INQUIRIES

For further information about these and related statistics, contact the National Information and Referral Service on 1300 135 070.

NOTES

- ABOUT THIS PUBLICATION** This publication presents national statistics on prisoners who were in adult corrective services custody on 30 June 2012. These statistics describe the characteristics of prisoners, their sentence length, the most serious offence/charge for which offenders are imprisoned, and provide a basis for measuring change over time.
- ROUNDING** Discrepancies may occur between sums of component items and totals across tables and within some summary tables due to rounding and randomisation.
- FURTHER INFORMATION** More information about ABS activities in the field of crime and justice statistics is available from the Crime and Justice theme page on the ABS website <http://www.abs.gov.au>. A list of other ABS publications relating to crime and justice statistics can be found in paragraph 102 of the Explanatory Notes.
- ACKNOWLEDGEMENTS** The ABS acknowledges the valuable contribution of the Board of Management and Advisory Group of the National Corrective Services Statistics Unit and the staff of the various agencies that provide the statistics that are presented in this publication.
- INQUIRIES** For further information about these and related statistics, contact the National Information and Referral Service on 1300 135 070.

Brian Pink
Australian Statistician

OVERVIEW

This publication presents information from the National Prisoner Census about persons held in Australian prisons on the night of 30 June 2012. The National Prisoner Census covers all prisoners in the legal custody of adult corrective services in adult prisons, including periodic detainees in New South Wales and the Australian Capital Territory. It excludes persons held in juvenile justice institutions, psychiatric custody and police custody. It is based on data extracted from administrative records held by the corrective services agencies in each Australian state and territory. These statistics provide a profile of the legal status, sentence details and demographic characteristics of Australian prisoners in the legal custody of adult prisons.

Users of this publication should note that it provides a statistical picture of the persons in prison at a point in time (30 June 2012), and does not represent the flow of prisoners during the year. The majority of prisoners in the annual Prisoner Census were serving long-term sentences for serious offences, whereas the flow of offenders in and out of prisons consists primarily of persons serving short sentences for lesser offences. Complementary information to this publication about Australian prisoners is available in the Australian Bureau of Statistics (ABS) quarterly publication, *Corrective Services, Australia* (cat. no. 4512.0).

The Explanatory Notes provide detailed information on the data sources, definitions, counting rules and other technical matters associated with this publication.

For ease of reading, 'most serious offence/charge' may be referred to as 'offence/charge' throughout this publication. The term 'related offences' has also been omitted for ease of reading for the following offences/charges: homicide and related offences; sexual assault and related offences; robbery, extortion and related offences; and theft and related offences.

CHANGES TO OFFENCE
CLASSIFICATION

In June 2011, the Australian Standard Offence Classification, 2008 (ASOC08) was renamed as the *Australian and New Zealand Offence Classification, 2011 (ANZSOC)* (cat. no. 1234.0). No changes were made to the content of the classification. ANZSOC provides a basis for the standardised collection, analysis and dissemination of offence data within crime and justice statistics. For the 2011 and 2012 reference periods, offence data are based on ANZSOC for all jurisdictions. For the 2010 reference period, offence data is based on the revised edition of ASOC (ASOC08) for all jurisdictions. For the 2009 reference period, offence data are based on ASOC08 for six jurisdictions (New South Wales, Victoria, South Australia, Tasmania, Northern Territory and the Australian Capital Territory). Data for Queensland and Western Australia in 2009 are based on the first edition of ASOC (ASOC97). Offence data between 2001 and 2008 are based on ASOC97.

Collection impacts

Due to the two differing versions of ASOC (1997 and 2008) used in this publication between 2001 to 2009, caution should be exercised when making comparisons to offence data over this period. For more details about these impacts, refer to Explanatory Notes paragraphs 39–44 and the Technical Note in the 2009 issue of Prisoners in Australia.

PRISONER SNAPSHOT

At 30 June 2012 there were 29,383 prisoners (sentenced and unsentenced) in Australian prisons, an increase of 1% (277 prisoners) from 30 June 2011. This represented a national imprisonment rate of 168 prisoners per 100,000 adult population. The median aggregate sentence length for all sentenced prisoners was 3.2 years (38 months).

Unsentenced prisoners comprised 23% (6,871) of the total prisoner population, an increase of 2% (148) from 30 June 2011 (Table 2.2). Over half (55%) of all prisoners had served a sentence in an adult prison prior to the current episode. The most serious offence/charge of acts intended to cause injury accounted for the highest proportion of all prisoners (20% or 5,774). (Table 2.1)

Of the total prisoner population, 7% (2,201) were female and approximately eight in ten (80% or 23,586) were born in Australia. The median age of all prisoners was 34 years. (Table 2.1)

Aboriginal and Torres Strait Islander prisoners comprised just over a quarter (27% or 7,982) of the total prisoner population. The age standardised imprisonment rate for Aboriginal and Torres Strait Islander prisoners was 1,914 per 100,000 adult Aboriginal and Torres Strait Islander population. This was 15 times higher than non-Indigenous prisoners for whom the age standardised imprisonment rate was 129 per 100,000 adult non-Indigenous population. (Tables 2.1 and 3.3)

CHANGES IN THE
PRISONER POPULATION

The total prisoner population increased by 1% (from 29,106 on 30 June 2011 to 29,383 on 30 June 2012), which is contrary to the 2% (594) decrease recorded between 2010 and 2011. Between the 2011 and 2012 Prisoner Census dates:

- the number of male prisoners increased by 0.4% (104) and the number of female prisoners increased by 8% (171);
- the number of Aboriginal and Torres Strait Islander prisoners increased by 4% (325);
- the number of sentenced prisoners increased by 1% (127) and the number of unsentenced prisoners increased by 2% (147). (Table 2.2)

CHANGES IN THE PRISONER POPULATION
continued

CHANGE IN SELECTED PRISONER CHARACTERISTICS, between 30 June 2011 and 30 June 2012

(a) Refers to prior adult imprisonment under sentence.

IMPRISONMENT RATES

At 30 June 2012, the national imprisonment rate was 168 prisoners per 100,000 adult population, compared to 167 prisoners per 100,000 adult population in 2011. (Table 2.2)

IMPRISONMENT RATE (a), 30 June 2002 to 30 June 2012

(a) Rate per 100,000 adult population.

SEX

Males comprised 93% (27,182) of the total prisoner population at 30 June 2012, while females comprised 7% (2,201).

The imprisonment rate for males at 30 June 2012 was 315 prisoners per 100,000 adult males, approximately 13 times the rate for females (25 female prisoners per 100,000 adult females). (Table 2.3)

Between 2002 and 2012, the total number of prisoners increased 31%, from 22,492 to 29,381. Over the same period, the number of male prisoners increased 29% (from 21,008 to 27,182) and the number of female prisoners increased by 48% (from 1,484 to 2,199). (Table 2.2)

SEX *continued*

PERCENTAGE CHANGE IN PRISONER NUMBERS, between 30 June 2002 and 30 June 2012, by sex

AGE

The median age of male prisoners at 30 June 2012 was 33.9 years, slightly lower than the median age for all prisoners (34.0 years). Females had a median age of 34.6 years. Prisoners aged between 20 and 39 years accounted for 65% of the overall prison population. (Table 2.3)

MOST SERIOUS OFFENCE/CHARGE

A most serious offence/charge is determined for each prisoner (see Explanatory Notes, paragraphs 79–82). At 30 June 2012, the most prevalent offences/charges for prisoners (either sentenced or unsentenced) were: acts intended to cause injury (20%); sexual assault and illicit drug offences (both 12%); unlawful entry with intent (11%); and homicide and robbery and extortion (both 10%). Together, these offences/charges accounted for just under three quarters (74%) of all prisoners in 2012. (Table 2.6)

Age

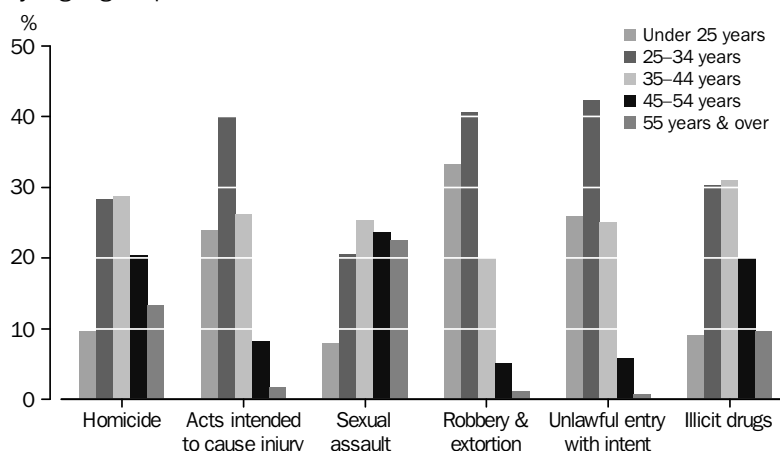

Prisoners aged 25–34 years accounted for the highest proportion of prisoners for the following offences/charges:

- theft (44%);
- unlawful entry with intent (42%)
- robbery and extortion (41%); and
- acts intended to cause injury and offences against justice (40%).

Prisoners aged 35–44 years accounted for the highest proportion of prisoners for illicit drug offences (31%), homicide (29%) and sexual assault (25%).

Age continued

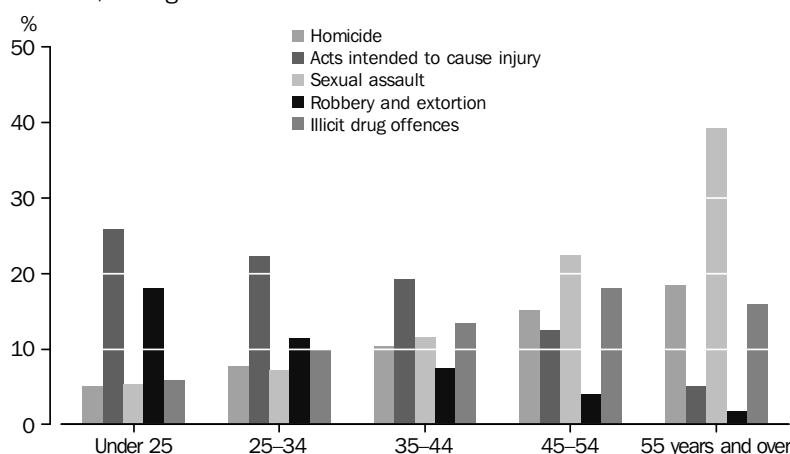

PROPORTION OF PRISONERS, selected most serious offence/charge, by age group

The following graph shows that when comparing different offences across age groups:

- prisoners aged 55 years and over and 45–54 had a higher proportion of prisoners imprisoned for sexual assault than for any other age group (39% and 22% respectively);
- for each of the remaining age groups, acts intended to cause injury was the most prevalent most serious offence/charge (Table 2.4)

PROPORTION OF PRISONERS, age groups by selected most serious offence/charge

COUNTRY OF BIRTH

At 30 June 2012, Australia was recorded as the country of birth for 80% (23,586) of all prisoners (sentenced and unsentenced). This was followed by New Zealand (3% or 791 prisoners), Vietnam (3% or 741 prisoners), and the United Kingdom (2% or 538 prisoners).

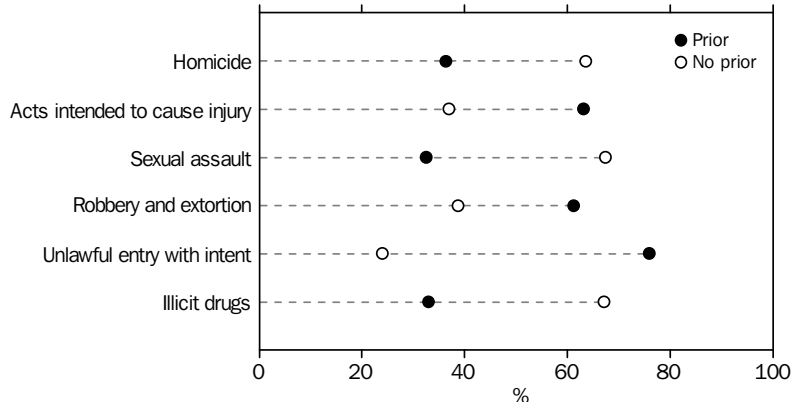

Prisoners born in Nigeria had the highest imprisonment rate (1,014 prisoners per 100,000 adult population born in Nigeria), followed by prisoners born in Indonesia (513 prisoners per 100,000 adult population born in Indonesia). (Table 2.5)

PRIOR IMPRISONMENT

Over half (55%) of prisoners in custody at 30 June 2012 had served a sentence in an adult prison prior to the current episode. Of those prisoners sentenced in the last twelve months, 60% had a prior imprisonment. (Table 2.7).

PRIOR IMPRISONMENT
continued

PRIOR IMPRISONMENT (a), selected most serious offence/charge

(a) Prior imprisonment as an adult under sentence.

The most serious offences/charges with the greatest proportion of prisoners who were recorded as having had prior adult imprisonment were: unlawful entry with intent (76%), traffic offences (74%) and offences against justice (70%). Conversely, approximately 70% of prisoners with a most serious offence/charge of fraud and deception and 67% of prisoners with a most serious offence/charge of either illicit drug offences or sexual assault had no prior adult imprisonment recorded. (Table 2.7)

SENTENCED PRISONERS

There were 22,510 sentenced prisoners in Australian prisons at 30 June 2012, an increase of 1% (127 sentenced prisoners) from 30 June 2011 (22,383). (Table 2.2)

Most serious offence

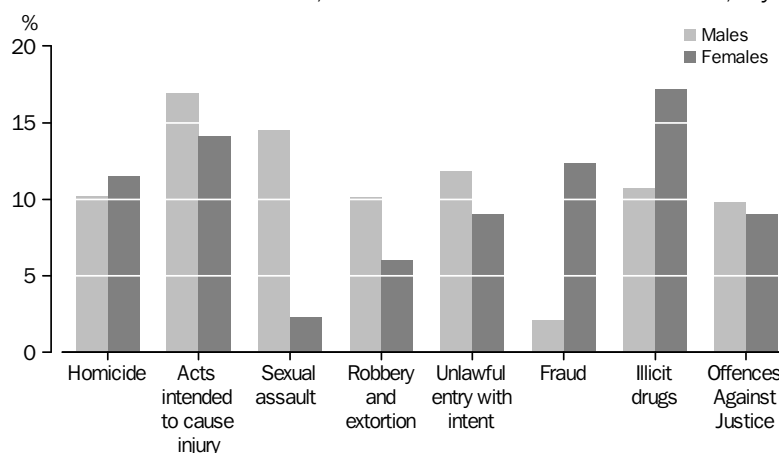

Seven offences accounted for 83% of all sentenced prisoners: acts intended to cause injury (17%); sexual assault (14%); unlawful entry with intent (12%); illicit drug offences (11%); homicide; robbery and extortion; and offences against justice (10% each). (Table 2.6)

Sex

The number of sentenced males in prison increased by less than 1% (59) from 30 June 2011, while sentenced females increased by 5% (70) in the same period. At 30 June 2012, the most serious offence with the highest proportion of sentenced male prisoners was acts intended to cause injury (17%), followed by sexual assault (15%). The most serious offence with the highest proportion of female prisoners was illicit drugs (17%), followed by acts intended to cause injury (14%). (Table 2.8)

Sex continued

SENTENCED PRISONERS, selected most serious offence, by sex

*Aggregate sentence length*

Of all sentenced prisoners, 5% (1,077) were serving a life term or other indeterminate sentence. Just over one quarter (26% or 5,941) of sentenced prisoners had an aggregate sentence length imposed ranging from two years to less than five years, while 22% (5,042) had an aggregate sentence length of between five years and under 10 years. Approximately 33% (7,450) of prisoners had an aggregate sentence length of less than two years. Periodic detainees accounted for less than 1% (63) of all sentenced prisoners.

Excluding prisoners with indeterminate and periodic detention sentences, the median aggregate sentence length for sentenced prisoners was three years and two months (38 months) in 2012, a decrease from three years and three months (39 months) in 2011. For information about interpreting mean and median sentence length based on a census 'snapshot' see Explanatory Notes, paragraphs 76–78.

The longest median aggregate sentence lengths at 30 June 2012 were for homicide (approximately 14.6 years or 175 months), sexual assault (7 years or 84 months) and illicit drug offences (5.5 years or 66 months). (Table 2.9)

Expected time to serve

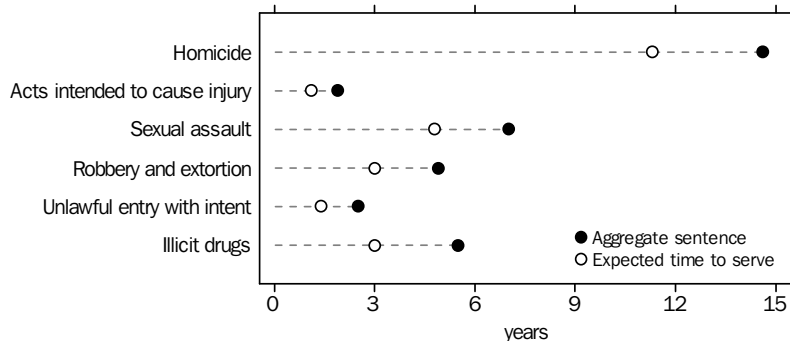

Expected time to serve refers to the time between date of reception for this episode and earliest date of release. One quarter (25%) of sentenced prisoners (5,644) had an expected time to serve between two and less than five years, while 20% of prisoners (4,402) had an expected time to serve between one and under two years.

Excluding prisoners with indeterminate, life without a minimum, and periodic detention sentences, the median expected time to serve for sentenced prisoners at 30 June 2012 was just under 2 years (23 months).

The median expected time to serve was highest for the offence of homicide (approximately 11 years or 135 months), followed by sexual assault (4.8 years or 57 months). (Table 2.9)

*Expected time to serve
continued*

SENTENCED PRISONERS, median sentence length by selected most serious offence(a)

(a) Prisoners with indeterminate, life with a minimum and periodic detention sentences are excluded from the aggregate sentence length calculations. For expected time to serve, prisoners with indeterminate and periodic detention sentences are excluded. Life with a minimum is included.

UNSENTENCED PRISONERS

Unsentenced prisoners (those on remand) include unconvicted prisoners awaiting a court hearing or trial, convicted prisoners awaiting sentencing and persons awaiting deportation where they are under the administration of adult corrective services. There were 6,870 unsentenced prisoners at 30 June 2012, an increase of 2% (147) from 30 June 2011 (6,723). Unsentenced prisoners accounted for 23% of the total prisoner population in Australian prisons at 30 June 2012 remaining steady in comparison to 30 June 2011. (Table 2.1 and 2.2)

Most serious charge

Of all unsentenced prisoners, 29% had a most serious charge of acts intended to cause injury, followed by illicit drug offences (13%) and unlawful entry with intent (11%). (Table 2.10)

Time on remand

Time on remand is influenced by a number of factors, particularly the time it takes for a case to come before a court. The median time spent on remand by unsentenced prisoners in custody at 30 June 2012 was 2.7 months, a decrease from 2.8 months at 30 June 2011. The longest amount of time spent on remand was by prisoners charged with miscellaneous offences (median of 12 months), followed by homicide (median of 10 months), followed by illicit drug offences and sexual assault (both four months) (Table 2.10). For information about interpreting median time on remand based on a census 'snapshot' see Explanatory Notes, paragraphs 76–78. Refer to Appendix 1 and the Glossary for offences included in the miscellaneous offences.

PERIODIC DETAINEES

The sentencing option of periodic detention, where detainees are in custody for two consecutive days per week and remain at liberty for the rest of the week, is available only in the Australian Capital Territory. Periodic detention ceased being a sentencing option in New South Wales in October 2010, although some persons sentenced prior to this time remain on periodic detention. There were 63 periodic detainees at 30 June 2012. More than a quarter (27% or 17) of periodic detainees were sentenced for acts intended to cause injury, followed by traffic and vehicle regulatory offences (19% or 12). (Table 2.9)

— nil or rounded to zero (including null cells)

r revised

(a) Refers to prior adult imprisonment under sentence.

(b) Caution should be exercised in comparing data prior to 2008. See Explanatory Notes, paragraph 94.

(c) Includes prisoners for whom prior imprisonment status is unknown.

(d) From 2007 onwards, unknown Indigenous status is included in the totals only. Prior to 2007 these are included in non-Indigenous.

(e) Rate per 100,000 adult population. See Explanatory Notes, paragraph 18–23.

(f) Calculation of rates was reviewed in 2012 and updated where required. See Explanatory Notes paragraph 18.

(a) For a definition of most serious offence, see Explanatory Notes paragraphs 79–82.

(b) Offence data from 2001–2008 are classified using ASOC97. Offence data for 2009 are classified using ASOC08, with exception of data for Qld and WA which are classified using ASOC97. Data for 2010 are classified using ASOC08 for all states and territories. Data from 2011 are classified using ANZSOC for all states and territories. Caution should be exercised in comparing offence data. See Explanatory Notes, paragraphs 39–44.

CHAPTER **3**

PRISONER CHARACTERISTICS, STATES AND TERRITORIES

PRISONER SNAPSHOT

At 30 June 2012, 69% (20,202) of the total prisoner population were located in either New South Wales (33% or 9,645), Queensland (19% or 5,593) or Western Australia (17% or 4,964). (Table 3.1)

CHANGES IN THE PRISONER POPULATION

Between 2011 and 2012, the prisoner population increased in all states and territories, except New South Wales and Tasmania. The highest proportional increases in prisoner numbers were for the Northern Territory (11%), Western Australia (7%) and the Australian Capital Territory (4%). The prisoner population decreased by 4% in New South Wales and by 3% in Tasmania between 2011 and 2012. (Based on Table 3.5)

CHANGE IN PRISONER NUMBERS, between 30 June 2011 and 30 June 2012 by state/territory

IMPRISONMENT RATES

At 30 June 2012, the Northern Territory continued to have the highest imprisonment rate at 826 prisoners per 100,000 adult population. All states and territories, with the exception of New South Wales and Queensland, recorded increased imprisonment rates compared to 2002, with fluctuations in imprisonment rates occurring within this ten year period. The Northern Territory recorded the largest percentage increase in the imprisonment rate between 2002 and 2012, rising 72% (from 480 prisoners per 100,000 adult population to 826 prisoners per 100,000 adult population). This was followed by Western Australia, increasing by 37% (from 195 to 267 prisoners per 100,000 adults). The imprisonment rate in Queensland decreased between 2002 and 2012 (down 6%, from 168 to 159 prisoners per 100,000 adults), followed by New South Wales, decreasing by 1% (from 172 to 171 prisoners per 100,000 adults). (Table 3.4)

IMPRISONMENT RATES
continued

IMPRISONMENT RATES(a), 30 June 2002 and 30 June 2012, state and territory

(a) Rate per 100,000 adult population.
(b) ACT data for 2002 include ACT prisoners held in NSW prisons. These prisoners are excluded from NSW data.

Sex

Between 2002 and 2012 the female imprisonment rate increased in all states and territories except for the Australian Capital Territory, which decreased from 12 to 10 female prisoners per 100,000 adult females. The Northern Territory recorded the highest increase in the female imprisonment rate: 2012 was more than three times the rate of 2002 (from 31 to 99 female prisoners per 100,000 adult female population), followed by Western Australia, with an increase of 84% (from 26 to 48 female prisoners per 100,000 adult female population). (Table 3.5)

FEMALE IMPRISONMENT RATE(a), 30 June 2002 and 30 June 2012, state and territory

(a) Rate per 100,000 adult female population.
(b) ACT data for 2002 include ACT prisoners held in NSW prisons. These prisoners are excluded from NSW data.

Between 2002 and 2012 the male imprisonment rate increased in all states and territories, except Queensland. The Northern Territory recorded the highest proportional increase in the male imprisonment rate, an increase of 72% (from 862 to 1,479 male prisoners per 100,000 adult male population), followed by Western Australia, with an increase of 36% (from 357 to 485 male prisoners per 100,000 adult male population). Queensland recorded a proportional decrease in male imprisonment rates of 8% (from 320 to 294 prisoners per 100,000 adult males).

Sex continued

MALE IMPRISONMENT RATE(a), 30 June 2002 and 30 June 2012, state and territory

(a) Rate per 100,000 adult male population.
 (b) ACT data for 2002 include ACT prisoners held in NSW prisons. These prisoners are excluded from NSW data.

AGE

At 30 June 2012, South Australian prisoners had the oldest median age at 36.0 years, more than five years older than the median age of prisoners in the Australian Capital Territory, which had the youngest prisoner population (30.7 years). (Table 3.1)

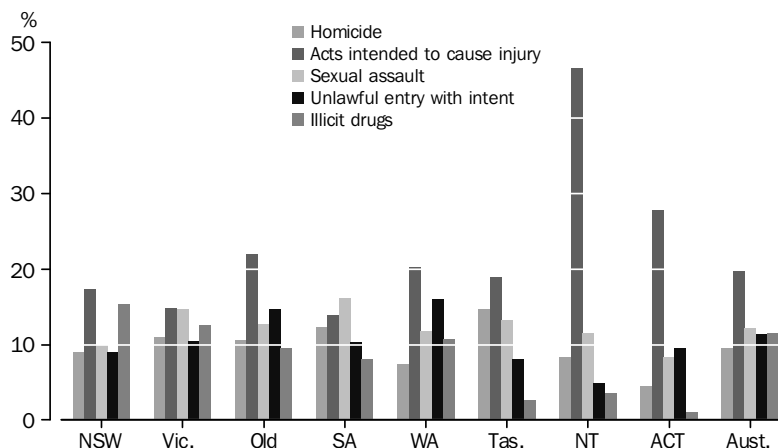

MOST SERIOUS OFFENCE/CHARGE

A most serious offence/charge is determined for each prisoner (see Explanatory Notes, paragraphs 79–82). At 30 June 2012, the most prevalent offence/charge for prisoners in all states and territories (with the exception of South Australia) was acts intended to cause injury. The Northern Territory had the highest proportion of prisoners with a most serious offence/charge of acts intended to cause injury at 47%, more than double the national figure of 20%. (Table 3.2)

In South Australia, sexual assault was the most prevalent offence/charge at 16%, followed by offences against justice (15%). In Victoria, sexual assault was as prevalent as acts intended to cause injury (both at 15%). (Table 3.2)

Unlawful entry with intent accounted for the second highest proportion of prisoners for Western Australia (16%) and Queensland (15%). The proportion of prisoners with a most serious offence/charge of illicit drugs was well below the national figure of 12% in the Northern Territory (4%), Tasmania (3%), and the Australian Capital Territory (1%), and above the national figure in New South Wales (15%) and Victoria (13%). (Table 3.2)

PROPORTION OF PRISONERS, selected most serious offence/charge by state and territory

COUNTRY OF BIRTH	<p>Approximately one quarter of the prisoner populations in Victoria and New South Wales were born overseas (26% and 25% respectively), compared with the national average of 20%. Tasmania and the Northern Territory had the lowest proportions of overseas-born prisoners (4% and 5% respectively). For New South Wales prisoners, New Zealand and Vietnam were the most prevalent overseas birthplaces (both 3%). Vietnam was the most prevalent overseas birthplace for Victorian prisoners (6%), followed by New Zealand (2%). (Based on Table 3.7)</p>
PRIOR IMPRISONMENT	<p>At least half of prisoners in all states and territories, except Victoria (48%), were recorded as having had prior adult imprisonment under sentence. Male prisoners consistently had higher proportions of prior imprisonment than females, except in the Australian Capital Territory where females had higher prior imprisonment than males (79% compared to 71%). The proportion of female prisoners with a prior imprisonment was highest in the Australian Capital Territory at 79%, and lowest in New South Wales and Victoria (38% and 35% respectively). (Table 3.8)</p>
SENTENCED PRISONERS	<p>The Australian Capital Territory recorded the largest proportional increase in sentenced prisoners between 30 June 2011 and 30 June 2012 (22% or 40 prisoners). Northern Territory recorded the second highest proportional increase in sentenced prisoners (10% or 94 prisoners). Decreases in the number of sentenced prisoners were recorded in New South Wales (3%) and Queensland (less than 1%). (Based on Table 3.10)</p>
<i>Aggregate sentence length</i>	<p>Excluding prisoners with indeterminate, life with a minimum and periodic detention sentences, the median aggregate sentence length was highest in South Australia (4.8 years or 58 months), followed by New South Wales (3.8 years or 45 months). The lowest median aggregate sentence length was in the Northern Territory (1.7 years or 20 months). (Table 3.9)</p>
<i>Expected time to serve</i>	<p>Expected time to serve takes into account the earliest date of release for sentenced prisoners. Excluding prisoners with indeterminate and periodic detention sentences, the median expected time to serve for sentenced prisoners at 30 June 2012 was highest in South Australia (3 years or 36 months), followed by Victoria (2.3 years or 28 months). The lowest median expected time to serve was in the Northern Territory (1.2 years or 14 months). (Table 3.9)</p>

*Expected time to serve
continued*

SENTENCED PRISONERS, median sentence length(a), by state and territory

(a) Prisoners with indeterminate, life with a minimum and periodic detention sentences are excluded from the aggregate sentence length calculations. For expected time to serve, prisoners with indeterminate and periodic detention sentences are excluded. Life with a minimum is included.

UNSENTENCED PRISONERS

Unsentenced prisoners (those held on remand) include unconvicted prisoners awaiting a court hearing or trial, convicted prisoners awaiting sentencing and persons awaiting deportation where they are under the administration of corrective services. Of all states and territories, South Australia had the highest proportion (31%) of unsentenced prisoners, while Tasmania had the lowest proportion (18%). Four states and territories recorded a decrease in the proportion of their prisoner population on remand since 30 June 2011: Australian Capital Territory (11 percentage points), Tasmania (3 percentage points), New South Wales and South Australia (both less than 1 percentage point). (Table 3.5)

Time on remand

Time on remand is influenced by a number of factors, particularly the time it takes for a case to come before a court. The median number of months spent on remand by unsentenced prisoners in custody at 30 June 2012 was highest in Queensland (3.9 months), followed by the Australian Capital Territory (3.3 months). The lowest median number of months spent on remand was in Tasmania (1.2 months) and Northern Territory (1.4 months). (Table 3.11)

UNSENTENCED PRISONERS, median time on remand by state and territory

(a) For a definition of most serious offence/charge, see Explanatory Notes, paragraphs 79–82.

3.3 IMPRISONMENT RATE(a), state and territory

	NSW	Vic.	Qld	SA	WA	Tas.	NT	ACT	Aust.
Crude rate(b)									
Males	324.7	212.4	294.3	305.7	485.0	231.2	1 479.1	207.9	314.6
Females	23.3	15.2	26.7	20.1	48.2	21.4	98.8	9.5	24.7
Aboriginal and Torres Strait Islander	2 193.5	1 607.3	1 646.3	2 519.8	4 113.7	553.6	2 680.0	1 543.6	2 273.4
Non-Indigenous	132.2	103.7	115.0	125.3	165.6	110.5	180.6	90.0	123.7
Ratio of crude rates(c)	16.6	15.5	14.3	20.1	24.8	5.0	14.8	17.2	18.4
Age standardised rate(d)									
Aboriginal and Torres Strait Islander	1 883.4	1 443.7	1 358.7	2 179.5	3 389.9	485.0	2 257.5	1 245.5	1 913.7
Non-Indigenous	140.4	107.7	119.9	138.6	168.9	128.3	172.8	85.4	129.1
Ratio of age standardised rates(c)	13.4	13.4	11.3	15.7	20.1	3.8	13.1	14.6	14.8
All prisoners (crude rate)(b)	171.2	111.7	158.9	160.1	267.3	124.6	825.5	106.9	167.5

(a) Rate per 100,000 adult population. See Explanatory Notes, paragraphs 18–26 and 28–32.

(b) Crude rates measure the actual rate of imprisonment and are not adjusted for differences in population structures. See Glossary.

(c) The ratio of Aboriginal and Torres Strait Islander to non-Indigenous imprisonment rates is calculated by dividing the Aboriginal and Torres Strait Islander rate by the non-Indigenous rate.

(d) Age standardised imprisonment rates adjust crude rates to account for age differences between study populations. See Explanatory Notes, paragraphs 33–38 and Glossary.

3.4 CRUDE IMPRISONMENT RATE(a)(b)(c), state and territory, 2002–2012

	NSW(d)	Vic.(e)	Qld	SA	WA	Tas.	NT	ACT(f)	Aust.

r revised

- (a) Rate per 100,000 adult population. See Explanatory Notes, paragraphs 18–26.
- (b) Crude rates measure the actual rate of imprisonment and are not adjusted for differences in population structures. See Glossary.
- (c) Calculation of rates was reviewed in 2012 and updated where required. See Explanatory Notes paragraph 18.
- (d) Excludes ACT prisoners held in NSW prisons prior to 2009. From 2009 all ACT prisoners were held in ACT prisons. See Explanatory Notes, paragraph 98.
- (e) Data prior to 2006 include persons aged 17 years. See Explanatory Notes, paragraph 91.
- (f) Includes ACT prisoners held in ACT as well as ACT prisoners held in NSW prisons. Prior to 2009, the majority of full-time prisoners sentenced in the ACT were held in NSW prisons. From 2009 all ACT prisoners were held in ACT prisons. See Explanatory Notes, paragraph 98.

(a) Rate per 100,000 relevant adult population.

(b) Prior to 2009, the majority of full-time prisoners sentenced in the ACT were held in NSW prisons and included in data for NSW. An exception is made for NSW imprisonment rates, which exclude ACT prisoners held in NSW prisons. See Explanatory Notes, paragraph 98.

(c) Data for prior imprisonment prior to 2003 are over-stated. See Explanatory Notes, paragraph 92.

(d) Data prior to 2006 include prisoners aged 17 years. See Explanatory Notes, paragraph 91.

(e) Data prior to 2003 exclude community custody centres and work camps. See Explanatory Notes, paragraph 95.

(f) Caution should be exercised in comparing prior imprisonment data prior to 2008 as data may no longer be comparable. See Explanatory Notes, paragraph 94.

.. not applicable

— nil or rounded to zero (including null cells)

(a) Rate per 100,000 relevant adult population.

(b) In 2002 the ACT changed the way it counts periodic detainees. See Explanatory Notes, paragraph 99.

(c) Prior to 2009, imprisonment rates include ACT prisoners held in NSW prisons. From 2009 all ACT prisoners were held in NSW prisons. See Explanatory Notes, paragraph 98.

(d) Data are a subset of the NSW figures, and are not separately counted in the Australian totals. Prior to 2009, the majority of full-time prisoners sentenced in the ACT were held in NSW prisons. See Explanatory Notes, paragraph 98.

(e) All ACT prisoners, including those held in NSW prisons prior to 2009. See Explanatory Notes, paragraph 98.

(a) Prisoners with indeterminate, life with a minimum and periodic detention sentences are excluded from the aggregate sentence length calculations.

(b) Prisoners whose date of aggregate sentence commencement was between 1 July 2011 and 30 June 2012.

(c) Includes periodic detainees and prisoners with indeterminate sentences.

(d) Prior to 2009, the majority of full-time prisoners sentenced in the ACT were held in NSW prisons and included in data for NSW. From 2009 all ACT prisoners were held in ACT prisons. See Explanatory Notes, paragraph 98.

(e) Data prior to 2006 include prisoners aged 17 years. See Explanatory Notes, paragraph 91.

CHAPTER 4

ABORIGINAL AND TORRES STRAIT ISLANDER PRISONER CHARACTERISTICS

ABORIGINAL AND TORRES STRAIT ISLANDER PRISONERS

The willingness of Aboriginal and Torres Strait Islander people to self identify may contribute to movements in Aboriginal and Torres Strait Islander prisoner numbers. Caution should therefore be exercised when interpreting relevant movements.

There were 7,979 prisoners who identified as Aboriginal and Torres Strait Islander at 30 June 2012. This represented just over one quarter (27%) of the total prisoner population. (Table 4.1) Aboriginal and Torres Strait Islander prisoner numbers increased by 4% between 2011 and 2012. (Table 2.2)

CHANGE IN PRISONER NUMBERS BY INDIGENOUS STATUS, between 30 June 2011 and 30 June 2012, state and territory

The proportion of prisoners who identified as Aboriginal and Torres Strait Islander varied across states and territories. The Aboriginal and Torres Strait Islander prisoner population in the Northern Territory comprised 84% of the total prisoner population, while Victoria had the lowest proportion of Aboriginal and Torres Strait Islander prisoners (8%). (Table 3.1)

IMPRISONMENT RATES

The following imprisonment rates are age standardised. When comparing rates of imprisonment for Aboriginal and Torres Strait Islander and non-Indigenous prisoners, it is preferable to use age standardised rates (for further information see Explanatory Notes, paragraphs 33–38).

The age standardised imprisonment rate for Aboriginal and Torres Strait Islander prisoners at 30 June 2012 was 1,914 Aboriginal and Torres Strait Islander prisoners per 100,000 adult Aboriginal and Torres Strait Islander population. The equivalent rate for non-Indigenous prisoners was 129 non-Indigenous prisoners per 100,000 adult non-Indigenous population. (Table 4.2)

IMPRISONMENT RATES

continued

The rate of imprisonment for Aboriginal and Torres Strait Islander prisoners was 15 times higher than the rate for non-Indigenous prisoners at 30 June 2012, an increase in the ratio compared to 2011 (14 times higher). The highest ratio of Aboriginal and Torres Strait Islander to non-Indigenous imprisonment rates in Australia was in Western Australia (20 times higher for Aboriginal and Torres Strait Islander prisoners). Tasmania had the lowest ratio (four times higher for Aboriginal and Torres Strait Islander prisoners). (Table 4.2)

RATIO OF INDIGENOUS TO NON-INDIGENOUS AGE STANDARDISED RATES OF IMPRISONMENT, state and territory

Between 2002 and 2012, imprisonment rates for Aboriginal and Torres Strait Islander Australians increased from 1,262 to 1,914 Aboriginal and Torres Strait Islander prisoners per 100,000 adult Aboriginal and Torres Strait Islander population. In comparison, the rate for non-Indigenous prisoners increased from 123 to 129 per 100,000 adult non-Indigenous population. (Table 4.2)

AGE STANDARDISED IMPRISONMENT RATES (a), Indigenous status

(a) Rate per 100,000 adult population. For a definition of age standardised rates, see Explanatory Notes, paragraphs 33–38.

SEX

Aboriginal and Torres Strait Islander males comprised 91% (7,233) of the Aboriginal and Torres Strait Islander prisoner population at 30 June 2012, similar to the proportion of non-Indigenous males who accounted for 93% of the non-Indigenous prisoner population. The number of Aboriginal and Torres Strait Islander male prisoners increased by 3% (202) while the number of non-Indigenous male prisoners decreased by

SEX *continued*

1% (198) from 30 June 2011. There were 746 Aboriginal and Torres Strait Islander female prisoners, comprising 9% of the Aboriginal and Torres Strait Islander prisoner population. There was an increase of 20% (123) in Aboriginal and Torres Strait Islander female prisoners from 30 June 2011. This compares with a 3% (38) increase in the non-Indigenous female prisoner population.

AGE

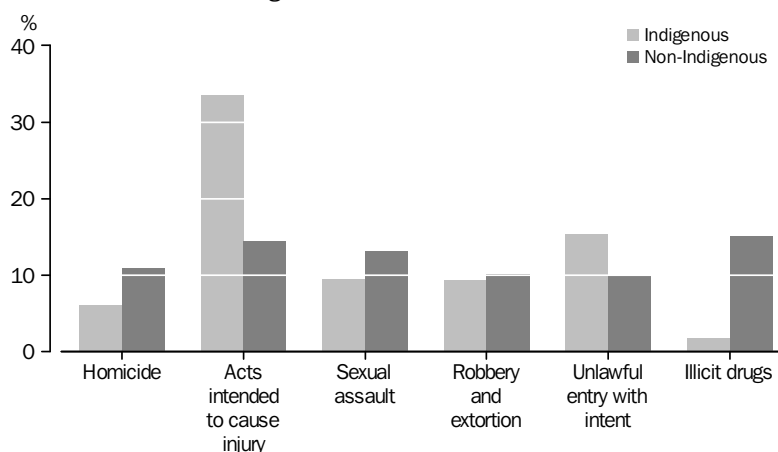

The median age of Aboriginal and Torres Strait Islander prisoners in Australian prisons at 30 June 2012 was 30.9 years. Aboriginal and Torres Strait Islander males had a median age of 30.9 years and Aboriginal and Torres Strait Islander females, 31.4 years. In contrast, the median age of male and female non-Indigenous prisoners was higher at 35.1 and 36.8 years respectively. (Table 4.4)

The largest proportion of Aboriginal and Torres Strait Islander prisoners (21%) was in the 25–29 year age group. For non-Indigenous prisoners, the age groups with the highest proportion of prisoners were 30–34 years, and 25–29 years (both 17%). (Table 4.4)

MOST SERIOUS OFFENCE/CHARGE

Just over one third (34% or 2,673) of all Aboriginal and Torres Strait Islander prisoners were sentenced/charged for acts intended to cause injury, and a further 15% (1,231) for unlawful entry with intent. Illicit drug offences were the offences that accounted for the highest proportion of non-Indigenous prisoners (15%), followed by acts intended to cause injury (14%) and sexual assault (13%). (Table 4.1)

PROPORTION OF PRISONERS, Indigenous status by selected most serious offence/charge

PRIOR IMPRISONMENT

There were proportionally more Aboriginal and Torres Strait Islander prisoners than non-Indigenous prisoners with prior imprisonment. Nearly three-quarters (74%) of Aboriginal and Torres Strait Islander prisoners had a prior adult imprisonment under sentence, compared with just under half (48%) of non-Indigenous prisoners. (Table 4.5)

SENTENCED PRISONERS

There were 6,029 sentenced Aboriginal and Torres Strait Islander prisoners at 30 June 2012, a 3% increase since 30 June 2011 (5,848), compared with a less than 1% decrease in the number of sentenced non-Indigenous prisoners (from 16,510 to 16,446). (Table 4.5)

Aggregate sentence length Excluding prisoners with indeterminate, life with a minimum and periodic detention sentences, the median aggregate sentence length for Aboriginal and Torres Strait Islander prisoners was unchanged from 2011 at 2.0 years (24 months), while for non-Indigenous prisoners it was 3.9 years (47 months), also unchanged since 2011. (Tables 4.6 and 4.7)

SENTENCED PRISONERS, Indigenous status by median aggregate sentence length(a) and selected most serious offence

(a) Prisoners with indeterminate, life with a minimum and periodic detention sentences are excluded from the aggregate sentence length calculations.

Expected time to serve Expected time to serve takes into account the earliest date of release for sentenced prisoners. Excluding prisoners with indeterminate, life without a minimum, and periodic detention sentences, the median expected time to serve for sentenced Aboriginal and Torres Strait Islander prisoners was 1.3 years (15 months). Median expected time to serve was highest for the offence of homicide (8.0 years or 96 months) followed by sexual assault (5.0 years or 60 months). For the non-Indigenous prisoner population the median expected time to serve was 2.3 years (27 months), with a median of 12 years (144 months) for the offence of homicide. (Tables 4.6 and 4.7)

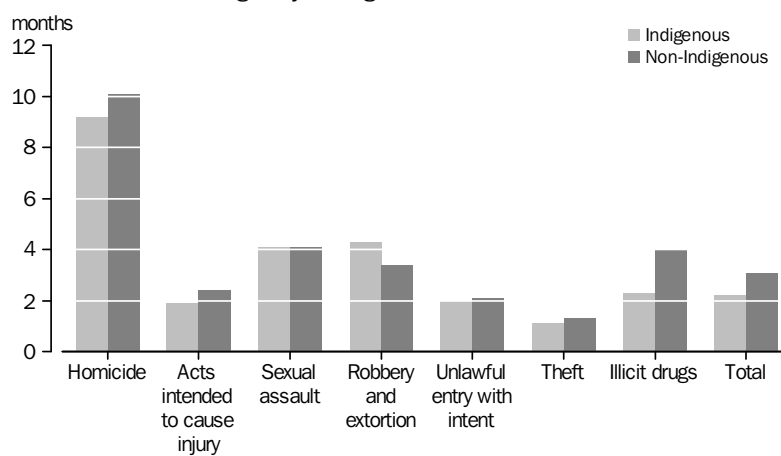

UNSENTENCED PRISONERS

The proportion of prisoners who were unsentenced was slightly higher for Aboriginal and Torres Strait Islander prisoners (24%) than for non-Indigenous prisoners (23%). These proportions are unchanged since 2011. (Table 4.5)

Time on remand Time on remand is influenced by a number of factors, particularly the time it takes for a case to come before a court. For information about interpreting median time on remand based on a census 'snapshot' see Explanatory Notes, paragraphs 76–78. The median number of months spent on remand by unsentenced Aboriginal and Torres Strait Islander prisoners in custody at 30 June 2012 was 2.2 months, a slight increase from 2.0 months at 30 June 2011. For unsentenced non-Indigenous prisoners the median number of months spent on remand was 3.1 months, a slight decrease from 3.2 months at 30 June 2011. (Table 4.8)

r revised

- (a) Rate per 100,000 adult population. See Explanatory Notes, paragraphs 18–26 and 28–32.
- (b) Age standardised imprisonment rates adjust crude rates to account for age differences between study populations. See Explanatory Notes, paragraphs 33–38 and Glossary.
- (c) Calculation of rates was reviewed in 2012 and updated where required. See Explanatory Notes paragraph 18.
- (d) Excludes ACT prisoners held in NSW prisons prior to 2009. From 2009 all ACT prisoners were held in ACT prisons. See Explanatory Notes, paragraph 98.
- (e) Data prior to 2006 include prisoners aged 17 years. See Explanatory Notes, paragraph 91.
- (f) Includes ACT prisoners held in ACT as well as ACT prisoners held in NSW prior to 2009. See Explanatory Notes, paragraph 98.

r revised

- (a) Rate per 100,000 adult population. See Explanatory Notes, paragraphs 18–26 and 28–32.
- (b) Crude rates measure the actual rate of imprisonment and are not adjusted for differences in population structures. See Glossary.
- (c) Calculation of rates was reviewed in 2012 and updated where required. See Explanatory Notes paragraph 18.
- (d) Excludes ACT prisoners held in NSW prisons prior to 2009. From 2009 all ACT prisoners were held in ACT prisons. See Explanatory Notes, paragraph 98.
- (e) Data prior to 2006 include prisoners aged 17 years. See Explanatory Notes paragraph 91.
- (f) Includes ACT prisoners held in ACT as well as ACT prisoners held in NSW prisons. Prior to 2009, the majority of full-time prisoners sentenced in the ACT were held in NSW prisons. From 2009, all ACT prisoners were held in ACT prisons. See Explanatory Notes, paragraph 98.

(a) For a definition of most serious charge see Explanatory Notes paragraph 82.

EXPLANATORY NOTES

INTRODUCTION

1 This publication presents information about prisoners held in custody in Australian adult prisons on 30 June 2012. A range of information is presented on the demographic and legal characteristics of prisoners such as age, sex, country of birth, Aboriginal and Torres Strait Islander status, legal status, most serious offence/charge and length of sentence being served.

2 The Australian Bureau of Statistics (ABS) has developed national standards for corrective services statistics to support the comparability of data between states and territories. While efforts have been made to attain maximum comparability between states and territories, some issues with jurisdictional comparability remain due to different legislative and administrative recording practices in the states and territories. Further detail on these differences is provided in paragraphs 85–99.

REFERENCE PERIOD

3 The National Prisoner Census is a census of all persons in the legal custody of adult corrective services in all states and territories as at midnight 30 June 2012.

SCOPE

4 The scope of the statistics in this publication includes all persons remanded or sentenced to adult custodial corrective services agencies in each state and territory in Australia.

5 Included in the National Prisoner Census are prisoners in the legal custody of corrective services but who, at the time of the census, were:

- absent on an authorised temporary leave permit
- absent from the correctional facility on a work release permit or program
- located in secure wards in a hospital outside the correctional facility
- periodic detainees.

6 Excluded from the collection are:

- prisoners who were unlawfully absent from corrective services legal custody, e.g. escapees or prisoners who failed to return from an authorised temporary absence from a correctional facility
- prisoners whose legal custody had been transferred to another agency, e.g. police or mental health institutions.

7 The count of periodic detainees covers the number of persons with an active periodic detainee warrant. However, periodic detainees who have breached orders may be excluded.

Types of facilities

8 The types of correctional facilities and programs where prisoners are held varies between the states and territories.

9 Included in the collection are:

- gazetted adult prisons in all jurisdictions
- periodic detention centres in the Australian Capital Territory
- community custody centres in Queensland and work camps in Queensland and Western Australia
- cells in court complexes administered by corrective services in New South Wales
- transitional centres in New South Wales
- lock-ups in Western Australia operated by the police but designated as a prison by the Chief Executive Officer of Corrective Services

Types of facilities continued

- gazetted police prisons in the Northern Territory which are administered and controlled by the Director of Corrective Services.

10 Excluded from the collection are persons held in facilities administered and controlled by other agencies:

- police lock-ups, police prisons and cells in court complexes
- immigration detention centres
- home detention programs
- military prisons
- mental health facilities
- juvenile facilities, including those under the authority of adult corrective services.

Age

11 In all states and territories except Queensland, persons remanded or sentenced to adult custody are aged 18 years and over. Persons under 18 years are treated as juveniles in most Australian courts and are only remanded or sentenced to custody in adult prisons in exceptional circumstances. In Queensland 'adult' refers to persons aged 17 years and over.

DATA SOURCE

12 Statistics in this publication are derived from information on each prisoner collected by the ABS from administrative records held by corrective services agencies within each state and territory.

JURISDICTION OF CUSTODY

13 Persons included in the National Prisoner Census were counted in the state or territory in which they were held in custody regardless of which state or territory imposed the sentence being served.

ABORIGINAL AND TORRES STRAIT ISLANDER IDENTIFICATION

14 The ABS conducts an ongoing program of quality assurance to monitor and improve the quality of Aboriginal and Torres Strait Islander status data in corrective services agencies. While the ABS has published Aboriginal and Torres Strait Islander status data in Prisoners in Australia for a number of years, ongoing quality assurance is required to better understand the level of accuracy over time.

15 The quality of the Aboriginal and Torres Strait Islander status information collected and recorded in corrective services agencies is assessed against the ABS Standard Indigenous Question (SIQ). The SIQ is based upon self-identification by the individual who comes into contact with corrective services agencies. The SIQ requires individuals to be asked "Are you of Aboriginal or Torres Strait Islander origin?". The answers to the SIQ can be 'No', 'Yes, Aboriginal', or 'Yes, Torres Strait Islander'. If the offender is of Aboriginal and also of Torres Strait Islander origin, both responses should be identified. If an offender does not supply an answer to this question, or is not asked, the Indigenous status field should be recorded as 'not stated'.

16 For custodial corrections, current indications are that corrective services agencies in all states and territories, except Western Australia, ask prisoners about their Aboriginal or Torres Strait Islander status in line with the SIQ as described above. In Western Australia, in some instances Aboriginal and Torres Strait Islander status may be recorded from information previously collected.

17 Some people in custody have their Aboriginal and Torres Strait Islander status recorded as unknown on the information systems of corrective services agencies, as their status has not been able to be obtained. Aboriginal and Torres Strait Islander status was unknown for 0.5% of all prisoner records in 2012.

IMPRISONMENT RATES

18 Imprisonment rates enable comparison of prisoner populations across states and territories at a point in time, as well as over time. Prisoner rates are expressed per 100,000 adult population, in accordance with international and state and territory practices. The calculation of these rates was reviewed in 2012 and as a result some minor corrections to previous rates have been made.

IMPRISONMENT RATES

continued

19 Rates for the adult prisoner population are calculated using the estimated resident population (ERP) for each of the states and territories, and total Australia (see *Australian Demographic Statistics* (cat. no. 3101.0)). All estimates and projections for the Australian Capital Territory exclude Jervis Bay Territory. All estimates and projections for Australia exclude the external territories of Christmas Island and the Cocos (Keeling) Islands.

20 The formula for calculating the imprisonment rate is as follows:

$$\text{imprisonment rate per 100,000 persons} = \left(\frac{\text{no. of prisoners}}{\text{Estimated Resident Population}} \right) \times 100,000$$

21 The formula for calculating the ratio of two imprisonment rates is as follows:

$$\text{ratio of imprisonment rates} = \left(\frac{\text{Imprisonment rate 1}}{\text{Imprisonment rate 2}} \right)$$

22 As the population changes over time the denominator used for the calculation of rates varies, depending on the reference period. The ERP series are revised every five years to incorporate additional information available from the latest Census of Population and Housing. The rates per 100,000 adult persons (excluding Indigenous rates) presented in this issue are based on the following ERPs:

- Rates for 2012 are preliminary ERP data based on the 2011 Census of Population and Housing
- Rates for 2008 to 2011 are preliminary ERP data based on the 2006 Census of Population and Housing.
- Rates for 2007 are based on the revised ERP data derived from the 2006 Census of Population and Housing;
- Rates for 2002 to 2006 use final ERP data based on the 2006 Census of Population and Housing;
- Rates for 1999 to 2001 use final ERP data based on the 2001 Census of Population and Housing;

23 For population estimates and information on the methodology used to produce the ERP, see *Australian Demographic Statistics* (cat. no. 3101.0).

National imprisonment rates

24 The age at which a person is remanded or sentenced to adult custody within the states and territories can vary. See paragraph 11 for more information. In order to standardise the national imprisonment rate, the same denominator is applied for all states and territories. Prior to 2009 the denominator used to derive the national imprisonment rate is based on the national ERP for persons aged 18 years and over for all states and territories except Queensland. For Queensland this is based on persons aged 17 years and over. From 2009 the denominator used to derive this data item is based on the national ERP for persons aged 17 years and over. For individual state and territory imprisonment rates the denominator applied is based on the age at which a person is remanded/sentenced in that state. This may result in slightly different national imprisonment rates across Tables 2.3, 3.3 and 3.4.

State and territory imprisonment rates

25 From 2006 the ERP used in the calculation of state and territory imprisonment rates is that of persons aged 18 years and over, except for Queensland. For Queensland, the ERP used is that of persons aged 17 years and over. In 2004 and 2005 imprisonment rates were calculated using the ERP for all persons aged 18 years and over for all states and territories except Victoria and Queensland, where persons aged 17 years and over were included in the ERP for those states. Prior to 2004 imprisonment rates for all states and territories were calculated using the ERP for all persons aged 17 years and over. For more information refer to paragraphs 11 and 91.

*State and territory
imprisonment rates continued*

26 Prior to 2009, imprisonment rate data for the Australian Capital Territory are calculated on the basis of the total number of Australian Capital Territory prisoners held in New South Wales prisons, as well as in the Australian Capital Territory. New South Wales imprisonment rates data are only based on the count of New South Wales prisoners held in New South Wales prisons. For more information about Australian Capital Territory prisoners held in New South Wales prisons refer to paragraph 98.

*Country of birth imprisonment
rates*

27 Imprisonment rates by birthplace are calculated using data for June 2011 ERP by Country of Birth from *Migration, Australia 2010–11* (cat. no. 3412.0).

*Aboriginal and Torres Strait
Islander imprisonment rates*

28 Rates for the Aboriginal and Torres Strait Islander and non-Indigenous adult population were revised in the 2011 issue due to the rebasing of estimates and projections for the Aboriginal and Torres Strait Islander population in September 2010. Rebased estimates (for the period 1986–2006) and projections (2007–2021) of the Aboriginal and Torres Strait Islander population are based on data from the 2006 Census of Population and Housing and use assumptions about future fertility, paternity, life expectancy at birth and migration.

29 The data supersede previously published ABS estimates and projections and, as a result, Aboriginal and Torres Strait Islander imprisonment rates previously published in *Prisoners in Australia* for the years 2001–2008 were revised accordingly in 2011.

30 The projections used in this issue are based on Series B, which is one of two main projection series (Series A and B) that have been published for the years 2007 to 2021. Both of these series assume an annual decline of 0.5% in fertility rates; an annual increase of 1% in paternity rates; constant interstate migration at levels observed in the 2006 Census; and zero net overseas migration with no arrivals and no departures. Two different assumptions were made about future Aboriginal and Torres Strait Islander life expectancy at birth for Australia:

- in Series A, Aboriginal and Torres Strait Islander life expectancy at birth will remain constant at 67.3 years for males and 73.0 years for females for the duration of the projection period; and
- in Series B, Aboriginal and Torres Strait Islander life expectancy at birth will increase by 0.3 years per year for both males and females, reaching 72.1 years for males and 77.8 years for females by 2021. This equates to an increase in life expectancy at birth of 5 years over the 15 year projection period for both males and females.

31 The impact of re-basing Aboriginal and Torres Strait Islander imprisonment rate data using Series B projections is small at the national level, with some differences more apparent in the state and territory data. The decision to use Series B as the denominator in the calculation of Aboriginal and Torres Strait Islander imprisonment rates for Prisoners in Australia followed consultation with the National Corrective Services Statistics Advisory Group and other stakeholders.

32 For further information see *Experimental Estimates and Projections, Aboriginal and Torres Strait Islander Australians, 1991 to 2021* (cat. no. 3238.0).

*Age standardisation of
imprisonment rates*

33 Age standardisation is a statistical method that adjusts crude rates to account for age differences between study populations.

34 There are differences in the age distributions between Australia's Aboriginal and Torres Strait Islander and non-Indigenous populations with the former having a much younger population. In 2001, the proportion of Aboriginal and Torres Strait Islander people aged 18 years and over was 54.6%, compared with 75.8% of non-Indigenous people (and 75.3% of the total Australian population). The diagram below illustrates the differences in age distributions.

Age standardisation of
imprisonment rates *continued*

35 ESTIMATED RESIDENT POPULATION, AUSTRALIA - 30 JUNE 2001

36 Due to these differing age profiles, using crude rates to examine differences between Aboriginal and Torres Strait Islander and non-Indigenous populations may lead to erroneous conclusions being drawn about variables that are correlated with age.

37 By making comparisons across age groups, we know that imprisonment rates decrease in older age groups, i.e. that the imprisonment rate is correlated with age. If we compare overall imprisonment rates between Aboriginal and Torres Strait Islander and non-Indigenous persons, it is likely that the imprisonment rate in the Aboriginal and Torres Strait Islander population will be higher because of the larger proportion of young people in the Aboriginal and Torres Strait Islander population.

38 Age standardised Aboriginal and Torres Strait Islander and non-Indigenous imprisonment rates have been presented in Tables 3.3 and 4.2 of this publication. Ratios of the rates are also included in these tables. The standard population against which each population is age standardised is the total Australian Estimated Resident Population at 30 June 2001. The standard population is revised every ten years; the next revision will be based on final data from the 2011 Census.

CLASSIFICATIONS

*Australian and New Zealand
Standard Offence
Classification (ANZSOC),
2011*

39 The Australian and New Zealand Standard Offence Classification (ANZSOC) provides a uniform national framework for classifying offences across Australia for statistical purposes. The classification is a hierarchical structure allowing for varying degrees of detail to be published depending on the level of detail in the source information. The first release of this classification was the *Australian Standard Offence Classification 1997* (cat. no. 1234.0) (ASOC97). In 2008 the ABS released a second edition of the Australian Standard Offence Classification (ASOC08), which reflected changes to criminal legislation since the first edition. In 2011, the offence classification was updated from the Australian Standard Offence Classification (ASOC) to the Australian New Zealand Standard Offence Classification (ANZSOC), however changes were not made to the content of the classification. For further information about the ANZSOC refer to *Australian and New Zealand Standard Offence Classification, 2011* (cat. no. 1234.0).

*Australian and New Zealand
Standard Offence
Classification (ANZSOC),
2011 continued*

40 The offence information presented in this issue is based on the 2011 ANZSOC. For the 2009 Prisoner Census, all jurisdictions implemented ASOC08 for the provision of offence data with the exception of Queensland and Western Australia which were still supplying offence data on ASOC97. This process had some level of impact to the time series prior to 2009 and to comparability across jurisdictions. The classification changes affected the most serious offence for sentenced prisoners and the most serious charge for unsentenced prisoners. Issues of the publication prior to 2009 were based on ASOC97. Prior to 2001, offence data were based on the *Australian National Classification of Offences (ANCO) 1985* (cat. no. 1234.0).

41 In 2009, four jurisdictions (New South Wales, Victoria, Tasmania and the Northern Territory) supplied offence data coded to both ASOC97 and ASOC08, which enabled an assessment of the impact of the changes to the classification on the prisoner census data. As part of the implementation, jurisdictions also rectified a number of codes that had been miscoded in previous years.

42 The analysis conducted found that the overall impact to the offence data, resulting from the new classification, was minimal. The most serious offence/charge for some prisoners moved between offence categories as a result of the classification change and the rectification of miscoding of some offences, however the total number of prisoners was not impacted. Four divisions (05, 11, 13 and 16) recorded changes of 15% or greater, however this was largely due to small numbers. All other divisions recorded changes below 15%. For more information refer to the Technical Note in *Prisoners in Australia, 2009* (cat. no. 4517.0).

43 For the 2010 Prisoner Census, both Queensland and Western Australia implemented ASOC08, however dual coded extracts could not be supplied to measure the impacts to offence data. Based on the findings of the 2009 analysis, it is expected that the impact on Queensland and Western Australia's offence data resulting from the implementation of ASOC08 would be similar to those of other jurisdictions.

44 Some corrective services agencies have not fully implemented any version of ASOC/ANZSOC. Data from these jurisdictions are coded to ANCO and data is then mapped by jurisdictions to the relevant ANZSOC category. Where there is no direct concordance between the two classifications, the ANCO codes have been mapped as closely as possible to the relevant ANZSOC categories.

National Offence Index

45 The National Offence Index (NOI) is a tool which provides an ordinal ranking of all ANZSOC groups in ANZSOC according to the perceived seriousness of each offence. The purpose of the NOI is to enable the representation of a prisoner by a single offence/charge in instances where multiple offences/charges occur for the same prisoner. The original NOI was introduced into the Prisoners collection in 2006, and was revised in 2009 to accommodate the changes made in ASOC08. For further information about the NOI refer to *National Offence Index, 2009* (cat. no. 1234.0.55.001).

46 In the Prisoners collection the NOI is used to determine the most serious charge for unsentenced prisoners for all states and territories, except Western Australia. For sentenced prisoners, the concept of most serious offence is determined by the longest sentence in the current episode for a single count of an offence for all states and territories, except Tasmania due to the use of global sentencing in that state. For more information about global sentencing in Tasmania, see paragraph 80. Detailed information about the most serious charge and most serious offence can be found in paragraphs 79–82.

*Standard Australian
Classification of Countries*

47 Country of birth information is classified according to the *Standard Australian Classification of Countries (SACC), Second Edition* (cat. no. 1269.0). Most jurisdictions use the *Standard Australian Classification of Countries (SACC), Second Edition* (cat. no. 1269.0), however South Australia, Victoria and the Australian Capital Territory have updated their coding to the *Standard Australian Classification of Countries (SACC) 2011* (cat. no. 1269.0). This is Revision 1 of the second edition used in 2008. The review of the classification was minor. There was no impact on comparability between the jurisdictions that have updated to the most recent edition and those that are using the second edition released in 2008.

COUNTING METHODOLOGY

Episode

48 An episode is defined as the period from an offender's latest date of reception into the custody of a corrective services agency for a particular offence(s)/charge(s) until the person is released from custody. When a prisoner breaches parole conditions and is returned to custody, a new episode is deemed to have commenced and a new reception date is provided. Differences in the application of this rule occur in Western Australia. Further detail on these differences is provided in paragraph 68.

49 In consultation with the National Corrective Services Statistics Advisory Group, the definition of an episode changed from the 2003 Prisoner Census to maximise data comparability across states and territories. There was no change to the data provided by New South Wales, Victoria, South Australia and the Northern Territory as these jurisdictions had always provided data based on the definition of an episode as outlined in paragraph 48. These jurisdictions accounted for 65% of the prisoner population in 2002. Prior to 2003, Queensland, Tasmania and the Australian Capital Territory treated persons who breached parole and returned to custody as continuing a prior episode. These jurisdictions now provide data based on the standard definition of episode. In Western Australia, as noted in the previous paragraph, there remain differences in the application of the national counting rule. As the revised definition of episode only impacts on prisoners who have breached parole, the impact of this change in definition on time series data is low at the national level.

Legal status

50 The legal status of an offender is determined by the warrant(s) or court order(s) which provide the legal basis for the detention in custody of the offender. Some offenders may have more than one type of warrant issued against them; therefore it is possible for an offender to have dual status (e.g. under sentence for some offences and awaiting appeal results for others, or under sentence and awaiting deportation). The counting rules for determining the legal status of an offender are as follows:

- If the prisoner has been sentenced for any offence then this takes precedence over any other offence(s)/charge(s) for which the prisoner is unsentenced.
- If the sentenced prisoner has appealed against all of his/her sentences then that prisoner is counted as under sentence.

Aggregate sentence

51 The aggregate sentence is the longest period that the convicted prisoner may be detained for the current sentenced offences in the current episode. Charges pending which are likely to extend the current episode are ignored. Where a new episode is counted when a person returns to prison from a breach of parole, the unexpired sentence of the prior episode is usually incorporated into the aggregate sentence for the new episode.

Expected time to serve

52 The expected time to serve is the period of imprisonment which a convicted prisoner is expected to serve and in most cases refers to the time between the date of reception for this episode (see paragraphs 48–49) and the earliest date of release for sentenced prisoners.

Expected time to serve
continued

53 Date of reception is defined as the date the prisoner was received into prison in a state or territory for the current episode. Counting rules for persons returning to custody from an escape attempt or parole are as follows:

- If an offender escapes from custody and is recaptured and returned to custody, the date of reception is the date the person originally entered into custody prior to the escape.
- If parole is revoked resulting in an offender returning to custody, the date of reception is the date the person was returned to custody. That is, a new episode is deemed to have commenced.

54 There are some state and territory variations:

- In Tasmania, if an offender escapes from custody and is recaptured and returned to custody, the date of reception is the date the person was returned to custody. That is, a new episode is deemed to have commenced
- In Western Australia, if an offender is returned to prison as a result of a parole breach the date of reception is the original reception date (see paragraph 68).

55 The minimum term is the period that must be served before the prisoner is eligible for release from custody to parole, and the difference between the maximum and minimum term is the period that will be served on parole if the prisoner is released at his or her earliest eligibility date. While parole is generally granted at the earliest eligibility date, prisoners may be denied parole for some or all of the period up to the expiry of their maximum term. For both fixed and maximum-minimum sentences, the period actually served in custody may be less than the stated time to serve where administrative mechanisms such as sentence remissions are applied.

56 The time a prisoner is expected to serve in custody depends upon the sentence(s) originally handed down, the system of remissions and the forms of parole available in the various states and territories and whether any time was spent in custody prior to reception (for example, time on remand or in police custody). The rules governing date of release are complex and differ between the states and territories. The calculation of the earliest date of release in each state and territory is described in paragraphs 58–74.

57 Expected time to serve is not calculated for prisoners sentenced to an indefinite term or to life where no minimum term has been fixed.

NEW SOUTH WALES

58 Under current legislation, a court setting a term of imprisonment is required to first set a 'Non-Parole' period and then a 'Sentence' period. Alternatively a court may decline to set a 'Non-Parole' period. These sentences are referred to as 'Sentence/Non-Parole' and 'Sentence/Parole declined' sentence types respectively.

59 Those prisoners with a sentence of three years or less, being a sentence that has a non-parole period, are automatically released from custody at the expiry of the non-parole term. Those with a non-parole term greater than three years may be released by the NSW Parole Board at any time after serving the non-parole term.

VICTORIA

60 In Victoria, the calculation of the expected time to serve is based on either the non-parole period set by court or the aggregate sentence and the following:

- If a court sentences an offender to be imprisoned in respect of an offence for the term of his or her natural life or a term of two years or more the court must, as part of the sentence, fix a period during which the offender is not eligible to be released on parole, unless it considers that the nature of the offence or the past history of the offender make the fixing of such a period inappropriate.
- If a sentence of less than two years but not less than one year is imposed, the court may set a non-parole period.

Expected time to serve
continued

- The non-parole period must be at least six months less than the term of imprisonment and must be in respect of the aggregate sentence that the offender is liable to serve under all the sentences imposed.
- Time spent in detention prior to the commencement of the sentence counts toward the time to be served under sentence if the sentencing judge so orders.
- Pursuant to section 74 of the Corrections Act 1986, the Adult Parole Board of Victoria may release an offender upon the expiration of the non-parole period but release on that date is at the discretion of the Board.

QUEENSLAND

61 In Queensland, with the exception of sentences of indefinite length such as Life, earliest release date calculations are based on the date an offender was eligible for parole.

62 Release dates are calculated as follows:

- Unless otherwise specified by the court, the parole eligibility date is at 80% of the aggregate sentence length for serious violent offenders and half the aggregate sentence length for others.
- The *Corrective Services Act 2006 (Qld)* commenced in August 2006. One key provision in the new legislation relates to the management of offenders subject to Court-ordered Parole. This new order provides courts with the power to specify a parole release date for persons who are sentenced to a term of imprisonment of 3 years or less.
- The earliest discharge date indicates when an offender might be discharged if remissions on each term of imprisonment are granted. For those prisoners ineligible for remission, this date would be the same as the full-time discharge date.
- The revised *Corrective Services Act 2000 (Qld)* commenced in July 2001. Offenders convicted of an offence that was committed on or after 1 July 2001 and sentenced to a term of imprisonment are not eligible to have that term remitted. Offenders convicted of an offence that was committed prior to the commencement of this Act and sentenced to a term of imprisonment of two months or more are eligible to be considered for a remission of up to one-third of that term of imprisonment. This provision was extinguished by the *Corrective Services Act 2006 (Qld)*.
- Prisoners with life sentences are eligible to apply for parole:
 - if the prisoner is serving a life sentence under the *Criminal Code section 305(2)15* – once the prisoner has served 20 years or longer
 - if the prisoner is serving a life sentence under another code – once the prisoner has served 15 years.

SOUTH AUSTRALIA

63 In South Australia, the *Truth in Sentencing* legislation implemented in August 1994 determines the way in which release dates are calculated. This legislation:

- requires prisoners with an aggregate sentence of five years or more to formally apply to the Parole Board for release on parole;
- enables the Parole Board to release prisoners with an aggregate sentence of five years or more at its discretion;
- provides directions for the judiciary to take the abolition of remissions into account when ordering sentences. Prisoners with a non-parole period (NPP) and an aggregate sentence of less than five years are paroled automatically. Release dates for prisoners are calculated as follows:
 - Where a prisoner has not had a NPP, the earliest date of release is the aggregate sentence end date.
 - Where a prisoner has a NPP and an aggregate sentence of less than five years, the earliest date of release is the end date of the NPP.

Expected time to serve
continued

- Where a prisoner has a NPP, and an aggregate sentence of five years or more, the earliest date of release is the earliest date the prisoner can be released by the Parole Board. If this date has expired and no further release date has been set by the Parole Board, the earliest date of release becomes the aggregate sentence end date, which in the case of Life or Other indeterminate sentences would be unknown.

WESTERN AUSTRALIA

64 In Western Australia, expected time to serve is determined differently depending on whether sentences are less than 12 months or sentences are 12 months or more.

Sentences less than 12 months

65 For sentences less than 12 months, expected time to serve is determined as follows:

- Before August 2003: the expected time to serve is calculated between the sentence start date and the two-thirds time date or effective date of release (EDR).
- On or after August 2003: the calculation of the expected time to serve is based on half of the maximum sentence as the prisoner may be released on Short Term Parole at the Earliest Eligibility Date (EED) after serving 50% of the sentence.

Sentences 12 months or more

66 For sentences 12 months or more expected time to serve is determined as follows:

- Sentence Imposed before August 2003:
 - Where no parole term is specified, the minimum sentence is calculated between the sentence start date and the two-thirds time date or EDR. If that Minimum Sentence is more than 12 months, the prisoner will be eligible for release on a Re-Entry Release Order (release is subject to approval by the Prisoners Review), and the expected time to serve is calculated up till the Re-Entry Release Eligibility Date (RRED). If the Minimum Sentence is 12 months or less, the expected time to serve is calculated between the sentence start date and the two-thirds time date or EDR.
 - Where a parole term has been specified, the minimum sentence is calculated between the sentence start date and the EED. If that Minimum Sentence is more than 12 months, the prisoner will be eligible for release on a Re-Entry Release Order (release is subject to approval by the Prisoners Review Board), and the expected time to serve is calculated up till the RRED. If that Minimum Sentence is 12 months or less, the expected time to serve is calculated between the sentence start date and the EED.
- Sentence Imposed on or after August 2003:
 - Where no parole term is specified:
 - For sentences equalling 12 months, the prisoner must serve the full term and the expected time to serve is calculated up until the sentence expiry date (maximum date).
 - For sentences greater than 12 months the prisoner will be eligible for release on a Re-Entry Release Order (release is subject to approval by the Prisoners Review), and the expected time to serve is calculated up until the RRED.
 - Where a parole term has been specified:
 - For prisoners sentenced before January 2007, the minimum sentence is calculated between the sentence start date and the EED.
 - If that Minimum Sentence is more than 12 months, the prisoner will be eligible for release on a Re-Entry Release Order (release is subject to approval by the Prisoners Review Board), and the expected time to serve is calculated up until the RRED.

Expected time to serve
continued

- If that Minimum Sentence is 12 months or less, the expected time to serve is calculated between the sentence start date and the EED.
- Prisoners sentenced to a parole term on or after January 2007 are not eligible for release on a Re-Entry Release Order and the expected time to serve is calculated between the sentence start date and the EED.

67 If EED or RRED have passed, any release date set by the Prisoners Review Board is taken into account. If the Prisoners Review Board has not set a release date but has set a review date, that review date is used. If there are no such dates, the EDR (for sentences imposed before August 2003) or sentence expiry date (for sentences imposed on/after August 2003) is used.

68 Where prisoners were returned to prison partly or wholly as a result of breach or suspension of early release orders, reimprisoned after finalisation of appeal after being released on bail or following unlawful release, a new episode is not deemed to have commenced and the date of reception is based on the date the person originally entered into custody, prior to being released on the early release order. Therefore, time spent in prison for the original sentence has continued to be included in the calculation of expected time to serve and aggregate sentence length data and may result in a higher mean and median duration for these data items in comparison with other states and territories (see paragraph 76). In light of legislative changes effective from August 2003, it is essential for Western Australia to have a continuous series of comparable information to enable the monitoring and evaluation of the impact of the legislation, therefore it does not comply with the current ABS counting rule.

TASMANIA

69 In Tasmania the calculation of expected time to serve is based on the totality of all sentences less remissions which may be granted on eligible sentences. A remission of the whole or any part of a sentence is not to: exceed 3 months (for sentences imposed after 1/1/1994); exceed one-third of the total period of imprisonment; or reduce the sentence below three months.

70 A prisoner may be eligible for remission of more than one sentence during an episode of imprisonment.

71 From October 2002, as a result of legislative change, if a court fails to make an order in relation to parole the prisoner will be ineligible for parole on that sentence.

NORTHERN TERRITORY

72 In the Northern Territory, expected time to serve is calculated as follows:

- Prisoners whose sentences commenced prior to July 1996 will be discharged with one-third remissions or at the expiry of the non-parole period, as approved by the Northern Territory Parole Board. If the parole date has elapsed, the date eligible for remission is used (if applicable) or else the full-term expiry date is used.
- Prisoners sentenced after July 1996 have an expected time to serve based on their non-parole period (if this date has elapsed the EDR becomes the full-term expiry date), a fixed release date or an earliest release date based on a suspension of sentence after a set period of time.

73 Following the commencement of the *Sentencing (Crime of Murder) and Parole Reform Act 2003 (NT)* in February 2004, prisoners receiving or currently serving a mandatory life sentence for murder can now be considered for release on parole after serving 20 or 25 years. Prior to sentencing legislation amendments in 2004, prisoners sentenced for murder were given a mandatory life sentence without the possibility of receiving an earliest date of release, e.g. parole.

*Expected time to serve
continued*

AUSTRALIAN CAPITAL TERRITORY

74 Prisoners sentenced in the Australian Capital Territory and who were held in New South Wales prisons were subject to New South Wales calculations for date of release. As at 30 June 2009, Australian Capital Territory prisoners were no longer held in New South Wales prisons.

Impact of indeterminate sentences

75 While all states and territories have access to indeterminate sentences as a sentencing option, the degree to which that sentencing option is utilised varies considerably across states and territories, particularly for homicide. This can impact on mean and median aggregate sentence length and expected time to serve data as prisoners with an indeterminate sentence are excluded from these calculations. For 2012, more than three-fifths of prisoners with a most serious offence of homicide had an indeterminate sentence in South Australia (75%), Western Australia (69%) and Queensland (64%). For the Australian Capital Territory, the proportion (44%) was closer to the national average of 33%. However, the proportions in the remaining states of New South Wales, Victoria, Tasmania and Northern Territory were each less than 10%.

Mean/median sentence length and time on remand

76 Calculations of mean and median sentence lengths and time on remand are affected by the reference period used. For the Prisoner Census, information relates to the characteristics of prisoners at a point in time (the night of 30 June), rather than the total prisoner population during the year. During a year, a large proportion of prisoners who go through the prison system serve short sentences (i.e. less than a year) or are on remand for shorter periods of time, while at any point in time the majority tend to be prisoners serving longer sentences or who have been on remand for long periods of time. The impact of this is that when the total population of prisoners during a year is considered, the large number of short sentences and short periods of time on remand will result in lower mean and median sentence length and time on remand values compared with means and medians calculated from point in time data.

77 Mean and median aggregate sentence length exclude indeterminate, life with a minimum and periodic detention sentences.

78 Between 1995 and 2001, prisoners who had a 'Life with minimum' sentence were not included as part of the calculation of the mean and median sentence lengths for prisoners' expected time to serve in prison. From 2002 they have been included. Their inclusion has slightly increased the mean for the expected time to serve, but has had a negligible impact on the median value for expected time to serve.

MOST SERIOUS
OFFENCE/CHARGE
Sentenced prisoners

79 For sentenced prisoners in all states and territories except Tasmania, the Most Serious Offence (MSO) is the offence for which the prisoner has received the longest sentence in the current episode for a single count of the offence, regardless of the possible result of any appeals, and regardless of whether the sentence for that offence has actually expired at census date. Where sentences are equal, or the longest sentence cannot be determined, the MSO is the offence with the lowest (numerical) ANZSOC code. For example, if a prisoner has two offences coded at the ANZSOC Group level: 0711 Unlawful entry with intent, and 0412 Dangerous or negligent driving, the MSO would be allocated as 0412 Dangerous or negligent driving, as this is the lowest ANZSOC code.

80 In Tasmania, magistrates and judges have the capacity to provide global sentencing, i.e. a combined sentence for all offences. An individual offence will not have an identified period of imprisonment, so it is not possible to identify the offence with the longest period of imprisonment. The MSO is therefore determined by applying the NOI.

Sentenced prisoners continued

81 From 2004, the MSO for prisoners who have breached parole and returned to prison is determined only from the breach offence and any new offence(s) committed while on parole (the original MSO is excluded from the determination). This differs in Western Australia where offences from previous episodes are considered in the selection of MSO, due to the episode definition applied by Western Australia (see paragraph 68).

Unsentenced prisoners

82 Prior to 2006, all states and territories applied the Most Serious Charge (MSC) for unsentenced prisoners by determining the charge which carries the longest statutory maximum penalty. From 2006, the NOI has been used by Victoria, Queensland, South Australia, Tasmania and the Australian Capital Territory. From 2007, the Northern Territory also applied the NOI, and in 2008, New South Wales introduced it. Western Australia continues to apply the charge which carries the longest statutory maximum penalty; where penalties are equal, the MSC is the charge with the lowest ANCO code. There are some state and territory variations:

- In New South Wales and the Australian Capital Territory, if a prisoner is convicted but as yet unsentenced for at least one charge, the MSC is selected from those offences for which convictions have been recorded.
- In Western Australia the MSC is always determined by calculating the lowest ANCO Code.

COURT OF
SENTENCE/REMAND

83 The court of sentence/remand data (available in Supplementary Data Cubes 4, 10 and 11) refer to whether the offender was sentenced or remanded to custody by the Supreme Court, the District or County Court or the Lower Courts such as the Magistrates' or Children's Courts. The rules adopted for coding the level of court are:

- Where an episode comprises orders/sentences of various levels of court, the level of court relating to the MSO is recorded.
- An appeal court is recorded when it has altered the length of sentence of the MSO/charge.
- For prisoners not under sentence, the level of court which has issued the most recent remand in custody warrant is recorded.
- Prisoners held under a Department of Immigration order or under the authority of the Parole Board are recorded as 'other'.

DATA COMPARABILITY AND
SIGNIFICANT EVENTS

84 National corrections statistics are compiled in order to maximise comparability across states and territories. Although differences have been overcome through the introduction of national standards, some legislative, interpretive and processing differences remain.

New South Wales

85 In New South Wales, the Kariong juvenile facility operates under the authority of Adult Corrective Services. These prisoners are excluded from this collection.

86 Periodic detention is a form of custody or order where a sentenced prisoner is required to be held in custody on a part-time basis. The Periodic Detention program operates in two stages. Stage 1 is the initial residential stage, whereby detainees must reside in a periodic detention centre for two days per week. In Stage 2 detainees undertake two days of supervised work but are not required to reside in a periodic detention centre at night. New South Wales abolished periodic detention on 1 October 2010. Following that abolition, periodic detainees who were managed under Stage 1 were progressively moved into Stage 2. At the same time residential periodic detention centres were progressively closed and as at 30 June 2012 all centres used for residential purposes (Stage 1) had closed. As at 30 June 2012, however, a small number of offenders were still managed on Stage 2 of the periodic detention program.

New South Wales continued

87 On the same day Periodic Detention ceased in New South Wales (1 October 2010), a new community sentencing option called an Intensive Correction Order (ICO) became available. This change is contained in the *Crimes (Sentencing Procedure) Act 1999* (section 7, Part 5). An ICO is an order of imprisonment for not more than 2 years made by a court, which directs that the sentence is to be served by way of intensive correction in the community. An ICO is served in the community under the strict supervision of Corrective Services New South Wales rather than in full-time custody in a correctional centre.

88 In November 2010, NSW opened the South-Coast Correctional Centre. The facility is situated near Nowra, NSW. The focus of this facility is to accommodate maximum/minimum security male and female prisoners. It received its first prisoners in December 2010.

89 Amendments to the *Bail Amendment (Repeat Offenders) Act 2002* restrict the availability of bail for three classes of defendant:

- those accused of having committed another offence while on bail or parole, or serving a sentence for another offence;
- those who have a previous conviction for absconding on bail; and
- those who are charged with an indictable offence who already stand convicted of an earlier indictable offence.

90 In 2012, New South Wales introduced improved coding procedures for sentenced and unsentenced prisoners whose most serious offence/charge fell within ANZSOC Division 16 - Miscellaneous Offences, specifically those related to import / export regulations. As a result of these changes, caution should be exercised when comparing 2012 data for miscellaneous offences for New South Wales with previous years.

Victoria

91 In July 2005, the *Children and Young Persons (Age Jurisdiction) Act 2004* came into force in Victoria. This Act changed the definition of a child from a person under 17 years of age to a person under 18 years of age. As a consequence the definition of an adult also changed for corrective services data to a person aged 18 years and over. Data prior to 2006 includes persons aged 17 years.

92 For 2002 and previous years, when a prisoner was held on remand and then sentenced to a term of imprisonment as part of the one episode, the time on remand was considered a separate episode of imprisonment for the purposes of determining whether a prisoner had known prior adult imprisonment. This practice was inconsistent with the national counting rule for the Prisoner Census and resulted in an inflated number (and proportion) of Victoria's prisoner population with known prior adult imprisonment under sentence. From 2003 the national counting rule was adopted for recording known prior adult imprisonment in Victoria.

Queensland

93 The *Corrective Services Act 2006 (Qld)* commenced in August 2006. One key provision in the new legislation relates to the management of offenders subject to Court-ordered Parole. This new order ensures that offenders serve all of their sentence under supervision, either in a correctional centre or under community supervision. This new order provides courts with the power to specify a parole release date for persons who are sentenced to a term of imprisonment of 3 years or less. Court-ordered Parole is not available to sex offenders or serious violent offenders.

94 In September 2005, Queensland implemented a new offender management system – the Integrated Offender Management System (IOMS). As a consequence prior imprisonment data were understated. The ABS imputed prior imprisonment data for 2006 and 2007 as an interim measure. During 2008 changes were implemented to the IOMS system and business processes to improve the quality of the prior imprisonment

Queensland continued

data. Comparisons to data prior to 2008 should be used with caution as the data may no longer be comparable.

95 From 2003, the Prisoner Census includes those prisoners who are held in community custody centres and work camps in Queensland.

Western Australia

96 The large increase in prisoners from 2008 to 2010 was due to fewer offenders being granted parole by the Prisoners Review Board and the impact of the *Truth in Sentencing* legislation. The *Truth in Sentencing* legislation refers to the *Sentencing Legislation Amendment and Repeal Act 2003 (Schedule 1 - Transitional Provisions, Section 2)* which included an automatic reduction of fixed sentences by one-third to offset other changes that were likely to increase the length of sentences. This provision was removed in 2008.

Tasmania

97 From 2003, the most serious offence/charge data for Tasmania has been determined by the application of the NOI as the longest sentence can no longer be attributed to a single offence (see paragraph 80).

Australian Capital Territory

98 Prior to 2009, persons sentenced to full-time custody by the Australian Capital Territory were usually held in New South Wales prisons. A new prison facility to house Australian Capital Territory persons sentenced to full-time custody, the Alexander Maconochie Centre, began taking prisoners on 30 March 2009. As at 30 June 2009, all Australian Capital Territory prisoners held in New South Wales prisons had been relocated to the new Alexander Maconochie Centre.

99 From 2003 the count of periodic detainees covers the number of persons with an active periodic detainee warrant excluding those with an outstanding PDC warrant. Detainees with an outstanding PDC warrant are those who breached a Periodic Detention Order and have been issued a warrant for a further court hearing, but failed to attend. In 2002, all periodic detainees with a current warrant were included in the census count (i.e. including those who were in breach of an order). Consequently, the periodic detainee population increased from 2002 to 2003.

CONFIDENTIALITY

100 Table cells containing small values have been randomly adjusted to avoid releasing confidential information. Due to this randomisation process, totals may vary slightly across tables.

ADDITIONAL DATA

101 A set of supplementary tables (data cubes) containing additional state and territory information is available for download from the ABS website. Refer to Appendix 2 for a list of available data cubes. Special tabulations may be produced on request to meet individual user requirements. For further information, contact the National Centre for Crime and Justice Statistics by email <crime.justice@abs.gov.au>

AUSTRALIAN AND NEW ZEALAND STANDARD OFFENCE CLASSIFICATION (ANZSOC) 2011

A1.1

<i>Code</i>	<i>Division/Subdivision(a)</i>
01	Homicide and related offences Murder Attempted murder Manslaughter and driving causing death
02	Acts intended to cause injury Assault Other acts intended to cause injury
03	Sexual assault and related offences Sexual assault Non-assaultive sexual offences
04	Dangerous or negligent acts endangering persons Dangerous or negligent operation of a vehicle Other dangerous or negligent acts endangering persons
05	Abduction, harassment and other offences against the person Abduction and kidnapping Deprivation of liberty/false imprisonment Harassment and threatening behaviour
06	Robbery, extortion and related offences Robbery Blackmail and extortion
07	Unlawful entry with intent/burglary, break and enter Unlawful entry with intent/burglary, break and enter
08	Theft and related offences Motor vehicle theft and related offences Theft (except motor vehicles) Receive or handle proceeds of crime Illegal use of property (except motor vehicles)
09	Fraud, deception and related offences Obtain benefit by deception Forgery and counterfeiting Deceptive business/government practices Other fraud and deception offences
10	Illicit drug offences Import or export illicit drugs Deal or traffic in illicit drugs Manufacture or cultivate illicit drugs Possess and/or use illicit drugs Other illicit drug offences
11	Prohibited and regulated weapons and explosives offences Prohibited weapons/explosives offences Regulated weapons/explosives offences
12	Property damage and environmental pollution Property damage Environmental pollution

(a) Refers to *Australian and New Zealand Standard Offence Classification, 2011* (cat. no. 1234.0).

A1.1

<i>Code</i>	<i>Division/Subdivision (a)</i>
13	Public order offences Disorderly conduct Regulated public order offences Offensive conduct
14	Traffic and vehicle regulatory offences Driver licence offences Vehicle registration and roadworthiness offences Regulatory driving offences Pedestrian offences
15	Offences against justice procedures, government security and government operations Breach of custodial order offences Breach of community-based orders Breach of violence and non-violence orders Offences against government operations Offences against government security Offences against justice procedures
16	Miscellaneous offences Defamation, libel and privacy offences Public health and safety offences Commercial/industry/financial regulation Other miscellaneous offences

(a) Refers to *Australian and New Zealand Standard Offence Classification, 2011* (cat. no. 1234.0).

DATA CUBES

The following supplementary data cubes are available free of charge on the ABS web site <<http://www.abs.gov.au>>. Each table is cross-classified by state and territory.

<i>All prisoners</i>	1 Prisoners, security classification by sex
	2 Prisoners, prison location by sex
<i>Sentenced prisoners</i>	3 Sentenced prisoners, most serious offence
	4 Sentenced prisoners, level of court of sentence by sex
	5 Sentenced prisoners, most serious offence by sentence length
	6 Periodic detainees, selected most serious offence
	7 Periodic detainees, age by sex
	8 Periodic detainees, aggregate sentence length
<i>Unsentenced prisoners</i>	9 Unsentenced prisoners, most serious charge
	10 Unsentenced prisoners, level of court of remand
	11 Unsentenced prisoners, mean and median time on remand by level of court
<i>Aboriginal and Torres Strait Islander status</i>	12 Prisoners, most serious offence/charge by Aboriginal and Torres Strait Islander status
	13 Prisoners, sex and age by Aboriginal and Torres Strait Islander status
	14 Prisoners, sex and prior imprisonment by Aboriginal and Torres Strait Islander status
	15 Sentenced prisoners, aggregate sentence length by Aboriginal and Torres Strait Islander status
	16 Sentenced prisoners, mean and median aggregate sentence length by sex and Aboriginal and Torres Strait Islander status
	17 Sentenced prisoners, expected time to serve by Aboriginal and Torres Strait Islander status
	18 Sentenced prisoners, mean and median expected time to serve by sex and Aboriginal and Torres Strait Islander status
	19 Prisoners aged 50 years and over, by sex, 2002–2012

GLOSSARY

90th percentile	A percentile is a value that divides the distribution of a particular data item into 100 groups having equal frequencies. The 90th percentile indicates that 90 percent of the values of the data item lie at or below the 90th percentile.
Abduction, harassment and other offences against the person	Acts intended to threaten or harass, or acts that unlawfully deprive another person of their freedom of movement, that are against that person's will or against the will of any parent, guardian or other person having lawful custody or care of that person.
Aboriginal and Torres Strait Islander prisoners	Prisoners who self identified as being of Aboriginal or Torres Strait Islander origin at the time of reception.
Acts intended to cause injury	Acts, excluding attempted murder and those resulting in death, which are intended to cause non-fatal injury or harm to another person and where there is no sexual or acquisitive element.
Adult prisoner	An adult prisoner is a person who is aged 18 years and over in all states and territories except Queensland where an adult prisoner is a person aged 17 years and over (see Explanatory Notes, paragraph 11).
Age standardisation	Age standardisation is a statistical method that adjusts crude rates to account for age differences between study populations. Age standardisation enables better comparisons between different populations. In the context of such a comparison, the key variable of interest is the ratio of rates, rather than the age standardised rates alone (see Explanatory Notes, paragraphs 33–38).
Aggregate sentence	The longest period that the convicted prisoner may be detained for the current sentenced offences in the current episode.
Country of birth	Country of birth information is classified according to the <i>Standard Classification of Countries (SACC), Second edition</i> (cat. no. 1269.0) (see Explanatory Notes, paragraph 47).
Crude imprisonment rates	Crude imprisonment rates are calculated by dividing the number of prisoners in the reference period, by the total adult population, multiplied by 100,000 to give a crude rate per 100,000 adult population. Crude rates measure the actual rates of imprisonment and are not adjusted for any differences in population structures that may influence the rates. As such, it is preferable to use age standardised rates when comparing rates of imprisonment for Indigenous and non-Indigenous populations.
Dangerous or negligent acts endangering persons	Dangerous or negligent acts which, though not intended to cause harm, actually or potentially result in injury to oneself or another person.
Date of reception	The date the prisoner was received into prison for the current episode.
Episode	A continuous period of imprisonment (see Explanatory Notes, paragraphs 48–49).
Expected time to serve	The period of imprisonment that a convicted prisoner is expected to serve. In most cases this refers to the time between the date of reception for this episode and the earliest date of release (see Explanatory Notes, paragraphs 52–76).
Fine default only	A type of sentence where persons are serving a sentence for non-payment of a fine and are subject to no other sentence type at the time. Persons who are serving fine default sentences while on remand are counted as sentenced (fine default) prisoners. Persons who are serving fine default sentences concurrently with other sentences of imprisonment are counted under the other sentence type and not as fine default only prisoners.

Fixed term	A type of sentence where there is no minimum term or non-parole period set. The prisoner is required to serve the whole sentence, less any remission allowed, in custody and when released from custody is not subject to any further correctional intervention.
Fraud, deception and related offences	Offences involving a dishonest act or omission carried out with the purpose of deceiving to obtain a benefit.
Homicide and related offences	The unlawful killing, attempted unlawful killing or conspiracy to kill another person.
Illicit drug offences	The possessing, selling, dealing or trafficking, importing or exporting, manufacturing or cultivating of drugs or other substances prohibited under legislation.
Imprisonment rate	Imprisonment rates are expressed as the number of persons in prison per 100,000 adult population. Imprisonment rates enable comparison of prisoner populations across states and territories.
Indeterminate sentences	Types of sentences where persons are sentenced to life imprisonment with no prescribed minimum time to serve. This does not necessarily mean, however, that the person will be held in custody for the term of their natural life. This category includes Indeterminate – life; Indeterminate – Governor's/HM Pleasure; or Indeterminate – subject to ministerial/administrative decision.
Jurisdiction	The state or territory in which a prisoner is held in custody, regardless of which state or territory has imposed the sentence being served (see Explanatory Notes, paragraphs 13 and 98).
Legal status	The legal status of an offender is determined by the warrant/s or court order/s which provide the legal basis for the detention in custody of the offender. The legal status of sentenced includes: no appeal current; awaiting appeal; unfit to plead; not guilty on grounds of insanity; preventative detention. A legal status of unsentenced includes: unconvicted awaiting court hearing or trial; awaiting sentence; and awaiting deportation.
Level of court	A separate tier of the court system, each of which is established under legislation and has certain prescribed powers. Court levels are distinguished from one another on the basis of the extent of their legal powers.
Life with minimum	A type of sentence where persons are sentenced to life imprisonment, where a minimum time to serve in custody has been specified by the court.
Maximum-minimum (or max-min)	A type of sentence where persons may be eligible to be released on parole after serving a minimum term in custody, and who must be released once a maximum term has been served.
Mean	The arithmetic average.
Median	The middle value of a set of values when the values are sorted in order.
Miscellaneous offences	Offences involving the breach of statutory rules or regulations governing activities that are prima facie legal, where such offences are not explicitly dealt with under any other division of ANZSOC, including: <ul style="list-style-type: none"> ■ defamation, libel and privacy offences ■ public health and safety offences ■ commercial/industry/financial regulations ■ other miscellaneous offences.
Most serious charge	Historically, for unsentenced prisoners, whether convicted or not, the most serious charge is the charge which carries the longest statutory maximum penalty. From 2006, the Prisoner Census moved towards the use of the National Offence Index for determining most serious charge (see Explanatory Notes, paragraphs 79–82).
Most serious offence	For sentenced prisoners, the most serious offence is the offence for which the prisoner has received the longest sentence in the current episode for a single count of the offence, except for Tasmania (see Explanatory Notes, paragraphs 79–82).

Offences against justice procedures, government security and operations	An act or omission that is deemed to be prejudicial to the effective carrying out of justice procedures or any government operations. This includes general government operations as well as those specifically concerned with maintaining government security.
Other indeterminate sentence	Includes two sentence types: Indeterminate – Governor's/HM Pleasure or Indeterminate – subject to ministerial/administrative decision.
Other sentence	An indeterminate sentence determination whereby persons are declared as habitual criminals, or persons are either permanently or temporarily deemed not responsible for their actions because of a mental disorder or intellectual disability. Such prisoners are detained and do not have a release date set. That is, the prisoner may be released at any time, at the discretion of the administrative body within each jurisdiction responsible for making that decision. This includes all Indeterminate sentences, except for Indeterminate – Life.
Periodic detention	A type of sentence where persons are in custody for two consecutive days in a week (periodic detainee week), but remain at liberty during the rest of the week. This sentencing option is only available in the Australian Capital Territory courts. Periodic detention ceased to be a sentencing option in New South Wales from 1 October, 2010.
Prior imprisonment	Persons known to have been imprisoned under sentence in an adult prison. Prior sentence of periodic detention is included as prior imprisonment. Prisoners who have had previous adult imprisonment in another state or territory may not be counted as having prior imprisonment.
Prisoner	A person held in custody. For the purposes of this collection, prisoners are those whose confinement is the responsibility of a corrective services agency.
Prohibited and regulated weapons and explosives offences	Offences involving prohibited or regulated weapons and explosives.
Property damage and environmental pollution	The wilful and unlawful destruction, damage or defacement of public or private property, or the pollution of property or a definable entity held in common by the community.
Public order offences	<p>Offences relating to personal conduct that:</p> <ul style="list-style-type: none"> ■ involves or may lead to a breach of public order and decency, or ■ is indicative of criminal intent, or ■ is otherwise regulated or prohibited on moral or ethical grounds. <p>In general these offences do not involve a specific victim or victims, however some offences, such as offensive language and offensive behaviour, may be directed towards a single victim.</p>
Remand prisoners (remandees)	Remand prisoners are those persons who have been placed in custody while awaiting the outcome of their court hearing. They may be unconvicted (remanded in custody for trial), convicted but awaiting sentence (remanded in custody for sentence) or awaiting deportation. Some sentenced prisoners also have active remand warrants against them. In such cases, these prisoners are counted as sentenced.
Robbery, extortion and related offences	Acts intended to unlawfully gain money, property or other items of value from, or to cause detriment to, another person by using the threat of force or any other coercive measure.
Sentenced in the last 12 months	Prisoners whose date of aggregate sentence commenced between 1 July in the preceding year and 30 June in the current year. The date the aggregate sentence commenced is based on a determination made by a sentencing judicial officer. This date may take into consideration time on remand or sentences currently being served.

Sentenced prisoners	Sentenced prisoners are those persons who have received a term of imprisonment from a court. This includes offenders who have been given an indeterminate sentence or custodial order, for example, persons detained under the 'Governor's/HM's Pleasure' and 'Forensic Patients', or those who have received a life sentence. Also included are periodic detainees in New South Wales and the Australian Capital Territory.
Sexual assault and related offences	Acts, or intents of acts, of a sexual nature against another person which are non-consensual or consent is proscribed.
Theft and related offences	The unlawful taking or obtaining of money or goods not involving the use of force, threat of force or violence, coercion or deception, with the intent to permanently or temporarily deprive the owner or possessor of the use of the money or goods, or the receiving or handling of money or goods obtained unlawfully.
Time on remand	For unsentenced prisoners, time on remand is calculated as the period between the date of reception and the prisoner census date. It represents only that period of time spent on remand up to 30 June of the reference year.
Traffic and vehicle regulatory offences	Offences relating to vehicles and most forms of road traffic, including offences pertaining to the licensing, registration, roadworthiness or use of vehicles, bicycle offences and pedestrian offences.
Unlawful entry with intent/burglary, break and enter	The unlawful entry of a structure with the intent to commit an offence where the entry is either forced or unforced.
Unsentenced prisoners	A legal status indicating that a person is confined to custody on remand while awaiting the outcome of their trial. They may be unconvicted (remanded in custody for trial), convicted but awaiting sentence (remanded in custody for sentence) or awaiting deportation.
