FINAL ISSUE

# BALANCE OF PAYMENTS, AUSTRALIA, DECEMBER 1996

#### MAIN FEATURES

Estimates of the main balance of payments aggregates for December 1996 and the two preceding months are shown below. These estimates are preliminary and subject to revision. Particular care should be taken in interpreting monthly movements, as indicated in the note on page 7 on Reliability of Contemporary Trend Estimates and in paragraph 4 of the Explanatory Notes on page 15. Certain items have been estimated using extrapolation techniques until source data become available.

		1996		Change on
	October	November	December	previous month(a)
		S million		%
			Trend	
Balance on current account	-1,603p	-1,652p	-1,714p	-4

Balance on current account	-1,674	-1,893	-1,408	26
Balance on merchandise trade	15	-384	37	
Net services	-40	14	75	
Net income	-1,760	-1,655	-1,618	$\hat{2}$
Net unrequited transfers	111	132	98	-26
		Not season	nally adjusted	
Balance on current account	-2,346	-1,777	-876	51
Balance on merchandise trade	-537	-329	414	
Net services	-95	92	152	65
Net income	-1,858	-1,670	-1,545	7
Net unrequited transfers	144	130	103	-21

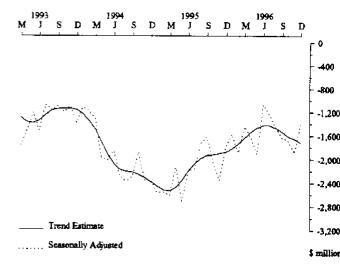

<sup>(</sup>a) For current account aggregates, a minus sign means an increase in a deficit or a decrease in a surplus; and an absence of sign means a decrease in a deficit or an increase in a surplus.

The **provisional trend estimate** for the December current account deficit was \$1,714 million, up \$62 million, or 4 per cent, on the provisional trend estimate for November. This is the fifth consecutive increase in this trend estimate.

The provisional trend estimate of the balance on goods and services recorded a deficit of \$135 million, up \$68 million on the trend estimate for November. The trend estimate of the balance on merchandise trade recorded a deficit of \$141 million, up \$62 million on the deficit recorded in November. Merchandise exports fell slightly, while merchandise imports rose 1 per cent.

In seasonally adjusted terms, the current account deficit for December decreased \$485 million to \$1,408 million. The decrease in the deficit was caused by a turnaround of \$421 million, from a deficit to a surplus, in the balance on merchandise trade (merchandise exports rose 8 per cent, while merchandise imports rose 1 per cent); an increase of \$61 million in the net services surplus; and a decrease of \$37 million in the net income deficit. These movements were partly offset by a decrease of \$34 million in the net unrequited transfers surplus.

**INQUIRIES** 

- for further information about these and related unpublished statistics, contact Wendy Raedt on Canberra (06) 252 6689 or Patricia Mahony on Canberra (06) 252 5540 or any ABS State office.
- for information about other ABS statistics and services please refer to the back page of this publication.

# ANALYSIS OF SELECTED MAJOR AGGREGATES

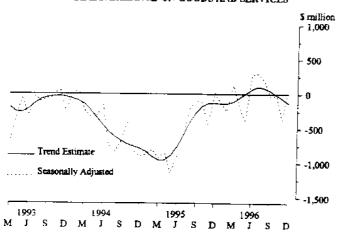

## December 1996 compared with November 1996

#### Balance on goods and services

The provisional trend estimate of the balance on goods and services recorded a deficit of \$135 million in December, an increase of \$68 million on the deficit recorded in November.

In seasonally adjusted terms, this balance recorded a surplus of \$112 million, a turnaround of \$482 million on the deficit recorded in November.

#### GRAPH 2: BALANCE ON GOODS AND SERVICES

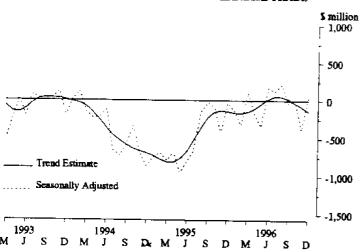

#### Balance on merchandise trade

The provisional trend estimate of the balance on merchandise trade recorded a deficit of \$141 million, an increase of \$62 million on the deficit recorded in November.

In seasonally adjusted terms, this balance recorded a surplus of \$37 million, a turnaround of \$421 million on the deficit recorded in November.

#### **GRAPH 3: BALANCE ON MERCHANDISE TRADE**

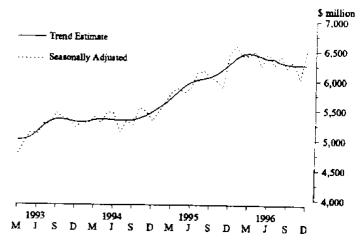

### Merchandise exports

The provisional trend estimate of merchandise exports was virtually unchanged at \$6,263 million.

In seasonally adjusted terms, exports rose \$473 million, or 8 per cent, to \$6,490 million. Rural exports rose \$125 million, or 7 per cent, to \$1,841 million. Non-rural exports rose \$348 million, or 8 per cent, to \$4,649 million.

### **GRAPH 4: MERCHANDISE - EXPORTS FOB**

In original terms, exports rose \$351 million, or 6 per cent, to \$6,663 million.

Rural exports, in original terms, rose \$130 million, or 7 per cent, to \$1,924 million. The largest increase was recorded in cereals, up \$224 million or 64 per cent (due mainly to increased volumes of wheat exports). The largest decreases were recorded in sugar, down \$51 million or 34 per cent (due mainly to decreased volumes of cane sugar exports); and meat, down \$40 million or 14 per cent (due mainly to decreased exports of beef and veal).

Non-rural exports, in original terms, rose \$221 million, or 5 per cent, to \$4,739 million. The largest increases were recorded in:

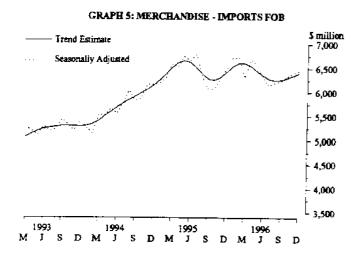

- metal ores and minerals, up \$92 million or 13 per cent (due mainly to increased volumes of alumina and iron ore exports;
- gold, up \$62 million or 17 per cent (due mainly to increased volumes of exports);
- transport equipment, up \$41 million or 14 per cent (due mainly to increased exports of "other" transport equipment);
- "other" mineral fuels, up \$35 million or 8 per cent (due mainly to increased exports of gas); and
- machinery, up \$31 million or 5 per cent.

The largest decreases were recorded in "other" manufactures, down \$31 million or 4 per cent; and "other" metals, down \$19 million or 4 per cent (due mainly to decreased exports of aluminium).

#### Merchandise imports

The provisional **trend** estimate of *merchandise imports* rose \$58 million, or 1 per cent, to \$6,404 million.

In seasonally adjusted terms, merchandise imports for December rose \$52 million, or 1 per cent, to \$6,453 million. Consumption goods rose \$26 million, or 1 per cent, to \$1,766 million. Capital goods fell \$93 million, or 6 per cent, to \$1,393 million. Intermediate and other goods rose \$119 million, or 4 per cent, to \$3,294 million.

In original terms, imports fell \$392 million, or 6 per cent, to \$6,249 million.

Imports of consumption goods, in original terms, fell \$152 million, or 8 per cent, to \$1,732 million. The largest decreases were recorded in:

- consumption goods nes, down \$121 million or 22 per cent (with all components recording decreases);
- household electrical items, down \$64 million or 31 per cent (with all components recording decreases); and
- toys, books and leisure goods, down \$50 million or 21 per cent.

The largest increase was recorded by non-industrial transport equipment, up \$87 million or 21 per cent (due mainly to increased imports of passenger motor cars).

Imports of capital goods, in original terms, fell \$81 million, or 5 per cent, to \$1,493 million. The largest decreases were recorded in:

- civil aircraft, down \$75 million or 60 per cent; and
- telecommunications equipment, down \$23 million or 14 per cent.

The largest increase was recorded in machinery and industrial equipment, up \$25 million or 4 per cent (with most components recording increases).

Imports of intermediate and other goods, in original terms, fell \$159 million, or 5 per cent, to \$3,024 million. Decreases were recorded in 12 of the 14 groups, with the largest being:

- "other" parts for capital goods, down \$55 million or 10 per cent;
- processed industrial supplies nes, down \$46 million or 6 per cent;
- iron and steel, down \$43 million or 36 per cent; and
- parts for transport equipment, down \$37 million or 10 per cent.

The largest increase was recorded in fuels and lubricants, up \$85 million or 20 per cent (due mainly to increased imports of crude petroleum).

#### Net services

The seasonally adjusted net services balance recorded a surplus of \$75 million, an increase of \$61 million on the surplus recorded in November. Services credits rose \$62 million (3 per cent), while services debits rose \$1 million.

#### Net income

The seasonally adjusted net income deficit fell \$37 million, or 2 per cent, to \$1,618 million. Income credits fell \$34 million or 5 per cent, while income debits fell \$71 million or 3 per cent. It should be noted that the monthly estimates of the non-official sector for October through December 1996 are based largely on extrapolations of quarterly results divided by three. These extrapolations will be replaced by preliminary results from the ABS Survey of International Investment when these results become available.

#### Net unrequited transfers

The seasonally adjusted net unrequited transfers surplus fell \$34 million, or 26 per cent, to \$98 million. Unrequited transfers credits rose \$54 million, or 18 per cent. Unrequited transfers debits rose \$88 million, or 51 per cent.

## Net capital transactions

In original terms, general government borrowing domiciled abroad recorded a net inflow of \$309 million in December, a turnaround of \$508 million on the net outflow recorded in November. This was mainly due to a \$543 million turnaround, from a net repayment to a net borrowing of \$404 million, in State government borrowings. Partly offsetting this movement was a \$36 million increase in repayments of Commonwealth government borrowings.

Reserve Bank transactions in December recorded a net outflow of \$1,515 million, an increase of \$1,444 million on the net outflow recorded in November. Transactions in December mainly reflected net purchases of reserve assets of \$1,518 million, an increase of \$1,427 million on the net purchases recorded in the previous month.

#### Exchange rates

Using period average exchange rates, the \$A appreciated by 1.0 per cent on a trade weighted basis during December against the currencies of Australia's major trading partners. The \$A appreciated by 1.6 per cent against the Japanese yen and appreciated by 0.2 per cent against the \$US.

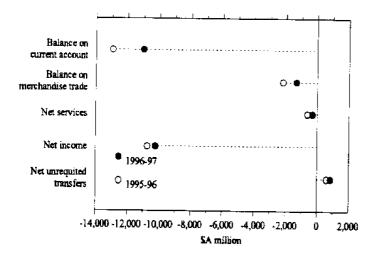

# Six months ended December 1996 compared with six months ended December 1995

In **original terms**, the *current account* deficit for the six months ended December 1996 was \$11,003 million, down \$1,953 million, or 15 per cent, on the deficit for the six months ended December 1995.

#### This result reflected:

- a decrease of \$842 million (39 per cent) in the merchandise trade deficit;
- a decrease of \$320 million (51 per cent) in the net services deficit;
- a decrease of \$537 million (5 per cent) in the net income deficit; and
- an increase of \$254 million (42 per cent) in the net unrequited transfers surplus.

# GRAPH 6: BALANCE OF PAYMENTS AGGREGATES - SIX MONTHS ENDED DECEMBER

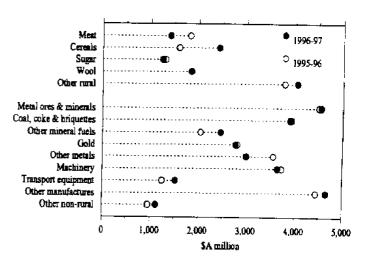

Merchandise exports rose \$1,055 million, or 3 per cent, to \$38,607 million. Rural exports rose \$637 million (6 per cent); and non-rural exports rose \$418 million (2 per cent). The largest increases were recorded in:

- cereals, up \$835 million (53 per cent);
- "other" mineral fuels, up \$421 million (21 per cent);
- transport equipment, up \$283 million (23 per cent);
- "other" rural exports, up \$267 million (7 per cent);
   and
- "other" manufactures, up \$216 million (5 per cent).

The most significant decreases were recorded in "other" metals, down \$563 million (16 per cent); and meat, down \$410 million (23 per cent).

GRAPH 7: MERCHANDISE EXPORTS -SIX MONTHS ENDED DECEMBER

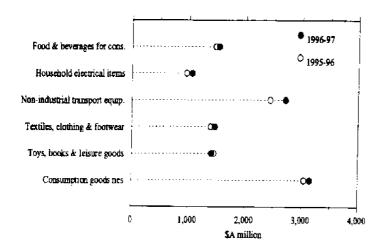

Merchandise imports rose \$213 million, or 1 per cent, to \$39,946 million. Consumption goods rose \$587 million (5 per cent); capital goods fell \$254 million (3 per cent); and intermediate and other goods fell \$120 million (1 per cent). The largest increases were recorded in:

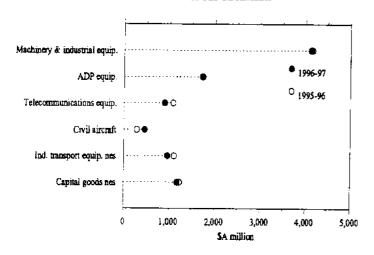

- fuels and lubricants, up \$537 million (28 per cent);
- non-industrial transport equipment, up \$275 million (11 per cent);
- civil aircraft, up \$181 million (64 per cent);
- consumption goods nes, up \$109 million (4 per cent); and
- household electrical items, up \$105 million (11 per cent).

The most significant decreases were recorded in telecommunications equipment, down \$185 million (17 per cent); paper and paperboard, down \$167 million (16 per cent); iron and steel, down \$151 million (20 per cent); industrial transport equipment nes, down \$148 million (13 per cent); plastics, down \$100 million (11 per cent); and parts for ADP equipment, down \$91 million (10 per cent).

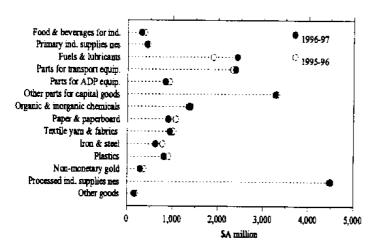

GRAPH 8: MERCHANDISE IMPORTS - CONSUMPTION GOODS SIX MONTHS ENDED DECEMBER

GRAPH 9: MERCHANDISE IMPORTS - CAPITAL GOODS SIX MONTHS ENDED DECEMBER

GRAPH 10: MERCHANDISE IMPORTS - INTERMEDIATE AND OTHER GOODS SIX MONTHS ENDED DECEMBER

The net services deficit fell \$320 million, or 51 per cent, to \$309 million. Services credits rose \$788 million, or 7 per cent, due mainly to increases of \$736 million in travel credits and \$264 million in "other" services credits. Services debits rose \$468 million, or 4 per cent, due mainly to increases of \$362 million in travel debits and \$160 million in "other" services debits.

The *net income* deficit fell \$537 million, or 5 per cent, to \$10,214 million. Income credits rose \$197 million, or 5 per cent, due mainly to an increase in dividends receivable. Income debits fell \$340 million, or 2 per cent, largely reflecting a decrease in reinvested earnings.

The net unrequited transfers surplus rose \$254 million, or 42 per cent, to \$859 million. Unrequited transfers credits rose \$134 million, or 7 per cent, due mainly to an increase in migrants' transfers. Unrequited transfers debits fell \$120 million or 9 per cent.

General government borrowing domiciled abroad for the six months ended December 1996 yielded a net outflow of \$497 million, compared with a net inflow of \$1,149 million for the corresponding period of the previous financial year. The estimate for the latest period consisted of:

- a net outflow of \$584 million in Commonwealth government borrowing domiciled abroad, a decrease of \$25 million on the net outflow for the six months to December 1995; and
- a net inflow of \$87 million in State government borrowing domiciled abroad, a decrease of \$1,672 million on the net inflow for the six months to December 1995.

Reserve Bank transactions recorded a net outflow of \$3,241 million, an increase of \$2,281 million on the net outflow recorded for the six months to December 1995. An increase in net purchases of official reserve assets was the main factor underlying the movement.

#### REVISIONS

Revisions since the last issue of this publication have increased the current account deficit for 1995-96 by \$11 million and decreased the current account deficit for the first five months of this financial year by \$249 million.

The major factors contributing to these revisions are:

- incorporation of the latest available data on merchandise imports and exports. Merchandise trade was the sole contributor to the revisions to the current account deficit for 1995-96;
- incorporation of the latest available information from the Survey of International Trade in Services which has affected services debits:

- incorporation of the latest available information on overseas arrivals and departures which has affected credits and debits for services, labour income credits and unrequited transfers; and
- incorporation of the latest available information from the Survey of International Investment and changes to associated income extrapolations, which has reduced the deficit by \$304 million for the first five months of 1996-97.

Revisions have also been made to the seasonally adjusted current account deficit for all months from October 1991 to take account of revised seasonal factors for one component of official investment income debits, i.e., interest payable on official borrowing domiciled in Australia. The adjustment process previously applied to this series took account of the quarterly seasonal pattern reflected in the series but did not adjust for the significant seasonal movements between months within a quarter.

Revisions to the capital account estimates for the first four months of this financial year are due to the incorporation of the latest available information from the Survey of International Investment.

#### Note: monthly borrowing data not available

As noted in the previous issue, difficulties are still being experienced with the quality of the monthly information provided to the ABS in regard to non-resident holdings of general government securites domiciled in Australia. Monthly data for the net capital transactions of general government borrowing domiciled in Australia continue not to be available from October 1996. This affects the availability of the separately identified series for these transactions in Table 6, together with the aggregates in Table 1 and/or Table 6 for total

general government borrowing, total general government capital transactions, and total official sector capital transactions. As a consequence, the total for non-official capital transactions plus balancing item (derived as the residual of the current account balance and official sector capital transactions) can no longer be derived.

Quarterly series for the net capital transactions of general government borrowing domiciled in Australia are expected to continue to be available.

#### SEASONAL REANALYSIS

The monthly goods and services series, in original terms, have been reanalysed to take account of additional information that has become available since the previous seasonal reanalysis, undertaken at the beginning of 1996. The resulting new factors for merchandise imports will be introduced in the final (January 1997) issue of Merchandise Imports (Balance of Payments Basis), Australia (ABS Cat no. 5320.0), due to be released on 19 February 1997. The new factors for all goods and services will be used to compile the first (January 1997) issue of the new ABS monthly publication International Trade in Goods and Services, Australia (ABS Cat no. 5368.0) which is expected to be released on 3 March 1997.

The seasonal factors for 1997 are expected to be available on 10 February 1997. Regular subscribers to these factors will be contacted before then to confirm their requirements. Other users can obtain the factors, for \$75.00, by contacting Melissa Hunt on Canberra (06) 252 6224.

# Final issue of this publication

This is the final issue of this publication. The Australian Statistician has announced the discontinuation of both this publication and *Merchandise Imports (Balance of Payments Basis)*, Australia (ABS Cat no. 5320.0), and their replacement with two new monthly publications titled *International Trade in Goods and Services*, Australia (ABS Cat no. 5368.0) and *International Merchandise Imports*, Australia (ABS Cat no. 5439.0), together with other more timely detailed international merchandise imports series. The announcement was made with the issue today of the ABS publication *Information Paper: The Future of Monthly Balance of Payments Statistics* (ABS Cat no. 5367.0). That Information Paper is being issued on a complimentary basis with this final issue of 5301.0 and the final (January 1997) issue of 5320.0. Readers wishing to receive a copy of the Information Paper, should contact Wendy Raedt on Canberra (06) 252 6689.

The Information Paper also details the replacement services being introduced and the associated subscription arrangements, and the future availability of draft publication mock-ups for the new publications.

# RELIABILITY OF CONTEMPORARY TREND ESTIMATES

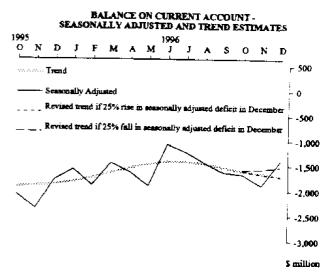

The table below presents trend estimates of the deficit on current account from October 1995 onwards, including provisional trend estimates for the latest three months (October, November and December 1996).

To illustrate the provisional nature of the most recent trend estimates, the table also shows the revisions to these trend estimates that could result were a seasonally adjusted current account estimate to be produced for the month of January 1997. The table shows the results of a January 1997 estimate that was 25 per cent higher or lower than the estimate for December 1996. The 25 per cent range has been chosen because in the last decade the average monthly percentage movement, without regard to sign, of the seasonally adjusted current account deficit has been about 25 per cent.

If a seasonally adjusted estimate of the current account balance were to be made for January 1997 and it recorded a deficit of \$1,760 million, that is, 25 per cent higher than recorded in December, then the provisional trend movement for that month would be 0.5 per cent. The movements in the trend estimates for October, November and December which are provisionally 4.5 per cent, 3.1 per cent and 3.8 per cent respectively, would be revised to 5.2 per cent, 3.8 per cent and 2.7 per cent, respectively. On the other hand, were a seasonally adjusted deficit to be estimated next month and it showed a decline of 25 per cent to \$1,056 million, that would

produce a movement of -6.1 per cent in the trend for January, with the movements in the trend estimates for October, November and December being revised to 2.3 per cent, -0.7 per cent and -3.1 per cent, respectively.

The graph below illustrates this potential degree of revision at the current end of the trend series. Please note, however, that this is the final issue of this publication and the series will not be revised. See the announcement on page 6 of this issue for details.

(a) The entries carry the opposite sign to corresponding entries in Tables I and 6. (b) These exchange rates and the trade-weighted index are derived using rates provided by the Reserve Bank of Australia in respect of each trading day. (c) These exchange rates and index numbers are derived by averaging figures for each trading day.

#### EXPLANATORY NOTES

#### Introduction

- I. This publication contains preliminary estimates of Australia's balance of payments for December 1996, together with revised estimates for previous months. More comprehensive quarterly estimates are available in the September quarter 1996 issue of the quarterly balance of payments publication (5302.0) which was released on 10 December 1996.
- 2. Descriptions of the underlying concepts and structure of the balance of payments and the sources and methods used in compiling the estimates are presented in *Balance of Payments*, Australia: Concepts, Sources and Methods (5331.0). The publication also provides item definitions and explanations of seasonal adjustment and trend estimates. Updated, but less detailed, reference material is provided in the 1996 edition of Balance of Payments, Australia: Summary of Concepts, Sources and Methods (5351.0).

Accuracy, reliability and volatility

- Care should be exercised in the use and interpretation of estimates in this publication. The sources available for the production of timely and reliable monthly estimates are limited and the initial estimates are made available very quickly. Consequently, the latest estimates in this publication, to a greater extent than estimates in quarterly and annual balance of payments publications, are preliminary and subject to revision as more complete and accurate information becomes available. Certain items are estimated using extrapolation techniques until source data become available. Further, the more detailed estimates may be less accurate in relative terms than broader items and aggregates of which they form components. A detailed assessment of the quality of Australia's balance of payments statistics is provided in the information paper Quality of Australian Balance of Payments Statistics, 1996 (5342.0) released on 20 February 1996.
- 4. Particular care should be exercised in interpreting month-to-month movements in original and seasonally adjusted series as short term movements cannot be assumed to indicate changes in trend. The monthly estimates are volatile, being subject to seasonal factors (except where adjusted in Table 2) and large irregular influences. The irregular influences may reflect both random economic events and difficulties of statistical recording. Seasonal adjustment does not aim to remove the irregular or non-seasonal influences which may be present in any particular month. This means that the month-to-month movements of the seasonally adjusted estimates may not be reliable indicators of trend behaviour. For example, irregular factors unrelated to the trend account for more than half the seasonally adjusted monthly movements with the following frequency:

Balance on current account: 9 in 10 months Merchandise exports fob: 8 in 10 months Merchandise imports fob: 9 in 10 months 5. The impact of the irregular influences upon the seasonally adjusted series is reduced by smoothing, as shown by the trend estimates in Table 2 and the graphs. The trend estimates are generally derived by applying a 13-term Henderson-weighted moving average to the seasonally adjusted series.

#### Seasonal adjustment

- 6. The **seasonally adjusted** statistics in this publication should not be regarded as in any way definitive as results from seasonal adjustment vary according to the method used.
- 7. For details regarding the annual seasonal reanalysis of monthly balance of payments series see page 6 of this issue.

#### Available longer term series

8. Estimates for months prior to those shown in this publication are available and can be obtained by contacting Trevor Jolly on Canberra (06) 252 6820. There may be a charge for this information.

#### Related products and services

9. More detailed merchandise exports and merchandise imports data, including dissections by commodity and country of origin, are also available on an international merchandise trade basis for December 1996 and previous months. These data can be obtained by contacting information services on Canberra (06) 252 5400.
