for 1.9% of the population and Islam for 1.5%. In 2001, around a quarter (25.3%) of the population stated they had 'No religion' or chose not to answer the question.

### *Dwellings*

The Census of 1901 had three classes of dwelling: Inhabited, Uninhabited and Being built. In total there were 786,000 dwellings including 43,000 canvas dwellings or tents. Throughout the century the number of dwellings in Australia has grown ten fold to over 7.8 million in 2001, compared to the population which has grown five fold.

.. not applicable

(a) 1901 data for the Northern Territory and the Australian Capital Territory are included in South Australia and New South Wales respectively. See also Explanatory Notes.

(b) Includes Other Territories.

(c) Includes overseas visitors.

(d) Under the constitution at federation, Indigenous people were not included in the Census. This changed following a referendum in 1967.

## BASIC COMMUNITY PROFILES

---

### ABOUT THE BASIC COMMUNITY PROFILE

The key characteristics from the Census are summarised in a set of 33 standard tables which make up the Basic Community Profile (BCP).

The first 21 tables (B01–B21) included in this publication provide a range of social, demographic and housing characteristics from the Census. Similar BCP tables are available for other geographic areas, including Collection Districts, Local Government Areas, Postal Areas and Suburbs.

The remainder of the BCP series (B22–B33) provide education and labour force related data and are published in *Census of Population and Housing: Selected Education and Labour Force Characteristics* (Cat. nos 2017.0–8).

The first release BCPs for Statistical Local Areas are available from our web site free of charge.

For further information about the Community Profile Series, please refer to *Appendix 2, Census Products and Services*.

SELECTED CHARACTERISTICS (FIRST RELEASE PROCESSING),  
Persons

	Males	Females	Persons
Total Persons(a)	9 365 941	9 606 409	18 972 350
Aged 15 years and over(a)	7 347 379	7 690 960	15 038 339
Aged 65 years and over(a)	1 050 912	1 337 651	2 388 563
Aboriginal	181 040	185 389	366 429
Torres Strait Islander	13 184	12 862	26 046
Both Aboriginal & Torres Strait Islander(b)	8 730	8 798	17 528
<i>Total Indigenous Persons</i>	<i>202 954</i>	<i>207 049</i>	<i>410 003</i>
Born in Australia	6 712 876	6 916 809	13 629 685
Born overseas(c)	2 031 613	2 073 831	4 105 444
Speaks English only	7 410 456	7 603 509	15 013 965
Speaks other language(d)	1 398 737	1 455 114	2 853 851
Indigenous Persons aged 18 years and over	107 015	115 346	222 361
Australian citizen	8 158 643	8 401 131	16 559 774
Australian citizen aged 18 years and over	5 981 199	6 330 261	12 311 460
Enumerated in private dwelling(a)	9 042 222	9 321 088	18 363 310
Enumerated in non-private dwelling(a)	323 719	285 321	609 040
Overseas visitors	95 475	107 626	203 101

- (a) Includes Overseas visitors.
- (b) Applicable to persons who are of both Aboriginal and Torres Strait Islander origin.
- (c) Includes 'Inadequately described', 'At sea' and 'Not elsewhere classified'.
- (d) Includes 'Non-verbal so described' and 'Inadequately described'.

(a) Refer to Glossary for further detail on ancestry.  
 (b) Includes birthplace of either/both parents not stated.  
 (c) Includes responses of Aboriginal, Torres Strait Islander & Australian of South Sea Islander descent.

(d) If two responses are categorised in the 'other' category within the same region, only one is counted.  
 (e) Includes 'Inadequately described'.  
 (f) As this table is a multi-response table, the 'total responses' will not necessarily equal the 'total persons' count.

## EXPLANATORY NOTES

### SCOPE AND COVERAGE

**1** The 2001 Census of Population and Housing was held on 7 August 2001. Australia's first national census was held in 1911 and since 1961 a census has been taken every five years, a frequency which is specified in the *Census and Statistics Act 1905*. The objective of the census is to count the number of people in Australia on Census Night, identifying their key characteristics and those of the dwellings in which they live.

**2** The Census aims to count every person who spent Census Night in Australia. This includes Australian residents in Antarctica and people in the territories of Jervis Bay, Cocos (Keeling) Islands and Christmas Island. The other Australian External Territories, Norfolk Island and minor islands such as Heard and McDonald Islands, are outside the scope of the Australian Census. The only people in Australia on Census Night who are excluded from the Census are foreign diplomats and their families.

**3** The Census includes people on vessels in or between Australian ports, on board long distance trains, buses or aircraft and on oil or gas rigs off the Australian coast. People entering Australia before midnight on Census Night are counted while people leaving an Australian port for an overseas destination before midnight on Census Night are not. Visitors to Australia are included regardless of how long they have been in the country or how long they plan to stay. However, for people who intend to be in Australia less than one year, only basic demographic data are available. The Census includes homeless people and people camping out.

**4** All occupied dwellings are counted in the Census with the exception of diplomatic dwellings. Unoccupied private dwellings are also counted with the exception of unoccupied dwellings in caravan parks, marinas and manufactured home estates, and units in accommodation for the retired or aged (self-care). Unoccupied residences of owners, managers or caretakers of such establishments are counted.

**5** Details about the 2001 Census content, collection operations, confidentiality and privacy protection, processing and evaluation activities are contained in *2001 Census of Population and Housing: Nature and Content* (Cat. no. 2008.0).

### BASIC COMMUNITY PROFILE TABLES B01 TO B21

**6** Tables numbered B01 to B21 contained in this publication are from the *2001 Census Basic Community Profile* (Cat. no. 2001.0). These tables are available in hardcopy or electronic format for all standard census geographic areas. For more information about the Community Profiles please refer to *Appendix 2, Census Products and Services*.

### ABS POPULATION ESTIMATES

**7** Population counts on a 'Place of usual residence' basis are shown in this publication in tables 3 and 10. All other counts in this publication are on a 'Place of enumeration' basis. 'Place of enumeration' means where the person was counted on Census Night. The Census can provide person counts based on 'Place of usual residence' for Collection Districts (CDs) and aggregations of CDs.

**8** The Estimated Resident Population (ERP) is the official ABS estimate of the Australian population. The ERP is based on results of the Census of Population and Housing. It is compiled as at 30 June of each census year and updated quarterly between censuses. The intercensal estimates of the resident population are revised following the next census.

**9** The ERP is derived from census usual residence counts, by making the following three important adjustments:

## EXPLANATORY NOTES *continued*

### ABS POPULATION ESTIMATES

*continued*

- An adjustment for census net underenumeration (or undercount). The level of underenumeration is derived from the Post Enumeration Survey which is conducted soon after the Census, and from estimates based on demographic analysis;
- The inclusion of an estimated number of Australian residents who are temporarily overseas on Census Night and are therefore not covered by the Australian Census. The number of such people is estimated from statistics on overseas arrivals and departures; and
- The third adjustment occurs because the Census does not fall on 30 June. For example, the 2001 Census was held on 7 August. Back dating of population estimates from 7 August to 30 June is accomplished using data from birth and death registrations, overseas arrivals and departures, and estimates of interstate migration, for the period 1 July to 7 August.

**10** ABS population estimates are published in *Australian Demographic Statistics* (Cat. no. 3101.0), produced quarterly, and in *Population by Sex and Age, Australian States and Territories* (Cat. no. 3201.0) produced annually. ERPs for SLAs are published in *Regional Population Growth, Australia* (Cat. no. 3218.0).

**11** The ABS also provides projections (based on different assumptions as to future fertility, mortality and migration) of the resident population of Australia, States and Territories. These projections are published every two years in *Population Projections, Australia* (Cat. no. 3222.0).

### DATA LIMITATIONS

**12** Census data are subject to a number of inaccuracies resulting from errors by respondents or mistakes in collection or processing. Whilst many of these are corrected by careful processing procedures, some still remain. The effect of the remaining errors is generally slight, although it may be more important for small groups in the population. The main kinds of error to keep in mind are:

- *Partial non-response*: In some cases where an answer is not provided to a question an answer is imputed (often from other information on the form). In other cases a 'Not stated' code is allocated;
- *Processing error*: While such errors can occur in any processing system, quality management is used continuously to improve the quality of processed data, and to identify and correct data of unacceptable quality;
- *Random adjustment*: Table cells containing small values are randomly adjusted or suppressed to avoid releasing information about particular individuals, families, or households. The effects of these adjustments are statistically insignificant;
- *Respondent error*: Because processing procedures cannot detect or repair all errors made by people in completing the forms, some remain in final data; and
- *Undercount*: Although the census aims to count each person, there are some people who are missed and others who are counted more than once. The data in this publication are not adjusted for the net undercount.

**13** Further information on data quality is provided progressively in *Census Update* and in *2001 Census Papers*.

## EXPLANATORY NOTES *continued*

### QUALITY OF INDIGENOUS STATISTICS

**14** For further information on the quality of Indigenous statistics, see *Population Distribution, Aboriginal and Torres Strait Islander Australians* (Cat. no. 4705.0). This publication presents counts for Aboriginal and Torres Strait Islander Australians from the 2001 Census for Indigenous geographic areas, accompanied by information on data quality to help interpret the data. Estimates of the Indigenous population, based on the 2001 Census, are also included. For comprehensive information on the quality of Indigenous census data, see *Population Issues, Aboriginal and Torres Strait Islander Australians* (Cat. no. 4708.0).

### 1901 DATA

**15** Care should be taken when using 1901 data. These data are generally not comparable with data from more recent censuses.

- In 1901 Aboriginal and Torres Strait Islander people were excluded from the Census.
- The Northern Territory and the Australian Capital Territory were not established as separate entities until 1911 so 1901 data for these areas are included in South Australia and New South Wales respectively.
- As personal income was not included in the 1901 Census, average annual individual income has been estimated from other sources. This estimate is for all persons, whereas the 2001 Census only collects individual income for persons aged 15 years or more.

**16** In table 1, data for 1901 have come from two sources. Individual income came from *A Statistical Account of the Seven Colonies of Australasia 1901–1902*, by T.A. Coghlan, Statistician of New South Wales, published in 1902. All other 1901 data for table 1 came from the *Official Yearbook of the Commonwealth of Australia No. 1, 1901–1907*, published by the Commonwealth Statistician in 1908.

### OVERSEAS VISITORS

**17** Overseas visitors are defined differently for the 2001 Census. For the 1996 Census overseas visitors were defined as any person who stated they would be in Australia for less than 6 months. For the 2001 Census they are defined as any person who stated they would be in Australia for less than 12 months. Data for overseas visitors are restricted to age, sex and marital status.

### CALCULATIONS OF PROPORTIONS

**18** When calculating the proportion of the population with a particular characteristic, 'Not stated' responses are included in the denominator. For example, in table 1 the proportion of people born in Australia is calculated by dividing the number of persons who stated that they were Australian-born by the total population and expressing the result as a percentage. The 'Total population' includes the category 'Not stated'.

**19** For census variables which include data for overseas visitors i.e. age, sex and marital status, 'Overseas visitors' are also included in the denominator.

### CALCULATION OF MEDIANS

**20** A median is a measure of central tendency. It is a mid value which divides a population distribution into two, with half the observations falling below it and half above it. Unlike averages (means) medians are not usually skewed by extreme observations.

**21** There are a number of issues to be aware of:

- The categories 'Not stated' and 'Not applicable' are not included in the calculation of medians;
- The category 'Overseas visitor', is only included in the calculation of the median when data for overseas visitors is collected for the variable (see paragraph 17). For example, 'Median age' in table 1 of this publication includes overseas visitors whereas 'Median weekly individual income' in the same table does not;

## EXPLANATORY NOTES *continued*

---

### CALCULATION OF MEDIANS *continued*

- If a median falls into a category that has a text only label, then a value of 0 is used for that category. For this publication this is only relevant to the calculation of median personal income, as the income classification includes categories 'Nil income' and 'Negative income';
- When calculating a median on a classification containing ranges, the median may fall into a range which is open-ended. In this case, the median would be set to the number in the label. For example, in the calculation of median weekly individual income, if the median was to fall in the last range *\$1,500 or more*, then \$1,500 would be allocated as the median; and
- 'Median monthly housing loan repayment' and 'Median weekly rent' are based on the ranged variables HLRD01 and RNTD01 respectively. This is due to difficulties associated with the large number of small cells when using individual dollar values to perform these calculations. An adjustment has been made to HLRD01, with the range *\$1,500 and over* changed to *\$1,500–\$1,999* and an additional range *\$2,000 and over* added.

### UNADJUSTED DOLLARS

**22** The 1996 Census dollar values for Median weekly individual income, Median monthly loan repayments and Median weekly rent have not been adjusted into 2001 dollars.

## APPENDIX 1 ESTIMATED RESIDENT POPULATION

### POPULATION MEASURES

This table is provided to highlight the difference between the Census 'as enumerated' and 'usual residence' counts and the Estimated Resident Population (ERP). The ERP is the official ABS estimate of the Australian population. It is based on the Census of Population and Housing usual residence counts and is updated quarterly using births, deaths and migration data.

### POPULATION MEASURES—30 JUNE AND 7 AUGUST 2001

	<i>Census as Enumerated(a)</i>	<i>Census Usual Residence(b)</i>	<i>Estimated Resident Population(c)</i>
New South Wales	6 371 745	6 326 579	6 609 304
Victoria	4 644 950	4 660 991	4 822 663
Queensland	3 655 139	3 522 044	3 635 121
South Australia	1 467 261	1 470 057	1 514 854
Western Australia	1 851 252	1 828 294	1 906 114
Tasmania	456 652	460 672	472 931
Northern Territory	210 664	188 075	200 019
Australian Capital Territory	311 947	309 998	321 680
<b>Australia(d)</b>	<b>18 972 350</b>	<b>18 769 249</b>	<b>19 485 278</b>

(a) Number of persons counted in each State/Territory on Census Night, 7 August 2001.

(b) Number of persons usually resident in each State/Territory on 7 August 2001 regardless of where they were counted on Census Night.

(c) These are census usual resident counts, plus Australian residents temporarily overseas on Census Night, plus the estimated census underenumeration, plus deaths and less births, net overseas migration and net interstate migration occurring between 30 June and 7 August 2001, giving estimated resident population at 30 June 2001.

(d) Includes Other Territories.

## APPENDIX 2 CENSUS PRODUCTS AND SERVICES

### 2001 PRODUCTS AND SERVICES

A wide range of products and services are available from the 2001 Census of Population and Housing. Brief descriptions of these are included below. For more detailed information on the 2001 Census range of products and services, please refer to the *2001 Census of Population and Housing Directory of Census Statistics* (Cat. no. 2910.0).

Census products fall into two broad types: reference products and data products. Most of the reference products from the 2001 Census are available free of charge from the ABS web site.

### CENSUS REFERENCE PRODUCTS

#### *2001 Census Dictionary*

The *2001 Census Dictionary* (Cat. no. 2901.0) is a comprehensive reference guide to the 2001 Census of Population and Housing. The Dictionary includes a complete listing of 2001 Census classifications. It describes new topics introduced for 2001 and highlights classification changes that have occurred since the 1996 Census. The Dictionary also explains the concepts relevant to census collection, processing and output of data.

#### *How Australia Takes a Census*

*How Australia Takes a Census* (Cat. no. 2903.0) provides information about the history of the census, the planning process and the way in which the census is conducted.

#### *Geographic Classifications and Codes*

*Statistical Geography: Volume 1 Australian Standard Geographical Classification (ASGC): 2001 Census Edition* (Cat. no. 1216.0) provides information about the names and codes of the standard geographic areas used in the 2001 Census. *Statistical Geography: Volume 2 Census Geographic Areas, Australia 2001 Census Edition* (Cat. no. 2905.0) and *Statistical Geography: Volume 3 ASGC Urban Centres/Localities: 2001 Census Edition* (Cat. no. 2909.0) provide information on further geographic areas, and are due to be released in June 2002 and September 2002 respectively.

#### *2001 Census Statistical Local Area Maps*

These reference maps show the Statistical Local Areas (SLAs) from the 2001 Census. Each map shows the boundary of an SLA and the Collection District boundaries contained within.

#### *Digital Boundaries*

Census boundaries are made available electronically as *Digital Boundaries*. They include all of the Australian Standard Geographical Classification (ASGC), Urban Centres and Localities, and Census-specific areas.

#### *Census Snapshots*

*Census Snapshots* are a new product designed to provide a summary overview for selected geographic areas and are available from the ABS web site, free of charge. *Census Snapshots* contain subsets of Community Profile data, including person counts, age and birthplace, presented in a narrative form for easy access by a wide audience. A *2001 Census Snapshot* for Australia and some States will also be available to celebrate the Centenary of Federation.

#### *CLIB2001*

*CLIB2001* is an electronic product provided free of charge to public libraries through the ABS Library Extension Program. The product contains a large volume of tabulated data and software that allows access, display and printing of the data. For 2001 this product will be available as both a CD-ROM (limited access) and an Internet-based product. *CLIB2001* comprises the complete 2001 Census Community Profile Series and Classification Counts.

### CENSUS DATA PRODUCTS

#### *Estimated Resident Population*

The Estimated Resident Population (ERP) is the official ABS population estimate. It is based on census usual residence counts, and is updated quarterly using births, deaths and migration data.

Two publications containing ERP data, based on 2001 Census figures are:

## APPENDIX 2 CENSUS PRODUCTS AND SERVICES *continued*

### *Estimated Resident Population continued*

- *Australian Demographic Statistics — 2001 Census Edition* (Cat. no. 3101.0); and
- *Regional Population Growth, Australia — 2001 Census Edition* (Cat. no. 3218.0).

### *Selected Characteristics*

The Census of Population and Housing suite of publications contains data and commentary on various person and dwelling characteristics from the 2001 Census at selected geographic levels. There are three series of publications in the suite:

- *Selected Social and Housing Characteristics, Australia* (Cat. no. 2015.0);
- *Selected Social and Housing Characteristics for Statistical Local Areas* (Cat. nos 2015.1–8);
- *Selected Characteristics for Urban Centres, Australia* (Cat. no. 2016.0);
- *Selected Characteristics for Urban Centres and Localities* (Cat. nos 2016.1–7);
- *Selected Education and Labour Force Characteristics, Australia* (Cat. no. 2017.0); and
- *Selected Education and Labour Force Characteristics for Statistical Local Areas* (Cat. nos 2017.1–8).

### *Community Profile Series*

The Community Profile Series provides detailed and comprehensive census characteristics of people, families and dwellings for small areas. This series is available for all standard census geographic areas, and is available in hardcopy and electronic formats.

The series comprises six Community Profiles:

- *Basic Community Profile* (Cat. no. 2001.0) contains 33 tables of detailed data covering dwelling, household and family topics. This profile is available for all standard census geographic areas, Commonwealth and State Electoral Divisions, Postal Areas, and Suburbs, for the States/Territories and Australia;
- *Indigenous Profile* (Cat. no. 2002.0) contains 29 tables of key Census characteristics for Aboriginal and Torres Strait Islander people, for all ASGC areas from Statistical Local Area (SLA) level to whole of Australia, as well as Indigenous Areas and Aboriginal and Torres Strait Islander Commission (ATSIC) regions;
- *Time Series Profile* (Cat. no. 2003.0) contains 22 tables comparing data from the 1991, 1996 and 2001 Censuses where the classifications are comparable. Data is presented on 2001 geographic boundaries;
- *Usual Residents Profile* (Cat. no. 2004.0) contains 28 tables of data for persons usually resident in the selected area. This is the only community profile based on place of usual residence;
- *Expanded Community Profile* (Cat. no. 2005.0) contains 49 tables available for SLAs and larger areas, comprising more detailed versions of some of the Basic Community Profile tables, plus additional tables; and
- *Working Population Profile* (Cat. no. 2006.0) contains 19 tables of labour force and related data on the characteristics of employed people.

### *Classification Counts*

*Classification Counts* (Cat. nos 2022.0–8) provide frequency counts for 2001 Census variables in complete classificatory detail, for every State/Territory and Capital City Statistical Division, cross-classified by sex where applicable.

### *CDATA 2001*

*CDATA 2001* is a CD-ROM product which contains a large volume of tabulated census data, digital boundaries and base map data, with software to produce tables, maps and graphs of the data. The product is available at the Australia and State/Territory levels.

## APPENDIX 2 CENSUS PRODUCTS AND SERVICES *continued*

---

### *CDATA 2001 continued*

There are two *CDATA 2001* products available, offering different levels of functionality:

*CDATA 2001 - Full GIS*: This version is aimed at the expert GIS user who requires detailed spatial data analysis using Structured Query Language, geocoding and importation of 'client own' data.

*CDATA 2001 - Quickbuild*: This version has been designed for GIS users with more basic spatial analysis requirements. It allows users to produce data reports, graphs and/or maps. The product is aimed at inexperienced or intermediate GIS users. *CDATA 2001 - Quickbuild* users will also have the option to upgrade to *CDATA 2001 - Full GIS* if so desired.

### *Social Atlas Series*

The *Social Atlas* (Cat. nos 2840.1–8) publications feature colour maps of the key social, demographic and economic characteristics of each capital city.

### *Australia in Profile — A Regional Analysis*

*Australia in Profile — A Regional Analysis* (Cat. no. 2032.0) provides commentary and data on a number of key social indicators from the 2001 Census, with the focus on regional distributions and comparisons.

### CONSULTANCY SERVICES

The following census specific services are available:

- *Customised Profiles Service* provides community profile data tailored to your needs, on a variety of media;
- *Customised Table Service* provides detailed cross-classified tables tailored to your needs on a variety of media;
- *Customised Geographic Data Reports Service* provides tabular geographic data which relate specifically to the census Geographic Areas and their characteristics (e.g. area); and
- *Customised Mapping Service* provides both Customised Thematic Maps and Customised Reference Maps on request.

## GLOSSARY

General descriptions of terms and concepts used in this publication are provided below. Tables are also footnoted where applicable for additional clarity. Detailed definitions of classifications and concepts are available in the *2001 Census Dictionary* (Cat. no. 2901.0).

**Ancestry** A person's ancestry, when used in conjunction with the person's birthplace and their parents' birthplace, provides a good indication of the ethnic background of first and second generation Australians. This is particularly useful for identifying distinct ethnic or cultural groups (e.g. Maoris or Kurds), which cannot be identified using country of birth alone.

Respondents were asked to consider and mark the ancestries they most closely identified with, and to count their ancestry back as far as three generations. Respondents had the option of nominating several ancestries but only the first two answers were processed for output purposes.

**Christmas Island** See Geographic areas.

**Cocos (Keeling) Islands** See Geographic areas.

**Dwelling** A dwelling is a structure which is intended to have people live in it, and which is habitable on Census Night. Some examples of dwellings are houses, motels, flats, caravans, prisons, tents, humpies and houseboats.

There are private and non-private dwellings:

- A private dwelling is normally a house, flat, part of a house, or even a room; but can also be a house attached to, or rooms above, shops or offices; an occupied caravan or unit in a caravan park or craft in a marina; occupied dwelling in a Manufactured Home Estate; occupied self-care unit in Accommodation for the Retired or Aged; a houseboat; or tent if it is standing on its own block of land. An occupied caravan situated on a residential allotment is also classed as a private dwelling. Private dwellings can be either occupied or unoccupied.
- Non-private dwellings are those dwellings not included above, which provide a communal or transitory type of accommodation. They are classified according to their function. These dwellings include hotels, motels, guest houses, prisons, religious and charitable institutions, defence establishments, hospitals and other communal dwellings. Only occupied non-private dwellings are included in the census.

**Family** A family is defined by the ABS as two or more persons, one of whom is at least 15 years of age, who are related by blood, marriage (registered or de facto), adoption, step or fostering, and who are usually resident in the same household. The basis of a family is formed by identifying either a couple, parent-child or other blood relationship. Information on persons temporarily absent on Census Night is considered in family coding.

**Geographic areas** The tables in this publication are at the levels of Statistical Subdivision and Statistical Division, as defined by the 2001 Census edition of the Australian Standard Geographical Classification (ASGC).

*Statistical Subdivision (SSD)*: These areas consist of one or more Statistical Local Areas and cover, in aggregate, the whole of Australia without gaps or overlaps.

*Statistical Division (SD)*: These areas consist of one or more SSDs and cover, in aggregate, the whole of Australia without gaps or overlaps. They do not cross State or Territory boundaries. However, the Other Territories, Jervis Bay Territory and the Territories of Christmas Island and Cocos (Keeling) Islands together form one SD. Capital city SDs are predominantly urban in character and the boundaries are delineated to contain the anticipated urban development of the capital cities (and associated urban centres) for a period of at least 20 years.

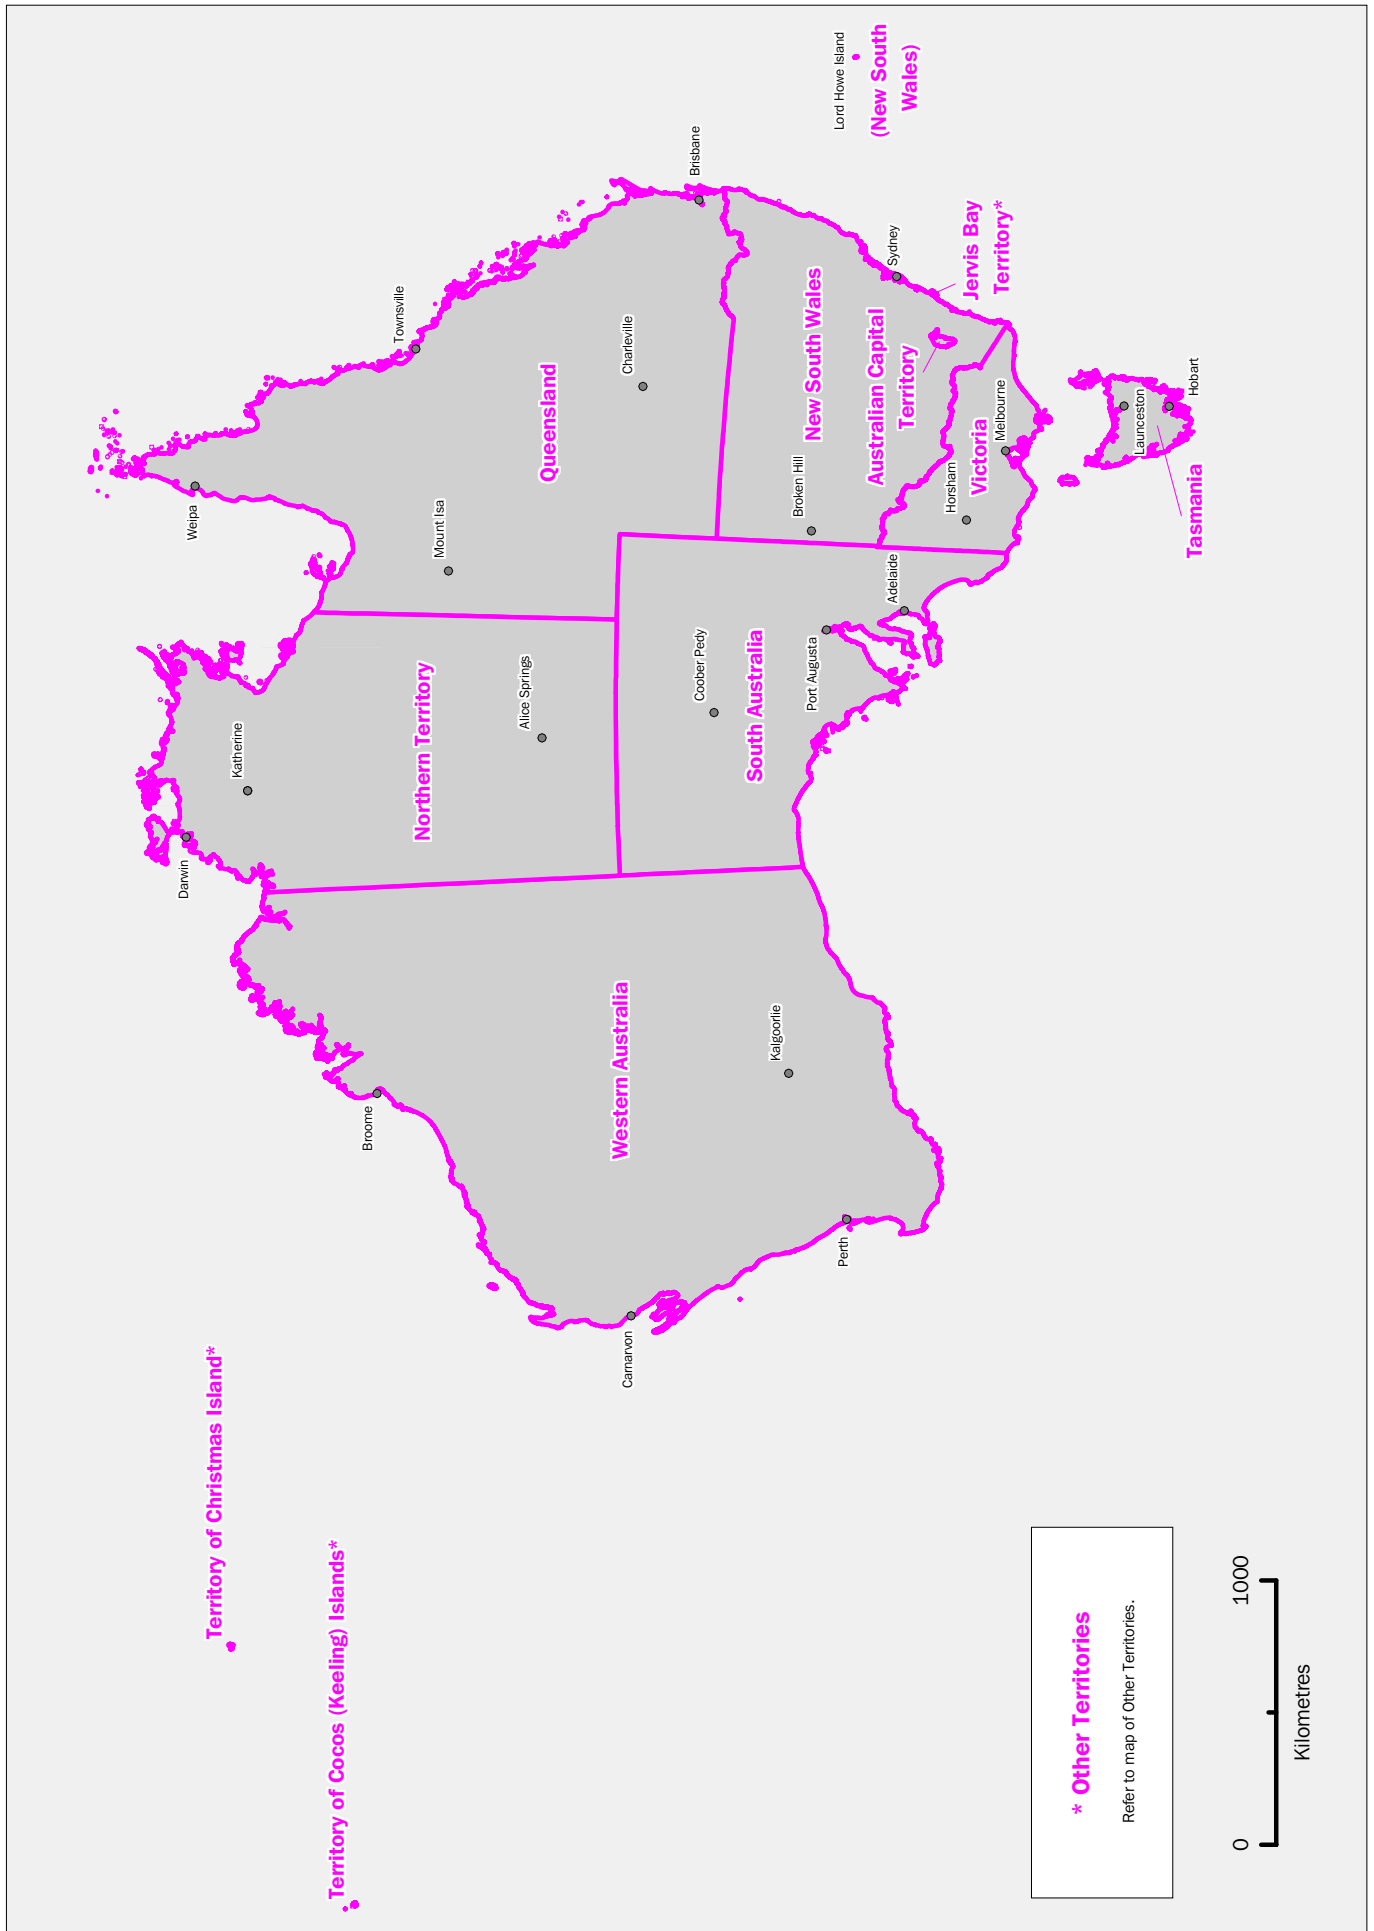

## GLOSSARY *continued*

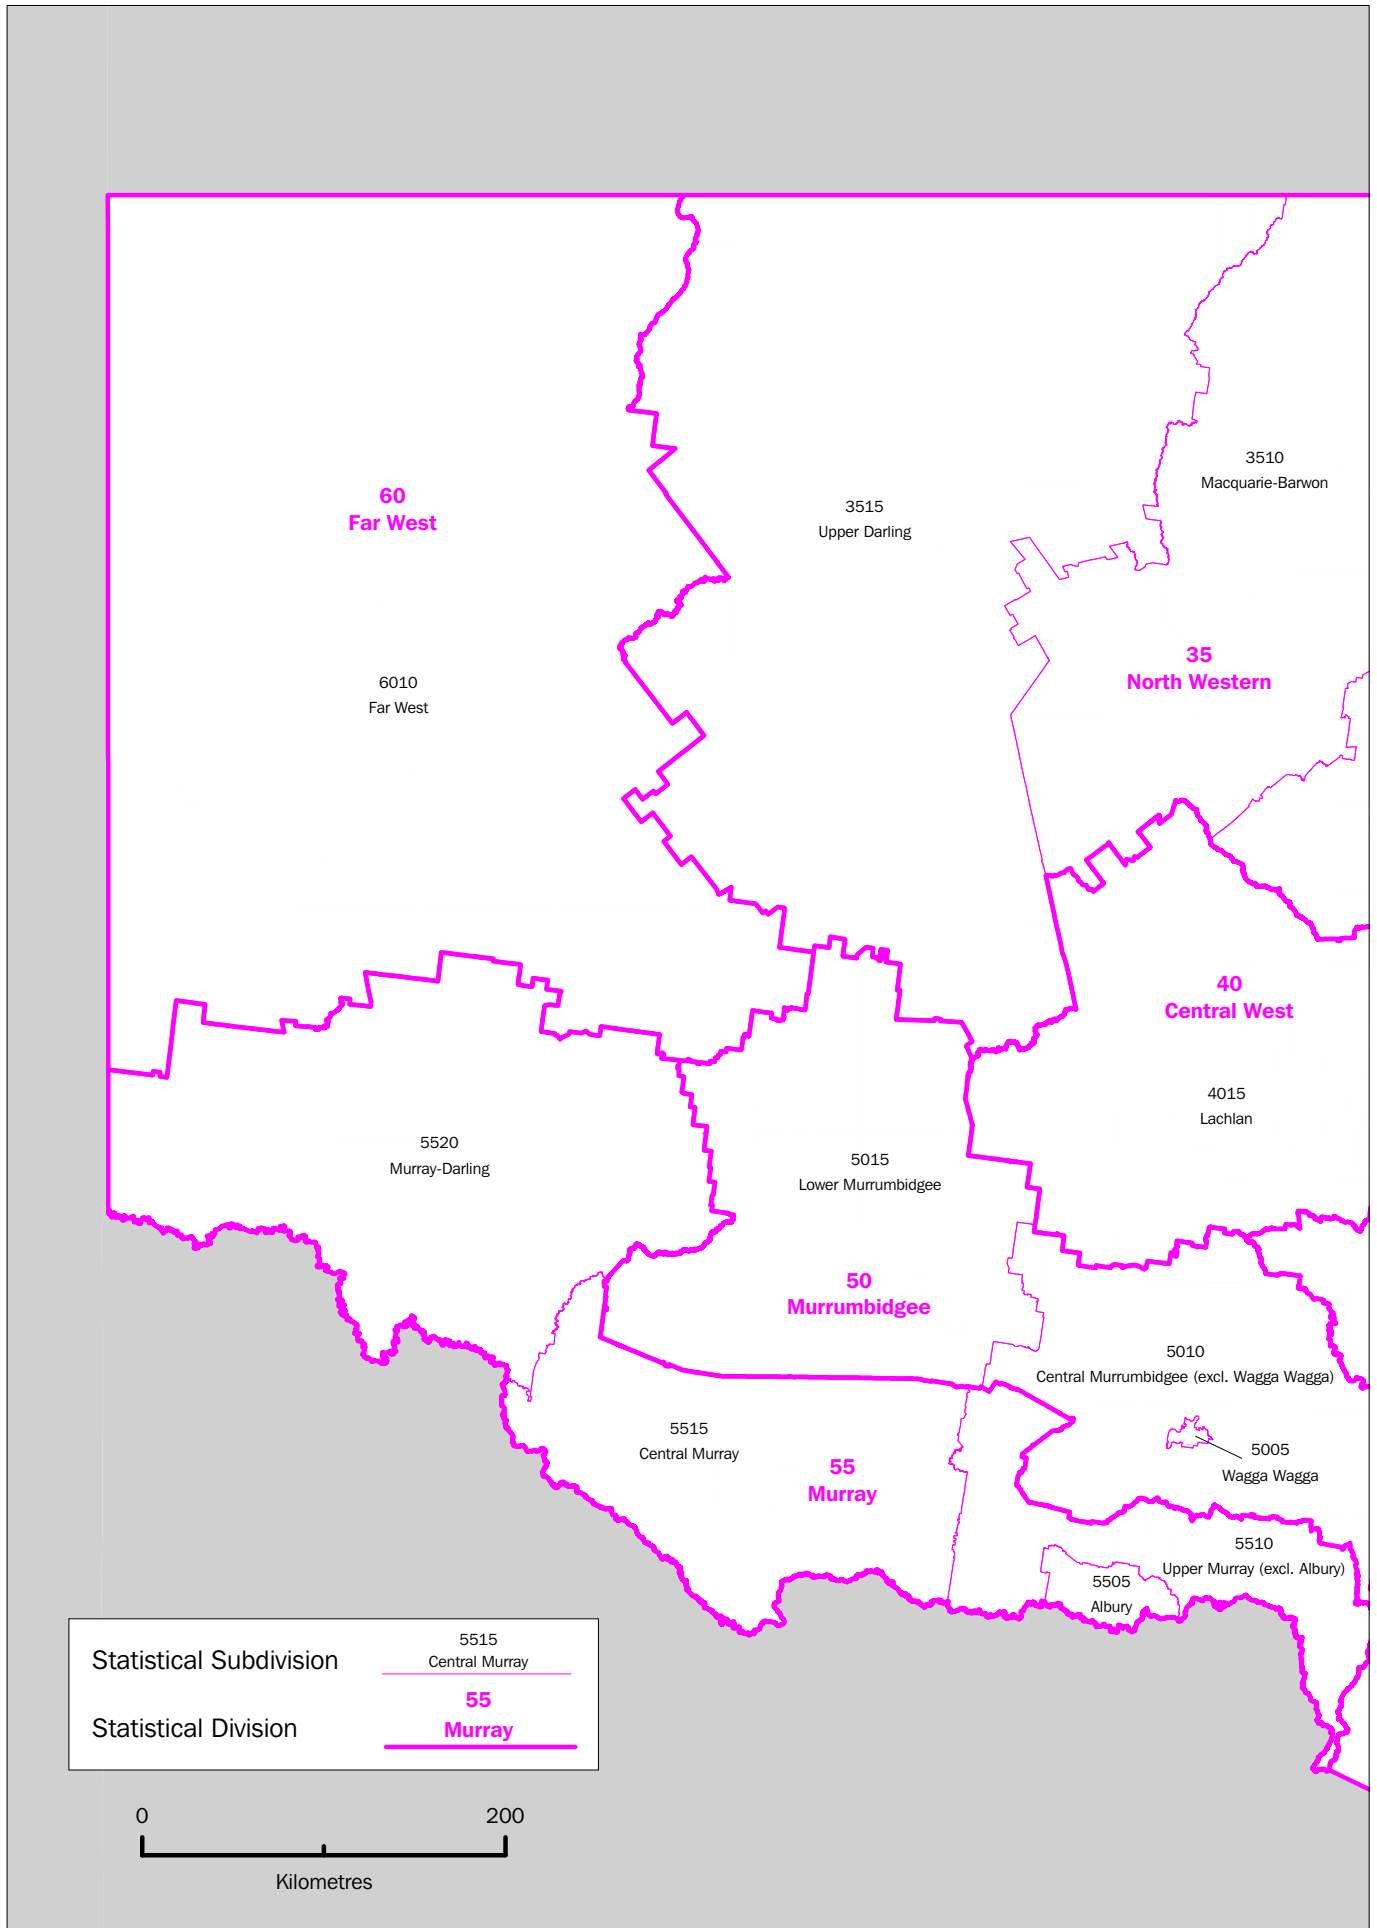

- Geographic areas *continued*** SDs outside the capital city are designed to be relatively homogeneous regions characterised by identifiable social and economic links between the inhabitants and the economic units in the region, under the unifying influence of one or more major towns or cities.
- State/Territory (STE)*: States and Territories consist of one or more SDs and are the largest type of spatial unit in the ASGC. The six Australian States and five Territories which are part of geographic Australia and included in the 2001 ASGC are New South Wales, Victoria, Queensland, South Australia, Western Australia, Tasmania, Northern Territory, Australian Capital Territory, Jervis Bay Territory and the external Territories of Christmas Island and Cocos (Keeling) Islands. In the ASGC, Jervis Bay Territory, the Territory of Christmas Island and the Territory of Cocos (Keeling) Islands are combined to form Other Territories (OT).
- For this series of publications, data for Other Territories are published down to SSD level in 2015.0 (Australia) and down to SLA in 2015.1 (New South Wales) and 2015.5 (Western Australia). That is, Jervis Bay Territory is included in 2015.1 and Christmas Island and Cocos (Keeling) Islands are included in 2015.5.
- More information about definitions, and lists of codes and names of the geographic areas can be found in *Volume 1: Australian Standard Geographical Classification (ASGC) 2001* (Cat. no. 1216.0) effective date 1 July 2001.
- Household** A household is defined as a group of two or more related or unrelated people who usually reside in the same dwelling, who regard themselves as a household, and who make common provision for food or other essentials for living; or a person living in a dwelling who makes provision for his/her own food and other essentials for living, without combining with any other person.
- Under this definition, in a group house where occupants share the dwelling, each occupant who usually supplies his/her own food should be counted as a separate household and issued with a separate Household Form. In practice, however, most such households usually only complete one form.
- Income** People aged 15 years and over are asked to indicate their usual gross weekly income by selecting an income range on the census form. There are 16 options ranging from 'Negative income', 'Nil income' through to '\$1,500 or more per week'. For example, a person with a gross weekly income of \$650 per week would tick the range '\$600–\$699 per week'. Gross weekly income is the income before tax, superannuation, health insurance, or other deductions are made. Gross income includes: family allowance, parenting payment, pensions, unemployment benefits, student allowances, maintenance (child support), superannuation, wages, salary, overtime, dividends, rents received, interest received, business or farm income (less operation expenses) and worker's compensation received.
- Indigenous** A person is defined to be of Indigenous origin if he or she identifies himself or herself as of Aboriginal and/or Torres Strait Islander origin.
- Internet** Internet includes: Internet connections in private and business applications; Internet connection through a computer or set top box, games machine, mobile phone, or other means; and Internet used at other locations including libraries, Internet cafes, shops, educational institutions, or at a neighbour or friends place of residence.
- Jervis Bay Territory** See Geographic areas.
- Overseas-born** Overseas-born people are those who state that they were born in a country other than Australia, those born at sea, and those whose responses are classed as 'Inadequately described' or 'Not elsewhere classified'.

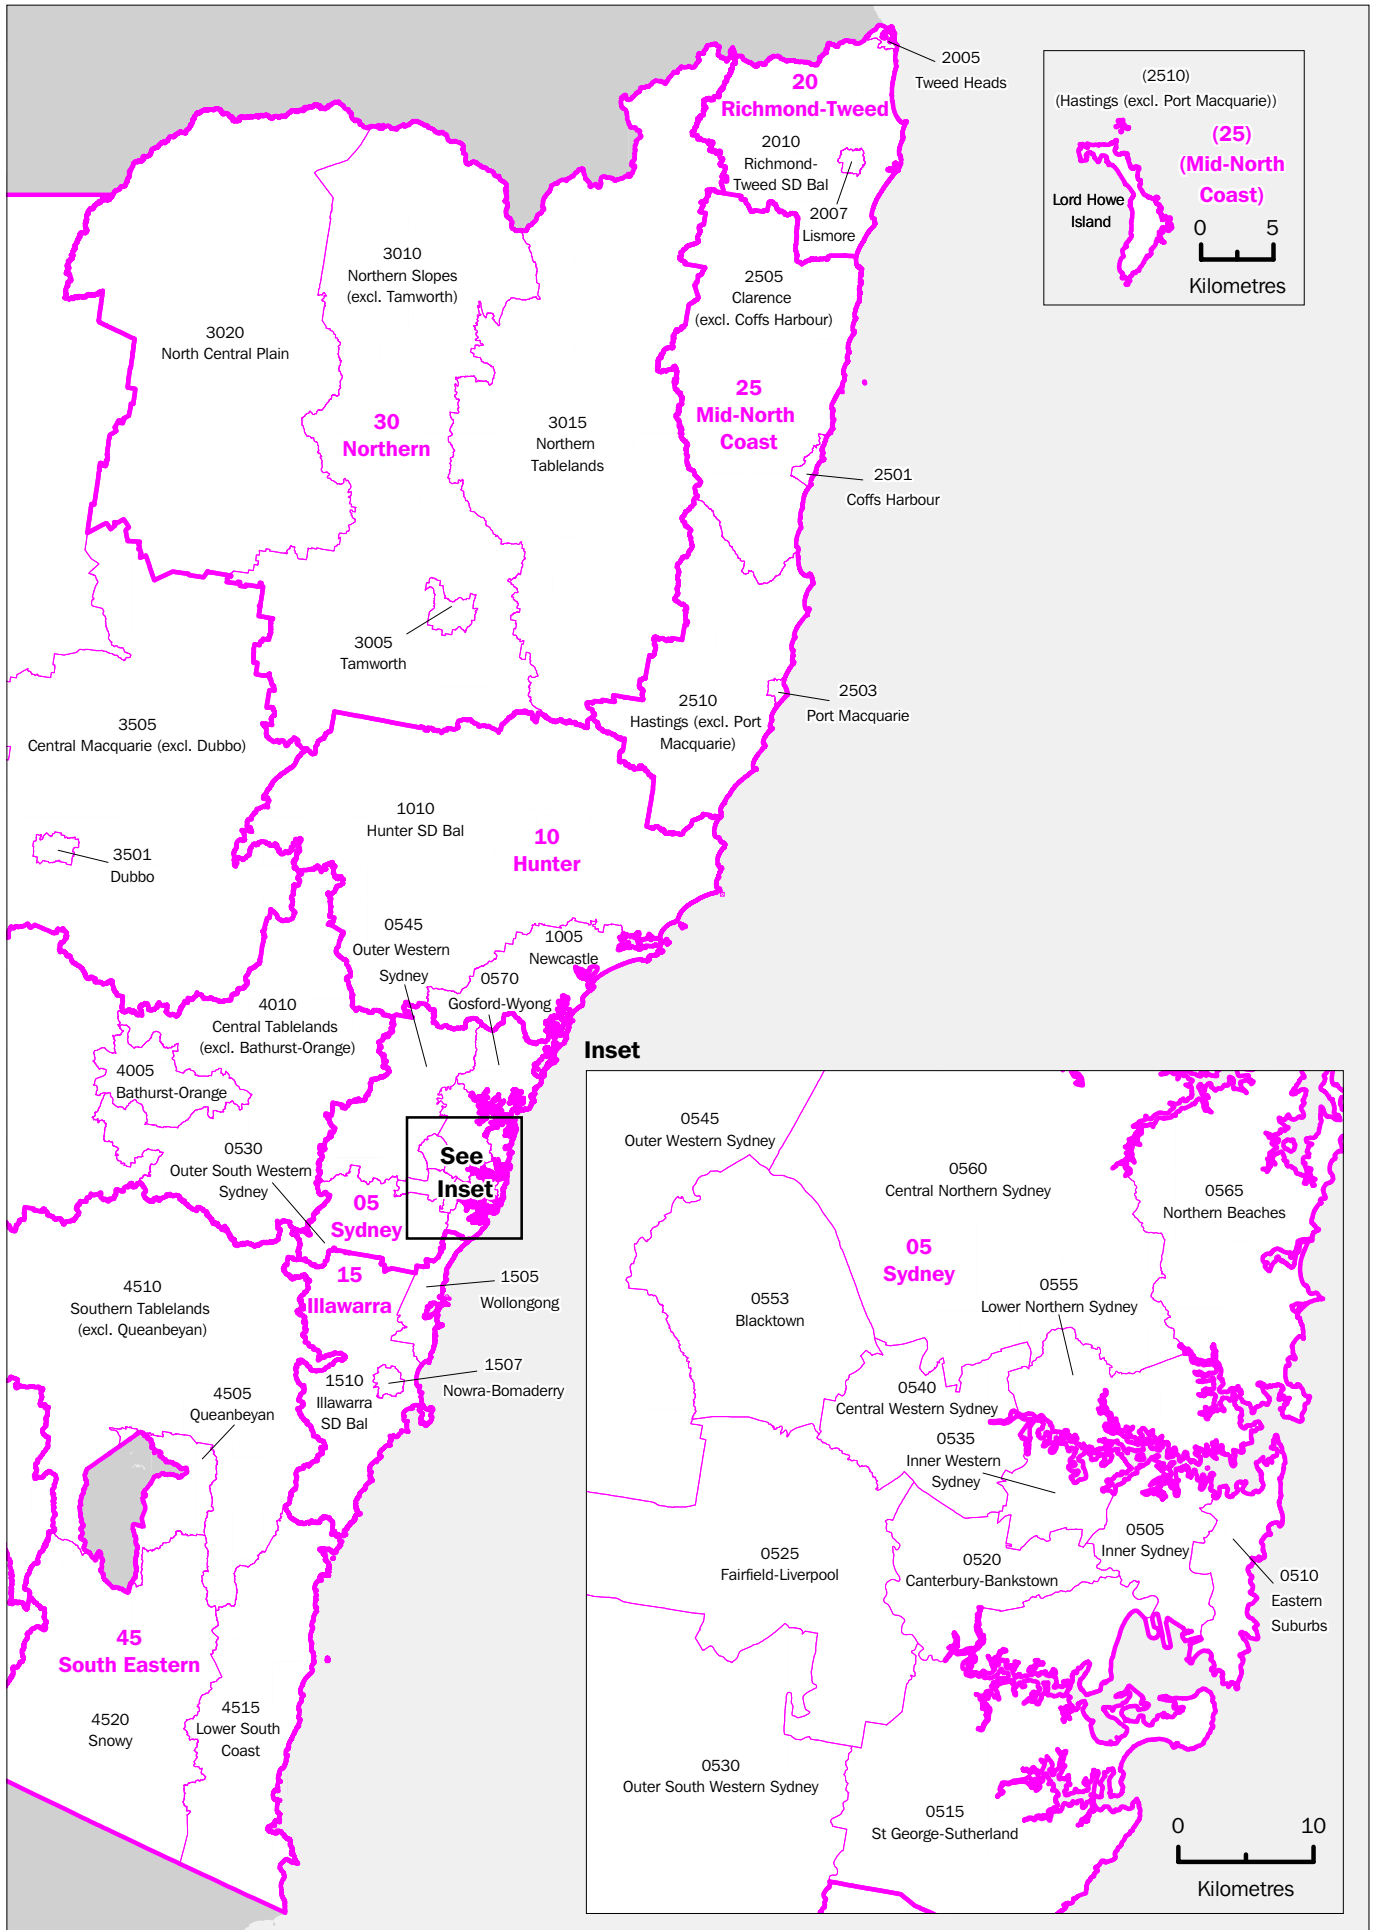

## GLOSSARY *continued*

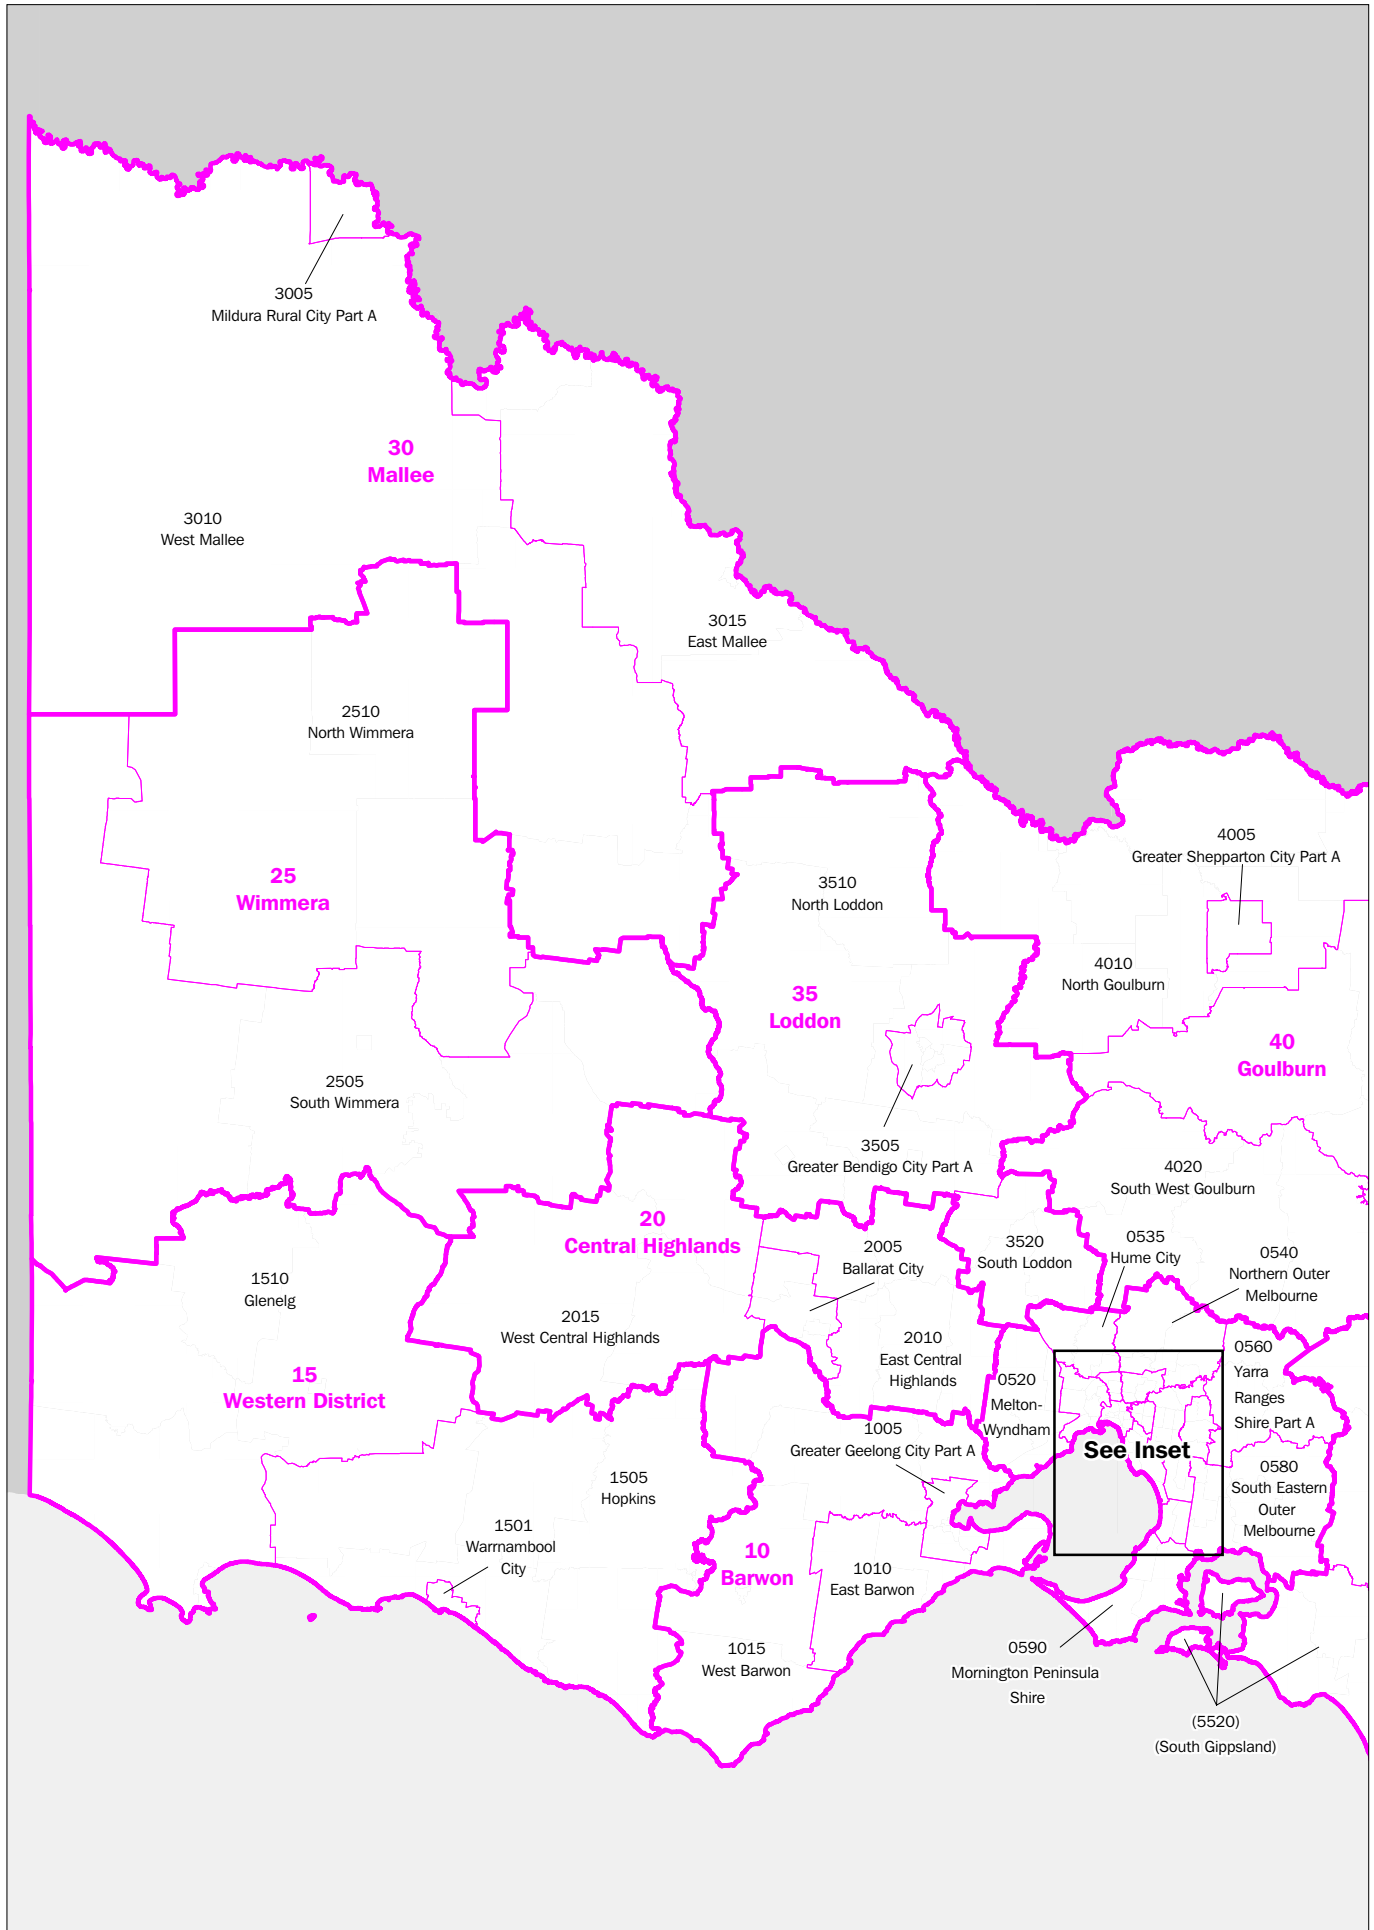

---

- Personal Computer (PC)** PCs include: computers used at home for private and business purposes, portable computers, personal organisers, computers brought home from the workplace, and dedicated word processors. Game machines are not included.
- Population** Table 3 shows the population on 'Census night' and 'Usually resident'. The population on Census Night is on a 'Place of enumeration basis'. The usually resident population is on a 'Place of usual residence' basis. Most population counts presented in this publication are on a place of enumeration basis. Place of enumeration means where the person was counted on Census Night.

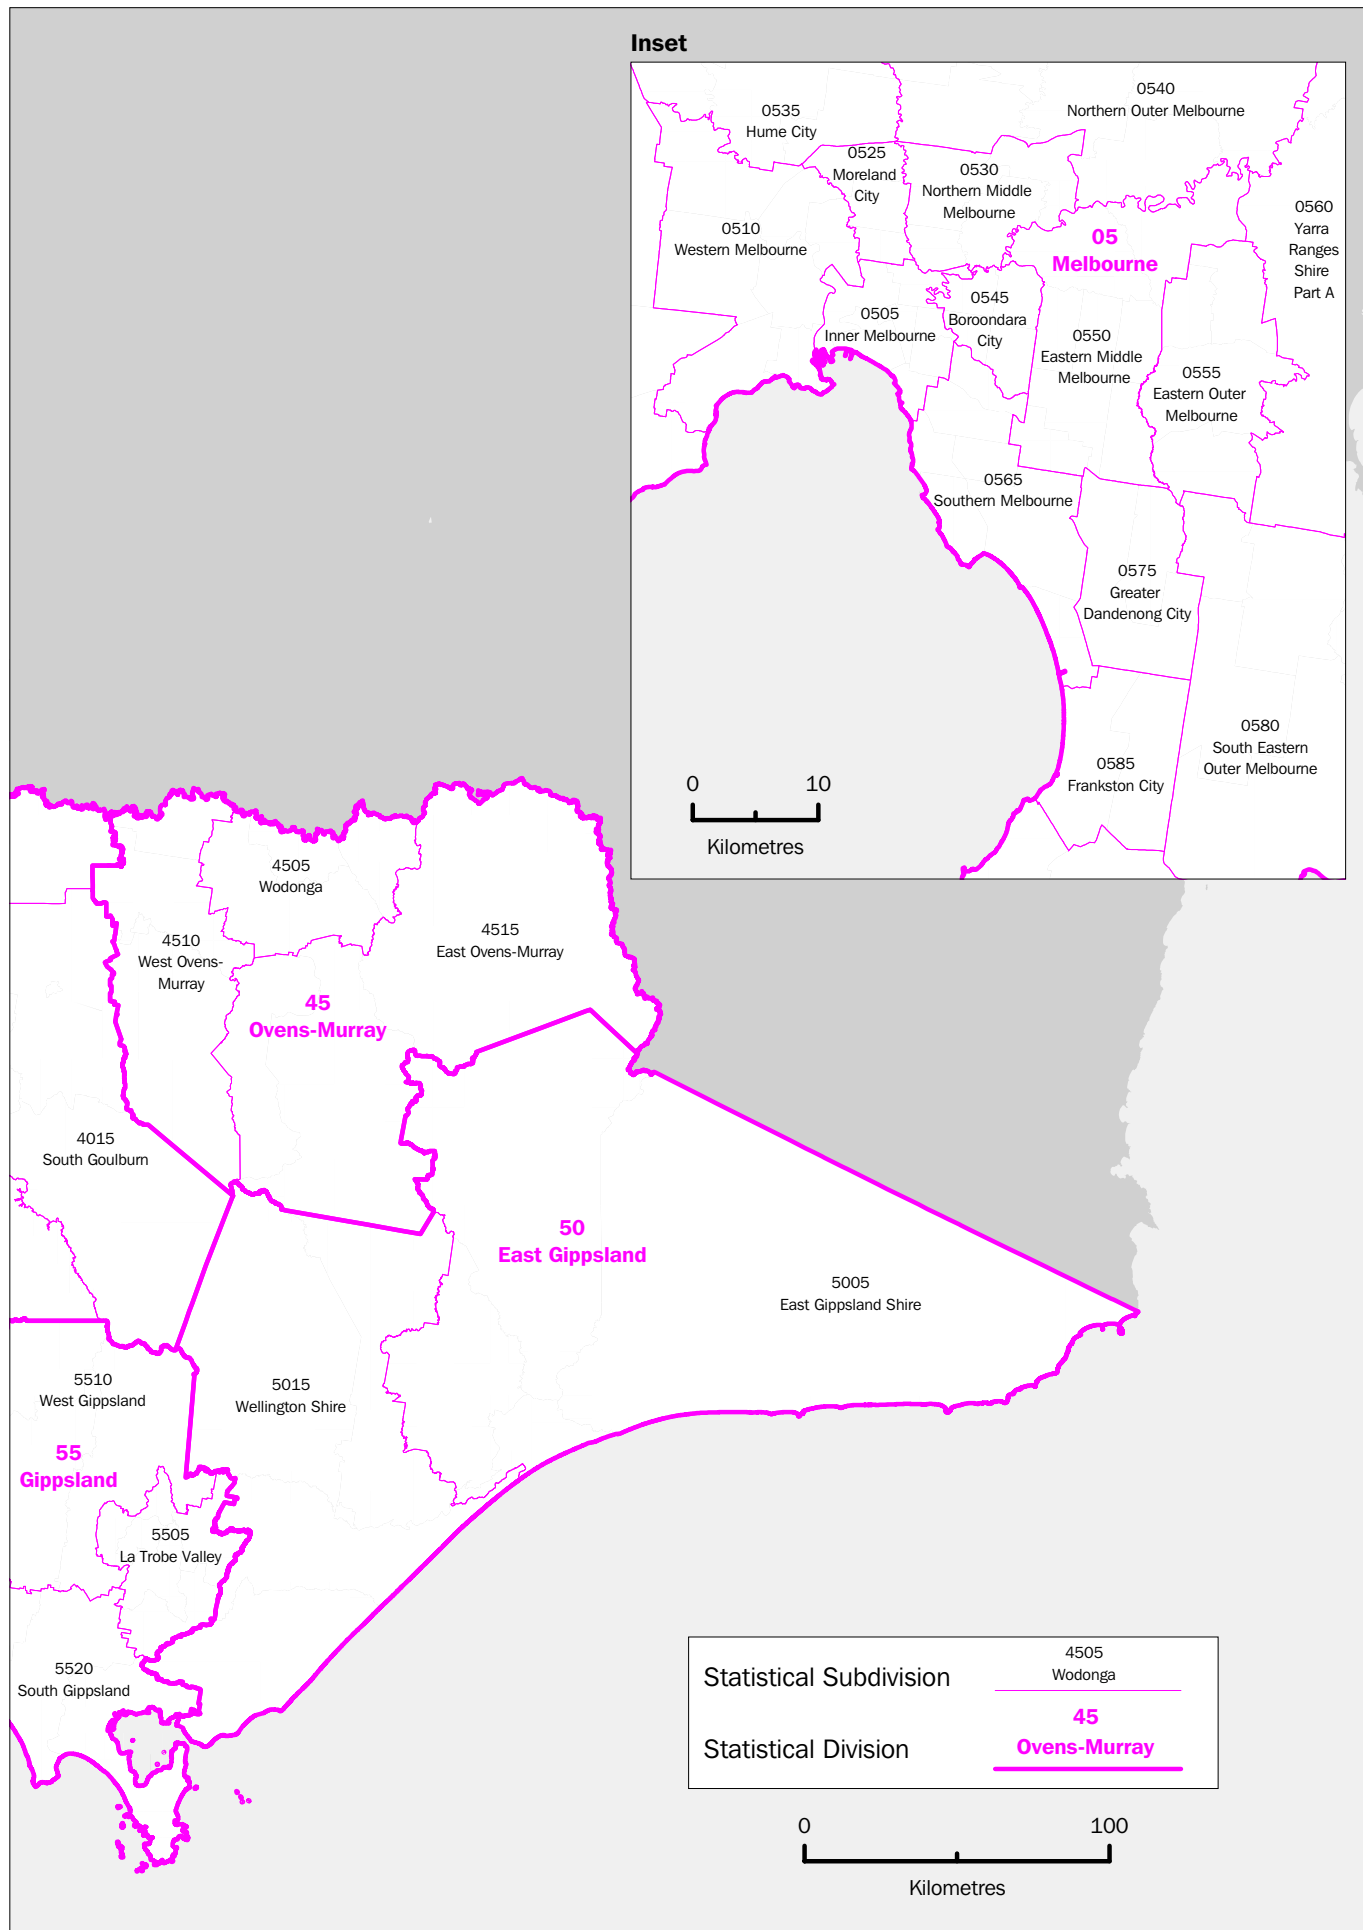

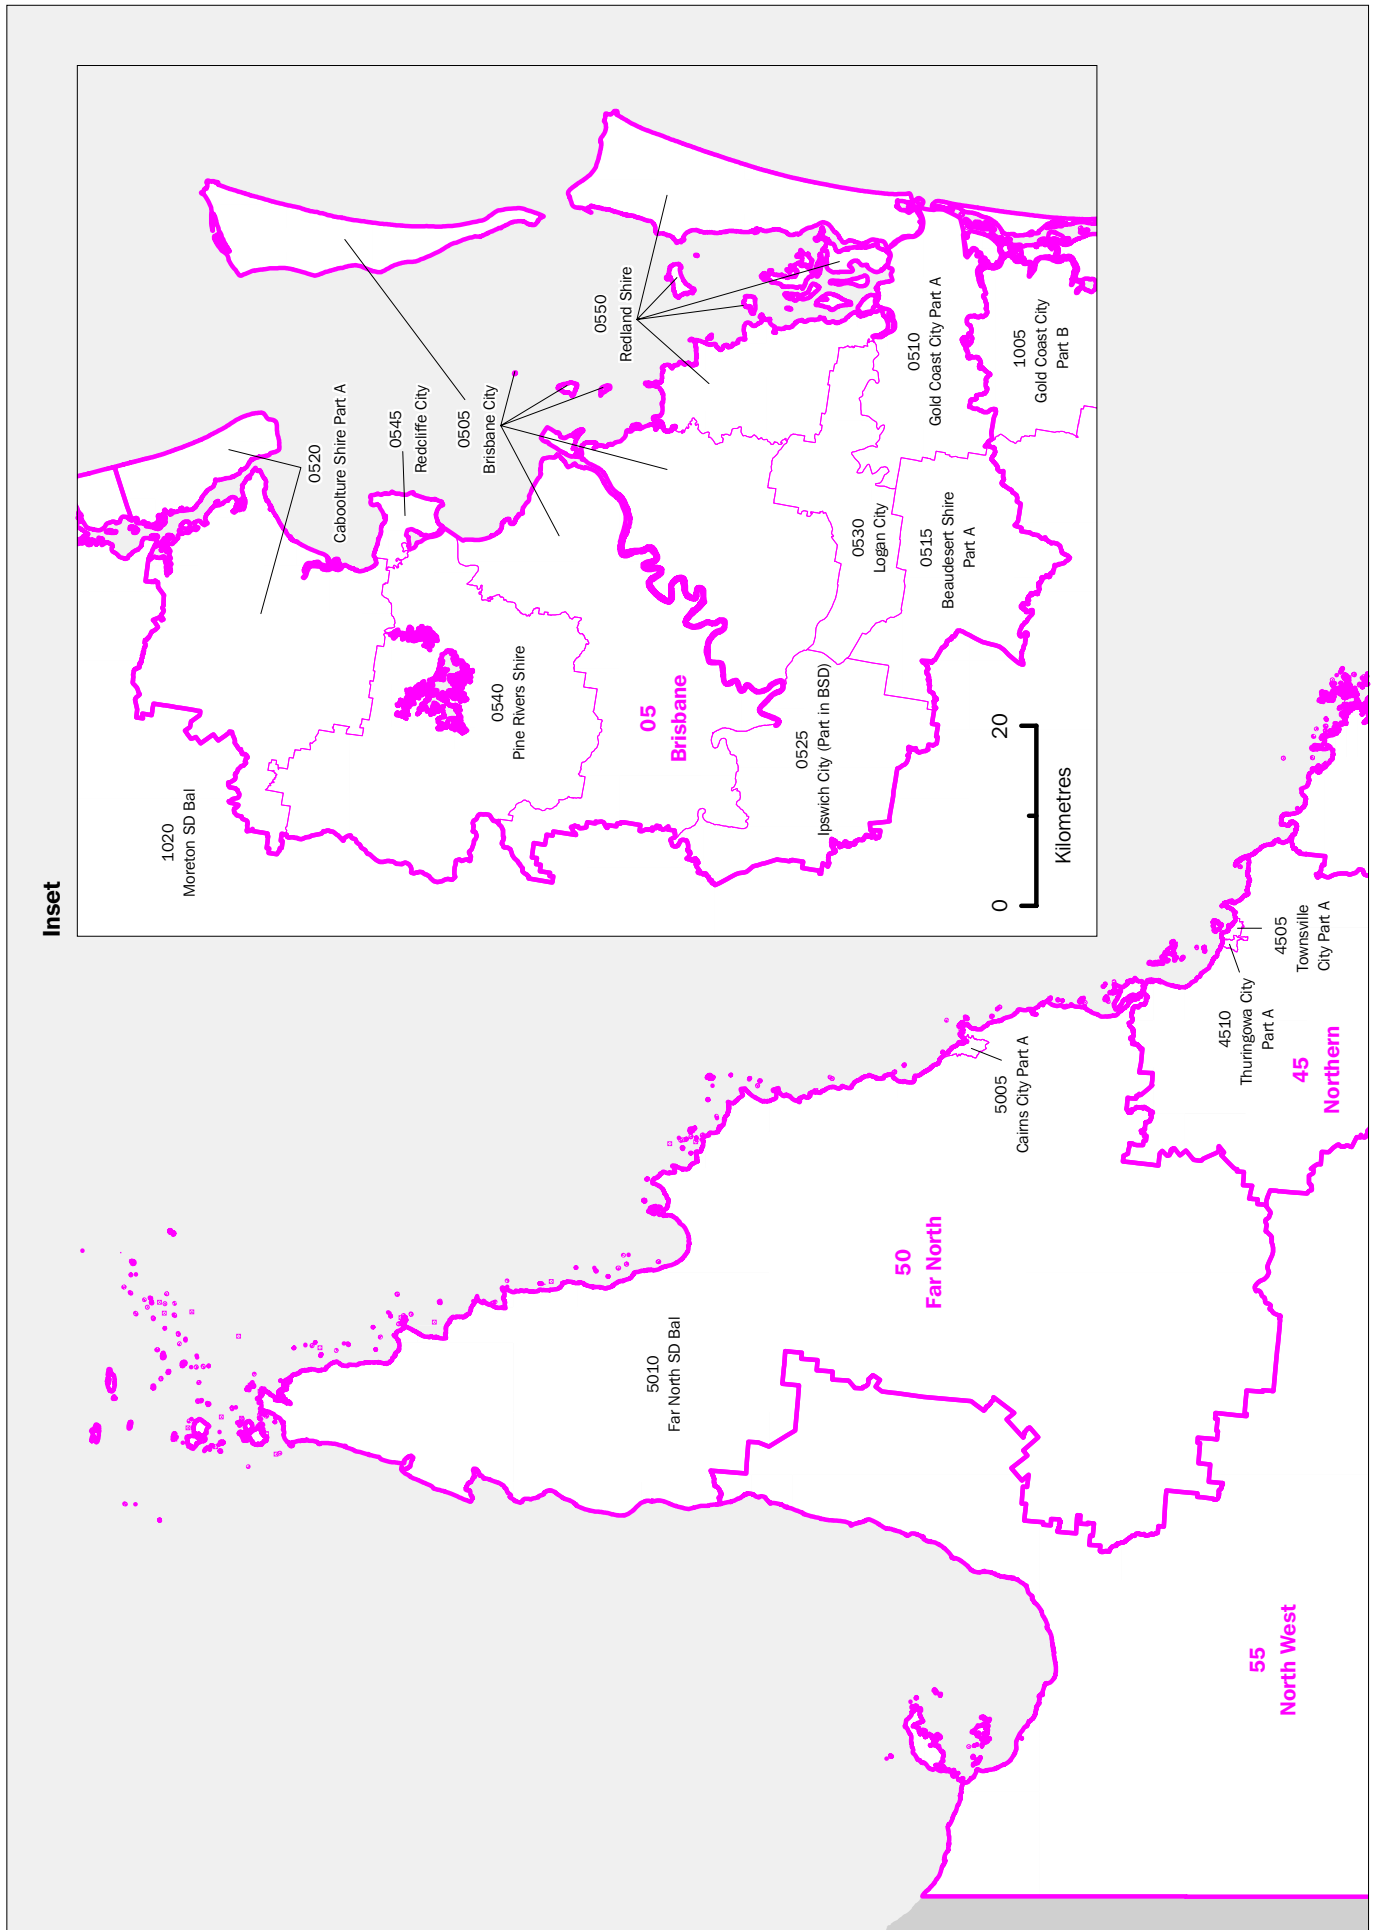

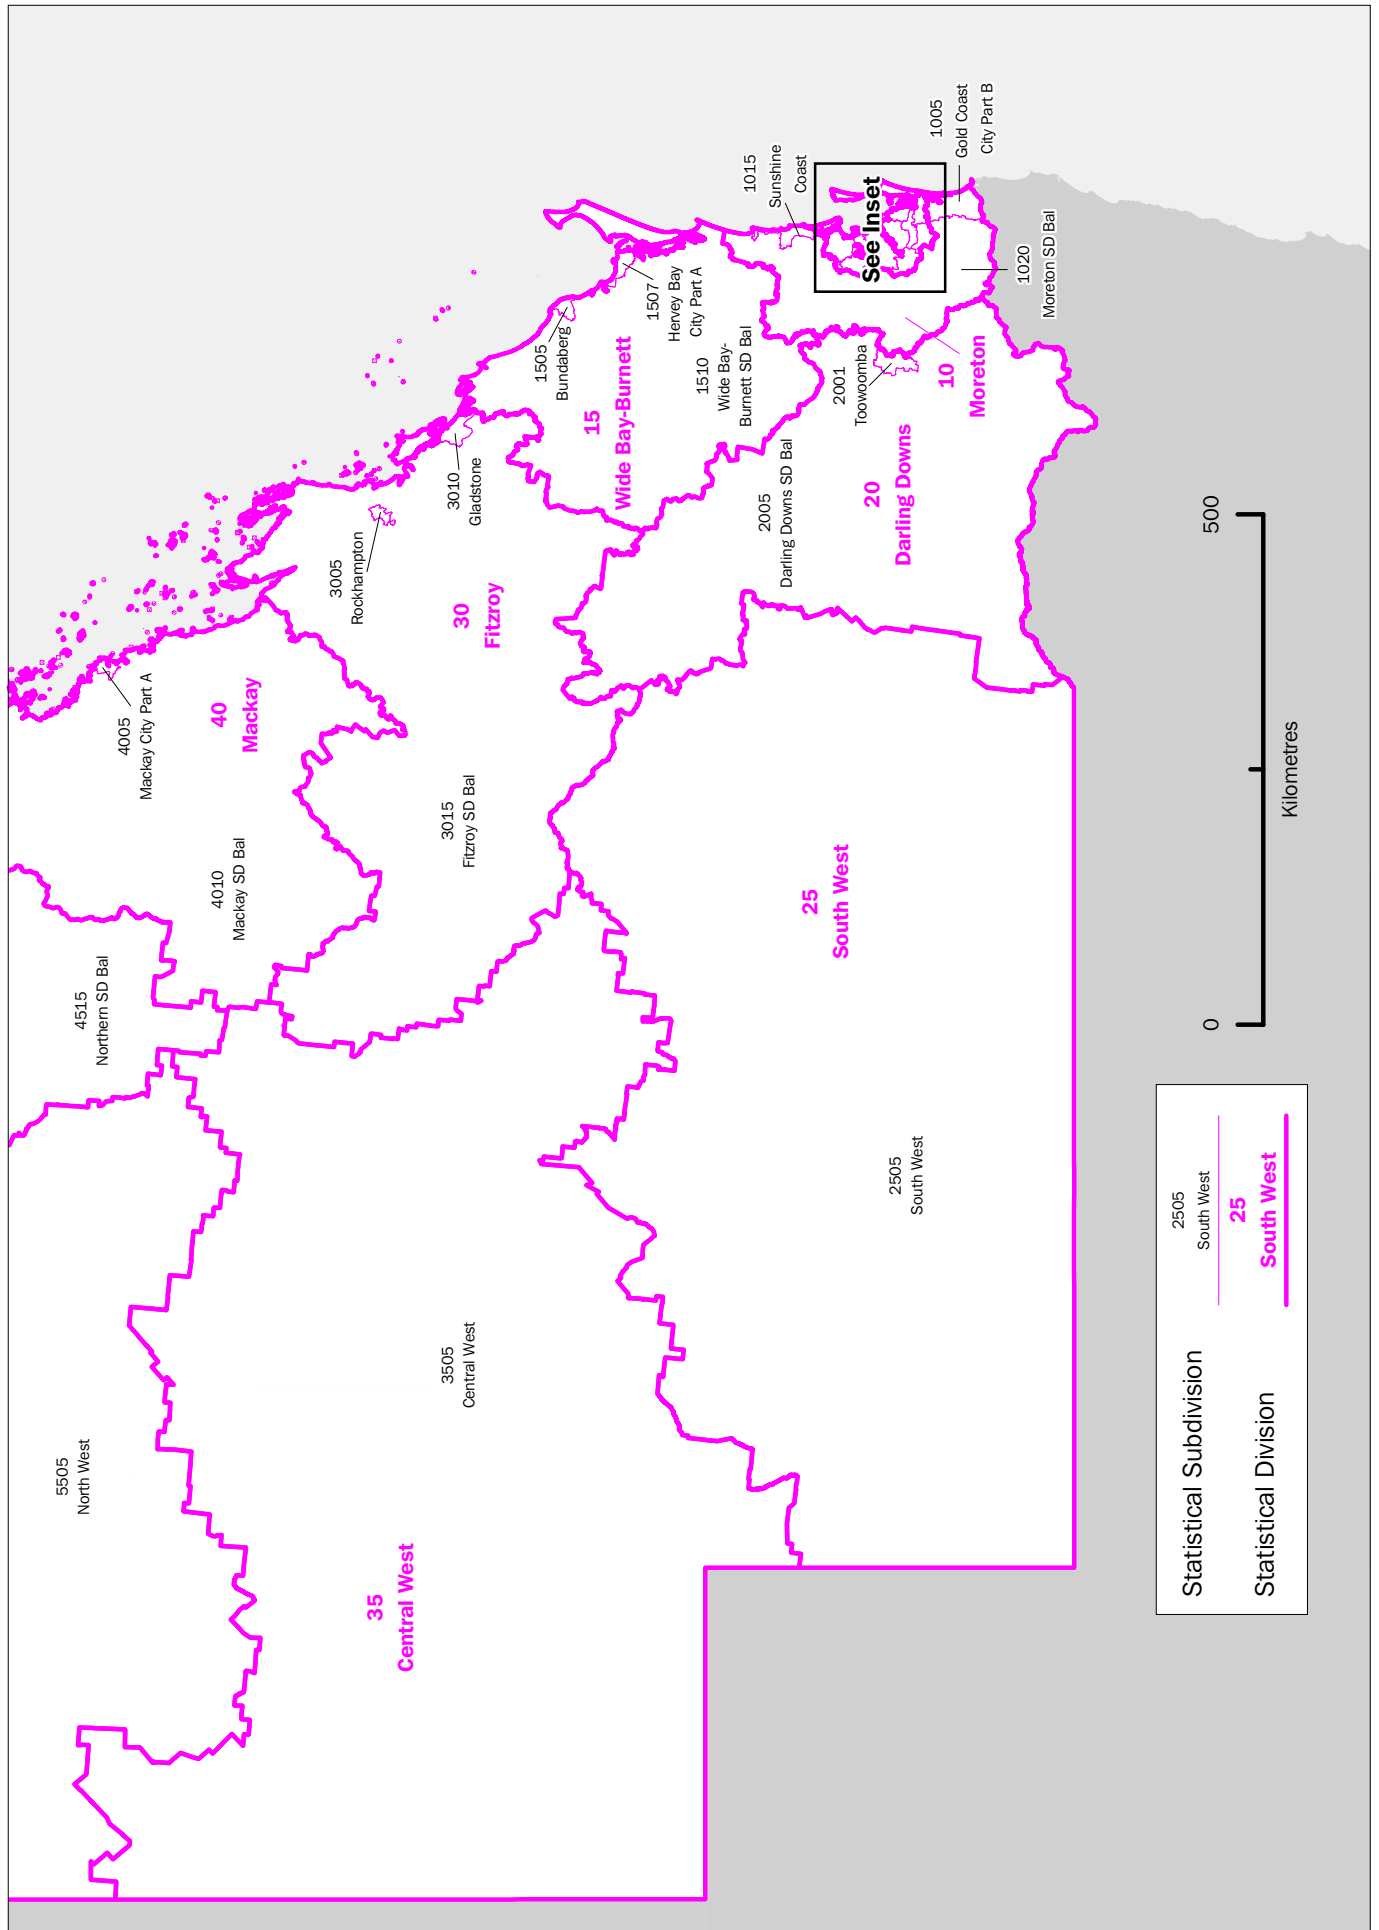

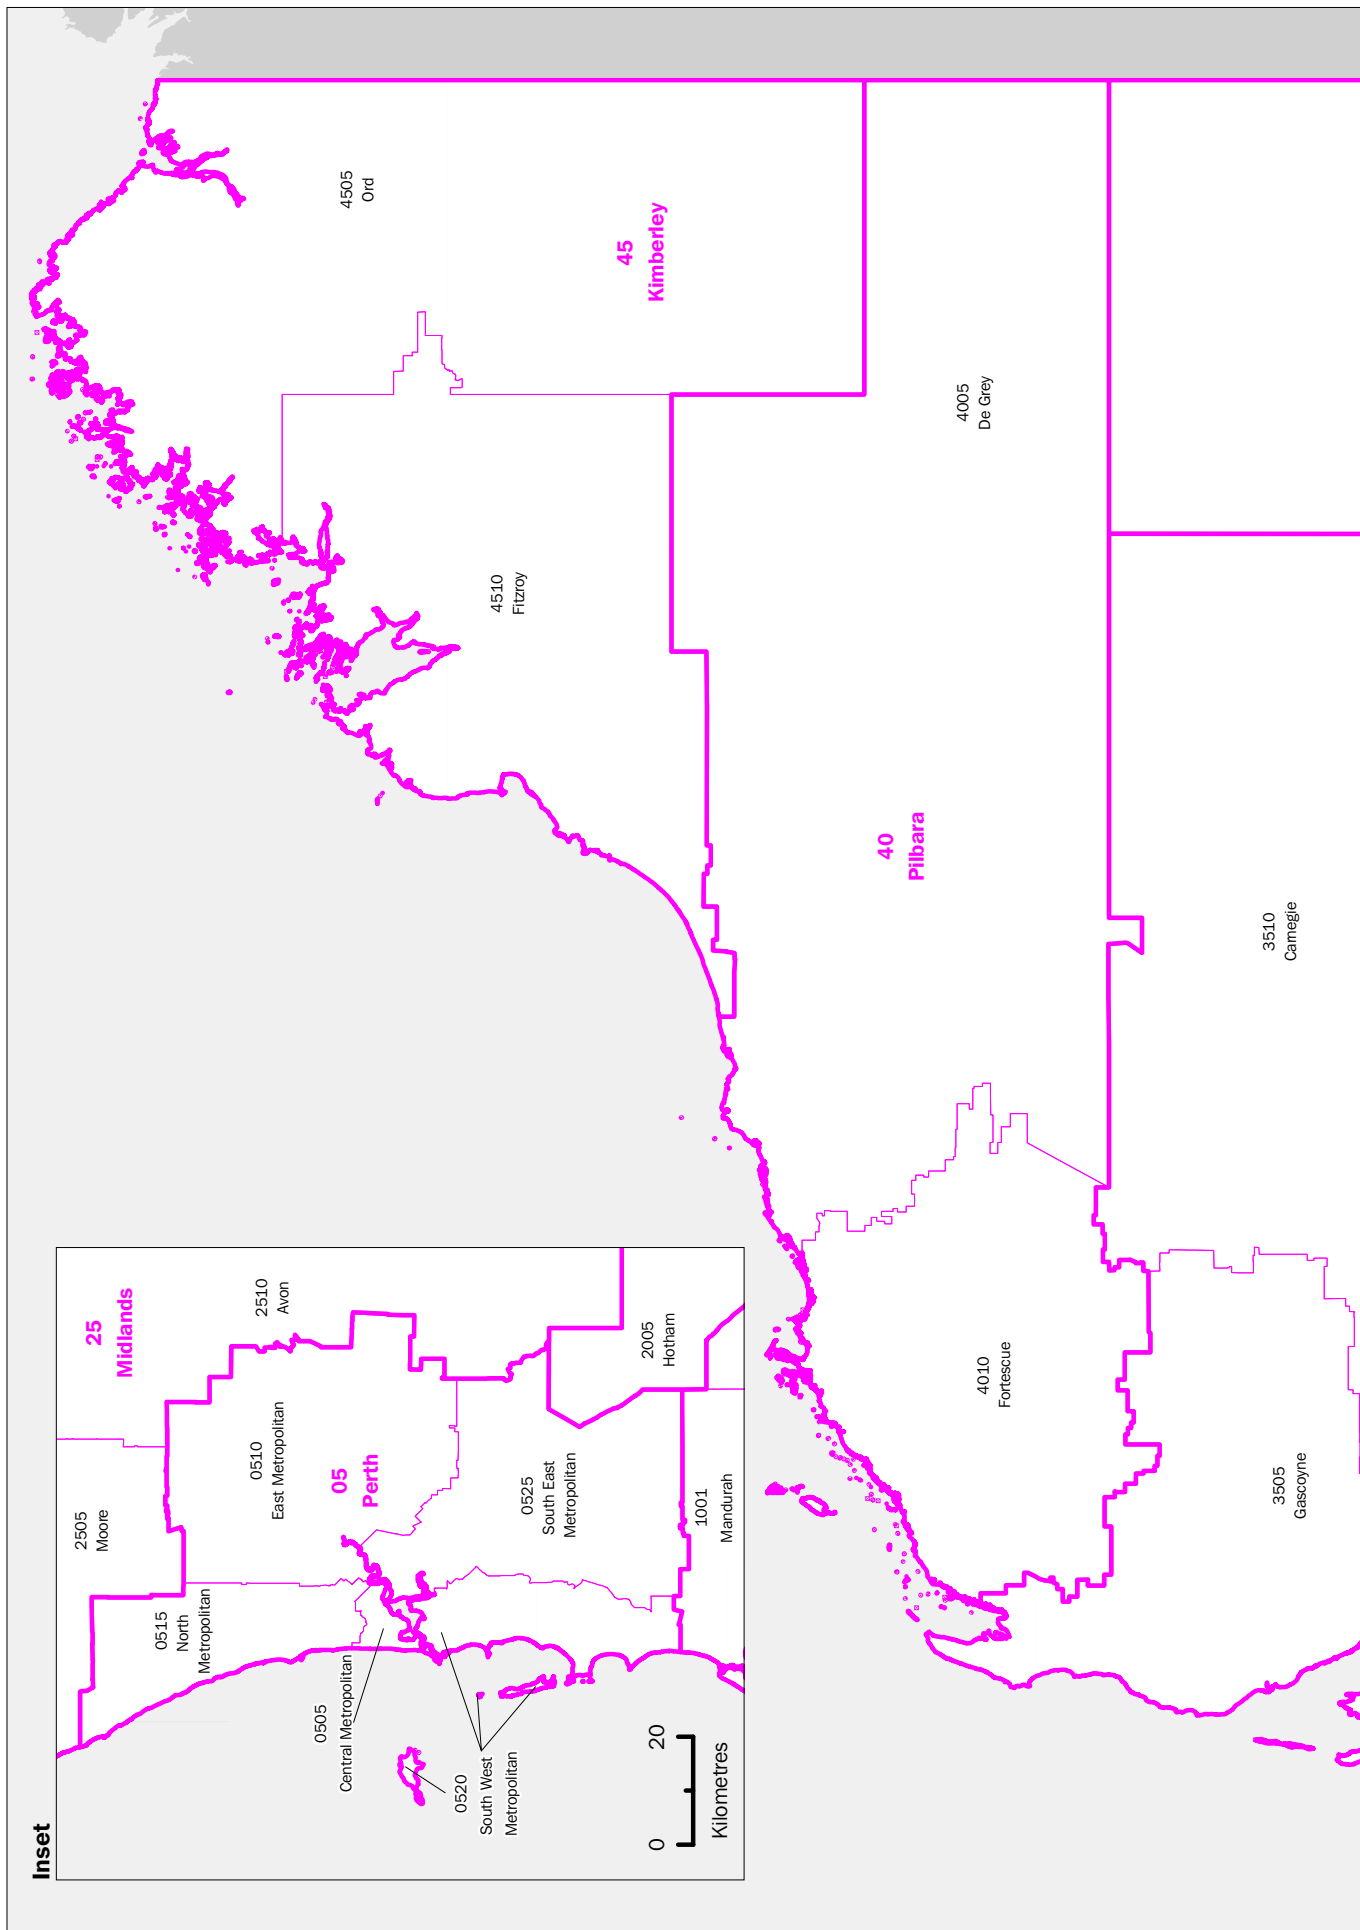

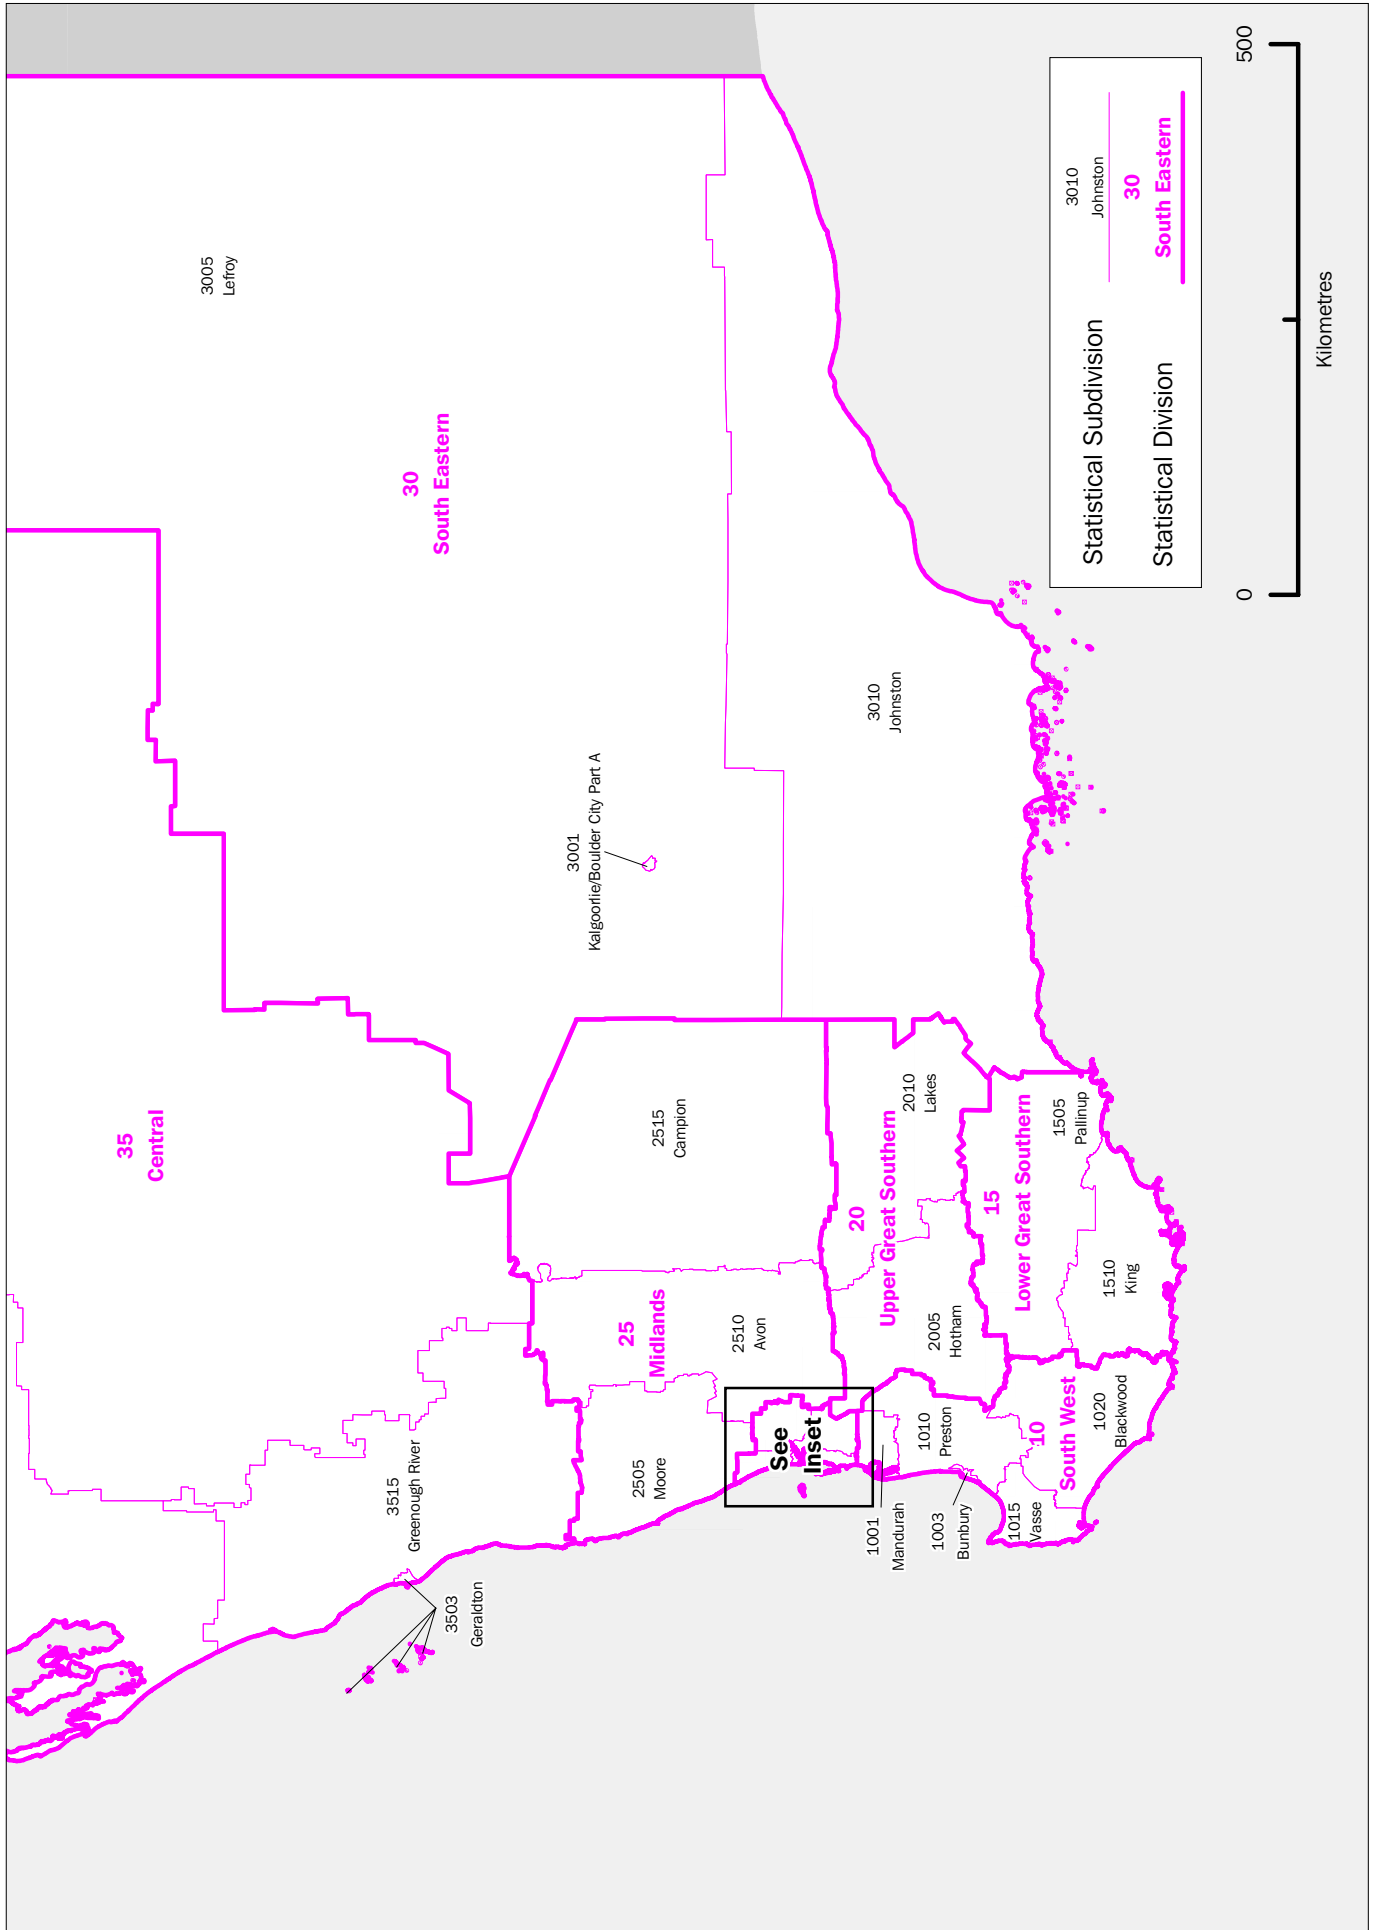

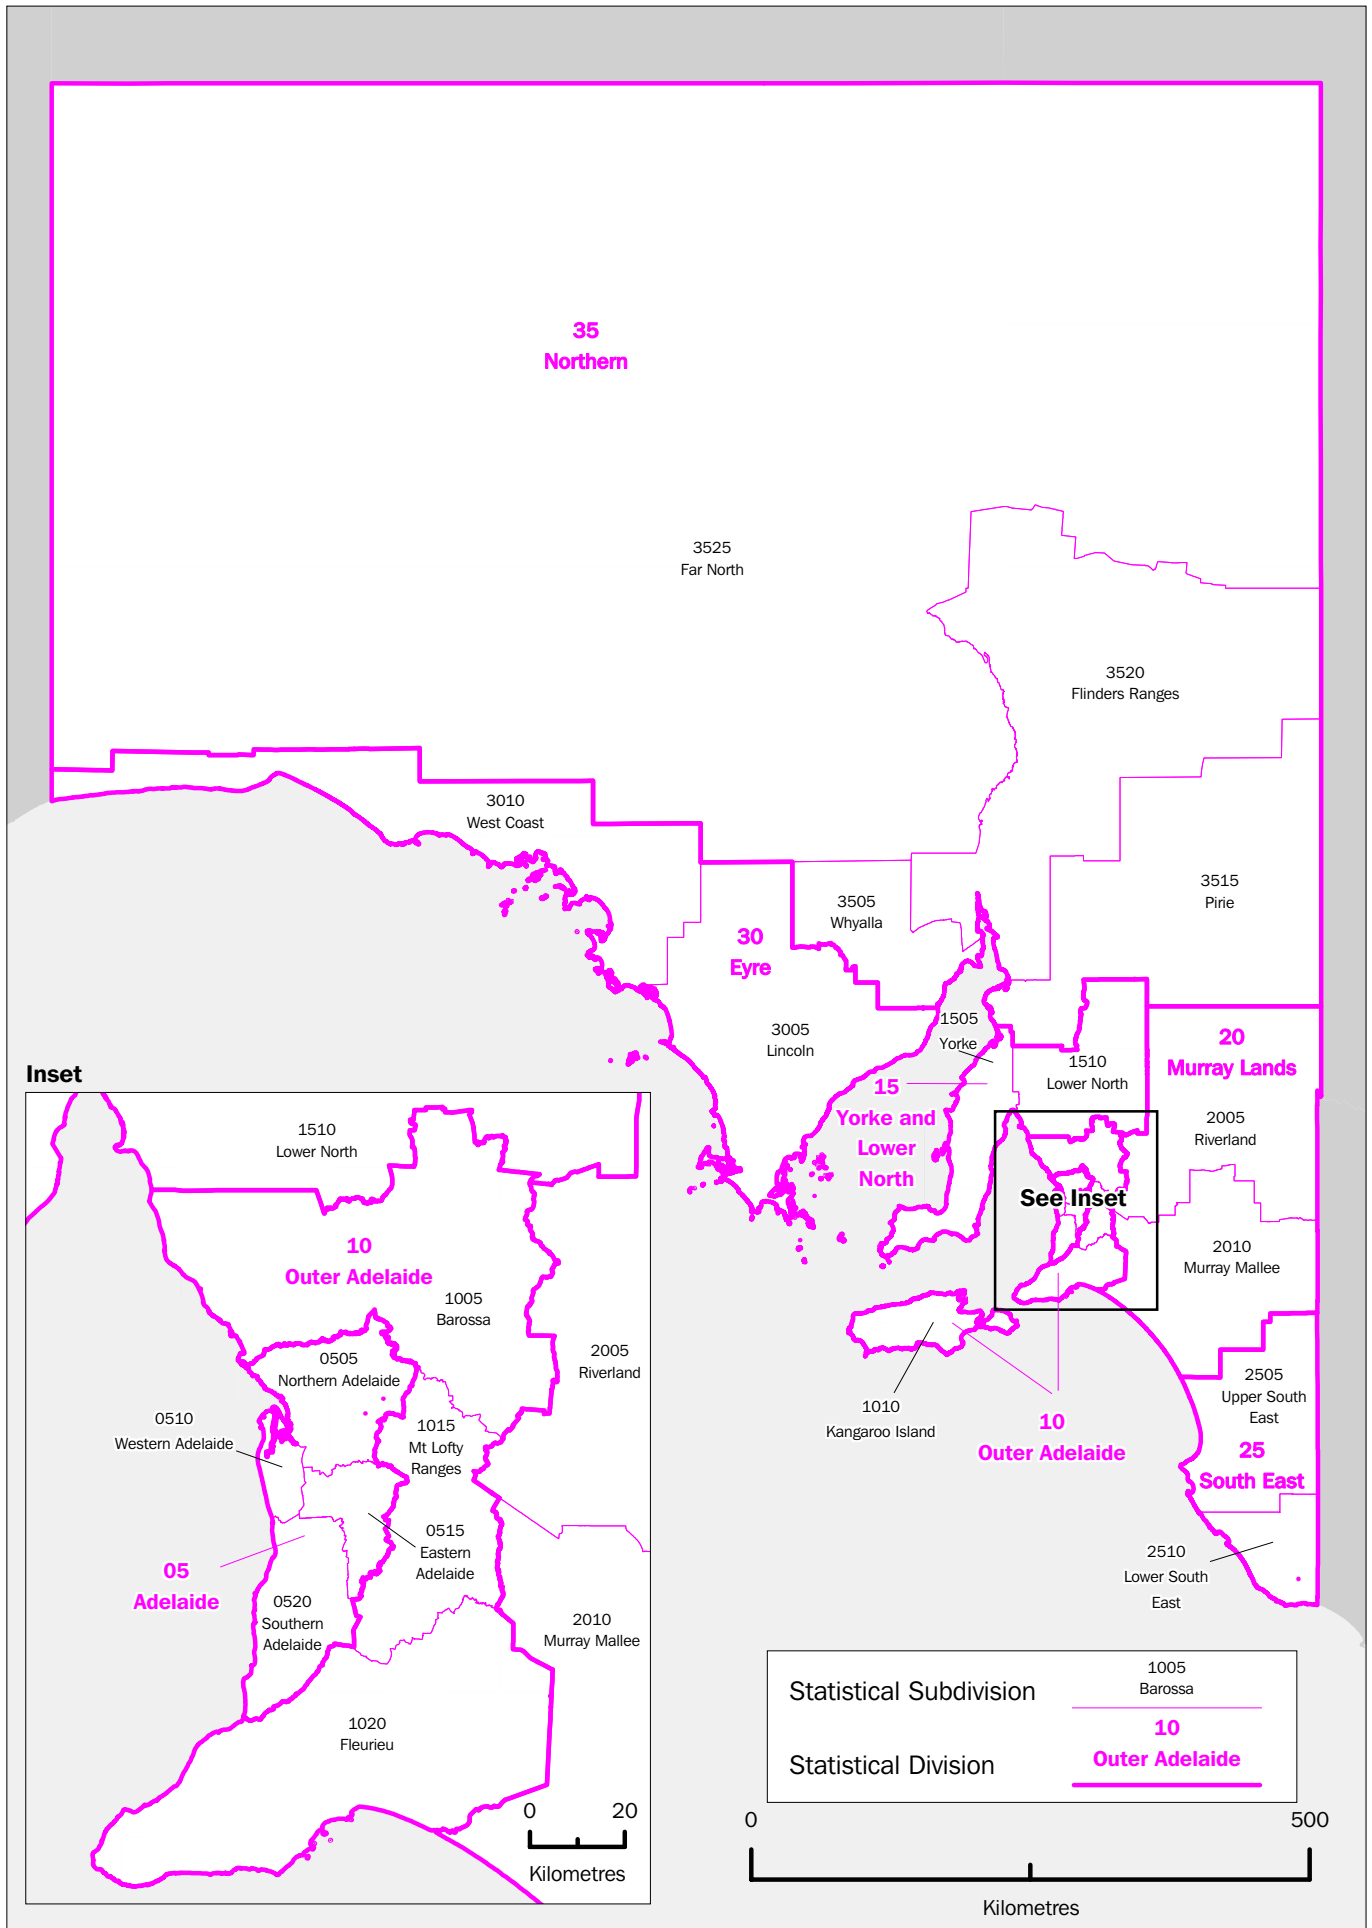

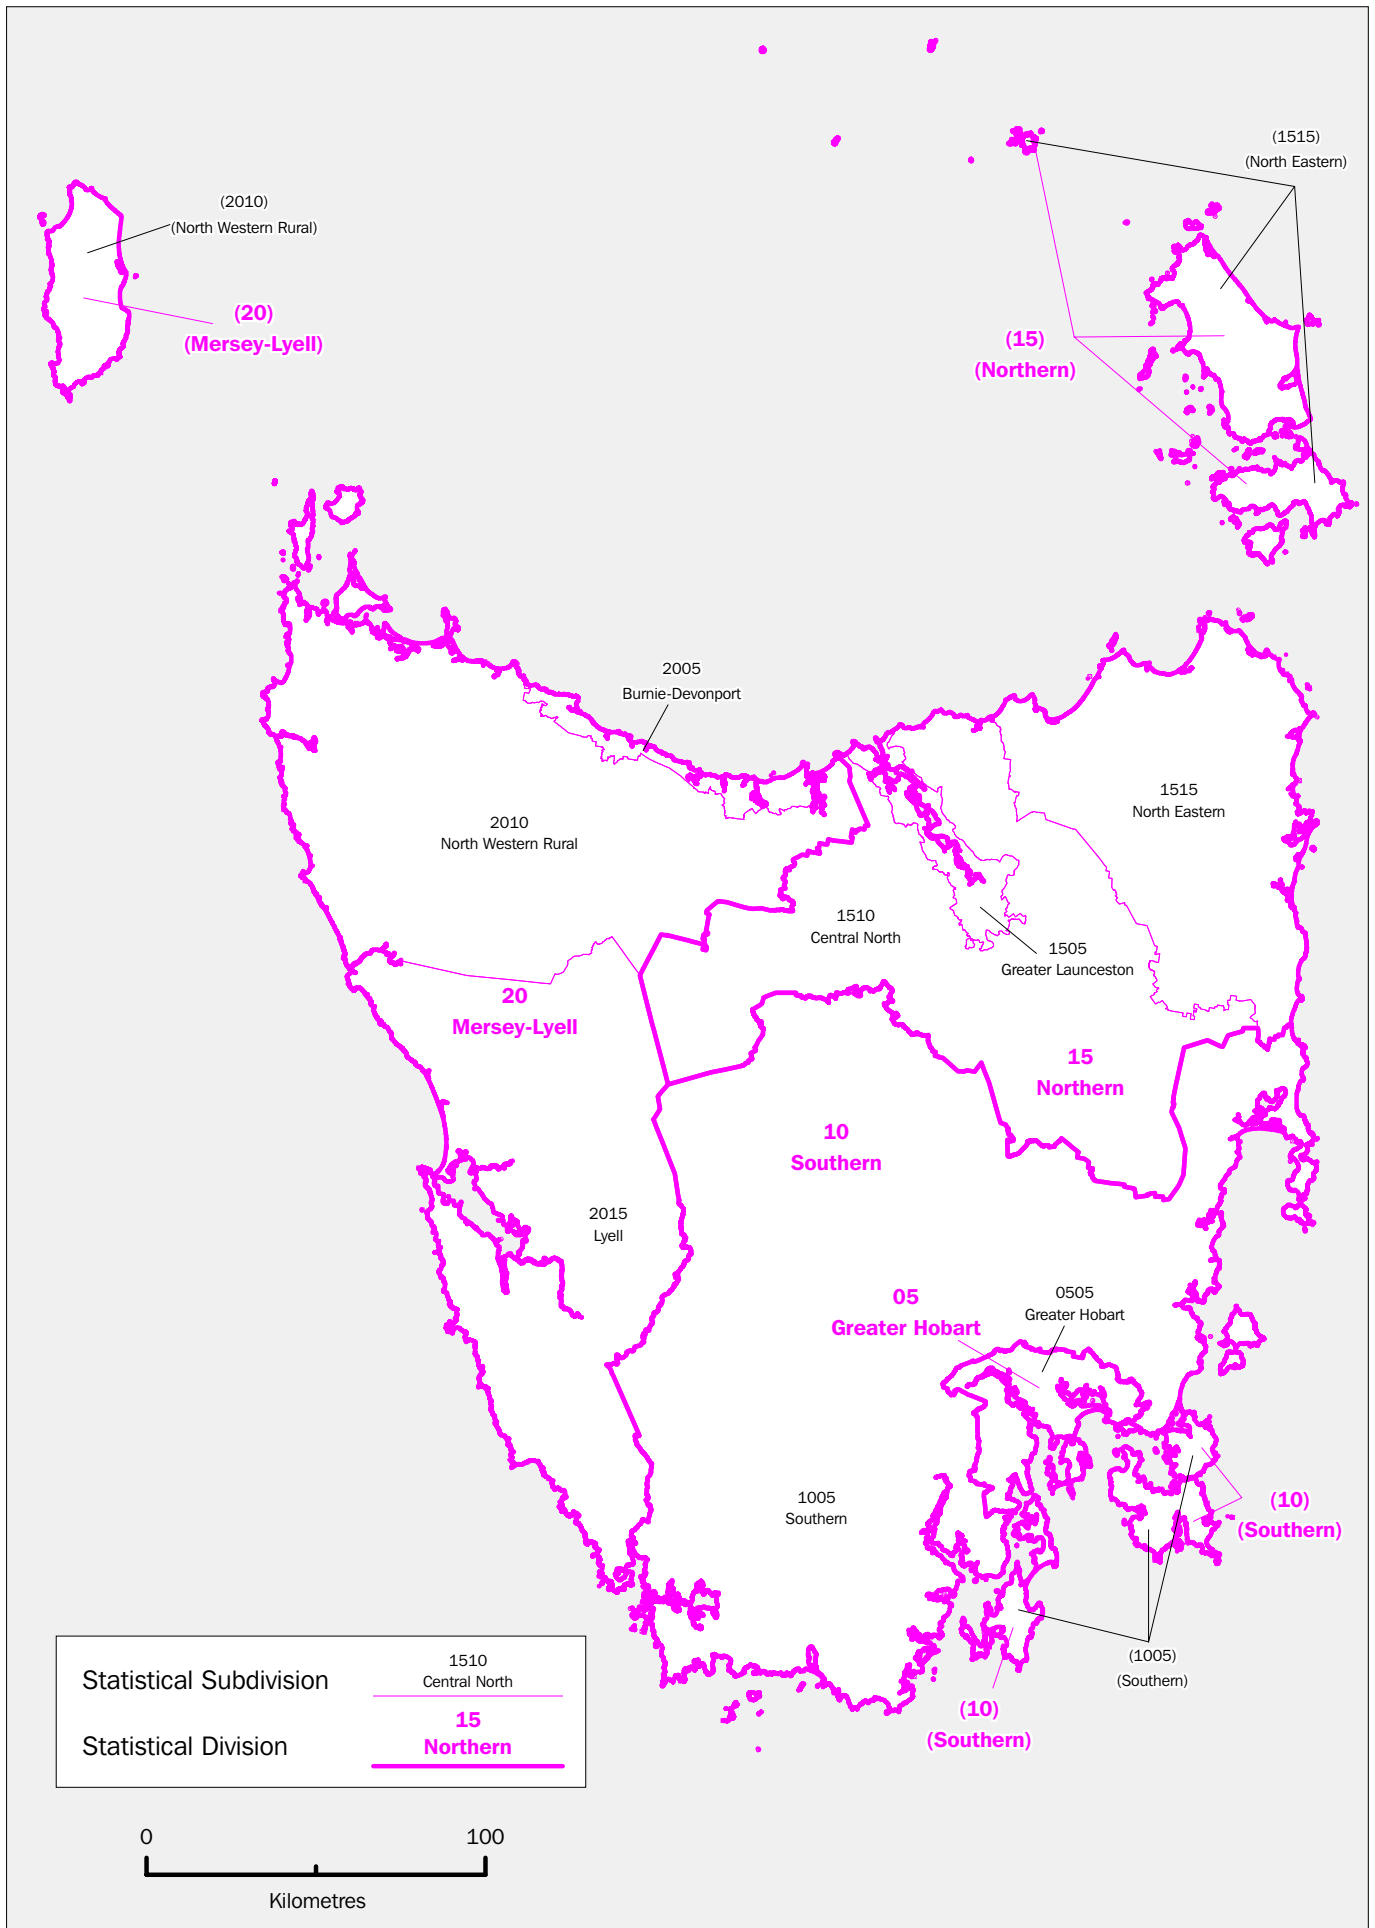

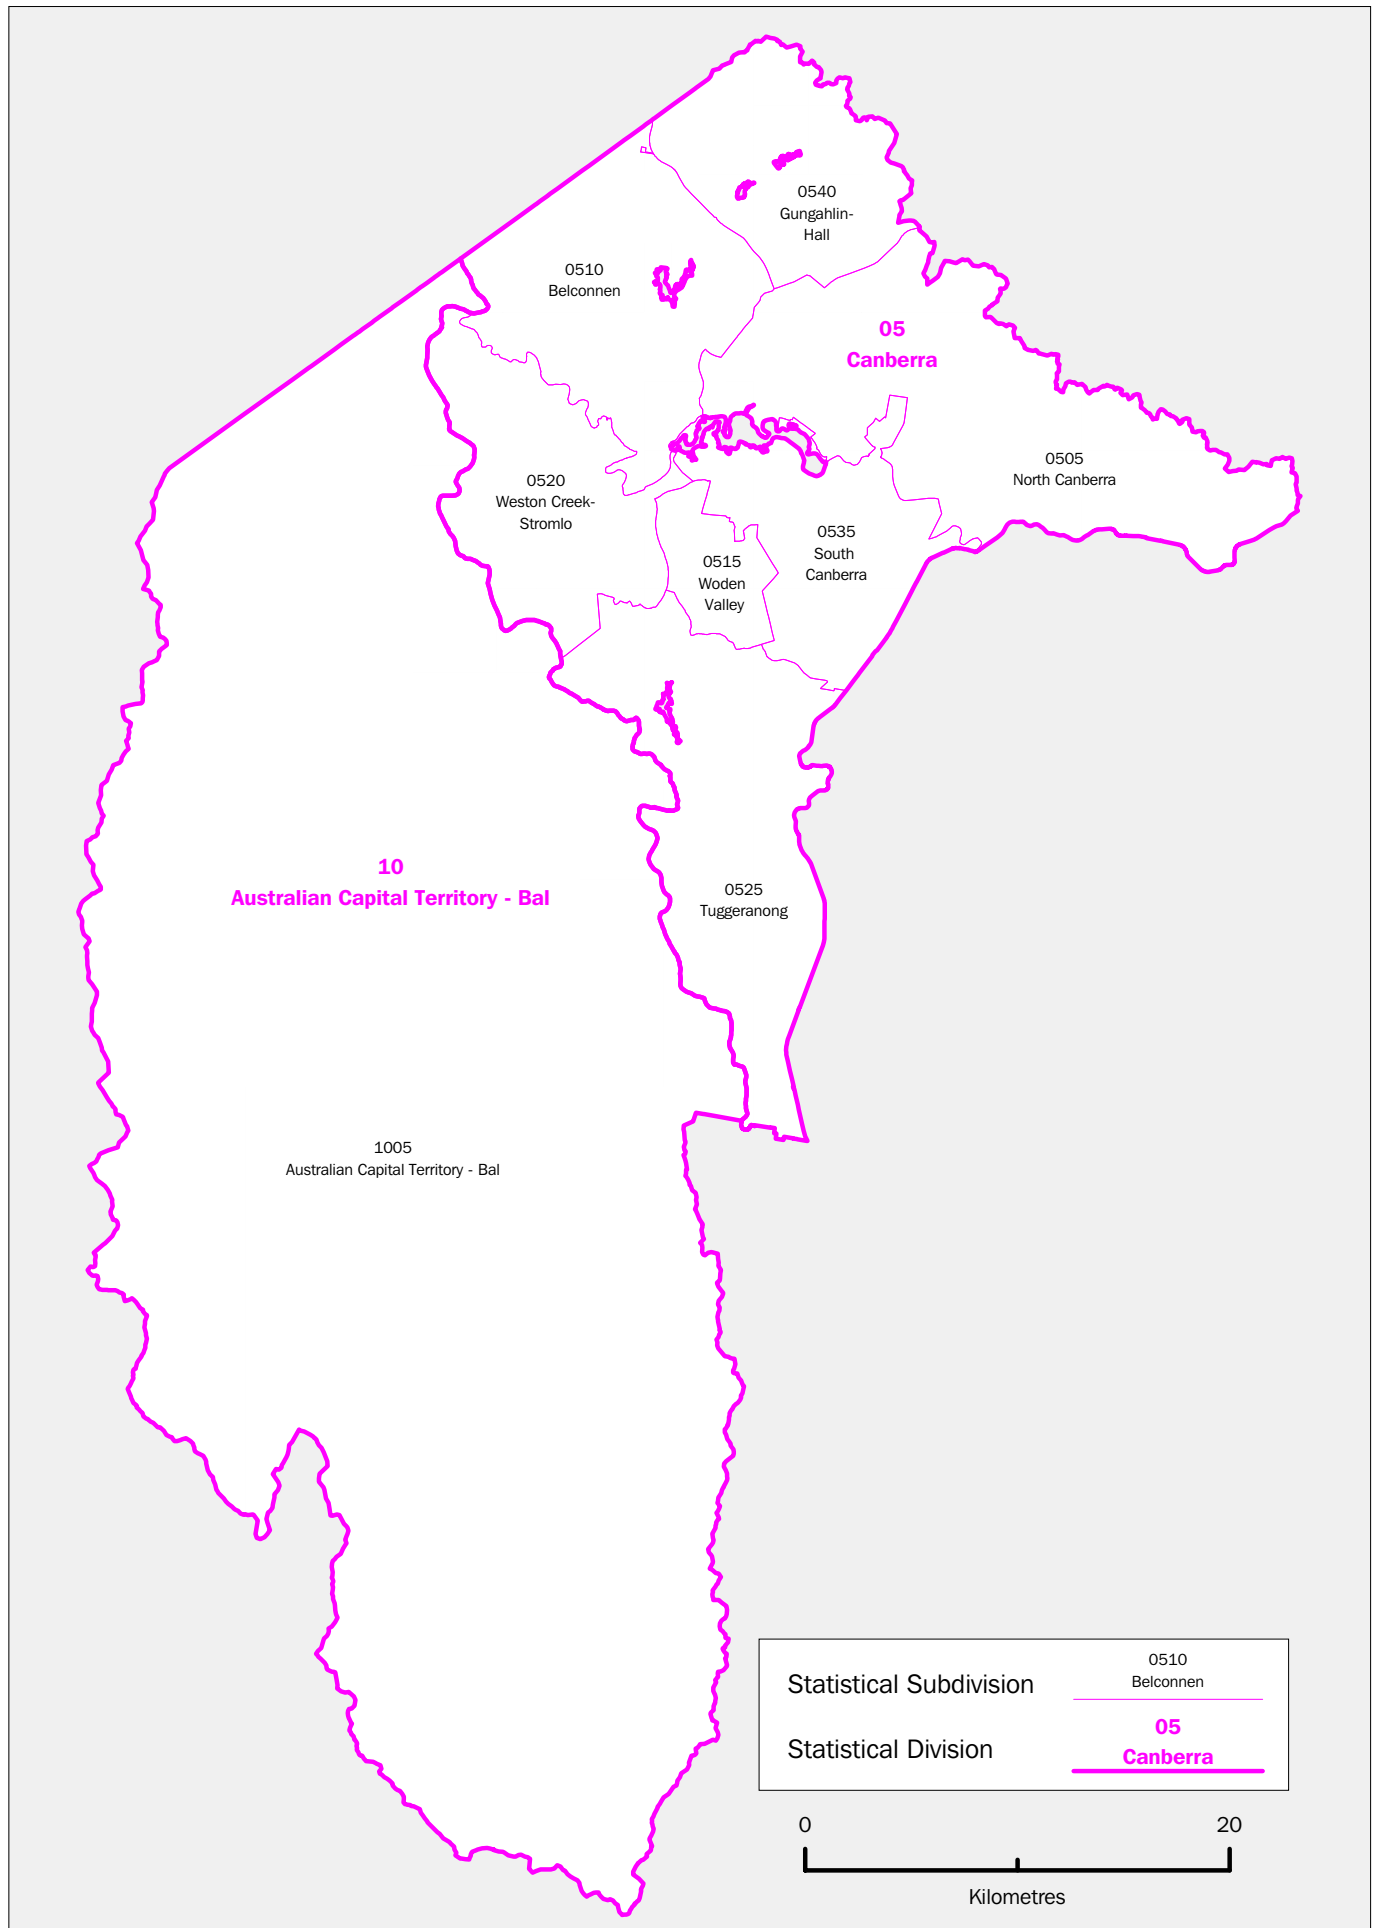

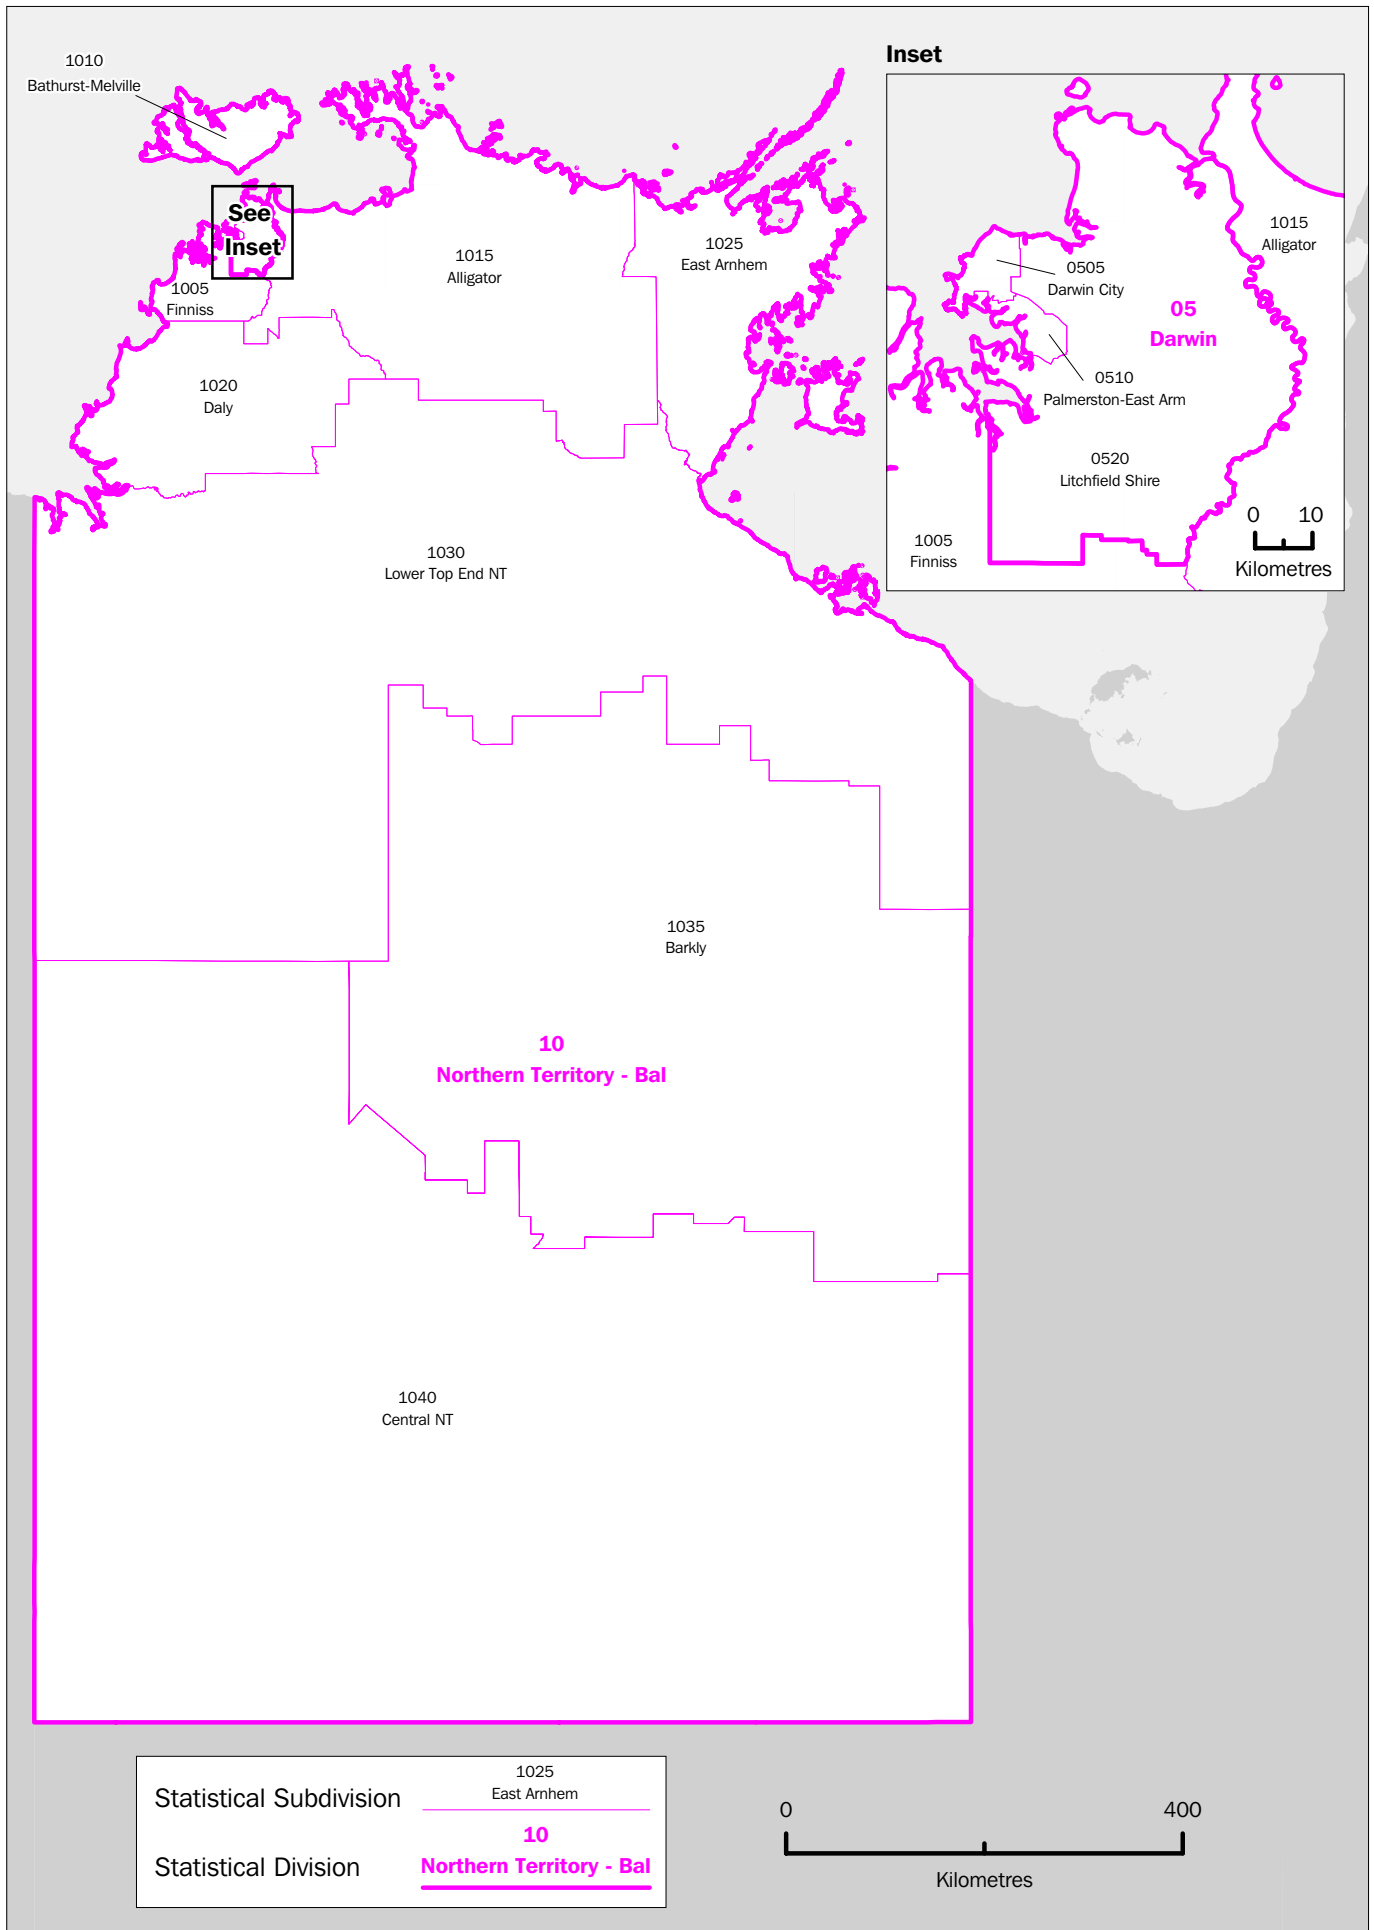

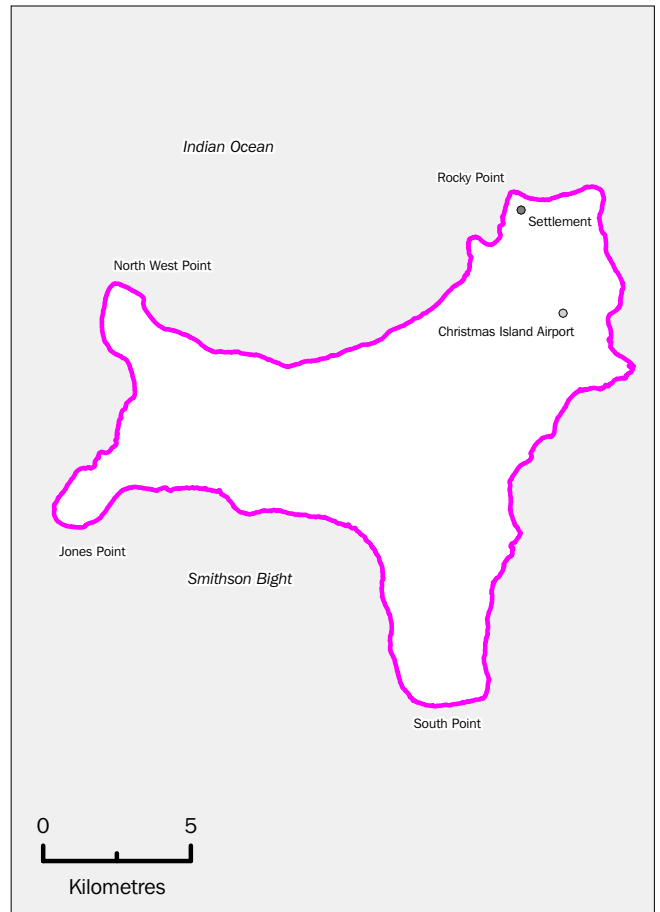

NORTHERN TERRITORY, Statistical divisions and statistical subdivisions—2001 edition

OTHER TERRITORIES, Statistical local areas—2001 edition

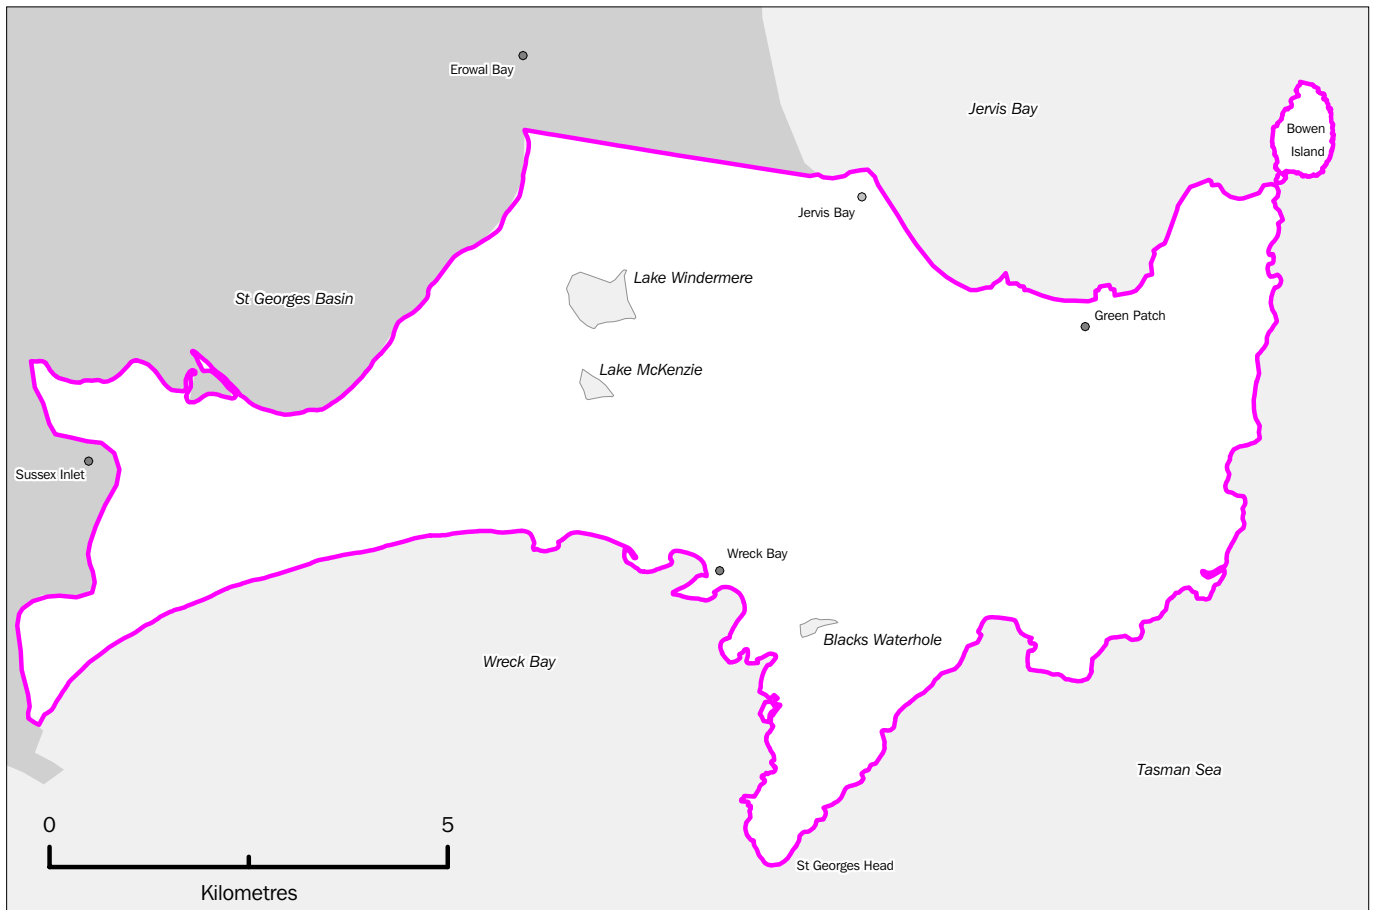

**Territory of Cocos (Keeling) Islands**

**Territory of Christmas Island**

**Jervis Bay Territory**
