COMMONWEALTH OF AUSTRALIA**

**CHARACTERISTICS OF THE POPULATION AND
DWELLINGS IN LOCAL GOVERNMENT AREAS**

AUSTRALIAN CAPITAL TERRITORY

AUSTRALIAN BUREAU OF STATISTICS, CANBERRA, AUSTRALIA

Catalogue No. 2434.0

SUGGESTED CITATION

Australian Bureau of Statistics, 1976 Census : *Characteristics of the Population and Dwellings in Local Government Areas* (2434.0).

PREFACE

Final results from the 1976 Census of Population and Housing are now being released in a series of 5 bulletins covering single and cross-classified characteristics of population and dwellings.

This bulletin contains summary tables of single characteristics for the Australian Capital Territory. Identical tables for EACH LOCAL GOVERNMENT AREA in the Australian Capital Territory (and areas treated as local government areas for statistical purposes) are now available from offices of the Bureau. The data for Local Government Areas (LGA's) may be obtained on:

- . Microfiche, at a cost of 45 cents per fiche (each fiche containing 269 frames, where a frame is equivalent to one page of data and there are 9 pages of data for each LGA) or 90 cents for all LGA's, Statistical Subdivisions, Statistical Divisions, in the Australian Capital Territory.
- . Magnetic tape, at a cost of \$50.00 for File Set Four single reel containing all LGA's in Australia or part thereof (see Information Paper No. 8, Catalogue No. 2111.0).
- . Loose copies of tables for selected LGA's are available on request at a cost of \$1.00 per LGA.

Identical tables for each Collection District in the Australian Capital Territory are also available from offices of the Bureau on microfiche or magnetic tape.

EXPLANATORY NOTES

Introduction

The bulletins in this series describe the summary tables of single characteristics that are available at Local Government Area (LGA) level. The bulletin contains, for illustrative purposes, tables for the whole State or Territory only. Tables for all the LGA's in each State or Territory can be provided in a separate folder. Users who do not require the complete set of tables may obtain loose copies for selected LGA's by contacting one of the offices listed in Appendix D.

Final results of the 1976 Census were processed on a sample basis and are therefore subject to sampling error (see Appendix B). Data for the Northern Territory is NOT subject to sampling error, because all schedules were processed.

Because of the nature of the processing system, there are minor differences between data contained in this series of bulletins and preliminary data published in the series *Population and Dwellings in Local Government Areas and Urban Centres (Preliminary)* (2401.0 – 2408.0), *Characteristics of the Population in Local Government Areas (Preliminary)* (2201.0 – 2208.0) and *Characteristics of the Population: States, Territories and Australia (Preliminary)* (2209.0). The total number of persons shown for each State or Territory corresponds with that published in *Census of Population and Housing, 30 June 1976* (2402.9), which shows the total enumerated population of each State and Territory. Where statistics have been rounded, any discrepancies between sums of the component items and totals are due to rounding.

Scope

The 1976 Census of Population and Housing aimed at enumerating every person who spent Census night, 30 June 1976, in Australia; including persons on vessels in or between Australian ports, on board long-distance trains, buses or aircraft; and every dwelling, whether occupied or unoccupied.

The Census was conducted on a *de facto* basis, i.e. persons were enumerated where they were on Census night, and this may not have been where they usually lived. *Visitors* to Australia were enumerated if they were in Australia on Census night, regardless of how long ago they had arrived or how long they planned to stay. *Australian residents* out of the country on Census night were excluded from the count.

Diplomatic personnel and their families are, by definition, out of scope of the Census, as are diplomatic residences, including all persons resident therein on Census night. In 1976 there were 3,316 diplomatic personnel and their families resident in Australia. The number of diplomatic personnel and their families resident in each State and Territory for 1976 were as follows: New South Wales 723, Victoria 399, Queensland 59, South Australia 19, Western Australia 62, Australian Capital Territory 2,054.

Coverage

As mentioned above, the Census aims at enumerating every person and dwelling excluding diplomatic personnel and their residences, in Australia on Census night, 30 June 1976.

While every effort is made to minimise under-enumeration, some inevitably remains for various reasons (e.g. inadvertent omission of very young children, treatment by the collector of an occupied dwelling as unoccupied). Refusal by householders to complete the Census Schedule is not a significant cause of under-enumeration as estimates by the Collector are used in such cases.

Overall, the adjustment to the Census figures "as recorded" is estimated to be 2.71 per cent for Australia as a whole, but varies not only from State to State but also between areas within States. For the estimated degree of under-enumeration in each State and Territory, see *Population of States and Territories Adjusted for Under-enumeration as Shown by Post-enumeration Survey* (2409.0). The data contained in this bulletin and its companion tables are not adjusted for under-enumeration.

Definitions

Dwellings – For Census purposes, dwellings are divided into two groups, occupied dwellings and unoccupied dwellings.

- (i) An occupied dwelling is defined as the premises occupied by a household on Census night (for definition of *Household* see below). A *private dwelling* is normally a house, room or flat but it can also be a tent, houseboat, or caravan if standing on its own block of land and not occupied by members of the same household resident in an adjacent dwelling. It is important to remember that the Census definition of a private dwelling means that the total number of dwellings may be more than the total number of known structures in any given area (see *Household* below). *Non-private dwellings* are motels, hostels, boarding houses, gaols, religious and charitable institutions, defence establishments and other communal dwellings. Usually, occupants of such dwellings will be using communal facilities such as hotel dining-rooms or mess halls. A caravan situated in a caravan park (whether permanently or temporarily) is treated as part of a non-private dwelling, as are self-contained units provided by commercial enterprises such as hotels, motels or guest-houses.
- (ii) An unoccupied dwelling is a structure built specifically for living purposes and capable of being lived in, but unoccupied at the time of the Census. Vacant houses, holiday houses, huts, cabins (other than seasonal worker's quarters)

on and houseboats are therefore counted as unoccupied dwellings; but vacant tents, garages and caravans (if not normally occupied) are not. Only private dwellings are classified as unoccupied. Unoccupied dwellings include dwellings vacant because they have been newly completed, vacant for demolition or repair, holiday homes, dwellings to let, and dwellings where all members of the household were absent on Census night.

Household – For Census purposes, a household is a person or group of persons living together as a single domestic unit with common eating arrangements. A person living alone is also a household. It is possible, then, for more than one household to live in one house or structure. For example, a lodger who lives with a family and provides all his food for himself is not a member of the family's household but constitutes a separate household and therefore completes a separate Householder's Schedule. As an occupied dwelling is defined as the premises occupied by a household on Census night (see above), the number of households and number of occupied dwellings is identical and the number of occupied dwellings as defined for Census purposes in an area may be greater than the known number of structures.

Migratory – Persons enumerated on board vessels in and between Australian ports, or on board long-distance trains, buses or aircraft are classified as Migratory. Such persons are not included in the population of specific LGA's, but are shown as a balancing item in the population of a State or Territory. By definition, there is no Migratory population in the Australian Capital Territory.

Campers Out – Persons who spent Census night in the open in cars, caravans or trucks pulled up at the side of the road for that night only, or persons in other temporary camps or accommodation erected for that night only are classified as campers out. Such persons are included in the population of the LGA in which they were enumerated.

Geographical Areas

Information from the Census is available at various levels of geographical detail. Information at other levels may be made available on request. Some of the principal levels are described below:

Collection District (CD) –

The CD is the smallest geographical area used in the collection and dissemination of Census data. A CD is an area containing approximately 300 dwellings in urban areas and fewer in rural areas. CD's can be aggregated to form other geographic levels, such as LGA's and Statistical Divisions.

Local Government Area (LGA) –

This is the principal tabulation unit used in the publication of Census data. LGA's correspond in all but a few instances to legal Local Government Authority areas as defined at 31 January 1976. The exceptions are:—

- (i) Some very minor areas for which boundary changes, involving nil or very minor populations, were received too late for implementation.
- (ii) The City of Brisbane, the Northern Territory, and the Australian Capital Territory are divided into statistical areas, which are treated as LGA's for Census purposes. In the Northern Territory two of these, the City of Darwin and the Municipality of Alice Springs, are Local Government Areas in a legal sense.

Statistical Division –

Statistical Divisions are designed to be reasonably homogeneous regions characterised by identifiable social and economic links between the inhabitants and between the economic units within the region, under the unifying influence of one or more major towns or cities. A Capital City Division is predominantly urban in character and the boundaries are delineated to contain the anticipated urban development of the city (and associated urban centres) for a period of at least twenty years.

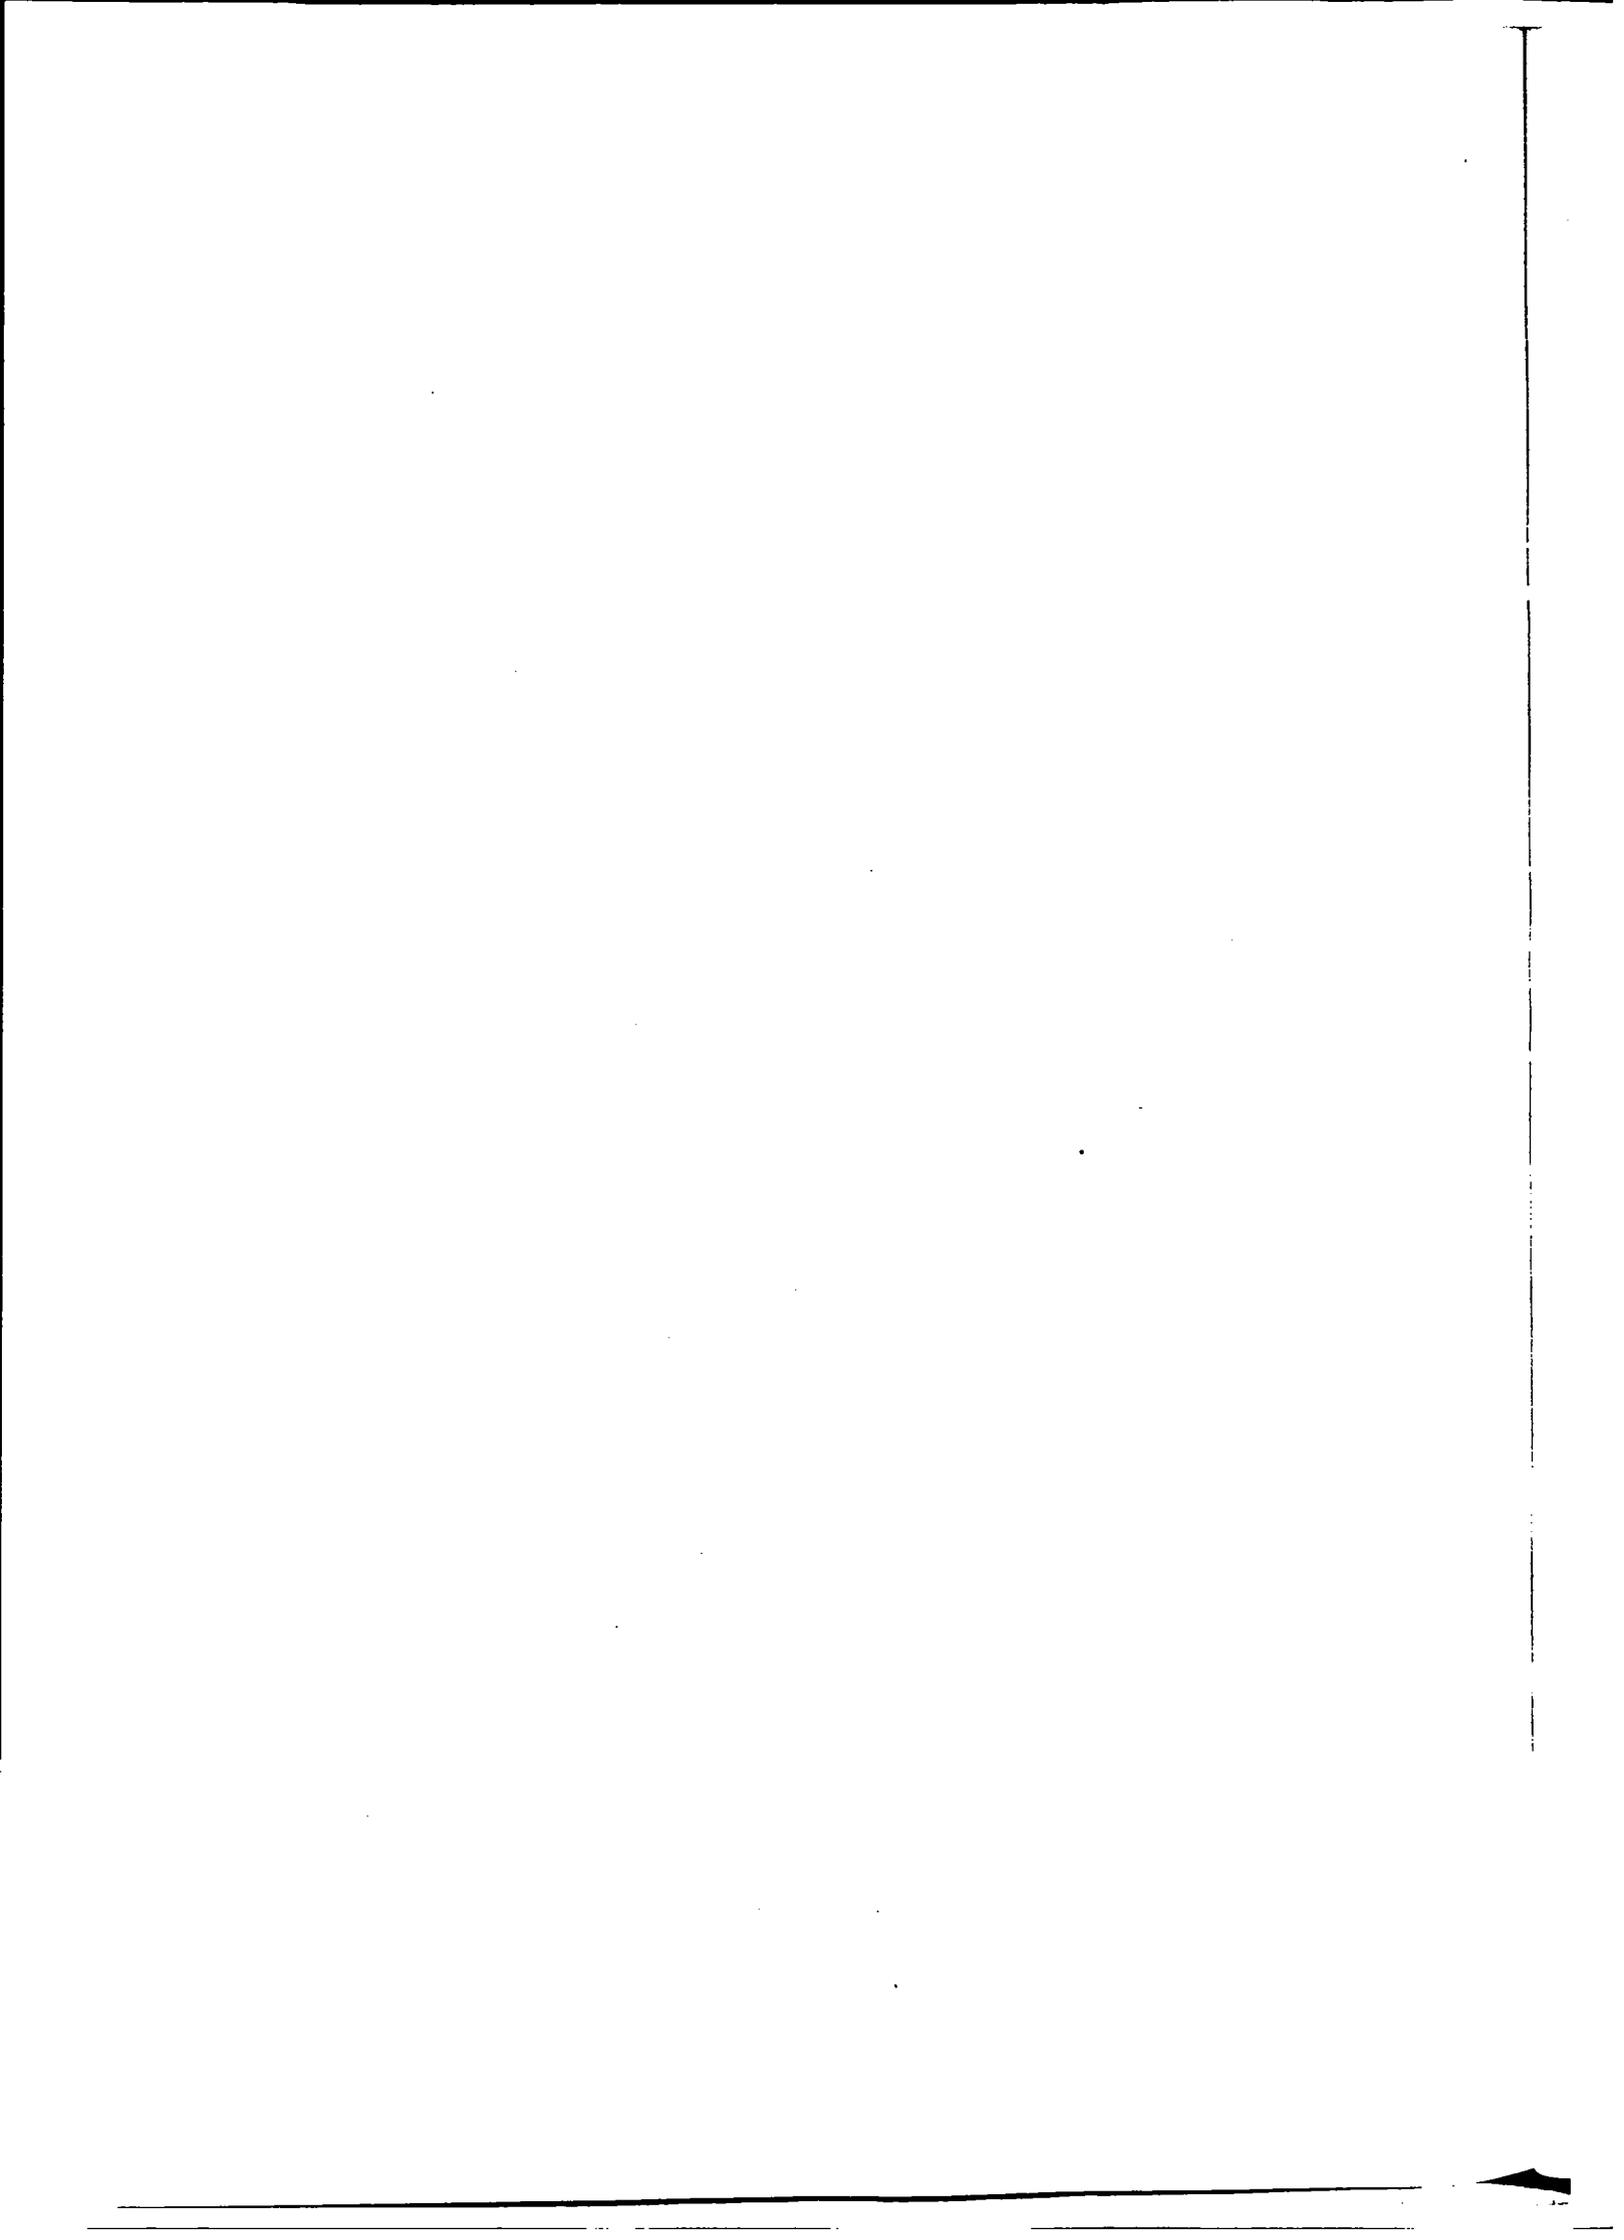

In 1976 Statistical Divisions, Statistical Subdivisions and Statistical Districts were designed to be compatible, wherever possible, with State Planning Regions.

Statistical Subdivision –

Statistical Subdivisions are delineated in most States on the same basis as Statistical Divisions but as portions of the latter.

Statistical District –

Statistical Districts have been delineated in respect of urban centres with a population of 25,000 or more, using concepts and criteria similar to those for Capital City Statistical Divisions. These fixed boundaries delimit areas which, for general statistical purposes, are free from the problems imposed by the moving boundaries of urban centres. In selected cases, especially in Victoria and South Australia, Statistical Districts were delineated around urban centres with less than 25,000 population, where there was a demand for intercensal population estimates for the area and where existing LGA boundaries were obviously inadequate for this purpose.

THE FOUR AND A HALF PAGES OF STATISTICS FOLLOWING PROVIDE AN EXAMPLE OF THE SUMMARY TABLES OF SINGLE CHARACTERISTICS AVAILABLE FOR EACH LOCAL GOVERNMENT AREA IN AUSTRALIA. THESE STATISTICS ARE AVAILABLE FROM OFFICES OF THE BUREAU LISTED IN APPENDIX D.

APPENDIX A

TABLE CONTENT

Most of the tables are self-explanatory. The following notes are designed to explain specific elements of some tables.

TABLE 2

- (a) USUAL RESIDENTS (SAME DWG) – Refers to the people who were usual residents of the dwelling in which they were enumerated on Census night.
- (b) HANDICAPPED – Refers to the number of people who stated they were handicapped by a serious long-term illness of physical or mental condition.
- (c) ABORIGINAL AND TORRES STRAIT ISLANDER DWELLINGS – dwellings where the head of the household is an Aboriginal or Torres Strait Islander. ^{OR SPOUSE}
A

TABLE 5

This table is divided into 3 parts

- (a) 1976 – shows the usual residence of persons at 30 June 1976.
- (b) 1975 – shows the usual residence at 30 June 1975 of persons who, in 1976, were enumerated at their usual residence.
- (c) 1971 – shows the usual residence at 30 June 1971 of persons who, in 1976, were enumerated at their usual residence.

TABLE 13

- (a) The category PRIMARY AND SECONDARY refers to schools which provide both primary and secondary levels of education; it is not the sum of the two previous lines.
- (b) The SCHOOLS – OTHER category refers to special schools, overseas schools, etc.
- (c) CAE is the abbreviation for Colleges of Advanced Education.
- (d) The OTHER INSTITUTIONS – OTHER category includes technical colleges, teaching hospitals, business and coaching colleges, overseas institutions, etc.
- (e) The NOT ATTENDING category includes pre-schools, and creches but only where the child was over 5 years of age and it was stated that they were attending school.

TABLE 15

The category LEVEL NOT APPLICABLE refers to qualifications which were inadequately described or which were not classified by level.

TABLE 18

EVER MARRIED WOMEN includes women who are now married, permanently separated, divorced or widowed.

TABLE 19

- (a) The question on childminding permitted more than one answer to be recorded, consequently some children were counted more than once in terms of individual facilities used.
- (b) The first 4 lines of the table relate to use of individual facilities and children can be counted more than once in these figures. The percentage figures are calculated in relation to total children 0-5 years, but do not add with the remaining percentages in the column to equal 100 percent.
- (c) TOTAL CHILDREN MINDED is the sum of the 3 previous lines.
- (d) TOTAL CHILDREN 0-5 years is the sum of the 3 previous lines.

TABLE 20

(a) The question on pensions/benefits received permitted more than one answer to be recorded, consequently some people are counted more than once in the first 6 lines of the table. The percentage figures for these 6 categories are calculated in relation to the total population 15 years and over; they do not add with the remaining percentages in the column to equal 100 percent.

(b) The category TOTAL RECEIVING PENSION is the number of persons receiving pensions/benefits regardless of how many individual benefits they receive. It is not, therefore, the sum of the previous 6 lines.

(c) TOTAL POPULATION 15 YEARS + is the sum of the 3 previous lines.

TABLE 25

The detailed classification of occupations is contained in Information Paper 9 (iii) (Catalogue No. 2114.0) The classification used in this table is as follows:

M Other, Nei, N/S, Total	99

TABLE 29

- (a) The question on mode of travel to work permitted more than one answer to be recorded, consequently some people were counted more than once in the first 8 categories.
- (b) Persons included in the last 3 categories, however, are counted once in only one of the categories and are NOT included in the first 8 categories.
- (c) The percentage figures are calculated in relation to total employed population.

HOUSEHOLDS AND FAMILIES – TABLES 30 TO 33

A HOUSEHOLD is defined as "a person or group of persons living as a domestic unit with common eating arrangements". A person living alone is therefore also a household. From answers reported on relationship to household head, individual families within a household were separately identified.

TABLE 30

HOUSEHOLDS were classified as communes only when all respondents in the household stated that the household was a commune.

TABLE 31

- (a) Family income is defined as the combined incomes of the head of the family and spouse, where both are present, or the individual income of the head (whether male or female) where no spouse is present. The income of other family members is not included.
- (b) Because individual families were not separately identified within communes, details of family income for communes are excluded from this table.

TABLE 32

Families are determined on the basis of blood and marriage relationships. A household can comprise one or more families. Generally a household will contain only one family unit.

This table shows the number of families. If two families, one of two persons and one of four persons, were living in a household they would both appear under the column heading TWO. The first family would appear in the second line (2 persons in family) and the second in the fourth line (4 persons in family). For further details of family coding see Information Paper No. 4 – Family (Catalogue No. 2119.0).

TABLE 33

Household income is defined as the sum of the mid-points of the ranges of the individual incomes of all members of a household occupying a private dwelling. The category NOT STATED includes instances where the income of a household member was not stated and the combined income of other household members was \$18,000 or less. Where the combined income of other household members was over \$18,000, it was not necessary to use the NOT STATED category, over \$18,000 being the last category in the Income question.

TABLE 34

- (a) The type of dwelling included in this table is as stated by the householder, and differs from similar information in Table 48, not only because this was based on answers from the Census collector, but also because of a difference in definitions applied to the classification. For example, blocks of flats in Table 48 would include both self-contained and non self-contained dwellings.
- (b) The OTHER category refers to private boarding houses. Private dwellings were classified as private boarding houses if there were three or more boarders indicated in the household.

TABLES 35 TO 38

The column heading SEP HOUSE in these tables refers to separate self-contained houses and other self-contained private dwellings. The column heading OTHER refers to all other private occupied dwellings.

TABLE 39

The ALL OTHER category includes sole use of one facility where use of the other facility is not stated (or there is no other facility), and where use of both facilities is not stated.

TABLE 43

The first (coal, coke or briquettes), second (wood) and sixth (solar energy) power or fuel categories were not accepted for lighting.

TABLE 44

(a) The category OWNER/PURCHASER UNDEFINED refers to dwellings which were identified as being owned or purchased, but for which it was not possible to make the distinction between owner and purchaser.

(b) The category OTHER, NEI includes dwellings which were not owned, being purchased or rented by the householder.

TABLE 46

(a) Information in the column headed 2+ MRTGE can include a dwelling more than once, for dwellings which had 3 or more mortgages. The column headed ALL MRTGS is therefore affected to the same degree.

(b) The category OTHER, NEI includes mortgages whose source was life assurance companies, employers, finance companies, State or Australian Governments and Defence or War Service Homes.

TABLE 48

Information contained in this table is as stated by the Census collector, based on external observation, and is not comparable with information in previous dwelling tables.

TABLE 49

Information contained in this table is as reported by the Census collector.

ABBREVIATIONS USED IN THE TABLES

ABORIG	Aboriginal
AD	Administration
ADLTS	Adults
AG	Agricultural
AUST	Australian
CAE	College of Advanced Education
CWLTH	Commonwealth
DENOM	Denomination
DENT	Dental
DWG	Dwelling
ENT	Entertainment
EXCL	Excluding
EXEC	Executive
FAMS	Families
FRM WKR	Farm worker
FRMR	Farmer
GOVT	Government

TPT	Transport
TSI or T/ST	Torres Strait Islander
UNDEF	Undefined
WOOL CLSR	Wool classer
WOOD TECH	Wood technician
WTR	Water

APPENDIX B

SAMPLING ERRORS ASSOCIATED WITH CENSUS ESTIMATES (a)

This appendix discusses the sampling errors associated with the data from the main processing phase of the 1976 Census. Data from the preliminary processing phase is not subject to sampling errors because all schedules were included. Thus counts of the total number of males total number of females and total number of persons for a CD, LGA or aggregations of these counts are not subject to sampling errors.

Since only a 50% sample of private dwelling schedules was processed, it is likely that the estimates derived from this 50% sample would differ from figures which would have been obtained if all schedules were included. These differences are called sampling errors. The sampling error associated with any estimate can be estimated from the sample results and one measure so derived of this sampling error is the standard error. The particular 50% sample selected was one of a large number of possible 50% samples. Each possible 50% sample would have yielded different estimates and the standard error measures the variation of all the possible 50% sample estimates around the figures which would have been obtained if all schedules had been processed.

Given an estimate and the standard error on that estimate, there are about two chances in three that the sample estimate will differ by less than one standard error from the figure that would have been obtained if all schedules had been processed, and about nineteen chances in twenty that the difference will be less than two standard errors.

Another measure of the sampling error is the relative standard error which is obtained by expressing the standard error as a percentage of the estimate:

$$\text{Relative Standard Error} = \frac{\text{Standard Error}}{\text{Estimate}} \times 100$$

Both standard error and relative standard error are used in the following discussion of the reliability of the estimate. An example of their application is as follows:

Example

If an estimate of 70 has a relative standard error of 10% then the standard error of that estimate is 10% of 70 or 7. Thus there are 2 chances in 3 that the figure that would have been obtained if all schedules had been processed will lie in the range 63 to 77 and about 19 chances in 20 that this figure is between 56 and 84.

It would have been impractical to publish standard errors of all Census estimates for the following reasons.

- (a) Difficulties in presentations would have been encountered because of the large number of estimates.
- (b) Computer production of all standard errors would have been costly.

Consequently, graphs which relate the relative standard error of an estimate to the size of the estimate are given. They are not intended to give a precise measure of the error for a particular estimate but provide an indication of the likely magnitude of the relative standard error for estimates of any particular size. An example of the use of a relative standard error is as follows:

The accuracy of an estimate (as measured by the relative standard error) will depend on a number of different factors which are listed below.

1. ESTIMATE SIZE

The larger an estimate the greater its reliability and thus the smaller its relative standard error. In fact estimates in excess of 5,000 dwellings or persons will generally have relative standard errors of less than 1% and in these cases sampling error can for most practical purposes be assumed to be negligible. For this reason, relative standard errors are only graphed for estimates of less than 5,000 persons or dwellings. Correspondingly, estimates below 100 persons or dwellings will generally have standard errors in excess of 10%. For the convenience of the user, this range of estimates has been graphed separately. Estimates below 10 will generally have standard errors in excess of 40% and should be considered to be too unreliable for most practical uses.

- (a) Note - Northern Territory data is not subject to sampling error.

2. ESTIMATE TYPE

The relative standard errors of dwelling estimates and person estimates are shown on different graphs.

(a) Estimates of Dwellings

Relative standard errors for all dwelling characteristics are able to be represented by a single line rather than a number of lines corresponding to different types of dwelling characteristics. Standard errors for any estimates of number of dwellings should be obtained from Graph 1 Line D.

(b) Estimates of Persons

Some characteristics are generally similar for persons in the same dwelling but differ from persons in different dwellings. That is these characteristics are clustered by dwelling (for example, religion and racial origin). The sampling scheme used involved the inclusion of ALL persons in selected dwellings rather than selection of every second person in a dwelling, hence for characteristics which are clustered by dwelling there is a greater chance that such persons would have been either undersampled or oversampled. Thus estimates of number of persons classified by characteristics which are clustered by dwelling will have higher relative standard errors.

Examination of standard errors calculated from the Census data indicates that two lines are needed to represent standard errors on persons' estimates — one for characteristics which are clustered by dwelling and one for characteristics which are not. Topics corresponding to these two lines are as follows:

(i) Graph 2 Line A

Arrival in Australia; Birthplace; Country of Citizenship; Nationality; Religion; Languages regularly used; Retail Origin; Period of Residence.

(ii) Graph 2 Line B

All topics not listed above.

(NOTE: If the estimate of interest is a cross-classification involving topics from both categories then Line A of Graph 2 should be used in all cases).

3. ESTIMATE PROPORTION

Estimates which are a large proportion of the population concerned will be more reliable than estimates which relate to a small proportion of the population. Only standard errors derived from Line B are significantly influenced by this property. In order to determine which of the two lines marked B on Graph 2 should be used, the estimate size should be expressed as a proportion of the population total relevant to that estimate. If the estimate is of females then the proportion should be expressed in terms of the total females for that table (i.e. in terms of the total females for a CD, LGA or whatever is the level of geographic aggregation of the table). Similarly, if the estimate is of males or persons respectively then the proportion should be expressed in terms of the total males or total persons of the table. If the calculated proportion is less than 0.5 then the relevant reference line for the standard error of an estimate is that marked B1, and if it is greater than 0.5 then B2 is the appropriate line.

Example

Consider an estimate of the number of female university graduates in a CD (or LGA) which will be derived from the topic "Qualifications - Level" a Line B persons topic. If the number of female university graduates in the CD (or LGA) is 30 and the total number of females in the CD (or LGA) is 900 then the proportion of females with the characteristics of interest is $30/900 = .033$. This proportion is less than 0.5 therefore Line B1 on Graph 2 should be used to determine the relative standard errors. Reading from this line, the relative standard error of an estimate of size 30 is approximately 16%.

4. EFFECT OF NON-PRIVATE DWELLINGS

If an estimate is known to include a large number of persons from non-private dwellings (where all schedules were processed), for example an estimate of males ten to fifteen years of age in a CD with a large boarding school for boys, then the relative standard error as read from the graph will over-estimate the true relative standard error.

Proportions formed from the ratio of two Census estimates are also subject to sampling errors and the size of the error depends on the accuracy of both the numerator and the denominator. An approximate formula for the relative standard error of a proportion is given below.

Relative Standard Error (x/y)

$$= \sqrt{(\text{Relative Standard Error (x)})^2 - (\text{Relative Standard Error (y)})^2}$$

(For proportions where the denominator is the total number of males, females or persons of a CD or group of CD's the relative standard error of the denominator is zero because these totals were derived from the preliminary processing phase).

Example

Consider an estimate of the labour force participation rate in an LGA (i.e. the number of married women in the LGA who are in the labour force divided by total number of married women in the LGA). If the number of married women in the labour force is 120 for an LGA and the number of married women in the LGA is 300 then the estimated proportion is $120/300 = 0.4$. Both marital status and labour force status are line B persons estimates and in order to calculate the relative standard error of both the numerator and denominator it is necessary to first calculate the proportions of females with the characteristics of interest. If the total number of females in the LGA is 1,000 then for the numerator the proportion of persons with the characteristic of interest is $120/1000 = .12$ and for the denominator the proportion is $300/1000 = .30$. Therefore, for both the numerator and denominator the relative standard error line which should be used is line B1. Reading from this line, the relative standard error of the numerator (i.e. number of married women in the labour force) is approximately 8% and the relative standard error of the denominator (i.e. the number of married women) is approximately 4%. The relative standard error of the estimate of the proportion is therefore

$$\sqrt{8^2 - 4^2} \approx 6.9\%$$

As can be seen from the above formula the relative standard error of a proportion will always be less than the relative standard error of the numerator. However, whenever a proportion is small (i.e. the denominator is considerably greater than the numerator) it will be reasonable to approximate the relative standard error of the proportion by the relative standard error of the numerator.

The relative standard error on differences between two estimates can also be derived from the graphs. For differences between the 1976 Census and the 1971 Census the standard error of the difference will be identical to the standard error of the 1976 estimates alone.

Example

If estimates for the 1971 and 1976 Censuses are 500 dwellings and 800 dwellings respectively then the difference is estimated as 300 dwellings. The 1971 estimate is not subject to sample error whilst the 1976 estimate has a relative standard error (as read from graph 1) of approximately 2% and hence a standard error of 2% of 800 or 16. The standard error of the difference is therefore 16 and there are 19 chances in 20 that if all schedules from the 1976 Census had been processed that the observed difference would be within the range $300 \pm 2 \times 16$ or 268 to 332.

For differences between two 1976 Census estimates the standard error of the differences may be approximated by the following formula.

$$\text{Standard Error (x-y)} = \sqrt{(\text{Standard Error (x)})^2 + (\text{Standard Error (y)})^2}$$

This approximation will be exact for differences between estimates of the same characteristics in two different areas (e.g. LGA's, CD's) or for differences between separate and uncorrelated characteristics in the same area. If, however, there is positive correlation between the characteristics (e.g. comparison of number of lawyers with number of persons with law degrees), the above approximation will overestimate the true standard error, and if there is a negative correlation between the characteristics (e.g. comparison of the number of persons who travel to work by train and car) it will underestimate the true standard error.

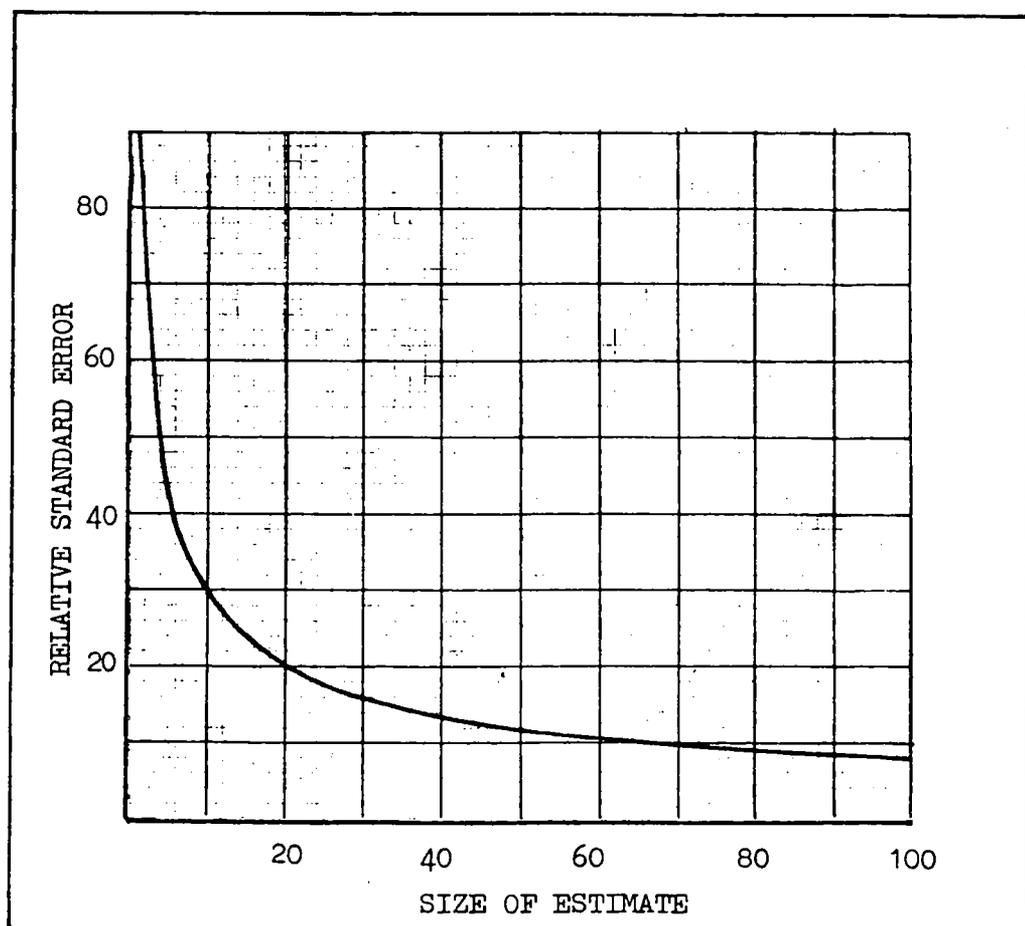

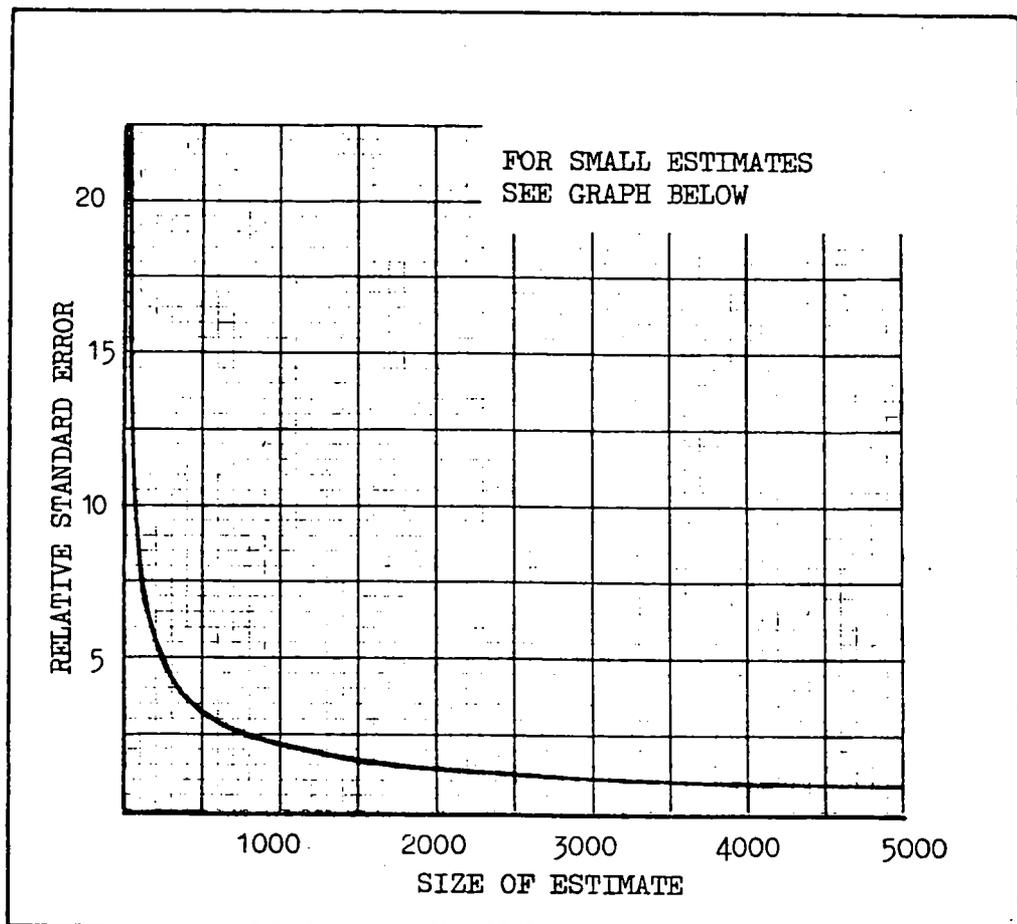

Example

If the estimate of the number of children in the age group 0-4 in an LGA is 1,250 and for the age group 5-9 is 1,750, then the estimate of the differences of the number of children in these two age groups is $(1,750 - 1,250) = 500$. The standard error of this estimate is calculated as follows. Since Age is a line B persons topic, we must determine which of B1 or B2 (see Graph 2) is the relevant relative standard error line. If the total number of persons in the LGA is 25,000, then the proportion $1,250/25,000 = .05$ and $1,750/25,000 = .07$ indicate that the appropriate relative standard error line is that marked B1. Reading off from the graph, the relative standard error for estimates of 1,250 and 1,750 are approximately 2% and 1.75% respectively. Therefore, the standard errors on these estimates are $(.02 \times 1,250) = 25$ and $(.0175 \times 1,750) = 30.625$. The standard error on the difference 500 is then given by:

$$\text{Standard Error (1750-1250)} = \sqrt{(25)^2 + (30.625)^2} = 40$$

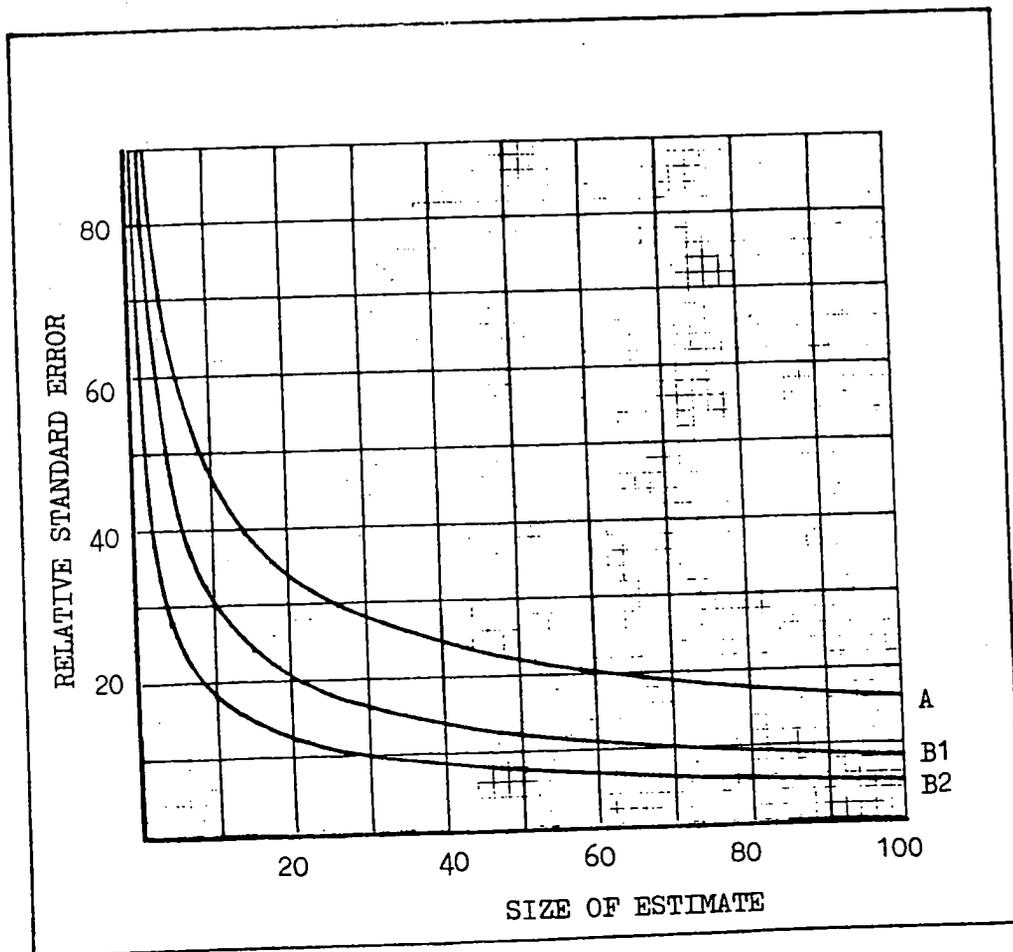

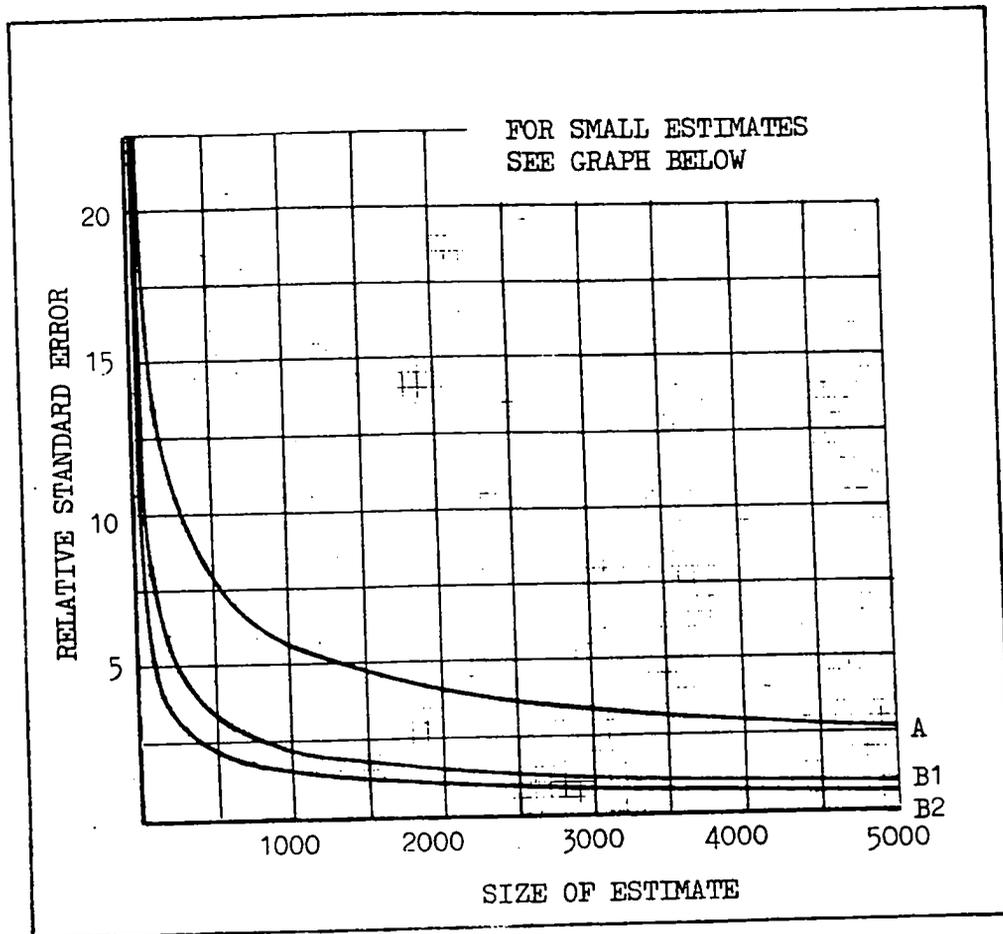

RELATIVE STANDARD ERRORS FOR DWELLING TOPICS

GRAPH 1

RELATIVE STANDARD ERRORS FOR PERSON TOPICS

GRAPH 2

POPULATION

1. Write this person's name.

First or given name.....
 Surname.....
 • For unnamed baby, write "Baby" and surname.

2. Sex:

Male
 or
 Female

• Tick the appropriate box.

3. Write this person's age in years and completed months.

• If age is less than 1 year write "O" years and number of completed months.
 years months

4. Relationship:

- If this person is living in a private dwelling show whether he/she is related to the head of the household or Person 1 as shown on the Householder's Schedule, e.g. husband, wife, defacto spouse, mother, son, daughter, son-in-law, brother, sister, grandson, grand-daughter, uncle, nephew.
- If not related to the head of the household or Person 1 write whether boarder, visitor, co-tenant, etc.
- If living in a non private dwelling write whether hotel guest, patient, prisoner, employee, etc.

5. What is this person's marital status?

- Tick one box only.
- Never married 1
- Married 2
- Married but permanently separated 3
- Divorced 4
- Widowed 5

Note: • "Usual residence" is that address at which a person has lived for the last 6 months or intends to live for any period of 6 months or more.
 • In question 6 any person who now has no usual residence should tick box 1 and go to question 7.
 • In questions 7 and 8 any person who did not have a usual residence on 30 June 1975 or 1971 should give the address at which they were then living.

6. Where does this person usually live?

This address 1 → **Go to question 7**
 Elsewhere 2

State full address of usual residence.
 • If usual residence is overseas write only name of country of usual residence and then go to Question 7.
 Number and street.....
 Suburb, town or locality.....
 Name of local council.....
 State..... Postcode.....

7. Where was this person's usual residence one year ago (i.e. at 30 June 1975)?

Same as in question 6 1 → **Go to question 8**
 Elsewhere 2

State full address of usual residence one year ago.
 • If overseas write "O" instead of address; if this person is less than 1 year old, write "N/A".
 Number and street.....
 Suburb, town or locality.....
 Name of local council.....
 State..... Postcode.....

8. Where was this person's usual residence five years ago (i.e. at 30 June 1971)?

Same as in question 6 1 → **Go to question 9**
 Same as in question 7 2
 Elsewhere 3

State full address of usual residence five years ago.
 • If overseas write "O" instead of address; if this person is less than 5 years old, write "N/A".
 Number and street.....
 Suburb, town or locality.....
 Name of local council.....
 State..... Postcode.....

9. Write the country of birth of this person's father and mother.

Father.....
 Mother.....

10. Where was this person born?

- If born in Australia write the State or Territory and go to question 13.
 - If born overseas write the country and go to question 11.
- Born in

11. Write the country of citizenship of this person.

- If naturalised, registered or granted Australian citizenship write "Australia".
 - Other persons (whether of British nationality or not) should write their country of citizenship.
- Citizen of

12. Is this person a resident of or visitor to Australia?

Resident → Give date of first arrival in Australia as a resident Month Year

or

Visitor → Give date of arrival in Australia on this visit Month Year

13. What is this person's religious denomination?

• If no religion write "None".
 Religion

14. Has this person been away from home ON A HOLIDAY for a week or more since 30 June 1975?

Yes
 or
 No

15. Is this person handicapped by a SERIOUS long-term illness or physical or mental condition?

- If yes, tick appropriate boxes to show types of handicap.
 - If not handicapped tick box 8.
 - If no illnesses or conditions tick box 8.
- In his or her education..... 1
 In getting or holding a job 2
 In getting about alone 3
 In doing housework 4
 In sporting or recreational activities..... 5
 In acts of daily living, e.g. dressing, bathing 6
 In other ways 7
 Not handicapped 8

16. Is this person's life insured with a life assurance company?

Yes
 or
 No

If this person is under 6 years old, answer question 17.

17. Is this child minded by someone other than his/her parent(s) for some part of each working day?

• Tick boxes which apply.

- Yes - at child-care centre (including child-minding centres, pre-schools, day care centres, creches, day nurseries, play groups)
Yes - at home (not by child's parents)
Yes - at another's home
Yes - elsewhere
No

18. What is this person's racial origin?

- If of mixed origin, indicate the one to which this person considers himself/herself to belong.
Tick one box only.
European origin
Aboriginal origin
Torres Strait Islander origin
Other origin

IF THIS PERSON IS UNDER 5 YEARS OF AGE NO MORE QUESTIONS

ANSWER QUESTIONS 19 AND 20 IF THIS PERSON IS 5 YEARS OF AGE OR MORE

19. For this person tick boxes to show ALL languages regularly used.

- Include all languages regularly used whether at home, at work, at school, when shopping, etc.
Remember: This person may use more than one language - tick each language used regularly.
If an aboriginal tribal language is used, tick box 5 and write name of language.

- English
Italian
Greek
German
Other

Please list

20. Attendance at any educational institution:

- Tick appropriate box.
Include if a school pupil, full-time, part-time or external student.
An educational institution may be an infants, primary or secondary school, correspondence school, university, college of advanced education, technical college, etc.
Tick box 3 if person not attending.

- Is this person - Still attending school?
Attending any other educational institution?
Not attending?

Name of educational institution

Address

State

IF THIS PERSON IS UNDER 15 YEARS OF AGE NO MORE QUESTIONS

ANSWER THE REMAINING QUESTIONS IF THIS PERSON IS 15 YEARS OF AGE OR MORE.

21. Write the age at which this person left school.

- If this person did not go to school, tick box 1.
If this person is still at school, tick box 2.

- Age left school
Did not go to school
Still at school

22. Has this person obtained a trade or other qualification since leaving school?

• If still at school, tick box 3.

- 1 Yes
2 No
3 Still at school

State details of highest qualification:

- Qualification name
Awarding institution
Field of study
Year obtained

23. Is this person licensed to ride a motor bike or motor scooter?

- Yes
No

24. Is this person licensed to drive a motor vehicle (other than motor bike or motor scooter)?

- Yes
No

25. Which of these payments are received?

- For this person, tick all boxes which apply.
If no payments received, tick box 10.

Do not count refunds from private or government medical funds.

- Superannuation or annuity
War widow's pension
Other war pension
Repatriation service pension
Age pension
Invalid pension
Widow's pension or Supporting mother's benefit
Unemployment benefit
Sickness or Special benefit
None of these

26. Does this person pay into a retirement benefit scheme such as superannuation, provident fund or annuity?

- Yes
No

• Tick "yes" also if payments are made by employer.

27. Does this person usually work for wages, salary, payment or profit in a job, business, profession, or on a farm?

- Yes
No

28. If this person is a woman who has EVER been married, write the number of babies she has had from ALL her marriages.

- Include children she has adopted.
Do not count still-births.
If none, write "None".
If never married write "N/A" and go to question 31.

- Now living
Not now living
Total

29. If this person is a woman who is NOW married, write the length of her present marriage.

- If less than one year write "0".
If not now married write "N/A" and go to question 31.

Number of years

30. If this person is a woman who is NOW married, write the number of babies she has had from her PRESENT marriage.

- Include children she has adopted.
Do not count still-births.
If none write "None".

- Now living
Not now living
Total

31. For this person tick the appropriate box to show all income usually received each week from all sources.

- Count all income: e.g., include wages, salary, overtime, *child endowment*, pensions, superannuation, tips and gratuities, business or farm income (less expenses of operation), interest, scholarships.
- Do not deduct tax, superannuation, etc.
- If unable to estimate income on a weekly basis tick the appropriate box to show present income on an annual basis.

- No income 1
 Less than \$29 p.wk. 2
 Less than \$1500 p.yr.
 \$29 to \$39 p.wk. 3
 \$1500 to \$2000 p.yr.
 Over \$39 to \$58 p.wk. 4
 Over \$2000 to \$3000 p.yr.
 Over \$58 to \$77 p.wk. 5
 Over \$3000 to \$4000 p.yr.
 Over \$77 to \$96 p.wk. 6
 Over \$4000 to \$5000 p.yr.
 Over \$96 to \$115 p.wk. 7
 Over \$5000 to \$6000 p.yr.
 Over \$115 to \$135 p.wk. 8
 Over \$6000 to \$7000 p.yr.
 Over \$135 to \$154 p.wk. 9
 Over \$7000 to \$8000 p.yr.
 Over \$154 to \$173 p.wk. 10
 Over \$8000 to \$9000 p.yr.
 Over \$173 to \$231 p.wk. 11
 Over \$9000 to \$12000 p.yr.
 Over \$231 to \$288 p.wk. 12
 Over \$12000 to \$15000 p.yr.
 Over \$288 to \$346 p.wk. 13
 Over \$15000 to \$18000 p.yr.
 Over \$346 p.wk. 14
 Over \$18000 p.yr.

32. Did this person do any work at all LAST WEEK?

- Tick one box only.

- Yes, worked for wages, salary, payment or profit 1 → **Go to question 36**
 Yes, but did unpaid work only 2 →
 Did not work 3 → **Go to question 33**

If this person ticked boxes 2 or 3 in question 32, please answer questions 33 and 34 and 35.

33. Did this person have a full-time or part-time job, business, profession or farm of any kind LAST WEEK?

- Yes, had a paid job, a business, a profession or farm last week (even if on holidays, sick, on strike, etc.) 1
 Yes, helped without pay in a family business 2
 Other unpaid job 3
 Did not have any job, business, profession or farm last week 4

34. Was this person temporarily laid off by their employer without pay for the WHOLE of last week?

- Yes
 or
 No

35. Did this person look for work last week?

- *Looking for work* means being registered with the Commonwealth Employment Service, approaching a prospective employer, placing or answering advertisements, writing letters of application or awaiting the results of recent applications.

- Yes, looking for first job 1
 Yes, but not for first job 2
 No 3

36. How many hours PER WEEK does this person usually work in the job or jobs held last week?

Main job hours per week
 Other job(s) hours per week

37. In the main job held last week was this person—

- Tick one box only.
- a wage or salary earner? 1
 conducting own business but not employing others? 2
 conducting own business and employing others? 3
 a helper not receiving wages or salary? 4

38. In the main job held last week what was this person's occupation?

- Describe as fully as possible using two or more words (e.g. builder's labourer).
- Where possible, give award or government designation.
- If a member of the armed services, please state rank.

Occupation

39. For the main job held last week print employer's trading name and address of workplace.

- If self-employed print name of own business.
- If a teacher please print name of school.
- If a government employee please print full name of department.
- A person with no fixed place of work last week, e.g. taxi-driver, airline pilot, etc., print "N/A".

USE BLOCK LETTERS

Employer's (or own) trading name

Name of Division, Branch or Section (if any) in which this person worked

Address of workplace:

Number and street

Suburb or town

State Postcode

40. What kind of industry, business or service is carried out at that address? (i.e. the address given in reply to question 39)

- Use two or more words, e.g. dairy farming, road construction, retail grocery.

Kind of industry

41. How did this person get to work on Tuesday 29 June 1976?

- Tick boxes to show methods used.

- Train 0 Motor bike or motor scooter 6
 Bus 1 Bicycle 7
 Ferry or tram 2 Worked at home 8
 Taxi 3 Did not go to work 9
 Car—as driver 4 Other 10
 Car—as passenger 5

Please state

How does this person usually get to work?

IF THIS PERSON TICKED BOXES 3 OR 4 IN QUESTION 33 NO MORE QUESTIONS

DWELLINGS

1. Tick the box which best describes this dwelling.

- Tick one box only.
 - "Self-contained" means able to be completely closed off and with own cooking and bathing facilities.
- 1 A self-contained dwelling (e.g. separate house, semi-detached house, terrace house, self-contained flat, home unit, villa unit, town house)
 - 2 A non self-contained dwelling (e.g. non self-contained flat, bedsitting room, non self-contained part of a detached house)
 - 3 An improvised dwelling (e.g. shed, garage, humpy) occupied on a permanent or semi-permanent basis
 - 4 A mobile dwelling (e.g. caravan, houseboat, tent)
 - 5 None of these. Please describe

2. Is this dwelling joined to one or more other dwellings?

- Yes
or
 No → Go to question 3

How many dwelling units are there in the whole building?

- | | | | |
|--------------|----------------------------|-----------------------|----------------------------|
| 2 units..... | <input type="checkbox"/> 1 | 6-8 units..... | <input type="checkbox"/> 5 |
| 3 units..... | <input type="checkbox"/> 2 | 9-16 units..... | <input type="checkbox"/> 6 |
| 4 units..... | <input type="checkbox"/> 3 | 17-32 units..... | <input type="checkbox"/> 7 |
| 5 units..... | <input type="checkbox"/> 4 | 33 or more units..... | <input type="checkbox"/> 8 |

3. Was this dwelling built after 30 June 1971?

Yes or No

4. What is the material of the outer walls of this building?

- Tick one box only. If more than one, indicate main material.
- | | | | |
|-------------------------------|----------------------------|----------------------|----------------------------|
| Brick, brick veneer..... | <input type="checkbox"/> 1 | Metal..... | <input type="checkbox"/> 5 |
| Stone..... | <input type="checkbox"/> 2 | Fibro, asbestos..... | <input type="checkbox"/> 6 |
| Concrete, concrete block..... | <input type="checkbox"/> 3 | Other..... | <input type="checkbox"/> 7 |
| Timber..... | <input type="checkbox"/> 4 | | |
- Please describe

5. What is the main source of water supply within this dwelling?

- Tick one box only.
- | | |
|--|----------------------------|
| Piped from mains..... | <input type="checkbox"/> 1 |
| Piped from rain water tank..... | <input type="checkbox"/> 2 |
| Piped from other source..... | <input type="checkbox"/> 3 |
| No piped water within this dwelling..... | <input type="checkbox"/> 4 |
