AUSTRALIAN CAPITAL TERRITORY BUSINESS INDICATORS, APRIL 1995

SUMMARY OF FINDINGS

Series updated since the March 1995 issue are: population; labour force, job vacancies, industrial disputes; housing finance, building approvals, price index of house building materials; retail turnover; and new motor vehicle registrations.

Notable movements in this issue include:

- The estimated resident population of the ACT at 30 September 1994 was 301,000. The ACT's population growth has slowed to 0.8 per cent over the year to September 1994 compared to 1.4 per cent in the previous year. Annual population growth for Australia was 1.1 per cent to September 1994 and 1.0 per cent to September 1993. Negative net migration has impacted on the ACT population growth over the last two quarters.
- The trend estimates of total employment in the ACT peaked at 154,600 in September/October 1994, but has since then been declining, and in March 1995 stood at 153,400. It has decreased by 0.2 per cent from the previous month. In contrast, the national employment level rose by 0.3 per cent. The trend unemployment rate for the ACT remained constant at 7.0 per cent, while the participation rate continued to decrease by a further 0.2 percentage points in March 1995.
- Long-term unemployment in the ACT declined from 2,636 in January 1995 to 2,459 in February 1995; representing an decrease of 6.7 per cent from the previous month and 39.4 per cent decrease from the same month in the previous year. The proportion of long-term unemployed in the ACT in February 1995 was 17.4 per cent (down 3.1% from January 1995) which compares well with the national proportion of 33.2 per cent (up 0.6%).
- There were 1,300 job vacancies recorded for the ACT in February 1995; a decrease of 7.1 per cent from November 1994 and 13.3 per cent from February 1994. The majority of job vacancies were reported in the public sector with 900 job vacancies at

February 1995 (decreased by 23.8% from the previous quarter). In the private sector, 500 job vacancies were reported in the same period (increased 71.7% from the previous quarter).

- The trend series for the value of monthly housing finance commitments for the ACT showed \$86.0 million in January 1995, down 1.0 per cent from December 1994, but was a drop of 19.8 per cent over the twelve month period. The national decline was 1.3 per cent for January 1995 and 17.2 per cent over the same twelve month period.
- The trend for the total number of dwelling unit approvals in the ACT fell by 0.4 per cent in February 1995. All States and Territories recorded falls in dwelling unit approvals, however, the ACT recorded the lowest fall. The original estimates for the value of approvals for new residential buildings and for residential alterations and additions continued to climb (5.2% and 60.5% respectively), while the value of non-residential buildings decreased by 43.5 per cent.
- Trend estimates of retail turnover in the ACT increased by 0.4 per cent in February 1995, above the national increase of 0.3 per cent. The two main contributors to this increase were the hospitality and services, and food retailing industries at 1.8 per cent and 1.3 per cent, respectively. In the twelve months to February 1995, the retail turnover for the ACT showed a 1.8 per cent increase.
- After a period of decline, the trend series for the number of registered new motor vehicles in the ACT has risen. The last six months has shown the highest level since August 1991, with 1,050 new motor vehicles registered in February 1995. This represented an increase of 1.8 per cent from the previous month and 1.4 per cent from the previous year. This also represented the second highest increase of all States and Territories, with Northern Territory being the highest at 3.8 per cent.
