Introduction

Statistics of the characteristics of the population and of dwellings as compiled from Householder's Schedules of the Census of 30 June 1966 are being issued progressively in mimeographed bulletins for each State and Territory.

Each bulletin will be allotted a two-figure code (e.g. 5.2). The first digit identifies the State and Territory concerned and follows the order used in Bureau publications, namely:

- 1 - New South Wales;
- 2 - Victoria;
- 3 - Queensland;
- 4 - South Australia;
- 5 - Western Australia;
- 6 - Tasmania;
- 7 - Northern Territory;
- 8 - Australian Capital Territory; and
- 9 - Australia.

The second digit identifies the content of the bulletin, as follows:

- 1. Summary of population;
- 2. Summary of dwellings;
- 3. Ages of the population according to marital status;
- 4. Ages of the population according to industry;
- 5. Birthplaces of the overseas born population according to nationality;
- 6. Occupational status of the population according to industry;
- 7. Occupational status of the population according to age and marital status;
- 8. Population and dwellings in local government areas.

A list of the 1966 Census bulletins so far issued is contained on page 17.

Additional publications containing further cross-classifications and more detailed geographical data will be issued for Australia as a whole.

All tables in this bulletin exclude particulars of full-blood Aborigines and dwellings occupied solely by them. A publication containing details of the Aboriginal population was issued on 16 April 1969.

Persons having diplomatic immunity (diplomatic and home-based staff of diplomatic missions, and their families) are not included. Dwellings occupied by persons having diplomatic immunity have also been excluded.

Although careful efforts are made to keep errors in the Census to a minimum, the large and complex task of processing Census data invariably results in minor discrepancies between the Census results produced at different stages of the Census programme. Because of the complexity of processing, and the fact that tabulations are produced progressively, it is frequently not practicable to rectify such small discrepancies. Consequently, some differences will be evident between tables included in a particular Census publication, as well as between a particular Census publication and previous publications. In all such cases the differences are small (generally no more than .02%) and in no way affect the general validity of the Census results.

Any discrepancies in the addition of percentages to totals within tables in this bulletin are due to rounding.

Section 2. Geographical Distribution

New criteria were adopted at the 1966 Census for the delimitation of urban centres, a full description of which is contained in Field Count Statement No. 4. In this bulletin, totals for each section of State only are published, namely:

- (a) Metropolitan Areas - These areas are the "urban centres" of each of the six State capital cities and of Canberra in the Australian Capital Territory. Briefly, "urban" includes all that area with a population density of 500 or more persons per square mile, together with some other areas (e.g. industrial areas) classified as "urban" on other grounds. The urban boundary is a moving boundary, which from Census to Census, as urbanisation proceeds, will move outwards to encompass peripheral development. Statistics for this area are comparable with statistics for other urban centres which have been delimited according to the same criteria.
- (b) Other Urban - Includes all urban centres other than the Metropolitan Areas.
- (c) Rural - Includes all areas not included in (a) or (b) above.

Section 3. Definitions

At the 1966 Census the following definitions were used as a basis for the Census of Dwellings.

- (a) An "occupied dwelling" is any habitation occupied by a "household group" and may comprise the whole or only a part of a building.
- (b) A "household group" is a person or group of persons living as a domestic unit with common eating arrangements.

The number of "occupied dwellings" and the number of "households" are therefore identical by definition.

The lack of a structural definition of a dwelling is not considered a significant disadvantage in Australia as the majority of households do in fact each occupy one distinct dwelling structure (i.e. a house or a self-contained flat).

Section 4. Class of Dwelling

Details of the numbers of each class of dwelling have been obtained from householders' statements made in accordance with the following instructions.

"State below whether the dwelling is a -

- Private house (including semi-detached and terrace house).
- Share of private house.
- Self-contained flat (including home unit).
- Share of a flat.
- Room(s), apartment or flat (not self-contained).
- Shed, hut, caravan, tent, boat, etc.
- Licensed hotel, motel, hostel, boarding house, institution, barracks, staff quarters, etc.

Where a private house or flat is shared without structural subdivision by two or more household groups each householder should fill in a separate Householder's Schedule.

"Self-contained" means able to be completely closed off and with own cooking and bathing facilities."

Dwellings are classified as follows:

Private dwellings -

Private house
 Share of private house
 Self-contained flat
 Share of self-contained flat
 Shed, hut, tent, caravan, etc.
 "Other" private dwellings

Non-private dwellings -

These include -

licensed hotels
 motels
 boarding houses
 educational institutions
 religious institutions
 charitable institutions
 hospitals
 staff barracks
 etc.

Where the class of dwelling was "not stated" a class was allocated prior to tabulation on the basis of other information in the Census Schedule or answers given for neighbouring dwellings.

Persons not enumerated in dwellings

Persons who on Census night were camping out, travelling on board ships in Australian waters, or ships which had left an Australian port prior to Census night with a next port of call in Australia or were enumerated on long-distance trains, motor coaches or aircraft are not regarded as living in a dwelling for Census purposes. Persons classified as "camping out" include those living temporarily (e.g. on holidays) in tents, caravans or houseboats, or who were "camped out" on Census night. If a tent, caravan or houseboat constituted a semi-permanent dwelling it was classified as a dwelling and is included in Table 1 of this bulletin.

(a) Represents 333 private houses in the Perth Metropolitan area, 40 in other urban areas and 40 in rural areas. (b) At the 1961 Census share of self-contained flat was not separately identified. In cases where more than one household group were occupying a self-contained flat they were counted as one household group occupying a self-contained flat. (c) Represents 6 self-contained flats in the Perth Metropolitan area, 1 in other urban areas and 1 in rural areas. (d) Details of the number of each of the types of non-private dwellings referred to on Page 4 are available on request. (e) See section 11. Minus sign (-) denotes decrease.

(a) It has not been found possible to provide all 1961 Census dwelling statistics on a basis comparable with that adopted for 1966.

5. Material of Outer Walls

At the 1966 Census each householder was asked to state the material of which the outer walls of the dwelling was built in accordance with the following instructions.

"Material of which Outer Walls are Built. State below whether brick, brick veneer, fibro-cement, wood, stone, concrete, iron, or other material (please specify). If more than one material state the one most largely used."

At the 1961 Census, dwellings with walls of brick veneer were not separately identified and for tabulation purposes were included with brick walled dwellings. However, in view of the increased use of brick veneer in the construction of dwellings, separate details are shown for the 1966 Census.

In the small number of cases where material of outer walls was not stated a material was selected during processing of the 1966 Census Schedules. Selection was based upon the answer given for the geographically nearest dwelling of the same class as the dwelling for which material of outer walls was not stated.

(a) So described in individual Census Schedules.

(b) See Section 5 above.

(c) See note (b) to Table 1.

6. Number of Rooms

At the 1966 Census each householder was asked to state the number of rooms in the dwelling in accordance with the following instructions.

"State below the number of rooms in this dwelling. Count all rooms (including permanently enclosed sleep-out) except bathroom, toilet, pantry, laundry or storeroom.

Note: Rooms in non-attached buildings should be included only if used for living or sleeping purposes by members of this household. A combined living-dining room or combined kitchen-living or kitchen-dining room should be counted as one room.

A shared kitchen or shared living room in a shared house should be included only by the owner or principal tenant."

The specific instructions relating to non-attached buildings were included at the 1961 Census but those relating to combined-usage rooms were introduced at the 1966 Census.

Where the number of rooms in a dwelling was not stated a number was allocated prior to tabulation, on the basis of the answer given for the geographically nearest dwelling of the same class except in the case of sheds, huts, tents, garages, caravans and houseboats where allocation was made by the use of a series of random numbers. The random numbers, which ranged from 1 to 8 rooms, were based upon the distribution of the number of rooms recorded in these types of dwellings at the 1961 Census.

The number of cases for which number of rooms was not stated is relatively small.

7. Number of Inmates

The number of inmates of a dwelling relates to the number of persons actually enumerated in that dwelling (i.e. the number of persons who spent the night of Thursday 30 June 1966, in the dwelling) and does not include persons who normally reside at that dwelling but spent Census night elsewhere.

8. Nature of Occupancy

At the 1966 Census each householder in Western Australia was asked to state the nature of occupancy of the dwelling according to the following instructions.

"Indicate the basis on which the dwelling is occupied (mark with a cross in the appropriate box) -

Owner (including persons buying or paying off the dwelling)

Tenant or Subtenant

Of the State Housing Commission of Western Australia

Of other Landlord

Caretaker

Other (please specify)"

At the 1961 Census persons paying interest only on a mortgage on the dwelling were instructed to enter "owner" but a person buying a house by regular payments including interest and principal was instructed to enter "purchaser by instalment". Despite these specific instructions it is probable that some "purchasers by instalment" described themselves on 1961 Census Schedules as "owners" especially in cases where they possessed the title to the property. However the extent of such mis-statements has not been measured. At the 1966 Census, as the two categories can be logically grouped, separate details for "owners" and "purchasers by instalment" were not collected.

9. Facilities

At the 1966 Census each householder was asked to state the facilities installed in the dwelling according to the following instructions.

"State "Yes" or "No" whether the dwelling has the following facilities

- | | |
|--------------------------|---------------------------|
| (a) Gas | (i) Mains |
| | (ii) Bottled |
| (b) Electricity | (i) Mains |
| | (ii) Home generated |
| (c) Television Set | |
| (d) Kitchen* | |
| (e) Bathroom* | |

* If shared with another household add "S".

Data relating to kitchens and bathrooms was sought for office use only and has not been tabulated.

At the 1961 Census there was no specific provision on the Schedule for householders with a power supply other than mains (i.e. home generated electricity or bottled gas); it was anticipated that such dwellings would be included in either the gas or electricity category by householders. However, it is possible that at the 1961 Census a number of householders, whose dwellings had a non-mains source of power refrained from stating the facilities of their dwellings. The instructions were revised at the 1966 Census and provision was made for the specific inclusion of dwellings with a non-mains power supply.

NOTE. Dwellings for which electricity was not stated but which had television have been classified as having electricity and therefore included as such in this table.

At the 1966 Census each householder was asked to state the number of motor vehicles at the dwelling in accordance with the following instructions.

"State below the number of Motor Vehicles (excluding Motor Cycles and Scooters) used by members of this household that were garaged or parked at or near this dwelling for the night of Thursday, 30 June. If no motor vehicles, write "NIL."

Information relating to number of motor vehicles was not sought at the 1961 Census.

Details of the number of motor vehicles were obtained only for private dwellings.

11. Unoccupied Dwellings

For dwellings not occupied on the night of the Census, collectors were required to determine as many particulars as possible and to enter on the Schedule the reason why the dwelling was unoccupied.

Unoccupied dwellings include vacant dwellings available for sale or renting; dwellings such as weekenders or holiday homes and seasonal workers' quarters which were not occupied on Census night; dwellings normally occupied but whose occupants were temporarily absent on the night of the Census; newly completed dwellings whose owners or tenants had not entered into occupation on Census night; dwellings described as "to be demolished", "condemned", "exhibition home", etc; and buildings constructed as dwellings but used for non-dwelling purposes on the night of the Census. The total number of unoccupied dwellings does not, therefore, represent the number of vacant houses and flats available for sale or renting.

TOTAL UNOCCUPIED DWELLINGS	13,705	4,722	4,668	8,575	17,965

(a) The inter-censal increase in unoccupied other private and non-private dwellings is mainly the result of a better coverage at the 1966 Census of dwellings occupied for only a short period of time each year, such as shearers' huts, seasonal workers' quarters, etc.
