NOTES

ABOUT THIS PUBLICATION This publication presents information about the nature of employment arrangements in the Australian workforce. It also presents information about different types of employment which can be cross-classified by characteristics such as hours worked, industry, occupation, and demographic characteristics.

The statistics in this publication were compiled from data collected in the Forms of Employment Survey, conducted throughout Australia in November 2011 as a supplement to the Australian Bureau of Statistics (ABS) monthly Labour Force Survey (LFS). Questions were asked about employment arrangements in the main job of all employed people, except those who were contributing family workers in their main job.

CHANGES IN THIS ISSUE Information was also collected from persons who found their current job through a labour hire firm/employment agency. See paragraph 25 of the Explanatory Notes for more information.

ROUNDING As estimates have been rounded, discrepancies may occur between sums of the component items and totals.

CONCEPTUAL FRAMEWORK

INTRODUCTION

Australia's workforce continues to change. There is an increasing diversity of employment arrangements, more flexible working time patterns, and changes in the extent of part-time and casual employment.

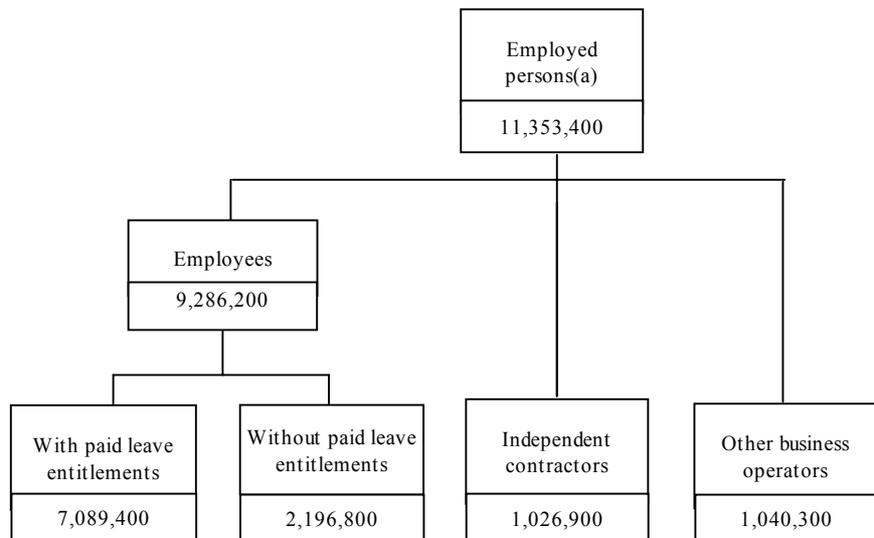

The Forms of Employment Survey (FOES) provides information on some of the key factors relating to the nature of employment arrangements in the Australian labour market. The survey also describes some of the employment and demographic characteristics of people in different forms of employment.

THE FORM OF EMPLOYMENT FRAMEWORK

This conceptual framework classifies jobholders to a 'Form of employment' on the basis of their main job, that is, the job in which the most hours are usually worked. These category groups are:

- Employees;
- Independent contractors; and
- Other business operators.

Employees are then further classified according to whether they had paid leave entitlements, that is, whether they had paid sick and/or paid holiday leave.

(a) Excludes persons who were contributing family workers in their main job.

Employees in this survey are defined as people who work for a public or private employer and receive remuneration in wages or salary. Employees are engaged under a contract of service (an employment contract) and take directions from their employer/supervisor/manager/foreman on how the work is performed. This definition of employees is different from that used in the monthly Labour Force Survey (see Glossary).

Independent contractors are defined as people who operate their own business and who contract to perform services for others without having the legal status of an employee, i.e. people who are engaged by a client, rather than an employer. Independent contractors are engaged under a contract for services (a commercial contract), whereas employees are engaged under a contract of service (an employment contract). Independent contractors' employment may take a variety of forms, for example, they

CONCEPTUAL FRAMEWORK *continued*

THE FORM OF EMPLOYMENT FRAMEWORK *continued*

may have a direct relationship with a client or work through an intermediary. Independent contractors may have employees, however they spend most of their time directly engaged with clients or on client tasks, rather than managing their staff.

Other business operators are defined as people who operate their own business, with or without employees, but who are not operating as independent contractors. Other business operators are distinguished from independent contractors in that they generally generate their income from managing their staff or from selling goods or services to the public, rather than providing a labour service directly to a client. Other business operators spend little time working on client tasks with most of their time spent on managing their employees and/or business.

SUMMARY OF FINDINGS

OVERVIEW

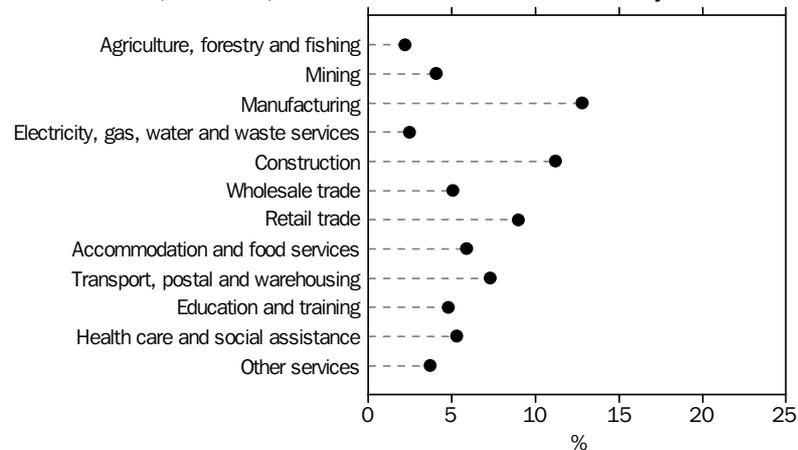

In November 2011, there were approximately 11.4 million employed persons aged 15 years and over. Of these, 7.1 million (62%) were employees with paid leave entitlements, that is, they were entitled to paid sick and/or paid holiday leave. Of the remaining employed persons:

- 2.2 million were employees without paid leave entitlements;
- 1.0 million were independent contractors; and
- 1.0 million were other business operators.

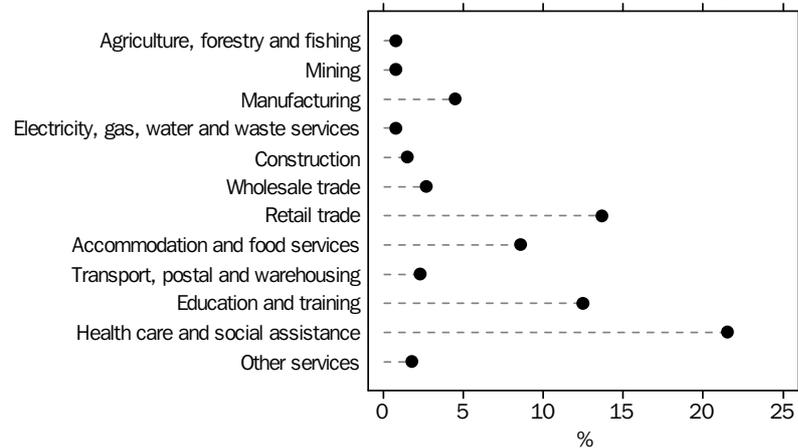

EMPLOYEES

Of the 9.3 million persons who were employees, 4.8 million were males and 4.5 million were females.

EMPLOYEES, MALES, Selected industries of main job

EMPLOYEES, FEMALES, By selected industries of main job

For males, the industry Division with the most employees was Manufacturing (13%) followed by Construction (11%). However for females, the industry Division with the most employees was Health care and social assistance (22%), followed by Retail trade (14%), and Education and training (13%).

For both males and females, the occupation group with the highest proportion of employees with paid leave entitlements was Managers (95% and 91% respectively). This was followed by Professionals for both males and females (91% and 89% respectively). The occupation group with the lowest proportion of males with paid leave entitlements

SUMMARY OF FINDINGS *continued*

EMPLOYEES *continued*

was Labourers (56%). By comparison, the occupation group with the lowest proportion of females with paid leave entitlements was Sales workers (46%).

An estimated 6.4 million (69%) employees were full-time workers in their main job. Most employees who were full-time workers in their main job had paid leave entitlements (89%). By comparison, of the 2.8 million part-time workers, less than half (46%) had paid leave entitlements.

Other characteristics of employees in November 2011 include:

- 24% had been with their current employer for less than 1 year, while 21% had been with their current employer for 10 years or more;
- 19% were aged 15–24 years, and 14% were aged 55 years and over;
- 40% had some say in their start and finish times;
- 69% worked weekdays only in their job/s¹, while a further 30% worked both weekdays and weekends; and
- Only 4% worked on a fixed-term contract, of whom 48% were Professionals.

Of the 7.1 million persons who were employees with paid leave entitlements, 54% were males. The industry Division with the highest proportion of males with paid leave entitlements was Financial and insurance services (93%) and for females it was Public administration and safety (92%). The industry Division with the lowest proportion of males and females with paid leave entitlements was Accommodation and food services (41% and 32% respectively).

Of the 2.2 million persons who were employees without paid leave entitlements, 55% were females. The industry Division with the highest proportion of males and females without paid leave entitlements was Accommodation and food services (59% and 68% respectively). The industry Division with the lowest proportion of males without paid leave entitlements was Financial and insurance services (7%) and for females it was Public administration and safety (8%).

INDEPENDENT CONTRACTORS

There were 1.0 million persons who were independent contractors in their main job in November 2011. The majority (73%) of these were males. Almost half (47%) of all independent contractors actually worked 40 hours or more in their main job (57% of males and 20% of females).

Female independent contractors were more likely to work fewer hours than males. For example, one-third (33%) of female independent contractors worked fewer than 15 hours in their main job, compared with 14% of male independent contractors. A further 25% of females worked 15–24 hours in their main job compared with 10% of males.

Around half of all independent contractors (50% of males and 54% of females) were in the 35–54 year age groups.

Independent contractors were most likely to work in the Construction industry Division (32%), followed by the Professional, scientific and technical services industry (13%). Male independent contractors were more likely to work in the Construction industry Division (41%), followed by the Professional, scientific and technical services industry (11%). By comparison, female independent contractors were most likely to work in the Professional, scientific and technical services industry Division (18%), followed by the Health care and social assistance industry (15%).

SUMMARY OF FINDINGS *continued*

INDEPENDENT CONTRACTORS *continued*

INDEPENDENT CONTRACTORS, MALES, By occupation of main job

INDEPENDENT CONTRACTORS, FEMALES, By occupation of main job

For males, the occupation group with the most independent contractors was Technicians and trades workers (37%), followed by Professionals (16%). However for females, the most independent contractors worked as Professionals (33%), followed by Clerical and administrative workers (20%).

Most independent contractors (76%) were usually able to work on more than one active contract, however just under half (47%) of all independent contractors had more than one active contract in the reference week.

Other characteristics of independent contractors in November 2011 include:

- 60% had authority over their own work (60% of males and 61% of females);
- 66% were able to (sub)contract their own work (71% of males and 55% of females);
- 80% had no employees (77% of males and 86% of females);
- 14% had been with their current business for less than 1 year, while 39% had been with their current business for 10 years or more;
- 82% had some say in their start or finish times; and
- 58% worked weekdays only in their job/s¹, while a further 42% worked on both weekdays and weekends.

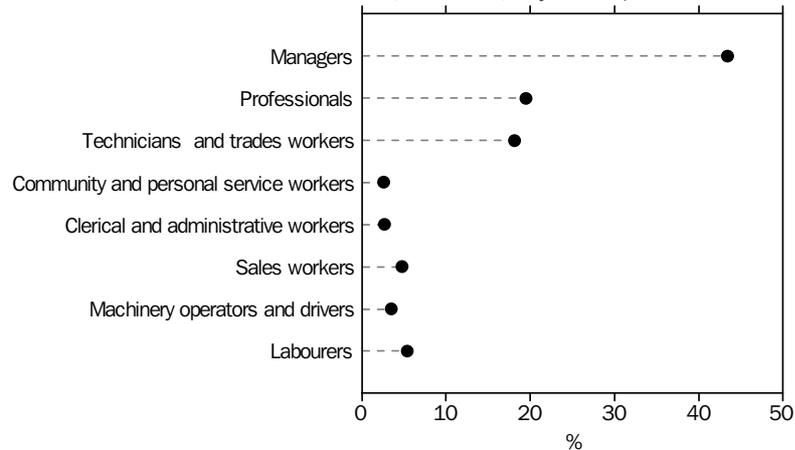

SUMMARY OF FINDINGS *continued*

OTHER BUSINESS OPERATORS

There were approximately 1.0 million other business operators in November 2011, of whom 62% were males. For both males and females, over half of business operators were in the 35–54 year age group (52% and 59% respectively).

Other business operators who were males were most likely to work in the Agriculture, forestry and fishing industry Division (16%), followed by the Construction industry (12%), Professional, scientific and technical services (11%) and retail trade industry (10%). For females, the most common industry Divisions were Retail trade (14%) and Agriculture, forestry and fishing (13%).

OTHER BUSINESS OPERATORS, MALES, By occupation of main job

OTHER BUSINESS OPERATORS, FEMALES, By occupation of main job

The most common occupation of other business operators for both males and females was Managers (43% and 33% respectively).

For males, the next most common occupations were Professionals (20%) and Technicians and trades workers (18%). For females, the next most common occupation was Clerical and administrative workers (24%).

Other characteristics of other business operators in November 2011 include:

- 58% actually worked 40 hours or more in their main job (71% of males and 38% of females) in the reference week, while almost two-thirds (65%) of these actually worked 49 or more hours in the reference week;

SUMMARY OF FINDINGS *continued*

OTHER BUSINESS OPERATORS *continued*

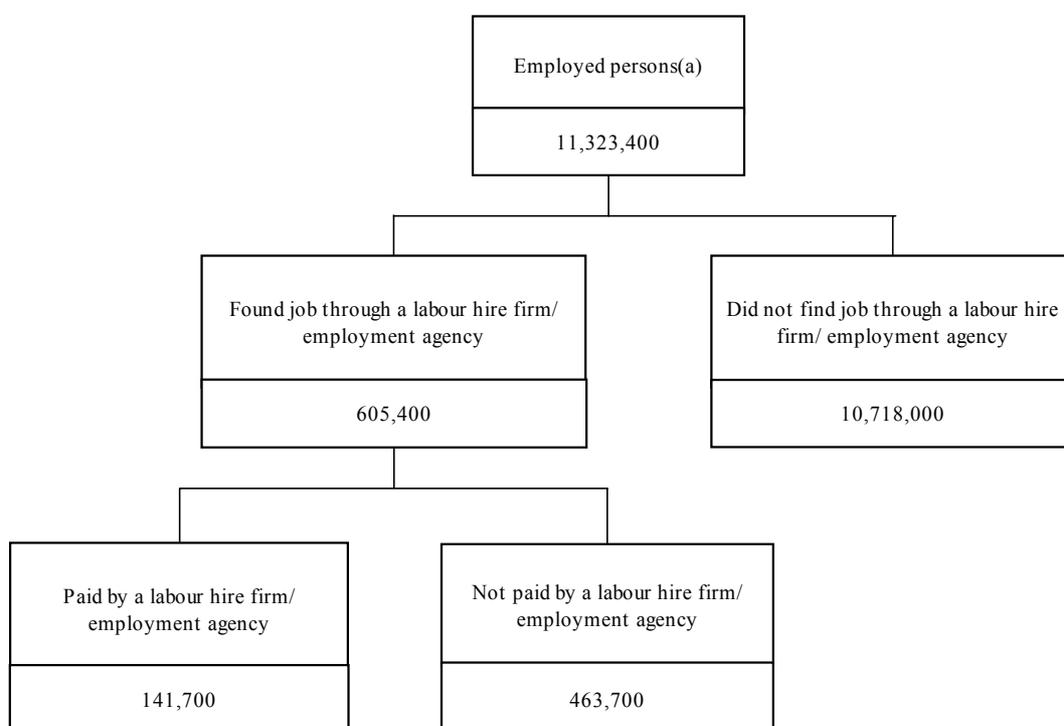

- 8% had been in their current business for less than 1 year, while almost half (49%) had been with their current business for 10 years or more;
- 89% had some say in their start or finish times; and
- 46% worked weekdays only in their job/s¹, while a further 54% worked on both weekdays and weekends.

ALL EMPLOYED PERSONS

Younger persons were most likely to be employees rather than independent contractors or other business operators. As age increases, generally, the proportion of employees decreases, while the proportion of independent contractors and other business operators increase however, being an employee was the most likely form of employment for employed persons for all age ranges. For example:

- 97% of employed persons aged 15–24 years were employees, 3% were independent contractors and 1% were other business operators;
- 78% of employed persons aged 35–54 years were employees, 10% were independent contractors and 11% were other business operators; and
- 51% of employed persons aged 65 years and over were employees, 19% were independent contractors and 30% were other business operators.

PERSONS WHO FOUND THEIR JOB THROUGH A LABOUR HIRE FIRM/EMPLOYMENT AGENCY

(a) Excludes people who were contributing family workers in their main job.

SUMMARY OF FINDINGS *continued*

PERSONS WHO FOUND
THEIR JOB THROUGH A
LABOUR HIRE
FIRM/EMPLOYMENT
AGENCY *continued*

In November 2011, there were 605,400 persons (5% of all employed persons) who found their job through a labour hire firm/employment agency of which 56% were males.

Of those persons who found their job through a labour hire firm/employment agency, most (60%) were in the 25–44 year age group.

For males who found their job through a labour hire firm/employment agency, the Manufacturing (19%) and Professional, scientific and technical services (9%) were the industry Divisions with the greatest proportion. For females, the most common industry Divisions were the Health care and social assistance (15%) and Financial and insurance services (11%).

The most common occupation groups for males who found their job through a labour hire firm/employment agency were Machinery operators and drivers and Professionals (both 22%). For females, the most common occupations group were Clerical and administrative workers (39%) and Professionals (23%).

The main reason for using a labour hire firm/employment agency for finding work was 'Ease of obtaining work' reported by 53% of persons who found their job through a labour hire firm/employment agency.

There were 141,700 persons (23% of those who found their job through a labour hire firm/employment agency) who were paid by a labour hire firm/employment agency (labour hire workers). Of these persons, the Administrative and support services (20%) and Manufacturing (13%) were the industry Divisions with the greatest proportion.

Clerical and administrative workers (21%) and Machinery operators and drivers (19%) were the most common occupation groups.

Of those who were paid by a labour hire firm/employment agency, there were 115,500 persons (82%) who usually had continuous/ongoing work from a labour hire firm/employment agency.

In November 2011, other characteristics of persons who found their job through a labour hire firm/employment agency include:

- 35% usually had continuous ongoing work from their labour hire firm/employment agency;
- 40% were still registered with the same labour hire firm/employment agency that found their job;
- 36% had been with their current employer/business for less than 1 year and a further 46% had been with their current employer/business for 1–5 years;
- 43% had one work assignment from their labour hire firm/employment agency in the last 12 months while 43% had no work assignments in the last 12 months; and
- 43% of persons who found their job through a labour hire firm/employment agency worked 40 hours in their main job during the reference week (52% of males and 31% of females).

END NOTE

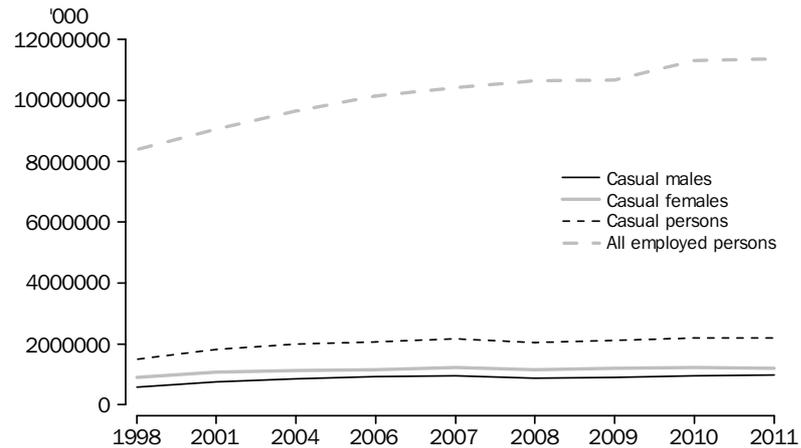

1. See paragraph 19 of the Explanatory Notes for more information.

CASUAL EMPLOYMENT AND CONDITIONS ARE STABLE

OVERVIEW

This article discusses the extent of casual employment and the conditions under which casual employees work. While the number of casuals (those without either paid sick and paid holiday leave) is generally increasing over time, it is not at an equivalent rate to the entire workforce, resulting recently in a small fall in the proportion of the labour force employed on a casual basis. In addition, the rights and entitlements of these casuals today are similar to previous years.

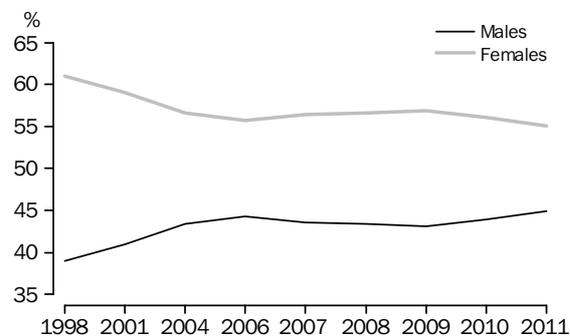

EMPLOYMENT, Comparison between casuals and all employed persons

The number of employed persons has continued to increase in the workforce in comparison with those deemed to be casuals (employees without paid leave entitlements).

Generally, the number of casuals in the workforce is increasing, however it is increasing at a rate lower than that of all employed persons. In 1998, there were 8.3 million employed persons of whom the number of casuals was 1.5 million (18% of all employed persons). The proportion of casuals reached a peak of 21% of all employed persons (2.2 million casuals and 10.4 million employed persons) in 2007, and now sits at 19% of all employed persons (2.2 million casuals and 11.4 million employed persons) in 2011.

PROPORTION OF CASUALS—1998 to 2011

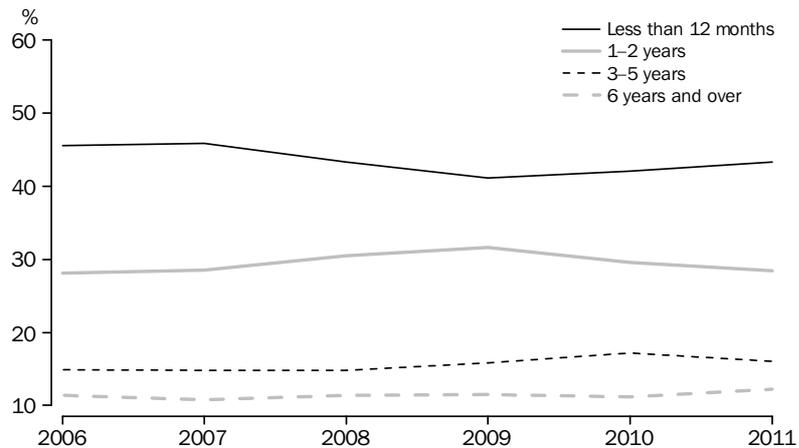

The proportion of casual females decreased from 61% in 1998 to 55% in 2011, while the proportion of casual males increased from 39% in 1998 to 45% in 2011. Since 2006 the proportions have remained steady.

CASUAL EMPLOYMENT AND CONDITIONS ARE STABLE *continued*

OVERVIEW *continued*

CONTINUOUS DURATION WITH CURRENT EMPLOYER/BUSINESS (%)

The proportion of casual employees working for 1–2 years with their employer has generally remained at the same level, 28% in 2006 and 28% in 2011, likewise for those employed for 3–5 years, 15% in 2006 and 16% in 2011. The proportion of casual employees working for their employer for less than 12 months has had more variability. This was 46% in 2006 and then generally declined to 41% in 2009 before reaching 43% in 2011.

The following points illustrate that there have been only slight changes in entitlements for casual workers since 2006.

- In 2004, 88% of employees without leave entitlements considered their job to be casual. In 2008 and again in 2011, the proportion of employees without leave entitlements who considered their job to be casual was still 88%.
- In 2006, 7% of casuals had a set completion date or end to their job. In 2008, this was 6% and was again 7% of casuals in 2011. Of these casuals, 63% worked on a fixed-term contract in 2006, 57% in 2008 and 63% in 2011.
- In 2008, 53% of casuals had earnings that varied from one period to the next. This has remained unchanged since and is again 53% in 2011.
- In 2008, there were 26% of casuals who were required to be on call or standby in their job. In 2011, there were 28% of casuals in the category.
- In 2008, 62% of casual employees usually worked the same number of hours each week. In 2010, there were 59% of casuals who usually worked the same number of hours each week and in 2011, the proportion was again 62% of casuals.
- The proportion of casuals who only work on weekdays only was 51% in 2011. In 2008, this was 50%. Those only working on weekends in 2011 was 6% and in 2008 was also 6%.

CASUAL EMPLOYMENT AND CONDITIONS ARE STABLE *continued*

OVERVIEW *continued*

Data from the Working Time Arrangements, Australia, November 2009 (cat. no. 6342.0) indicate that for casual employees:

- In 2003, 66% of casual employees could choose when to take holidays. In 2006 this was 64% and in 2009 this was again 66%.
- In 2006, 33% of casuals has some say in their start and finish times, compared with 35% in 2009.

EXPLANATORY NOTES

INTRODUCTION

1 The statistics in this publication were compiled from data collected in the Forms of Employment Survey, conducted throughout Australia in November 2011 as a supplement to the Australian Bureau of Statistics (ABS) monthly Labour Force Survey (LFS). Respondents to the LFS who fell within the scope of the supplementary survey were asked further questions.

2 The publication *Labour Force, Australia* (cat. no. 6202.0) contains information about survey design, sample redesign, scope, coverage and population benchmarks relevant to the monthly LFS, which also applies to supplementary surveys. It also contains definitions of demographic and labour force characteristics, and information about telephone interviewing which are relevant to both the monthly LFS and supplementary surveys.

CONCEPTS, SOURCES AND METHODS

3 The conceptual framework used in Australia's LFS aligns closely with the standards and guidelines set out in Resolutions of the International Conference of Labour Statisticians. Descriptions of the underlying concepts and structure of Australia's labour force statistics, and the sources and methods used in compiling these estimates, are presented in *Labour Statistics: Concepts, Sources and Methods* (cat. no. 6102.0.55.001).

SCOPE

4 The scope of the LFS is restricted to persons aged 15 years and over and excludes the following people:

- members of the permanent defence forces;
- certain diplomatic personnel of overseas governments, customarily excluded from the Census and estimated populations;
- overseas residents in Australia; and
- members of non-Australian defence forces (and their dependants).

5 Students at boarding schools, patients in hospitals, residents of homes (e.g. retirement homes, homes for people with disabilities), and inmates of prisons are excluded from all supplementary surveys.

6 This supplementary survey was conducted in both urban and rural areas in all states and territories, but excluded persons living in Indigenous communities in very remote parts of Australia.

7 This survey was restricted to employed persons aged 15 years and over who were not contributing family workers in their main job.

COVERAGE

8 The estimates in this publication relate to persons covered by the survey in November 2011. In the LFS, coverage rules are applied which aim to ensure that each person is associated with only one dwelling, and hence has only one chance of selection in the survey. See *Labour Force, Australia* (cat. no. 6202.0) for more details.

SAMPLE SIZE

9 Supplementary surveys are not conducted on the full LFS sample. Since August 1994 the sample for supplementary surveys has been restricted to no more than seven-eighths of the LFS sample.

10 The initial sample for the November 2011 LFS consisted of 36,604 private dwelling households and special dwelling units. Of the 29,675 private dwelling households and special dwelling units that remained in the survey after sample loss (e.g. households selected in the survey which had no residents in scope for the LFS, vacant or derelict dwellings and dwellings under construction), 28,171 or 94.5% were fully responding to the Forms of Employment Survey. The number of completed interviews obtained from these private dwellings and special dwelling units (after taking into account scope and coverage exclusions) was 29,763.

EXPLANATORY NOTES *continued*

RELIABILITY OF THE ESTIMATES

- 11** Estimates in this publication are subject to sampling and non-sampling errors:
- Sampling error is the difference between the published estimate and the value that would have been produced if all dwellings had been included in the survey. For more information, see the Technical Note.
 - Non-sampling errors are inaccuracies that occur because of imperfections in reporting by respondents and interviewers and errors made in coding and processing data. These inaccuracies may occur in any enumeration, whether it be a full count or a sample. Every effort is made to reduce the non-sampling error to a minimum by careful design of questionnaires, intensive training and supervision of interviewers and effective processing procedures.

SEASONAL FACTORS

- 12** The estimates are based on information collected in the survey month (November) and, due to seasonal factors, may not be representative of other months of the year.

CLASSIFICATIONS USED

- 13** Country of birth data are classified according to the *Standard Australian Classification of Countries (SACC), Second Edition, 2008* (cat. no. 1269.0).

- 14** From 2006, occupation data are classified according to the *ANZSCO—Australian and New Zealand Standard Classification of Occupations, First Edition, Revision 1, 2009* (cat. no. 1220.0). This classification replaced the *ASCO—Australian Standard Classification of Occupations, Second Edition, 1997* (cat. no. 1220.0).

- 15** Also from 2006, industry data are classified according to the *Australian and New Zealand Standard Industrial Classification (ANZSIC), 2006* (cat. no. 1292.0). This classification replaced the *Australian and New Zealand Standard Industrial Classification (ANZSIC), 1993* (cat. no. 1292.0).

NOTES ON ESTIMATES

- 16** People who were away from work during the reference week, were included in the 'Less than 1 hour/no hours' category for the data item 'Hours actually worked in main job'.

- 17** Employees are classified as 'With paid leave entitlements' if they said 'yes' to either of the following questions:

- 'Does your employer provide you with paid sick leave?'
- 'Does your employer provide you with paid holiday leave?'

In all other cases, employees are categorised as 'Without paid leave entitlements'.

- 18** For the data item 'Days of the week usually worked in all jobs', people who reported that they worked from Monday to Friday, inclusive, were categorised as working Monday to Friday. These people may have reported that they also worked on Saturday and Sunday in their job/s. In addition, for those who did not work Monday to Friday, inclusive, these people would be counted in each day (e.g. Monday, Tuesday, Wednesday, Thursday, Friday, Saturday or Sunday) that they usually work. People who reported that the days of the week usually worked varied were categorised only to 'Days varied'. A response of 'Days varied' could not be provided with any other response.

- 19** The responses given by multiple jobholders for the data items 'Days of the week usually worked in all jobs', 'Number of days of the week usually worked in all jobs', and 'Whether worked weekdays and/or weekends in all jobs' does not imply that this was their usual pattern of work in each of their jobs, rather this was their total pattern of work in all their jobs.

EXPLANATORY NOTES *continued*

COMPARABILITY OF TIME SERIES

20 The Labour Force Survey estimates, and estimates from the supplementary surveys, are calculated in such a way as to sum to independent estimates of the civilian population aged 15 years and over (population benchmarks). These population benchmarks are based on Estimated Resident Population (ERP) data. Generally, revisions are made to population benchmarks after each five-yearly Census of Population and Housing (Census), however in the second half of 2010 revisions were applied to population benchmarks, including those used for the 2011 Forms of Employment Survey, to take into account more up to date information about Net Overseas Migration (a component of the ERP). For more details on population benchmarks, see the Explanatory Notes in *Labour Force Australia* (cat. no. 6202.0), and for details about the revisions made, see the article in the September 2010 issue of *Labour Force, Australia* (cat. no. 6202.0).

21 Care should be taken when comparing results from the 2011 Forms of Employment Survey to surveys prior to 2008.

22 In November 2008, the Forms of Employment Survey was redeveloped to better capture information about independent contractors, other business operators and employees. The change has resulted in a break in series for employees and users need to exercise caution when comparing with data about employees prior to the 2008 publication.

23 The data items 'Status in employment' and 'Employment type in main job' presented in the 2007 Forms of Employment publication are no longer presented in this publication, however are available on request. The main data item used to classify employed persons is 'Form of employment in main job'.

24 Further, prior to 2004, people working for payment in kind were excluded from the survey. From 2004 onwards, this group has been included. In addition, the 2001 survey excluded persons aged 70 years and over.

25 Additional information is presented about people who found their current job through a labour hire firm/employment agency. These are, 'Whether currently registered with a labour hire firm/employment agency', 'Whether still registered with the same labour hire firm/employment agency', 'Whether paid by a labour hire firm/employment agency', 'Number of work assignments through labour hire firm/employment agency in the last 12 months', 'Whether usually had continuous/ongoing work from a labour hire firm/employment agency', and 'All/Main reasons for using a labour hire firm/employment agency'. This information was previously collected in November 2008.

COMPARABILITY WITH MONTHLY LFS STATISTICS

26 Due to differences in the scope of this supplementary survey and that of the monthly LFS, the estimation procedure may lead to some small variations between labour force estimates from this survey and those from the LFS.

PREVIOUS SURVEYS

27 The Forms of Employment Survey was first conducted in August 1998 then in November 2001, November 2004 and annually since November 2006. Results of previous surveys on employment arrangements have been published in:

■ *Employment Arrangements, Retirement and Superannuation, Australia* (cat. no. 6361.0); and

■ *Forms of Employment, Australia* (cat. no. 6359.0).

NEXT SURVEY

28 The ABS plans to conduct this survey again in November 2012.

ACKNOWLEDGEMENT

29 ABS publications draw extensively on information provided freely by individuals, businesses, governments and other organisations. Their continued cooperation is very much appreciated: without it, the wide range of statistics published by the ABS would not be available. Information received by the ABS is treated in strict confidence as required by the *Census and Statistics Act, 1905*.

EXPLANATORY NOTES *continued*

RELATED PUBLICATIONS

30 ABS publications which may be of interest include:

31 Current publications and other products released by the ABS are available from the *Statistics Page* on the ABS website. The ABS also issues a daily Release Advice on the website which details products to be released in the week ahead.

APPENDIX 1 FORM OF EMPLOYMENT

FORM OF EMPLOYMENT

The following provides an outline of how people are classified in the 'Form of employment in main job' data item.

Persons are classified as employees (excluding owner managers of incorporated enterprises (OMIEs)), owner managers of incorporated enterprises and owner managers of unincorporated enterprises (OMUEs) based on their responses to questions in the monthly Labour Force survey (LFS).

Employees (excluding OMIEs) from the LFS are persons who:

- work for a public or private employer; and
- receive remuneration in wages or salary; or are paid a retainer fee by their employer and worked on a commission basis, for tips, piece-rates or payment in kind.

Owner managers of incorporated enterprises from the LFS are persons who:

- work in their own incorporated enterprise, that is, a business entity which is registered as a separate legal entity to its members or owners (also known as a limited liability company).

Owner managers of unincorporated enterprises from the LFS are persons who:

- operate their own unincorporated enterprise, that is, a business entity in which the owner and the business are legally inseparable, so that the owner is liable for any business debts that are incurred. This category includes those engaged independently in a trade or profession.

These people from the LFS are then asked questions in the FOES to identify key characteristics of employees, independent contractors and other business operators. The responses to these questions are then used to determine how people are classified as employees, independent contractors and other business operators in the 'Form of employment' data item.

These questions are:

"Do you work as an independent contractor in your job?"

"Do you receive a pay slip/advice?"

"Do you/Does your business invoice or bill clients/employers?"

"Excluding wages and salary, are you able to make drawings from your employer/business?"

APPENDIX 1 FORM OF EMPLOYMENT *continued*

FORM OF EMPLOYMENT
continued

The following decision table, shows how people are classified in the 'Form of employment' data item.

Decision table: Form of employment					
	Whether considered to be independent contractor?	Whether received pay slip/advice?	Whether invoices/bills clients/ employers?	Whether able to make drawings from employer/ business	Result
Employees (excluding OMIEs)	Yes	Yes	Yes		Independent Contractor
			No	Yes	Independent Contractor
				No	Employee
			No		Independent Contractor
			No		Independent Contractor
	No	Yes			Employee
			No		Independent Contractor
			No		Employee
Owner managers (OMIEs and OMUEs)	Yes	Yes	Yes		Independent Contractor
			No	Yes	Independent Contractor
				No	Employee
			No		Independent Contractor
			No		Independent Contractor
	No	Yes	Yes		Other Business Operator
			No	Yes	Other Business Operator
				No	Employee
		No		Other Business Operator	
		No		Other Business Operator	

Sufficient information was obtained from respondents after answering the second or third questions to determine their 'Form of employment', therefore people were not asked these questions to reduce respondent burden.

APPENDIX 1 FORM OF EMPLOYMENT *continued*

COMPARISON WITH EMPLOYMENT TYPE

The data item 'Employment type in main job' that classifies persons according to the following broad categories:

- Employees (excluding OMIEs);
- Owner managers of incorporated enterprises; or
- Owner managers of unincorporated enterprises.

is commonly used in other Labour Supplementary Surveys.

The following table shows a comparison of the data items 'Employment type in main job' and 'Form of employment in main job'.

EMPLOYED PERSONS, Form of employment in main job—By employment type in main job—By sex

Form of employment in main job	EMPLOYEES (EXCLUDING OMIES)			Owner managers of incorporated enterprises	Owner managers of unincorporated enterprises	Total
	With paid leave entitlements	Without paid leave entitlements	Total			
	'000	'000	'000			
MALES						
Employees	3 801.6	968.2	4 769.8	11.4	15.9	4 797.1
With paid leave entitlements	3 801.6	—	3 801.6	*6.4	*3.4	3 811.4
Without paid leave entitlements	—	968.2	968.2	*5.0	12.5	985.7
Independent contractors	13.1	61.2	74.3	223.3	447.7	745.3
Business operators	—	—	—	327.9	315.0	642.9
Total	3 814.7	1 029.4	4 844.0	562.6	778.6	6 185.3
FEMALES						
Employees	3 268.5	1 197.7	4 466.1	9.9	13.2	4 489.2
With paid leave entitlements	3 268.5	—	3 268.5	*6.4	*3.2	3 278.0
Without paid leave entitlements	—	1 197.7	1 197.7	*3.5	10.0	1 211.1
Independent contractors	10.0	32.5	42.5	54.4	184.7	281.6
Business operators	—	—	—	158.1	239.3	397.4
Total	3 278.5	1 230.2	4 508.7	222.3	437.2	5 168.2
PERSONS						
Employees	7 070.1	2 165.8	9 235.9	21.3	29.1	9 286.2

Without paid leave entitlements	—	2 165.8	2 165.8	8.5	22.4	2 196.8
Independent contractors	23.1	93.7	116.8	277.7	632.4	1 026.9
Business operators	—	—	—	486.0	554.3	1 040.3
Total	7 093.2	2 259.5	9 352.7	785.0	1 215.8	11 353.4

* estimate has a relative standard error of 25% to 50% and should be used with caution — nil or rounded to zero (including null cells)

The table shows, there were 116,800 employees (excluding OMIEs) from 'Employment type' who were further defined as independent contractors in 'Form of employment' (comprising 74,300 males and 42,500 females). Similarly there were 50,400 owner managers (21,300 OMIEs and 29,100 OMUEs) from 'Employment type' who were further defined as employees in 'Form of employment'.

APPENDIX 1 FORM OF EMPLOYMENT *continued*

COMPARISON WITH
EMPLOYMENT TYPE *continued*

Of OMIEs (in 'Employment type'), 62% were further defined as other business operators in 'Form of employment' and 35% of OMIEs were further defined as independent contractors. By comparison, over half (52%) of OMUEs (in 'Employment type') were further defined as independent contractors in 'Form of employment', and 46% were further defined as other business operators.

APPENDIX 2 POPULATIONS AND DATA ITEMS LIST

DATA AVAILABLE ON REQUEST

The ABS has a range of data available on request from the Forms of Employment Survey. This section lists the data items and populations which relate to the survey. More detailed breakdowns of some data items may also be available on request.

The population(s) for a particular data item refers to the persons in the survey to whom the data item relates. Where alternative output categories are available for the same data item, these are shown and the data item name is followed by a bracketed numeral (e.g. Country of birth (2)).

For more information about ABS data available on request, contact Client Services Section on Canberra (02) 6252 7400, or via email <information.consultancy@abs.gov.au>.

(a) This product replaces the publication Labour Force Status and Other Characteristics of Migrants, Australia (cat. no. 6250.0).

(b) Latest data available on request July 2001.

(c) This product replaces the publication Working Arrangements, Australia (cat. no. 6342.0).

TECHNICAL NOTE DATA QUALITY

INTRODUCTION

1 Estimates in this publication are based on information obtained from occupants of a sample of dwellings; they are subject to sampling variability. That is, they may differ from those estimates that would have been produced if all dwellings had been included in the survey. One measure of the likely difference is given by the standard error (SE), which indicates the extent to which an estimate might have varied by chance because only a sample of dwellings was included. There are about two chances in three (67%) that a sample estimate will differ by less than one SE from the number that would have been obtained if all dwellings had been included, and about 19 chances in 20 (95%) that the difference will be less than two SEs. Another measure of the likely difference is the relative standard error (RSE), which is obtained by expressing the SE as a percentage of the estimate.

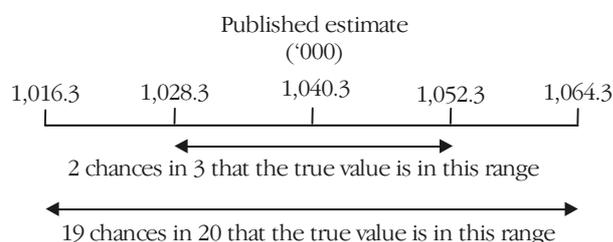

2 Due to space limitations, it is impractical to print the SE of each estimate in the publication. Instead, a table of SEs is provided to enable readers to determine the SE for an estimate from the size of that estimate (see table T1). The SE table is derived from a mathematical model, referred to as the 'SE model', which is created using data from a number of past Labour Force Surveys. It should be noted that the SE model only gives an approximate value for the SE for any particular estimate, since there is some minor variation between SEs for different estimates of the same size.

CALCULATION OF STANDARD ERRORS

3 An example of the calculation and the use of SEs in relation to estimates of people is as follows. Table 2 shows that the estimated number of persons in Australia who were other business operators was 1,040,300. Since this estimate is between 1,000,000 and 2,000,000, table T1 shows the SE for Australia will be between 11,750 and 17,050 and can be approximated by interpolation using the following general formula:

$$\begin{aligned}
 & SE \text{ of estimate} \\
 &= \text{lower SE} + \left(\left(\frac{\text{size of estimate} - \text{lower estimate}}{\text{upper estimate} - \text{lower estimate}} \right) \times (\text{upper SE} - \text{lower SE}) \right) \\
 &= 11,750 + \left(\left(\frac{1,040,300 - 1,000,000}{1,000,000 - 2,000,000} \right) \times (17,050 - 11,750) \right) \\
 &= 12,000 \text{ (rounded to the nearest 100)}
 \end{aligned}$$

4 There are about two chances in three that the value that would have been produced if all dwellings had been included in the survey will fall in the range 1,028,300 to 1,052,300, and about 19 chances in 20 that the value will fall within the range 1,016,300 to 1,064,300. This example is illustrated in the diagram below:

CALCULATION OF STANDARD ERRORS *continued*

5 In general, the size of the SE increases as the size of the estimate increases. Conversely, the RSE decreases as the size of the estimate increases. Very small estimates are thus subject to such high RSEs that their value for most practical purposes is unreliable. In the tables in this publication, only estimates with RSEs of 25% or less are considered reliable for most purposes. Estimates with RSEs greater than 25% but less than or equal to 50% are preceded by an asterisk (e.g. *3.4) to indicate that they are subject to high SEs and should be used with caution. Estimates with RSEs of greater than 50%, preceded by a double asterisk (e.g. **0.3), are considered too unreliable for general use and should only be used to aggregate with other estimates to provide derived estimates with RSEs of 25% or less.

PROPORTIONS AND PERCENTAGES

6 Proportions and percentages formed from the ratio of two estimates are also subject to sampling errors. The size of the error depends on the accuracy of both the numerator and the denominator. A formulae to approximate the RSE of a proportion is given below. This formulae is only valid when x is a subset of y:

$$RSE\left(\frac{x}{y}\right) = \sqrt{[RSE(x)]^2 - [RSE(y)]^2}$$

7 Considering the example above, of the 1,040,300 persons who were other business operators, 397,400 or 38.2% were female. The SE of 397,400, may be calculated by interpolation as 7,500. To convert this to an RSE we express the SE as a percentage of the estimate, or $7,500/397,400 = 1.9\%$. The SE for 1,040,300 was calculated previously as 12,000, which converted to an RSE is $12,000/1,040,300 = 1.2\%$. Applying the above formulae, the RSE of the proportion is:

$$RSE = \sqrt{(1.9)^2 - (1.2)^2} = 1.5\%$$

8 The SE for the proportion of females who were other business operators, is 0.6 percentage points, calculated as $(38.2/100) \times 1.5$. There are about two chances in three that the proportion of female business operators is between 37.6% and 38.8% and 19 chances in 20 that the proportion is within the range 37.0% to 39.4%.

9 All other estimates produced from population estimates smaller than the values in T2 have RSEs larger than 25% and should be used with caution. T2 also indicates the size of the population estimates that would produce all other estimates with RSEs greater than 50% are considered too unreliable for general use.

DIFFERENCES

10 Published estimates may also be used to calculate the difference between two survey estimates (of numbers or percentages). Such an estimate is subject to sampling error. The sampling error of the difference between two estimates depends on their SEs and the relationship (correlation) between them. An appropriate SE of the difference between two estimates (x-y) may be calculated by the following formulae:

$$SE(x-y) = \sqrt{[SE(x)]^2 + [SE(y)]^2}$$

11 While this formulae will only be exact for differences between separate and uncorrelated characteristics or subpopulations, it is expected to provide a good approximation for all differences likely to be of interest in this publication.

GLOSSARY

Born in Australia	Includes persons born in Australia, Norfolk Island and Australian External Territories.
Considered job to be casual	Employees who considered their job to be casual, regardless of any entitlements that they may receive.
Continuous duration with current employer/business	The length of the current period of employment people had with their employer or in their own business. The length of time includes periods of paid leave, unpaid leave or strike.
Drawings	Drawings are where the owner of a business withdraws money from the business for their personal use, or where an employee withdraws money from their employer for their personal use.
Employed	<p>People aged 15 years and over who, during the reference week:</p> <ul style="list-style-type: none">■ worked for one hour or more for pay, profit, commission or payment in kind, in a job or business or on a farm (comprising employees, employers and own account workers); or■ worked for one hour or more without pay in a family business or on a farm (i.e. contributing family workers); or■ were employees who had a job but were not at work and were:<ul style="list-style-type: none">■ away from work for less than four weeks up to the end of the reference week;■ away from work for more than four weeks up to the end of the reference week and received pay for some or all of the four week period to the end of the reference week;■ away from work as a standard work or shift arrangement;■ on strike or locked out;■ on workers' compensation and expected to return to their job; or■ were employers or own account workers who had a job, business or farm, but were not at work. <p>Contributing family workers in their main job were excluded from the Forms of Employment Survey.</p>
Employees	<p>From November 2008, the Forms of Employment Survey definition of employees differs from the definition used in the Labour Force Survey, other household surveys (including earlier FOES), and employer surveys.</p> <p><i>Forms of Employment Survey (from November 2008).</i> Employees are people who work for a public or private employer and receive remuneration in wages or salary. Employees are engaged under a contract of service (an employment contract) and take directions from their employer/supervisor/manager/foreman on how the work is performed.</p> <p><i>Labour Force Survey and other household surveys (including FOES prior to 2008).</i> Employees are persons who:</p> <ul style="list-style-type: none">■ worked for a public or private employer; and■ received remuneration in wages or salary; or are paid a retainer fee by their employer and worked on a commission basis, for tips, piece-rates or payment in kind; or■ operated their own incorporated enterprise with or without hiring employees. <p><i>Employer surveys.</i> Employees are wage and salary earners who received pay for any part of the reference period.</p>
Employment agency	An employment agency is an organisation which is engaged in personnel search, or selection and placement of people for an employing organisation. The agency or firm may also be engaged in supply of their own employees to other employers, usually on a short-term basis. (See also labour hire firm).
Fixed-term contract	A contract of employment which specifies that the employment will be terminated on a particular date/event.

GLOSSARY *continued*

Form of employment	Classifies employed persons according to the following categories on the basis of their main job (that is, the job in which the most hours were usually worked): <ul style="list-style-type: none">■ Employees;<ul style="list-style-type: none">■ With paid leave entitlements;■ Without paid leave entitlements;■ Independent contractors; or■ Other business operators.
Full-time workers in main job	Employed persons who usually worked 35 hours or more a week (in their main job) and others who, although usually worked fewer than 35 hours a week, worked 35 hours or more during the reference week.
Holiday leave	Provision by an employer of paid holiday, vacation or recreation leave.
Hours usually worked	The number of hours usually worked in a week.
Hours worked	The number of hours actually worked during the reference week.
Independent contractors	Independent contractors are persons who operate their own business and who contract to perform services for others without having the legal status of an employee, i.e. persons who are engaged by a client, rather than an employer. Independent contractors are engaged under a contract for services (a commercial contract), whereas employees are engaged under a contract of service (an employment contract). Independent contractors' employment may take a variety of forms, for example, they may have a direct relationship with a client or work through an intermediary. Independent contractors may have employees, however they spend most of their time directly engaged with clients or on client tasks, rather than managing their staff.
Industry	An industry is a group of businesses or organisations that undertake similar economic activities to produce goods and services. In this publication, industry of main job refers to ANZSIC Division as classified according to the <i>Australian and New Zealand Standard Industrial Classification (ANZSIC), 2006</i> (cat. no. 1292.0).
Labour hire firm	A labour hire firm is an organisation which is engaged in personnel search, or selection and placement of people for an employing organisation. The agency or firm may also be engaged in supply of their own employees to other employers, usually on a short-term basis. (See also employment agency).
Labour hire workers	Labour hire workers are persons who found their job through a labour hire firm/employment agency and are paid by the labour hire firm/employment agency.
Long service leave	Provision by an employer or industry body of paid long service leave.
Main English-speaking countries	The list of main English-speaking countries provided here is not an attempt to classify countries on the basis of whether or not English is the predominant or official language of each country. It is a list of the main countries from which Australia receives, or has received, significant numbers of overseas settlers who are likely to speak English. These countries comprise the United Kingdom, the Republic of Ireland, New Zealand, Canada, South Africa and the United States of America.
Main job	The job in which the most hours were usually worked.
Maternity/paternity leave	The provision by an employer of paid maternity/paternity leave.
Multiple job holders	Employed people who, during the reference week worked in a second job. Multiple jobholders exclude those who changed employer in the reference week. People who were contributing family workers or unpaid voluntary workers in their second job were excluded from the Multiple jobholder population.

GLOSSARY *continued*

Occupation	An occupation is a collection of jobs that are sufficiently similar in their title, tasks, skill level and skill specialisation, which are grouped together for the purposes of classification. In this publication, occupation refers to Major Group as defined by the ANZSCO— <i>Australian and New Zealand Standard Classification of Occupations, First Edition, Revision 1, 2009</i> (cat. no. 1220.0).
Other business operators	People who operate their own business, with or without employees, but who are not operating as independent contractors. Other business operators are distinguished from independent contractors in that they tend to generate their income from managing their staff or from selling goods or services to the public, rather than providing a labour service directly to a client. Other business operators spend little time working on client tasks with most of their time spent on managing their employees and/or business.
Part-time workers in main job	Employed persons who usually worked fewer than 35 hours a week (in their main job) and who did so during the reference week.
Reference week	The week preceding the week in which the interview was conducted.
Sick leave	Provision by an employer of paid sick leave.
With paid leave entitlements	Employees who were entitled to either paid holiday leave or paid sick leave (or both) in their main job. For more information see paragraph 18 of the Explanatory Notes.
Without paid leave entitlements	Employees who were not entitled to either paid holiday leave or paid sick leave, or did not know whether they were entitled to paid holiday leave or paid sick leave in their main job. For more information, see paragraph 18 of the Explanatory Notes.
Worked on a fixed-term contract	Employees with a contract of employment which specifies that the employment will be terminated on a particular date/event.
