PREFACE

South Australian Economic Indicators is a monthly publication which contains the latest available data at the time of preparation for a range of statistical series that have been identified as indicators of economic activity in this State. In a number of cases the figures presented are preliminary and subject to revision in subsequent issues.

Written and graphic commentary have been included for many of the selected series and analysis has been augmented with the calculation of the percentage change from the previous reference period together with the presentation of comparative Australian data.

Time series information has been included to provide a historical perspective on many of the selected indicators. Future issues may be expanded to include further historical data in response to expressed user needs. This product is under continuous review and any suggestions for enhancement will be welcomed.

More detailed information on each series, including explanatory and technical notes, can be obtained from other Australian Bureau of Statistics publications or alternative data sources. To assist those seeking further information a source publication for each of the series has been documented in the statistical summary.

If you have any inquiries concerning this publication please contact the editor, John Callinan, telephone (08) 8237–7307. All requests for statistical information should be directed to the ABS Information Service, GPO Box 2272, Adelaide SA 5001, telephone (08) 8237-7100.

REVIEW

South Australian Overview

- The value of merchandise exports where the final stage of production was in South Australia were \$371.3 million in January 1997, whilst imports released from customs control in South Australia were \$300.4 million.
- The trend estimate of retail turnover has increased 0.1% in January 1997 after a six month period of decline.
- The January 1997 trend estimate for new motor vehicle registrations increased 2.1% and continues the growth shown in this series in the past four months.
- The trend estimate for private new capital expenditure in South Australia for the December quarter 1996 increased by 5.4% from the previous quarter and is a continuation of trend growth which commenced in December quarter 1995.
- The room occupancy rate of 54.9% for hotels, motels and guesthouses in December quarter 1996 was the highest December quarter result recorded since 1986.
- The trend estimate for total dwelling units building approved has fallen for the last three months and is now 6.5% below the recent peak in October 1996.
- The value of non-residential building approved was \$41.9 million in January 1997.
- The Price Index of Materials used in House Building increased by 0.1% in January 1997 whilst the index for Materials used in Building other than House Building increased by 0.2% when compared with December 1996.
- During the December quarter 1996 the Price Index of Established Houses in Adelaide decreased 1.0% and the Project Home Index decreased 3.6%.
- The trend unemployment rate for South Australia has generally remained flat over the last 12 months. The estimate for February 1997 was 9.4%.
- There were 1,100 working days lost through industrial disputes in South Australia during December 1996.
- The trend estimate of average weekly ordinary time earnings of full-time adult employees in South Australia increased by 0.4% for the three months to November 1996.
- In the 12 months to January 1997, the weekly award rates of pay index for full-time employees in South Australia increased by 1.3%.
- The trend estimate for the value of owner-occupied housing commitments continued the upward climb, but at a slower rate with January rising 0.6% to \$258.4 million.

State Accounts

NOTE: Deficiencies in the data sources used to estimate gross operating surplus for recent quarters may at times lead to the current price estimates of gross state product GSP(I) being under or over stated for particular States. Consequently, the measured growth rate for constant price GSP(I) for those States will also be affected.

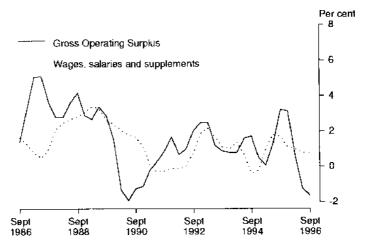

The constant price series for gross state product (GSP) have been labelled as 'experimental'. Users are cautioned that these estimates are derived indirectly by calculating a deflator from the expenditure components. It is emphasised that, at times, movements that can not be fully explained may be introduced into the constant price GSP(I) series through the use of this proxy deflator.

Trend Estimates (Current Prices)

Gross state product (GSP) contracted by 0.3% in the September quarter compared with a 0.5% increase in the national average. Since peaking at 2.4% in the September quarter 1995, the growth in GSP has declined steadily. The annual growth rate of 2.4% was the lowest of all States.

The most significant factor contributing to the September quarter decline in GSP was a 1.6% decline in gross operating surplus. The annual growth rate of 0.8% was the lowest of all States.

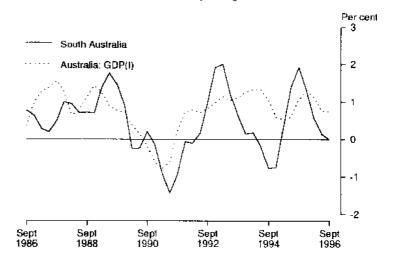

The rate of growth in wages, salaries and supplements has declined for the last 5 quarters, increasing by 0.7% in the September quarter.

No growth was recorded for indirect taxes less subsidies over the latest two quarters.

Trend Estimates (Constant Prices)

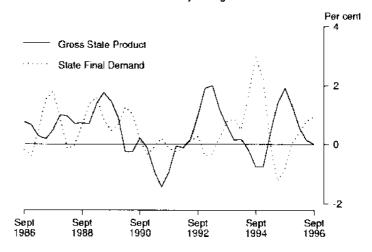

The experimental estimate of GSP at constant prices remained flat in the September quarter but increased by 2.0% through the year to September quarter 1996.

State final demand (SFD) increased by 1.0% in the September quarter and has, for the past two quarters, grown at a faster rate than GSP. September quarter growth in SFD was the highest of all States and was due mainly to a 7.3% increase in private gross fixed capital expenditure, in particular expenditure on equipment. Expenditure on dwellings fell for the eighth consecutive quarter.

GROSS STATE PRODUCT AND STATE FINAL DEMAND - TREND (CONSTANT PRICES) Quarterly Changes

There was an increase of 0.3% in private final consumption expenditure in the September quarter. The increase of 1.4% through the year to September quarter 1996 was the lowest growth rate of any State.

International Accounts

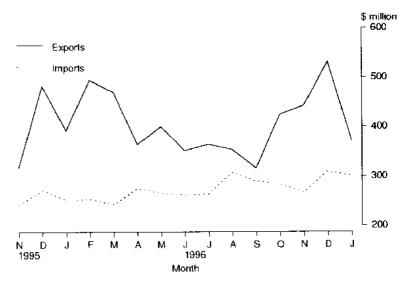

Exports

The January 1997 merchandise exports where the final stage of production was in South Australia were valued at \$371.3 million, a decrease of 30.2% on the previous month and 5.5% on January 1996. A decrease was recorded in most categories with cereals and cereal preparations and fish and crustaceans the only commodities to show an increase on the previous month.

The major commodity groups exported during January 1997 were cereal and cereal preparations valued at \$108.1 million up from \$85.2 million last month and road vehicles, parts and accessories with \$46.7 million down from \$70.1 million.

The major destinations of South Australian exports in January 1997 were the Middle East \$83.8 million, United States \$46.6 million and New Zealand \$32.0 million.

MERCHANDISE EXPORTS AND IMPORTS

Imports

The value of merchandise imports released from Customs control in South Australia for January 1997 was \$300.4 million, a 3.2% decrease on the previous month and a 19.1% increase on January 1996. The decreases mainly occurred in food, beverages and tobacco down \$3.8 million to \$10.0 million, petroleum and petroleum products down \$22.5 million to \$25.0 million and other manufactured goods down \$30.0 million to \$52.4 million. These decreases were partly off set by increases in the importation of machinery up \$31.5 million to \$107.4 million, a record monthly figure and road vehicles parts and accessories up \$9.1 million to \$42.2 million.

Consumption and Investment

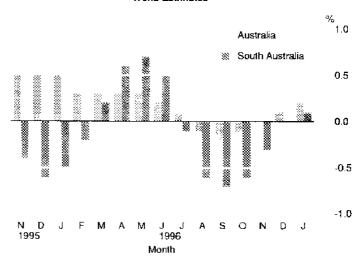

Retail Turnover

The January 1997 trend estimate of retail turnover recorded a 0.1% increase on December 1996 and follows a six month period of decline. Clothing and soft good, other retailing and hospitality and services were the main contributors to growth in this period. The Australian trend estimate recorded a 0.2% increase in January which followed a 0.1% increase in December 1996.

Over the past three months the trend estimate for South Australia fell by \$1.3 million caused by decreases of \$5.0 million in household good retailing, and \$1.1 million in recreational good retailing but was partly offset by increases of \$3.5 million in food retailing and \$0.9 million in clothing and soft good retailing.

The seasonally adjusted estimate of retail trade in January 1997 increased 1.8%. In original terms, South Australian retail turnover was \$752.4 million, an increase of 3.9% on January 1996.

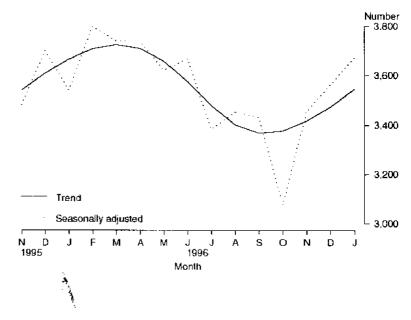

New Motor Vehicle Registrations The trend for total new motor vehicle registrations in January 1997 increased 2.1% over December 1996 and was the fourth consecutive rise following six months of decline. The Australian figure for the same period increased 1.4%.

In original terms there were 2,942 new motor vehicles registered in January 1997, a fall of 17.9% from December 1996 and an increase of 4.0% from January 1996. For new passenger vehicles, the leading makes registered in January 1997 were Mitsubishi (467 vehicles), Holden (452), Ford (446), Toyota (269) and Hyundai (252).

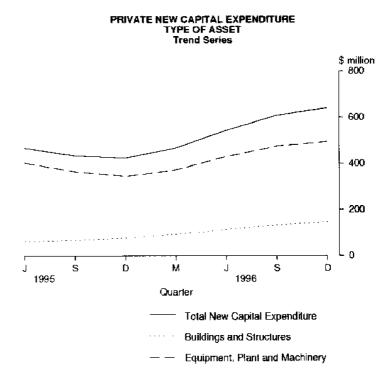

NEW MOTOR VEHICLE REGISTRATIONS

Private New Capital Expenditure

The trend estimate for private new capital expenditure in South Australia for the December quarter 1996 increased by 5.4% from the previous quarter and is a continuation of trend growth which commenced in December quarter 1995. The Australian figure fell by 0.3%.

Private new capital expenditure in original terms for the December quarter 1996 was \$658 million, an increase of 4.4% from the September quarter 1996. Buildings and structures accounted for \$165 million, and equipment, plant and machinery \$493 million.

Information on expected capital expenditure data is contained in the Forward Outlook on pages 17 and 18.

Tourist Accommodation

When December quarter 1996 is compared with December quarter 1995, number of rooms available in hotels, motels and guesthouses in South Australia increased from 10,763 to 10,951 while bed spaces increased from 30,537 to 31,266. Room nights occupied rose by 5.5% resulting in an occupancy rate of 54.9%. Takings from accommodation increased by 0.6% from \$43.0 million to \$43.3 million however the average takings per room night occupied fell from \$82 to \$78. This resulted from a substantial fall in the average takings per room night occupied for the Adelaide Statistical Division in the month of November 1996 which coincided with the loss of the Adelaide Grand Prix.

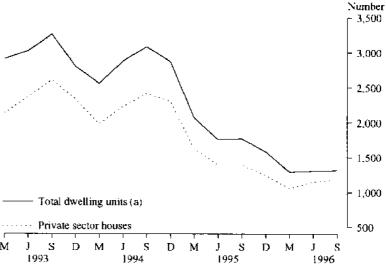

Production

Dwelling Approvals

The January 1997 trend for total dwelling units approved has fallen for the last 3 months and is now 6.5% below the recent peak in October 1996. The trend estimate for total dwellings is 3.3% below the December estimate. In original terms, the number of dwelling unit approvals continued to decline, falling by 14.4% to 351 from the previous month. The number of dwelling units approved for January (351) is comparable to that of a year earlier (355).

The national trend estimate for the total number of dwelling units approved in January 1997 (11,430) was 1.3% higher than the trend estimate for December 1996 and 12.3% higher than January 1996. In original terms, South Australia accounted for 3.5% of the total dwelling units approved in Australia during January 1997.

DWELLING UNITS COMMENCED

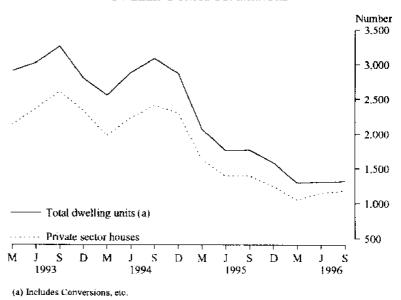

(a) Includes Conversions, etc.

Dwelling Commencements

From the Building Activity Survey, it was estimated that 1,498 dwelling units were commenced during the December quarter 1996, a rise of 13.4% from the previous quarter. This compares with a 2.9% increase nationally. The December quarter figure for South Australia was 5.6% below that total of a year earlier, while the national figure increased 2.2% over the 12 month period.

DWELLING UNITS COMMENCED

Value of Building Approvals

The value of new residential building approved declined to \$29.6 million for January 1997.

The value of non-residential building increased by 49.6% in January to \$41.9 million. Of the total value of non-residential building for January 1997, the public sector contributed \$30.6 million, including \$16.2 million in the entertainment and recreational and \$11.7 million in the educational categories.

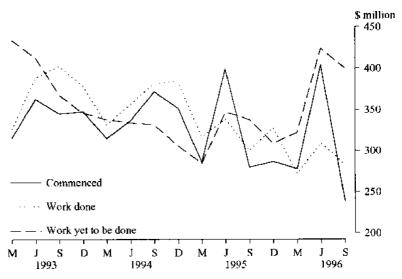

Overall for January 1997, the value of all buildings approved increased by 10.5% from the previous month to \$80.1 million.

Value of Total Building Activity The total value of building work commenced in South Australia during the September quarter 1996 fell by 41.0% to \$238.4 million from the previous quarters high of \$403.9 million. This fall can be mostly attributed to a 60.9% fall in the non-residential building sector, in particular, the shops, other business premises and entertainment and recreational categories which had recorded substantial increases last quarter. This is the lowest value for building work commenced in South Australia in over ten years.

The total value of building work done during the September quarter 1996 fell by 8.2% to \$283.2 million compared with a 3.9% increase nationally. Compared with the September quarter 1995, South Australia had a 5.5% fall in the value of total building work done which was comparable with the national movement of a 4.9% fall.

The total value of building work yet to be done in South Australia was \$400.1 million at the end of September quarter 1996, a fall of 5.5% from the previous quarter while the corresponding national figure increased by 2.1% to \$9,530.6 million. Expressed as a proportion of the national total, the total value of building work yet to be done in South Australia was 4.2% for the September quarter 1996.

VALUE OF BUILDING ACTIVITY

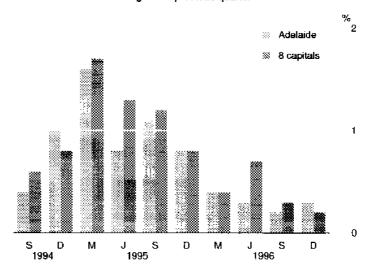

Value of Engineering Construction In South Australia, the value of engineering construction work done for the September quarter 1996 was down 38.5% to \$139.1 million compared with a 9.8% fall nationally. South Australia had a 3.7% share of the national total of \$3,719.3 million. The value of work commenced during the quarter for South Australia rose 25.9% to \$247.9 million as did the corresponding national figure increasing by 33.6% to \$4,382.1 million. The State's proportion of national commencements was 5.7% for the September quarter 1996.

Prices

Consumer Price Index

The Consumer Price Index (all groups) in Adelaide rose 0.3% in the December quarter. The annual increase of 1.2% was the lowest recorded since September 1968. The comparative Australian data shows a 0.2% increase for the December quarter 1996, the lowest quarterly change since December 1993 and an annual increase of 1.5%, the lowest annual change since the March quarter 1994.

CONSUMER PRICE INDEX Change from previous quarter

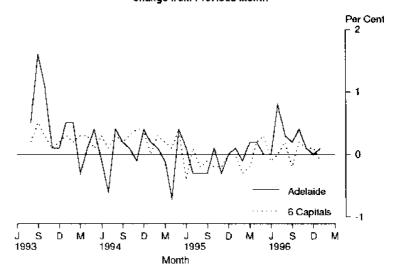

House Building Materials

Adelaide recorded a rise of 0.1% for the month of January in the Price Index of Materials used in House Building, the rise being attributed to an increase in installed appliances and cupboards. The weighted average of the six State capitals fell by 0.1% for the month.

For the twelve months to January, the Index has risen 2.1% for Adelaide, while the weighted average of the six State capitals only rose 0.2% for the same period.

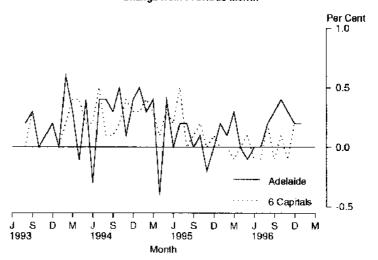

MATERIALS USED IN HOUSE BUILDING Change from Previous Month

Non-house Building Materials For the month of January, Adelaide recorded a rise of 0.2% in the Price Index of Materials used in Building other than House Building. A rise in the price of electrical materials was the main reason for the rise. For the same period, the weighted average of the six State capitals also rose 0.2%.

A rise of 1.7% for the twelve months ended January was recorded in Adelaide, while for the same period, a rise of 0.3% was recorded for the weighted average of the six State capitals.

MATERIALS USED IN BUILDING OTHER THAN HOUSE BUILDING Change from Previous Month

House Prices

During the December quarter 1996 the Price Index of Established Houses in Adelaide decreased 1.0% and the Project Home Index decreased 3.6%. The weighted average of the eight capital cities index, over the same period showed a 0.3% increase for established houses and a 0.3% decrease for project houses.

Between December quarter of 1995 and 1996 the Price Index for Established Houses in Adelaide decreased by 0.7% and project homes by 4.8%. Nationally, for the 12 month period established house prices recorded a 1.7% increase and project homes decreased by 0.3%.

Passenger Transport Costs

The passenger transport cost index measures changes in the costs of operating a public transport passenger bus service in Adelaide. Costs covered include labour costs, leasing charges, registration and insurance, repairs and maintenance, fuel and overheads. The index has been compiled on a quarterly basis from September 1995 with a base of 100.0 in 1993-94. The December quarter 1996 index was 107.8, up 3.6% from 104.1 in September 1996. The index showed a 2.8% increase in the 12 months to December 1996.

Labour Force and Demography

Population

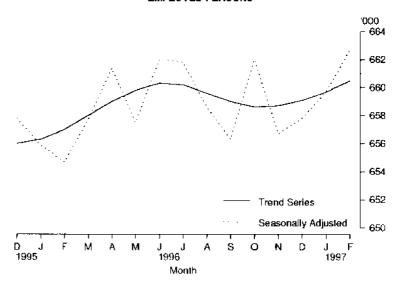

At 30 June 1996 the estimated resident population of South Australia was 1,479,147. This was an increase of 0.1% (1,417) persons from the March quarter. The continuing low growth rate for South Australia is attributable to a net outflow in interstate migration of 1,093 persons which was partly offset by a net inflow of overseas migration of 697 persons. In the June quarter there was a natural increase of 1,813 persons and 1,596 in the September quarter 1996.

Employment

At February 1997, the trend estimate of employed persons in South Australia was 660,500, up slightly from the level recorded in February 1996 (657,000).

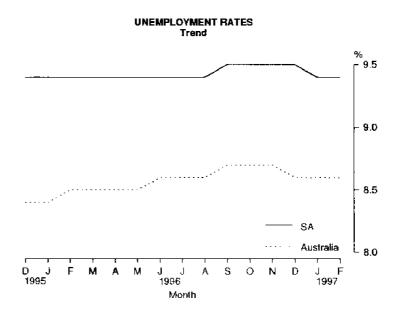

The trend estimate of employed persons in Australia rose to 8,418,800 in February 1997, thus continuing the growth of recent months.

EMPLOYED PERSONS

Unemployment

The trend unemployment rate for South Australia has generally remained flat over the last 12 months. The estimate for February 1997 was 9.4%.

After reaching a peak of 8.7% in September 1996, the trend estimate of the employment rate for Australia was 8.6% in February 1997.

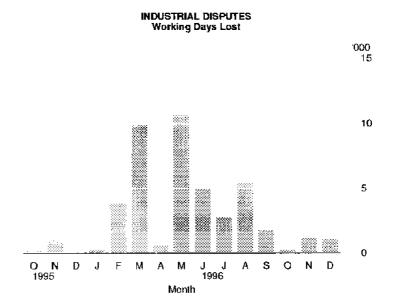

Overtime

In original terms, the proportion of employees who worked overtime in South Australia in November 1996 was 15.0%. This was higher than the November 1995 level of 14.3%. For Australia, the corresponding proportions were 15.9% and 16.6% for November 1996 and November 1995 respectively.

In November 1996, employees who worked overtime in South Australia recorded an average of 6.4 overtime hours per week. This was lower than the corresponding national level of 7.2 hours.

Industrial Disputes

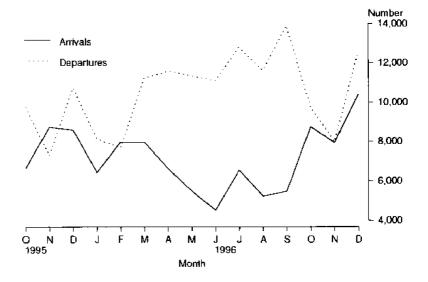

There were 1,100 working days lost through industrial disputes in South Australia during December 1996. At 4.0% of the national total (27,200 working days lost), South Australia experienced a relatively low level of industrial disputation.

Short term Overseas Visitor Arrivals In December 1996, there were 10,411 short term overseas visitor arrivals to South Australia. This is the highest monthly figure recorded in recent years, representing a 31.0% increase from November (7,947) and a 21.4% rise from December 1995 (8,574). Similar growth (23.9%) was recorded for Australia (from 375,565 in November to 465,176 in December). The South Australian share of the Australian short term overseas visitor market increased only slightly from 2.1% in the previous month to 2.2% in December.

Short term Resident Departures There were 12,552 resident short term departures from South Australia in December. This represents a 57.1% increase in the number of resident departures from November (7,988), and is 16.7% higher than for the same month last year (10,760). These figures reflect the increase of resident departures from Australia as a whole for December (294,952 departures up 35.2% from 218,200 in November).

SHORT TERM OVERSEAS ARRIVALS AND DEPARTURES

Incomes

Average Weekly Earnings

The trend estimate of average weekly ordinary time earnings of full-time adult employees in South Australia increased by 0.4% for the three months to November 1996. Male full-time ordinary time earnings decreased by 0.1% in November 1996 whilst over the same period female full-time adults ordinary time earnings increased by 1.5%.

In the twelve months to November 1996 the trend estimate of average weekly ordinary time earnings of full time adults increased by 3.3%. This compares with a 4.3% increase for full-time adult total earnings.

Note: Since it is an average of earnings across all employees, changes in average weekly earnings may occur through changes in employment as well as changes in pay levels.

Award Rates of Pay

In the 12 months to January 1997, the weekly award rates of pay index for full-time employees in South Australia increased by 1.3%.

For full-time adult male employees in South Australia, the largest annual movement of the index occurred in the manufacturing industry division, with an increase of 1.8%.

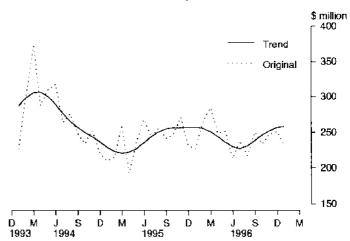

For full-time adult female employees, the largest annual movement of the index occurred in public administration and defence with an increase of 2.4%.

Financial Markets

Housing Finance

The trend estimate for the value of owner-occupied housing commitments continued the upward climb, but at a slower rate with January rising 0.6% to \$258.4 million, 0.3% above January 1996. The national trend increased 1.6% for the month, 15.1% above the previous January.

Total housing finance commitments (original figures including alterations and additions) decreased in January by 7.0% to \$246.1 million, marginally above January 1996. All categories were down apart from commitments for alterations and additions.

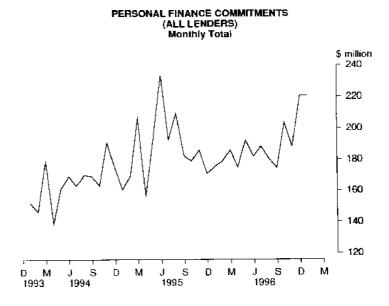

Commitments for the purchase of established houses (the largest category) was down by 10.0% to \$144.9 million. Construction of dwellings decreased 2.7% to \$29.7 million (which represented 6.3% of the national total) but was 38.3% above the previous January. Commitments for newly erected dwellings decreased 17.0% to \$9.2 million. Refinancing was down 3.9% to \$47.0 million from the \$13.1 million recorded in December 1996.

Alterations and additions increased 17.5% to \$15.3 million following the lowest month since July 1993.

Personal Finance

Total commitments for January remained static at \$221.0 million, but still 25.8% above the previous January. The national total decreased marginally during the month but was 7.6% above January 1996. The South Australian commitments for the month were 8.0% of the national total.

Fixed loan commitments increased 8.8% to \$124.0 million, marginally below January 1996. The main category, finance for used motor vehicles and station wagons, was up 14.0% to \$38.8 million. 8% lower than the previous year, this represents 8.5% of the national total. New motor vehicles and station wagons, were up 11.3% to \$14.5 million, 26.9% higher than the previous year and now representing 6.4% of the national total. Significant increases were also recorded for debt consolidation, up 10.3% and refinancing, up 6.8%.

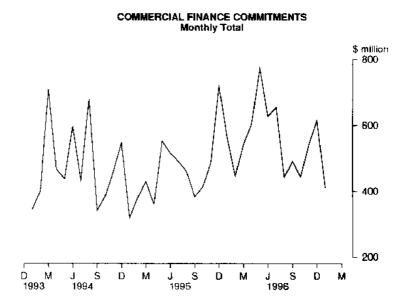

Revolving credit facilities decreased by 9.2% to \$96.9 million with secured revolving credit facilities falling by 15.7% to \$58.7 million from the very high December figure. Secured revolving credit facilities are still three times higher than the previous January. Unsecured rose 3% to be 18% higher than January 1996.

Commercial Finance

Total commercial finance commitments decreased 33.2% to \$411.2 million, 26.9% below January 1996. This was the lowest month since September 1995 and put South Australia's proportion of the national total down to 3.4%.

Commitments under fixed loan facilities decreased 27.5% to \$260.0 million, 2.6% above the previous January. The main decrease was for mining, down \$99.6 million to \$0.9 million, following an exceptionally high December. Finance, investment and insurance increased \$13.7 million to \$24.9 million following the low December figure.

Revolving credit facilities decreased 41.1% to \$151.2 million, 51.0% below January 1996. Big decreases were recorded for recreation, personal and other services, finance, investment and other services and construction after high December figures.

Lease Finance

The value of goods under new finance lease commitments decreased 28.6% to \$13.7 million, 5.2% higher than the previous January. South Australia's proportion of the national total is now down to 2.5%. Nationally the month was down 11.7% but 16.8% above the previous January.

Two of the main decreases were for new and used heavy trucks (down \$1.2 million and \$1.3 million respectively) following high increases in the previous month. The other major decrease was for new motor cars and station wagons not subject to depreciation (the largest category), 25.2% below December but 13.6% above the previous January. This category represented 2.9% of the Australian total in January.

Forward Outlook

Composite Leading Indicator

The Composite Leading Indicator (CLI) is a single time series produced by aggregating eight individual economic indicators, and has been developed by the ABS as an experimental series to supplement existing forms of economic analysis and modelling.

The CLI summarises the early signals contained in a selection of economic indicators and is designed to assist the detection of turning points between successive expansions and slow downs of economic activity as measured by constant price GDP(A). It does not attempt to forecast the level of economic activity.

In the December quarter 1996:

- the experimental CLI rose 0.12%, following rises of 0.31% and 0.25% in the June and September quarters respectively.
- The last turning point in the deviation from its long-term trend for average Gross Domestic Product GDP (A) was a peak in the March quarter 1995. This peak was not predicted by the CLI as it is not well equipped to predict turning points driven predominantly by farm production as was the case in 1995-96.

Australian Business Expectations

Surveys of business expectations have been available to decision makers for a number of years from several sources. These surveys provided *qualitative* indicators in the form of the net proportion of businesses expecting a rise or fall in future business conditions. Since the December quarter 1993, the ABS has been compiling a *quantitative* indicator of business expectations in the form of an expected weighted aggregate change in a range of economic variables. These data are available on a quarterly basis in *Australian Business Expectations* (5250.0).

AUSTRALIAN BUSINESS EXPECTATIONS SOUTH AUSTRALIA AND AUSTRALIA SALES OF GOODS AND SERVICES EXPECTED PERCENTAGE AGGREGATE CHANGE

	Short t	erm	Medium term				
	Expected aggregate	change between	Expected aggregate change between				
Reference Period	Sep. 1996 and Dec. 1996	Dec. 1996 and Mar. 1997	Dec. 1996 and Dec. 1997	Mar. 1996 and Mar. 1997			
	%	%	%	%			
South Australia	2.1	-0.1	4.3	3.6			
Australia	1.6	0.4	3.1	4.1			

Short term

Businesses in South Australia expect a decrease of 0.1% in sales of goods and services in the March quarter 1997 compared with the December quarter while the national expectation was a 0.4% increase.

Medium term

Businesses in South Australia expect sales of goods and services in the December quarter 1997 to be 4.3% above December quarter 1996. Australia wide the expectation was for 3.1% growth.

Expected New Capital Expenditure

State estimates of actual new capital expenditure by private businesses in Australia are compiled each quarter. Details appear on pages 6, 20 and 28 of this publication.

Each December quarter businesses in the survey are asked for details of their longer term expectations for capital expenditure by State enabling estimates to be made for periods 6 months and 18 months ahead of the reference period. The collection of expectations in the December quarter survey also allows the derivation of a composite estimate (6 months actual plus 6 months expectations) for that financial year.

The following table shows the forward estimates made with the December 1996 collection.

EXPECTED PRIVATE NEW CAPITAL EXPENDITURE BY SELECTED INDUSTRY AND TYPE OF ASSET SOUTH AUSTRALIA

	6 months to June 1997	1996-97	1997-98			
Selected industries and type of asset	\$m	\$m	\$m			
Mining	140	280	228			
Manufacturing	642	1 051	702			
Other	502	1 240	857			
Total expenditure	1 284	2 571	1 787			
Buildings etc.	302	596	511			
Equipment etc.	982	1 975	1 276			

Once actual expenditure for a financial year is known, it is useful to investigate the relationship between previous expectations and the expenditure that was actually incurred. The resultant realisation ratios (subsequent actual expenditure divided by expected expenditure) then indicates how much expenditure was actually incurred against the amount expected to be incurred at various times of reporting.

Realisation ratios provide an important tool in understanding and interpreting statistics for future periods. The application of realisation ratios enables the adjustment of expectation data for known under (or over) realisation patterns in the past and hence provides a valid basis for comparison with other expectation data and actual expenditure estimates.

The following table shows the average realisation ratios over the past 4 years for both the composite estimate (6 months actual and 6 months expected) and the twelve month expectation from the December quarter surveys.

RATIOS OF ACTUAL PRIVATE NEW CAPITAL EXPENDITURE TO EXPECTED PRIVATE NEW CAPITAL EXPENDITURE BY SELECTED INDUSTRY AND TYPE OF ASSET - 4 YEAR AVERAGES SOUTH AUSTRALIA

Selected industries		
and type of asset	Composite estimate	12 month expectation
Mining	0.88	1.18
Manufacturing	0.97	1.06
Other	0.98	1.58
Total expenditure	0.96	1.25
Buildings etc.	0.96	1.53
Equipment etc.	0.96	1.19

ABS PUBLICATIONS AND PRODUCTS

Statistics collected by the ABS are generally made available in published form. Some, including those not published, are available in one or more of the following forms: microfiche, magnetic tape, computer printout, CD, floppy disk, photocopy and clerically extracted tabulation.

Current publications produced by the ABS are listed in the Catalogue of Publications and Products, Australia (1101.0). The ABS also issues on Tuesdays and Fridays a Release Advice (1105.0) which lists publications to be released within the next few days. The Catalogue and Release Advice are available from any ABS Office.

To receive ABS publications on a regular basis contact the ABS *Publication Mailing Service* on 1800 02 0608.

A large range of data is available via on-line services, diskette, magnetic tape, tape cartridge and CD ROM. For more details about our electronic data services, contact any ABS Office.

The ABS Information Consultancy Service has specialist staff to assist and advise clients

with their statistical inquiries. For more detailed information about these services call at the ABS, 55 Currie Street, Adelaide, telephone the Information Officer on (08) 8237 7100, or write to Information Service, ABS, GPO Box 2272, Adelaide SA 5001.

The ABS also provides a *Statistical Consultancy Service*, for expert assistance in survey, sample and questionnaire design, data collection, processing and analysis, and statistical modelling. For more information contact Gary Niedorfer, on (08) 8237 7379.

SYMBOLS AND OTHER USAGES

n.a. not available

n.y.a. not yet available

.. not applicable

0, 0.0 nil or rounded to zero

Where figures have been rounded, discrepancies may occur between sums of the component items and totals.

For more information . . .

The ABS publishes a wide range of statistics and other information on Australia's economic and social conditions. Details of what is available in various publications and other products can be found in the ABS Catalogue of Publications and Products available from all ABS Offices.

ABS Products and Services

Many standard products are available from ABS bookshops located in each State and Territory. In addition to these products, information tailored to the needs of clients can be obtained on a wide range of media by contacting your nearest ABS Office. The ABS also provides a Subscription Service for standard products and some tailored information services.

National Dial-a-Statistic Line

0055 86 400

Steadycom P/L: premium rate 25c/20 secs.

This number gives 24-hour access, 365 days a year, for a range of important economic statistics including the CPI.

Internet

http://www.abs.gov.au

A wide range of ABS information is available via the Internet, with basic statistics available for each State, Territory and Australia. We also have Key National Indicators, ABS product release details and other information of general interest.
