

## **ECONOMIC INDICATORS** QUEENSLAND

EMBARGO: 11:30AM (CANBERRA TIME) MON 28 JULY 1997

### THE KEY POINTS

#### AUSTRALIA

##### GOODS AND SERVICES

- The trend estimate of the balance on goods and services recorded a surplus of \$233m in May 1997, an increase of \$48m over the surplus recorded in April 1997. This is the fifteenth consecutive surplus on this balance.
- Exports of goods and services, in trend terms, increased \$21m from April 1997 to May 1997, continuing the upward movement since September 1996.
- Imports of goods and services, in trend terms, decreased \$27m in May 1997, after having fallen \$10m in April 1997. These decreases reversed an upward movement since August 1996.

**BALANCE ON GOODS AND SERVICES,  
AUSTRALIA, TREND**

May 1987 May 1989 May 1991 May 1993 May 1995 May 1997

**UNEMPLOYMENT RATE, PERSONS,  
QUEENSLAND, TREND**

June 1987 June 1989 June 1991 June 1993 June 1995 June 1997

#### QUEENSLAND

##### UNEMPLOYMENT RATE

- Decreased, in trend terms, from 9.5% for May 1997 to 9.3% for June 1997. For males, in trend terms, decreased 0.2 percentage points to 9.6% for June 1997. For females, in trend terms, decreased 0.1 percentage point to 9.0% for June 1997.

##### CONSUMER PRICE INDEX, BRISBANE

- The Brisbane all groups index was 121.1 for June quarter 1997, decreasing 0.3% from March quarter 1997, but increasing 0.6% between June quarter 1996 and June quarter 1997.

##### DWELLING UNITS APPROVED

- Total dwelling units approved in Queensland, in trend terms, totalled 2,832 in May 1997, increasing 7.1% from May 1996, but decreasing 0.8% from April 1997.

# EXPLANATORY NOTES

\*\*\*\*\*

## INTRODUCTION

**1** This publication contains latest estimates for a comprehensive range of economic indicators. Statistics shown in this publication are the latest available at the date of preparation. In a number of cases figures appearing in this publication are preliminary and are subject to revision in subsequent issues. Reference should therefore always be made to the latest issue or to the statistical publication on the specific subject.

## SEASONAL ADJUSTMENT AND TREND ESTIMATION

**2** Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences on the series can be more clearly recognised. Seasonal adjustment does not aim to remove the irregular or non-seasonal influences which may be present in any particular month. This means that month-to-month movements of the seasonally adjusted estimates may not be reliable indicators of trend behaviour.

**3** The smoothing of seasonally adjusted series reduces the impact of the irregular components of the seasonally adjusted series and creates trend estimates. These trend estimates are derived by applying a 13-term Henderson-weighted moving average to all months except the last six. The last six monthly trend estimates are obtained by applying surrogates of the Henderson average to the seasonally adjusted series. Trend series are used to analyse the underlying behaviour of the series over time.

**4** While this smoothing technique enables estimates to be produced for the latest month, it does result in revisions to the most recent months as additional observations become available. Generally, subsequent revisions become smaller and after 3 months have a negligible impact on the series. Revisions also occur as a result of the annual review of seasonal factors.

**5** Users may wish to refer to the ABS Publication: *A Guide to Interpreting Time Series — Monitoring 'Trends', An Overview* (1348.0) for more detailed information on smoothing seasonally adjusted time series data.

## COMPOSITE LEADING INDICATOR

**6** The ABS has developed an experimental Composite Leading Indicator (CLI) which summarises the early signals contained in a selection of economic indicators. The CLI is calculated as a simple average of the short-medium term movements in eight indicators. On average during the 1970s and 1980s, the CLI led turning points in the GDP(A) growth cycle by around two quarters, but the lead time for individual peaks and troughs varied considerably.

**7** Expansions and slow downs in activity are measured relative to the historical long-term trend; thus *peaks and troughs in the CLI provide early signals of turning points in the growth cycle*, not signals of recessions and recoveries.

## RELATED PUBLICATIONS

**8** Current publications produced by the ABS are listed in the *Catalogue of Publications and Products* (1101.0). The ABS also issues, on Tuesdays and Fridays, the *Release Advice* (1105.0) which lists publications to be released in the next few days. The *Catalogue* and *Release Advice* are available from any ABS office.

## UNPUBLISHED STATISTICS

**9** As well as the statistics included in this and related publications, the ABS may have other relevant unpublished data available. Inquiries should be made to Information Inquiries on (07) 3222 6351 or to any ABS office.

## EFFECTS OF ROUNDING

**10** Estimates have been rounded and discrepancies may occur between totals and sums of the component items.

**FOR MORE INFORMATION...**

The ABS publishes a wide range of information on Australia's economic and social conditions. A catalogue of publications and products is available from any of our offices (see below).

**INFORMATION CONSULTANCY SERVICES**

Information tailored to special needs of clients can be obtained from the Information Consultancy Service available at ABS Offices (see below).

**ABS PRODUCTS**

A large number of ABS products is available from the ABS Bookshops (see below). The ABS also provides a subscription service – you can telephone the ABS Subscription Service Australia wide toll free on 1800 0206 08.

**ELECTRONIC SERVICES**

A large range of data is available via on-line services, diskette, magnetic tape, tape cartridge and CD ROM. For more details about our electronic data services, contact any ABS office (see below) or e-mail us at:

\* [client.services@abs.gov.au](mailto:client.services@abs.gov.au)
