Preface

Like the earlier issues of *Labour Statistics*, this publication brings together statistics covering most of the subjects, except retail and wholesale prices and price indexes, formerly included in the *Labour Report*, which is no longer published.

The statistics generally relate to collections undertaken during or relating to 1978, but in some cases statistics are given for earlier periods. Because of limitations of space only a summary of the principal statistics is shown in the tables, but references to other publications which contain more detailed statistics are given where appropriate. The principal publications are listed on pages 1 and 2.

Users are invited to comment on the usefulness of the tables selected and to suggest new tables for inclusion in future issues. Any such suggestions should be addressed to The Assistant Statistician, Manpower Branch, Australian Bureau of Statistics, P.O. Box 10, Belconnen, A.C.T. 2616.
