

Reference No. 4.3

OVERSEAS ARRIVALS AND DEPARTURES SEPTEMBER 1972

This publication provides summary statistics of overseas arrivals in and departures from Australia during the month of September 1972 and the three months ended September 1972 with comparable statistics for earlier periods. More detailed statistics are published quarterly – see *Overseas Arrivals and Departures* (Reference No. 4.1).

CONTENTS

Table	Page
.. Explanatory notes and Comment	1
1. Arrivals and departures by category of traveller	3
2. Arrivals and departures : recent annual and monthly totals	3
3. Permanent movement by month of arrival or departure	4
4. Long-term movement by month of arrival or departure	4
5. Short-term movement by month of arrival or departure	4
6. Settlers arriving by nationality and by occupation	5
7. Australian residents departing permanently by country of birth and by occupation	6
8. Visitors arriving – short-term movement; by sex, mode of transport, intended length of stay, stated purpose of journey and country of residence	7
9. Australian residents departing – short-term movement; by sex, mode of transport, intended length of stay, stated purpose of journey and country of disembarkation	8

EXPLANATORY NOTES

Permanent movement consists of persons arriving in Australia with the stated intention of settling permanently in Australia, and Australian residents departing with the stated intention of residing permanently abroad. **Settlers** are persons who, on arrival in Australia, indicated that they came intending to settle. **Former settlers** are persons who, on departure from Australia, stated that they had come to Australia intending to settle, had stayed for a period of twelve months or more, and were now departing permanently.

2. **Long-term movement** (which is distinct from permanent movement) consists of the arrival of visitors and the departure of Australian residents with the stated intention of staying (in Australia or in a country abroad, respectively) for twelve months or more and the departure of visitors and the return of Australian residents who have stayed (in Australia or in a country abroad, respectively) for twelve months or more.

3. **Short-term movement** consists of all other movements, including the movement of Australian troops irrespective of period of stay, and U.S. troops visiting Australia on rest and recreation leave. This scheme was discontinued in December 1971.

4. **Seasonally adjusted figures** of total and short-term arrivals and departures are shown in Tables 2 and 5. In the adjustments, account is taken of "trading day" effects as well as normal seasonal factors. Details of the methods used and selected measures of variability are available on request and were published in *Seasonally Adjusted Indicators – 1972* (Reference No. 1.10), issued on 6 July 1972.

5. Statistics of characteristics of travellers in the short-term movement from April 1971 are estimates derived from a fifty per cent sample of short-term travellers. While the total number of such travellers and statistics of their mode of transport are fully known, statistics in various Classifications, e.g. nationality, may differ from those that would be obtained from complete processing. A measure of this difference is given by the standard error. There are about 2 chances in 3 that the difference will be less than 1 standard error, and 19 chances in 20 that it will be less than 2 standard errors. The standard error varies with the size of the estimate and the following table shows the standard errors of various estimate sizes.

Size of quantity estimated (persons)	Approximate standard error of estimate	
	Persons	Per cent of estimate
10,000	100	1.0
5,000	70	1.4
1,000	32	3.2
500	23	4.5
100	10	10.0

6. Statistics of permanent and long-term movement are based on records of all travellers in this movement and therefore do not contain sampling errors. However, since short-term movement is a component of *total* movement, statistics of characteristics of travellers in total movement are subject to such errors. The magnitude of standard errors in total movement is about 20 per cent less than in short-term movement.

7. A fuller description of the sampling procedures is published in the quarterly bulletin *Overseas Arrivals and Departures* (Reference No. 4.1).

COMMENT

8. In September 1972, overseas arrivals (104,986) exceeded departures (75,138) by 29,848. Except for a small excess of arrivals over departures in July (4,277), September is the first month since February in which a net gain was reported. The large net losses in April, May and June were unusual, caused in the main by a high level of departures of Australian residents for short terms (less than one year). In September, the number of Australian residents departing in the short-term movement had declined from 52,571 in August to 32,177 – still high for an off-peak month (the seasonally adjusted figure of 46,007 is only exceeded by the adjusted August peak figure of 48,173; but Australian residents returning from trips abroad rose to 58,839, exceeding departures by 26,662.)

9. Total settler arrivals were 9,872 in September, and 28,903 in the three months ended September. The figures are well down on corresponding figures a year earlier, the fall occurring mainly amongst assisted settlers. The number of assisted settlers arriving during the three months ended September 1972 was 16,835, compared with 24,832 for the three months ended September 1971. Departures recorded as former settlers (i.e. persons who state on departure that they had come to Australia intending to settle, had stayed for a year or more and are departing permanently), 8,173 for the three months ended September 1972, were slightly less than the figures for the three months ended June 1972 (8,871), but above those for the three months ended September 1971 (7,201).

10. After adjustment for seasonal variations, the number of overseas visitors in the short-term movement in September (34,738) was slightly above the seasonally adjusted figures for August 1972 (33,948). The seasonally adjusted September figure, however, is still below the corresponding figures in most months of 1970/71. Actual arrivals in September (29,751) were down by 4,170 from the August 1972 figures, and also below the figures for September 1971 (30,019).

TABLE 1. - OVERSEAS ARRIVALS AND DEPARTURES : CATEGORY OF TRAVELLER
