INQUIRIES

- for further information about statistics in this publication and the availability of related unpublished statistics, contact Matthew Montgomery on Canberra (06) 252 6671 or any ABS State office.
- for information about other ABS statistics and services please refer to the back page of this publication.

MAIN FEATURES (March quarter 1994)

Short-term movement - Overseas visitors

There were 862,200 short-term overseas visitor arrivals to Australia, an increase of 16 per cent compared with the March quarter 1993 (746,200).

The main source countries for visitor arrivals in March quarter 1994 were: Japan (22% of total), the United Kingdom (12%), New Zealand (10%) and the United States of America (9%). These four countries accounted for 54 per cent of the total visitor arrivals compared with 59 per cent in March quarter 1993 and 61 per cent in March quarter 1992.

The main purpose of journey reported by visitors arriving was 'Holiday or accompanying business traveller' (64%) followed by 'Visiting relatives' (16%) and 'Business or employment' (10%).

The age group with the greatest number of visitor arrivals was 25 to 34 years with 203,800 (24% of total) followed by the 35 to 44 year age group with 146,000 (17%).

All visitors were asked, on completion of their visit to Australia, to report the State or Territory in which they spent most time. Forty-seven per cent reported New South Wales (the same percentage as March quarter 1993), 25 per cent Queensland (26%), 13 per cent Victoria (14%) and 10 per cent Western Australia (8%).

Of those visitors who reported spending most time in New South Wales, 19 per cent stayed for one month or more. Thirty-one per cent of visitors to Victoria, and 14 per cent of visitors to Queensland reported a similar length of stay.

Short-term movement - Australian residents

The number of short-term resident departures (492,100) was an increase of 7 per cent over March quarter 1993 (460,300).

The main destinations of Australian residents departing were: New Zealand (19% of total), the United States of America (12%), Indonesia (9%), the United Kingdom (8%), Hong Kong (6%) and Singapore (4%).

In the March quarter 1994, 48 per cent (compared with 50% in March quarter 1993) of departures were for the purpose of 'Holiday or accompanying business traveller', 23 per cent for 'Business or employment' (22%) and 21 per cent for 'Visiting relatives' (20%).

Twenty-two per cent of all Australian resident departures were in the 35 to 44 year age group (109,400), followed by 21 per cent aged 25 to 34 years (102,000) and 20 per cent aged 45 to 54 years (98,100).

Australian residents who intended to stay abroad for less than one month accounted for 68 per cent of all resident departures, with a further 14 per cent intending to stay for one month and less than two months.

Permanent and long-term movement

Permanent and long-term arrivals (63,480) increased 7 per cent, while permanent and long-term departures (37,760) decreased 3 per cent compared with March quarter 1993. The excess of permanent and long-term arrivals over permanent and long-term departures was 25,720, 25 per cent higher than the net gain of 20,500 for March quarter 1993.

The majority of permanent and long-term arrivals were persons born in Australia and returning after being overseas for one year or more (15% of the total), followed by persons born in the United Kingdom (9%), Hong Kong (8%) and Malaysia (7%).

The major countries of intended residence recorded for permanent and long-term departures were the United Kingdom (7,530 or 20% of total), New Zealand (4,210 or 11%), the United States of America (2,930 or 8%) and Hong Kong (2,230 or 6%). These countries accounted for 45 per cent of all destinations for permanent and long-term departures.

There were 16,810 permanent (settler) arrivals, 6 per cent more than the 15,910 settler arrivals in March quarter 1993. Increased settler arrivals were recorded for persons born in New Zealand (an increase of 370 or 20% over March quarter 1993), South Africa (300 or 143%), the Philippines (180 or 27%), Iraq (120 or 57%) and Iran (50 or 83%), while decreases were recorded for Hong Kong (down 420 or 32% from March quarter 1993), Korea (120 or 40%), Indonesia (103 or 54%) and Taiwan (100 or 36%).

The major source countries for settlers were New Zealand and the United Kingdom (each contributing 13% of all settler arrivals), Viet Nam (8%) and Hong Kong and the Philippines (both 5%).

There were 7,200 permanent departures, six per cent down from March quarter 1993 (7,670).

EXPLANATORY NOTES

Introduction

This publication contains statistics of persons arriving in, and departing from, Australia in summary form for the latest available quarter, together with three year time series for the major characteristics of travellers. More detailed statistics can be made available, on request (see paragraph 22). Monthly statistics have previously been released (see paragraph 19).

Source of the statistics

2. Persons arriving in, or departing from, Australia are required to complete prescribed questionnaires in the form of Incoming and Outgoing Passenger cards (see Appendix A). These cards provide information to the Department of Immigration and Ethnic Affairs for administrative purposes and serve as the source of statistics of overseas arrivals and departures. In accordance with the *Census and Statistics Act 1905*, information relating to individuals, individual flights or ships and individual carriers, which is contained in these cards or other documents, is treated as confidential by the ABS.

Scope

3. The statistics in this publication relate to the number of movements of travellers rather than the number of travellers (i.e. the multiple movements of individual persons during a given reference period are each counted separately). The statistics exclude the movements of operational air and ships' crew, of transit passengers who pass through Australia but are not cleared for entry, and of passengers on pleasure cruises commencing and finishing in Australia aboard ships not then engaged on regular voyages.

Definitions

Category of movement

4. Category of movement is primarily determined by the traveller's selection of their own category on the passenger card. This selection is accepted provided it is consistent with other information on the passenger card.

Permanent movement

5. Permanent arrivals (settlers) comprise travellers who hold migrant visas, (regardless of stated intended period of stay), New Zealand citizens who indicate an intention to settle and those who are otherwise eligible to settle (e.g. overseas born children of Australian citizens). Permanent departures are Australian residents (including former settlers) who on departure state they do not intend to return to Australia.

Long-term movement

6. Long-term arrivals comprise overseas visitors (except those who hold migrant visas—see paragraph 5 above) who intend to stay in Australia for 12 months or more and Australian residents returning after an absence of 12 months or more overseas. Long-term departures comprise Australian residents who intend to stay abroad for 12 months or more and overseas visitors departing who stayed 12 months or more in Australia.

Short-term movement

7. Movements of travellers whose intended or actual length of stay is less than twelve months are classified as short-term, except those who on arrival hold migrant visas (see paragraph 5 above).

8. A large number of travellers state exactly 12 months or one year as their intended period of stay. Many of these stay for less than that period and on their departure from, or return to, Australia should therefore be classified as short-term. To maintain consistency between arrivals and departures, movements of travellers who report their actual or intended period of stay as being one year exactly are randomly allocated to long-term or short-term, in proportion to the number of movements of travellers who report their actual length of stay as up to one month more, or one month less, than one year.

Country of birth, residence or citizenship

9. The classification of countries in this publication is based on the Australian Standard Classification of Countries for Social Statistics (ASCCSS). For more detailed information refer to the ABS publication *Australian Standard Classification of Countries for Social Statistics* (1269.0).

10. Political developments in Europe and the Former USSR have resulted in a number of changes to the ASCSS, detailed in Revisions 1.01 and 1.02 of the ASCSS. Further developments in Europe and Africa have affected some of the categories in this publication and are detailed in Revision 1.03 of the ASCSS. These changes came into effect for March 1994 data.

11. Statistics on country of birth, residence or citizenship have certain limitations because of inadequate reporting on passenger cards. For instance, it is not possible to identify separately England, Scotland and Wales. Similarly 'Korea' includes both the Republic of Korea and the Democratic People's Republic of Korea. United States of America includes 'America (undefined)'.

State or Territory of clearance

12. State or Territory of clearance refers to the State or Territory in which a passenger is cleared by Customs and Immigration authorities. Embarkation or disembarkation and clearance are usually, but not necessarily, in the same State.

State or country of residence

13. State of residence or country of residence refers to the State or country in which travellers regard themselves as living or as last having lived. State of intended residence is derived from the intended address given by settlers and Australian residents returning after a journey abroad. Particularly in the case of the former, this information does not necessarily relate to the State in which a traveller will eventually establish a permanent residence.

State of stay and country of intended stay for short-term travellers

14. Overseas visitors are asked on arrival for their intended address and on departure for the name of the State in which they spent most time. Australian residents travelling overseas are asked on departure for the name of the country in which they intend to spend most time and on their return for the name of the country in which they spent most time.

Estimation method

15. Overseas arrival and departure statistics are derived from a combination of full enumeration and sampling. All permanent movements and all movements with a duration

of stay of one year or more are fully enumerated. All movements with a duration of stay of less than one year are sampled. Statistics relating to these movements are therefore estimates which may differ from statistics which would have been obtained if details of all these movements had been processed. Details of the sampling method and comments on the sampling errors associated with the estimates are contained in the Technical Note, Appendix B.

16. The statistics in this publication have been rounded, to the nearest 100 for short-term movements and to the nearest 10 for permanent and long-term movements. In tables showing both short-term and permanent and long-term movements the total movements have been rounded to the nearest 100. The sums of the components may, due to rounding, not add exactly to totals.

Corrections and imputations

17. The imprecision due to sampling errors should not be confused with errors arising from imperfections in reporting, which may occur in any data collection, whether sampled or not. Every effort is made to minimise such errors, both through careful design of the passenger cards and through checks on the information once it is received. During the edit process some items are corrected where they conflict with other known information. Missing replies to certain items such as age and country of birth are also imputed by reference to other related items.

18. Errors of this kind differ from discrepancies arising from the fact that certain information reflects the travellers intentions, at the time the passenger cards were completed. These intentions are of course subject to change. Particularly affected is the distinction between permanent and temporary movement and in the latter case, length of intended stay, country in which most time will be spent and purpose of journey.

Related publications

19. Users may also wish to refer to the following ABS publications:

Overseas Arrivals and Departures, Australia (3401.0)—issued monthly

Overseas Arrivals and Departures, Australia (3404.0)—issued annually

Australian Demographic Statistics, (3101.0)—issued quarterly

20. Related statistics are also published by the Department of Immigration and Ethnic Affairs and the Department of Transport and Communications.

21. Current publications produced by the ABS are listed in the *Catalogue of Publications and Products, Australia* (1101.0). The ABS also issues, on Tuesdays and Fridays, a *Publications Advice* (1105.0) which lists publications to be released in the next few days. The *Catalogue* and *Publications Advice* are available from any ABS office.

Additional statistics available

22. In some cases, the ABS can make available information which is not published. This information may be made available in one or more of the following forms: microfiche, photocopy, data tape, floppy disk, computer printout, clerically-extracted tabulations. Generally, a charge is made for providing unpublished information. A full list of unpublished Overseas Arrival and Departure tabulations is available on request.

APPENDIX B

TECHNICAL NOTE : METHOD OF SAMPLING AND RELIABILITY OF ESTIMATES

Method of sampling

All movements with a duration of stay less than one year are sampled using the following stratification:

| Country of Citizenship | Sample |
|---|-----------------------------------|
| Australia, New Zealand, Japan, United Kingdom (excl. Ireland), and the United States of America | 1 in 40 |
| Canada, Germany, Malaysia and Singapore | 1 in 15 |
| Any other individual country depending on the number of movements | 1 in 1 or 1 in 4 or 1 in 10 |

Reliability of estimates

Estimates based on a sample are subject to sampling variability, i.e. they may differ from those that would be obtained from a full enumeration.

The sampling error associated with any estimate can be estimated from the sample results and one measure so derived is the standard error. Given an estimate and the standard error on that estimate, there are about two chances in three that the sample estimate will differ by less than one standard error from the figure that would have been obtained from full enumeration, and about nineteen chances in twenty that the difference will be less than two standard errors. Another measure of the sampling error is the relative standard error which is obtained by expressing the standard error as a percentage of the estimate.

It would be impracticable to publish estimates of standard errors for all figures in individual tables. However, the following tables of standard errors and relative standard errors gives an indication of the magnitude of the sampling error associated with any estimate of a particular size for short-term and total movement.

APPROXIMATE STANDARD ERRORS OR ESTIMATES FOR STRATIFIED SAMPLE

| Estimated number of persons | Short-term movement | | | | Total movement | |
|-----------------------------|--|-------------------------|---|-------------------------|------------------------|-------------------------|
| | Departure or arrival of Australian residents | | Arrival or departure of overseas visitors | | Arrivals or departures | |
| | Standard error | Relative standard error | Standard error | Relative standard error | Standard error | Relative standard error |
| 10,000 | 550 | 6 | 490 | 5 | 550 | 6 |
| 5,000 | 450 | 9 | 330 | 7 | 410 | 8 |
| 2,000 | 280 | 14 | 230 | 11 | 250 | 13 |
| 1,000 | 200 | 20 | 150 | 15 | 170 | 17 |
| 750 | 180 | 24 | 140 | 19 | 150 | 20 |
| 500 | 130 | 26 | 110 | 22 | 125 | 25 |
| 400 | 120 | 30 | 100 | 25 | 115 | 29 |
| 300 | 110 | 36 | 84 | 28 | 97 | 32 |
| 200 | 90 | 45 | 70 | 35 | 80 | 40 |
| 100 | 63 | 63 | 49 | 49 | 56 | 56 |

An example of the use of this table is as follows: if the estimate of the number of the Australian resident departures for short-term visits is 500, then the standard error on this estimate is 130, i.e. there are two chances in three that the actual number of Australian resident departures for a short-term visit will lie between 370 and 630 and nineteen chances in twenty that it will lie between 240 and 760.

As the table shows, the larger the size of an estimate the smaller the relative standard error. For any estimate of greater than 10,000 the relative standard error will be less than 6 per cent and so the sampling error can be assumed to be negligible for most practical purposes.

The estimate of the difference between an estimate in two different periods or between estimates from the same

period is also subject to sampling error. The standard error on the difference between any two estimates which are subject to sampling error can be approximated by using the larger standard error of the estimates inflated by a factor of 1.4. An example of the use of this procedure is as follows:

Assume the estimates of the number of arrivals to Australia of visitors who stated 'attending convention' as the purpose of journey in January 1992 and 1993 are 1,500 and 750 respectively. The difference between the 1992 and 1993 figures is 750 and the standard errors on these estimates are approximately 190 and 140. The standard error on the difference is approximately $(1.4 \times 190) = 266$, and there are nineteen chances in twenty that the estimate of the difference between the two years will lie between 218 and 1,282.

For more information ...

The ABS publishes a wide range of statistics and other information on Australia's economic and social conditions. Details of what is available in various publications and other products can be found in the *ABS Catalogue of Publications and Products* available at all ABS Offices (see below for contact details).

Information Consultancy Service

Information tailored to special needs of clients can be obtained from the Information Consultancy Service available at ABS Offices (see Information Inquiries below for contact details).

National Dial-a-Statistic Line

0055 86 400

(Steadycom P/L, premium rate 25c/21 4 secs.)

This number gives 24-hour access, 365 days a year for a range of statistics.

Electronic Data Services

A large range of data is available via on-line services, diskette, magnetic tape, tape cartridge and CD ROM. For more details about our electronic data services, contact any ABS Office (see below).

Bookshops and Subscriptions

There are over 400 titles of various publications available from ABS bookshops in all ABS Offices (see below Bookshop Sales for contact details). The ABS also provides a subscription service through which nominated publications are provided by mail on a regular basis at no additional cost (telephone Publications Subscription Service toll free on 008 02 0608 Australia wide).
