

### CHARACTERISTICS OF MIGRANTS AGED 18 YEARS AND OVER AT TIME OF ARRIVAL AND WHO ARRIVED AFTER 1960, AUSTRALIA, MARCH 1984 PRELIMINARY

**PHONE INQUIRIES** *for more information about these statistics*—contact Ms Pam Hahne on Canberra (062) 52 6503 or any of our State offices.  
*other inquiries including copies of publications*—contact Information Services on Canberra (062) 52 6627 or in any of our State offices.

**MAIL INQUIRIES** *write to* Information Services, ABS, P.O. Box 10, Belconnen, A.C.T. 2616 or any of our State offices.

#### MAIN FEATURES

**NOTE:** *Survey estimates are subject to sampling variability as explained in paragraph 12 below.*

2,931,400 persons in Australia in March 1984 were born overseas and of these 1,283,000 (44 per cent) arrived after 1960 and were aged 18 years or more at time of arrival.

Of these 1,283,000 migrants 826,000 (64 per cent) were born in Europe (36 per cent in the United Kingdom). 802,400 migrants (63 per cent) said that their country of last residence was Europe (35 per cent said United Kingdom).

319,500 migrants were sponsored (25 per cent) and of these 202,100 (63 per cent) were sponsored by families already in Australia.

658,900 migrants (51 per cent) had no family in Australia before migrating. Of the 624,000 migrants who had family in Australia only 32,400 migrants (5 per cent) had a husband or wife only.

434,100 migrants had no family arriving in Australia with them. Of the 848,900 migrants who arrived with family 472,200 (56 per cent) arrived with children and a husband or wife.

#### EXPLANATORY NOTES

##### Introduction

In association with the March 1984 labour force survey conducted throughout Australia, persons were asked whether they were born in Australia, and if not, whether they arrived after 1960 aged 18 years or more. These persons were then asked about members of their family who arrived in Australia with them, family already in Australia, country of last residence and State in which first settled.

2. During the two weeks beginning Monday 12 March 1984 specially trained interviewers asked the questions of those of the 72,000 respondents in the March labour force survey who fell within the scope of this survey.

3. This publication contains only a summary of the results of the survey. Estimates shown are preliminary and may be revised. Further information which will be published as soon as possible is available on request. Results of the only other similar survey which was conducted in March 1980, were published in *Assisted and Unassisted Migrants, Australia, March 1980* (3406.0).

#### Scope

4. The survey includes all persons aged fifteen years and over except:

- (a) certain diplomatic personnel of overseas governments, customarily excluded from census and estimated populations;
- (b) overseas residents in Australia;
- (c) dependants of non-Australian defence forces personnel stationed in Australia;
- (d) boarding school pupils, some patients in hospitals and sanatoria and inmates of reformatories, jails, etc.

#### Definitions

5. A *migrant* is a person who was not born in Australia and who was a permanent resident of Australia at the time of the survey. A migrant could be *sponsored* to come to Australia or arrive *unsponsored*.

6. Migrants who were *sponsored* include those who had family already in Australia who filled out papers for that person to come to Australia. These people are considered to have come to Australia under the Family Reunion criteria. Others who were *sponsored* had an employer or some other person or organisation, other than the Australian Government, fill out papers for that person to come to Australia.

7. Migrants who were *unsponsored* include those who came to Australia under special eligibility criteria. This category includes persons who came to Australia as migrants who did not require a visa, or who had some entitlement to come to Australia such as *New Zealanders*. *Refugees* were regarded as *unsponsored* and include any person who came to Australia under a refugee program. Other persons who were *unsponsored* include: persons who applied in their own country to come to Australia; Australians born overseas; persons who came to Australia on a temporary visa, on a working holiday, as a student, etc., and had since gained permanent residence.

8. If a wife arrived in Australia with her husband or within 12 months then the wife was considered to be a *wife accompanying husband*.

9. *Country of last residence* was the country in which that person stated he/she last lived in.

10. *State in which first settled* was the state in which that person first lived for 12 months or more.

11. For *Country of Birth* and *Country of Last Residence*, Africa includes: Egypt, Kenya, Uganda, Zimbabwe, Mauritius, South Africa, etc.; America includes: Argentina, Canada, Mexico, United States of America, etc.; Asia includes: China, India, Indonesia, Iran, Israel, Japan, Jordan, Lebanon, Kuwait, Saudi Arabia, Syria, Turkey, Malaysia, Philippines, Taiwan, Vietnam, etc.; Europe includes: United Kingdom, Italy, Greece, Germany, France, Poland, Spain, Ukraine, USSR, etc.; Oceania includes: Fiji, New Caledonia, New Zealand, Papua New Guinea, etc.

#### Reliability of the estimates

12. Estimates in this publication are subject to two sources of error:

- (a) *Sampling error*. Since the estimates are based on information obtained from occupants of a sample of dwellings they are subject to sampling variability; that is they may differ from the figures that would have been produced if all dwellings had been included in the survey. One measure of the likely difference is given by the *standard error*. More information about this topic will be found in *The Labour Force, Australia* (6203.0). A table of estimated standard errors for this survey follows these notes. Estimates with a standard error of more than about 27 per cent have not been shown in this publication, as the degree of sampling variability would seriously detract from their value for most reasonable uses. Although figures for these small components can, in some cases, be derived by subtraction they should not be regarded as reliable.

- (b) *Non-sampling error*. Inaccuracies may occur because of imperfections in reporting by interviewers and respondents and errors made in the coding and processing of data. These inaccuracies may occur in any enumeration, whether it be a full count or a sample. Every effort is made to reduce the non-sampling error to a minimum by careful design of questionnaires, intensive training and supervision of interviewers and efficient operating procedures.

#### Related publications

13. Other ABS publications which may be of interest include:

*The Labour Force, Australia* (6203.0)—issued monthly

*Characteristics of Persons Looking for Work, Australia, July 1983* (6222.0)

*Assisted and Unassisted Migrants, Australia, March 1980* (3406.0)

*Overseas Arrivals and Departures, Australia* (3401.0)—issued monthly

14. Current publications produced by the ABS are listed in the *Catalogue of Publications, Australia* (1101.0). The ABS also issues, on Tuesdays and Fridays, a *Publications Advice* (1105.0) which lists publications to be released in the next few days. The Catalogue and Publications Advice are available from any ABS office.

#### Symbols and other usage

- \* subject to sampling variability too high for most practical uses. See paragraph 12 above.  
 .. not applicable.

15. Because figures have been rounded, discrepancies may occur between sums of the component items and totals.
