PREFACE

Final results from the 1971 Census of Population and Housing are being released in a series of 14 bulletins covering single and cross-classified characteristics of population and dwellings.

It should be recognised that in processing census data for 13 million persons and 4.5 million households there are innumerable possibilities for error. As in other areas of statistics, much of the effort of statisticians is directed to devising procedures which prevent most errors from occurring or which detect and eliminate those which do occur. Despite such efforts, it is impracticable to eliminate every inaccuracy but special steps such as editing and quality control procedures are taken to measure and control the level of such inaccuracy. Thus while some minor errors and discrepancies may be evident in the final results, it is unlikely that they would have any practical significance in the interpretation of the Census data.

A large number of tabulations are being produced for the 1971 Census which, because of their size and complexity, will not be published. In some cases, classifications of characteristics will be available at a finer level than those published in the Bulletins. A complete list of the tabulations produced (published and unpublished) and the levels of classification available will be published in the Catalogue of 1971 Census Tabulations (Bulletin 14). For information on the more detailed classifications and the availability of unpublished tabulations please contact the office of the Bureau of Census and Statistics in each State capital city or in Canberra.

As an illustration of the colour code system, all 'Summary of Dwellings' bulletins have light brown covers with a horizontal band varying in colour according to the State.

Coverage

In conformity with the 1967 repeal of Section 127 of the Constitution, 1971 Census statistics include Aborigines. In order to provide comparability between the 1971 and 1966 Censuses, tables showing 1966 data have been amended to include Aborigines or their dwellings and therefore differ from the 1966 tables previously published.

Persons with diplomatic immunity (diplomatic and home-based staff of diplomatic missions, and their families) are excluded from the Census. Dwellings occupied by persons with diplomatic immunity are also excluded.

NOTE. Any discrepancies between totals and sums of components in percentages in tables are due to rounding.

CONFIDENTIAL

Any Census Officer or other person disclosing any information obtained from a Census Form is liable to a penalty of \$100.

A FEW FACTS ABOUT THE CENSUS

At the Census everybody in Australia contributes to Australia's knowledge about itself

YOUR FORM IS ABSOLUTELY CONFIDENTIAL. The LAW prevents anyone but the Commonwealth Statistician and his officers from seeing your return. OTHER PERSONS OR GOVERNMENT DEPARTMENTS CANNOT see your return for any purpose whatsoever.

THE STATISTICS ARE ESSENTIAL TO PEOPLE WORKING ON SUCH NATIONAL PROBLEMS AS:

- HOUSING NEEDS
- BETTER LIVING STANDARDS
- EDUCATION (SCHOOLS, TEACHERS, ETC.)
- WELFARE OF THE AGED, WIDOWS, ABORIGINES, MIGRANTS, ETC.
- CITY GROWTH, TRAFFIC PROBLEMS, ROADS
- SEWERAGE, WATER AND POWER SUPPLY
- EMPLOYMENT, UNEMPLOYMENT, VOCATIONAL TRAINING
- DECENTRALISATION, RURAL DEPOPULATION, LOCATION OF INDUSTRY

MOST CENSUS INFORMATION CANNOT BE OBTAINED IN ANY OTHER WAY. The great value of the Census is that all the information about everybody is obtained at the one time. This means that it can be added together and cross-tabulated to give a very detailed statistical picture of AUSTRALIA at a single point in time. Without you the picture would be incomplete.

THE STATISTICS ARE AVAILABLE TO YOU. All the statistical tables which are compiled from the Census serve important Governmental purposes, but they are also available to private individuals, the business community and researchers.

EXPLANATORY NOTES

GENERAL

This bulletin shows the population and dwellings in local government areas (as constituted at 30 June 1971), urban centres and other bounded localities as enumerated at the Census of June 30, 1971.

In this bulletin, the term 'local government area' (L.G.A.) relates also to those areas of the City of Brisbane, the Northern Territory and the Australian Capital Territory which have been separately identified in the absence of, or in addition to, legally defined local government areas.

In Tables 2, 3, 4 and 5 in the States, code numbers appear alongside local government area names to aid cross referencing between the tables and as a reference to maps published by the Bureau showing local government area boundaries (Bulletin 13).

Detailed characteristics of the population and dwellings in local government areas are available in Bulletin 7, and are available on request for urban centres.

Definition of dwelling

An occupied dwelling is defined as any habitation occupied on Census night by a household and may comprise the whole or only a part of a building. A household is a person or group of persons living and eating together.

An unoccupied dwelling is defined as a structure built specifically for private living purposes and which is habitable, though unoccupied at the time of the Census.

Non-private dwellings are those dwellings which provide group-accommodation such as hotels, motels, hostels, and staff quarters, and institutions such as hospitals, nursing homes, prisons, boarding schools, etc., and which were occupied on Census night.

Campers out

Persons classified as 'campers out' comprise those living *temporarily* in tents, caravans or houseboats or who were camped out on Census night. Such persons are regarded as not living in dwellings for census purposes. In this bulletin however, due to a processing difficulty, a notional dwelling has been allocated to each person or group of persons camping out. These have been included in this bulletin with total non-private dwellings and amount to 2,383 in Australia as a whole, and account for the differences between the corresponding dwelling figures shown in Bulletin 7.

Note that tents, huts, caravans and houseboats used to provide *permanent* or *semi-permanent* accommodation are classified as dwellings.

Migratory

Persons who on Census night were on board ships in Australian ports or travelling between two Australian ports, or who were enumerated on long distance trains, buses or aircraft are classed as 'migratory' and excluded from the figures for individual geographical areas. They are, however, shown in aggregate under the category 'migratory', and are included in the State totals.

Urban centres and other bounded localities

A detailed description of the concepts and methods used in 1971 in defining urban centres is contained in the subsequent text. These methods were similar to those used at the 1966 Census, the main changes being:

- (a) The elimination of the 'indentation' provision. At the 1966 Census an indented area was included within the urban centre if the distance across the 'neck' was less than one mile;
- (b) A re-interpretation of the 'enclosure' rule. At the 1966 Census land was included within the urban centre if it was completely surrounded by the urban centre itself (or in part by the sea or a wide unbridged river). In 1971, if one part of this surround was the sea or a wide unbridged river this rule was not applied.

At the 1971 Census these concepts were used to determine the urban boundaries of all those centres expected to reach 25,000 population in 1971.

Around other urban centres and non-urban localities, boundaries were delineated, where possible, when the population was expected to reach at least 200 by 1971. For this purpose, the most recent available aerial photography was used in order to identify as closely as possible the periphery of the built up area.

Major urban

The term 'major urban' was introduced at the 1971 Census and denotes all urban centres with a population of 100,000 or more. The population and dwellings in all other urban centres below this size are included under 'other urban'. The balance of the State or Territory other than migratory (*see above*) is classified as rural.

1966 Census population and dwellings

There are both conceptual and practical difficulties in determining comparable population and dwelling totals for urban centres over time. Growth can be vertical within the original boundary or horizontal by spreading beyond the original boundary. In this publication attempts have been made to show the 1966 Census population and dwellings which reflect the combined horizontal and vertical growth.

CRITERIA FOR THE DELIMITATION OF URBAN BOUNDARIES

The criteria used for delimiting urban centres, as determined by the Thirty-First Conference of Statisticians, October 1969, were as follows.

At each Census of Population and Housing a boundary shall be defined in accordance with these Resolutions for each population cluster of 1,000 or more population (and, for known holiday resorts of less population, if they contain 250 or more dwellings of which at least 100 are occupied). These clusters shall be named 'urban centres' and the population and dwellings enumerated in them shall be classified as urban for statistical purposes.

Around each urban centre with a population of at least 100,000 a further boundary shall be defined, after consultation with planners, to contain the anticipated development of the urban centre and associated smaller urban centres for a period of at least twenty years. Such a boundary should delimit an area which is now, or is expected to be, socially and economically oriented towards the urban centre. It shall consist of complete local government areas if possible. This fixed boundary (as distinct from the urban boundary which is moving) will delimit an area which, for general statistical purposes, is free from the practical problems imposed by the moving boundary, but which nevertheless represents the city in a wider sense.

In delimiting urban centres with 25,000 or more population:

- (a) All contiguous Census Collector's Districts which have a population density of 500 or more persons per square mile (approximately 193 persons per square kilometre) shall be included. Consequently, State, Statistical Division, Local Government Area and other administrative boundaries shall be disregarded;
- (b) A Collector's District which is known to contain a high proportion of holiday homes shall be classified as urban if the dwelling density is 125 dwellings per square mile (approximately 48 dwellings per square kilometre) or greater;
- (c) A Collector's District consisting mainly of land used for factories, airports, small sports areas, cemeteries, hostels, institutions, prisons, military camps or certain research stations shall be classified as urban if contiguous with Collector's Districts which are themselves urban;

- (d) Any Collector's District which consists mainly of land used for large sporting areas, large parks, explosives handling and munitions areas, or holding yards associated with meatworks and abattoirs shall be classified as urban only if it is bordered on three sides by Collector's Districts which are themselves urban;
- (e) Any area which is completely surrounded by Collector's Districts which are urban must itself be classified as urban;
- (f) Where an urban centre of 25,000 or more population is separated from another urban centre by a gap in actual development of less than two miles (by the shortest rail or road distance), the gap shall be bridged by classifying a connecting Collector's District or Districts as urban, and therefore treating the urban centres as one; if the gap is two or more miles (and whether or not it is comprised mainly of reserved land or a natural barrier) the urban centres shall remain separate;
- (g) Any area included in an urban centre in 1971 or thereafter under the provisions of this Resolution shall continue to be so included unless the population of the urban centre falls below 25,000, in which case this Resolution will cease to apply;
- (h) Large peripheral Collector's Districts in growth areas shall be fragmented; and so far as the availability of visible boundary features allows, the fragments so created shall be as near square-shaped as possible and of such a size that they will contain a collector's workload when fully developed. For the purposes of delimiting urban centres such fragments shall be regarded as Collector's Districts.

In delimiting urban centres with less than 25,000 population:

- (a) The urban centres shall be delimited subjectively (by the inspection of aerial photographs, by field inspection and/or by consideration of any other information that is available);
- (b) All continuous urban growth is to be included (which, in small urban centres, would not necessarily occur if the density criterion were applied), together with any close but non-contiguous development which could be clearly regarded as part of the centre. However, cognisance shall be taken of Resolution 3, where appropriate, particularly in urban centres which are approaching a population of 25,000.

In selecting the boundaries for the splitting of Collector's Districts, cognisance shall be taken, where appropriate, of the boundaries of land-use zones:

- (a) For State capital cities, nomenclature for the area delimited by –
 - (i) the urban, and
 - (ii) the outer boundary
 shall be (using Melbourne as the example) –
 - (i) Urban Melbourne, and
 - (ii) Melbourne Statistical Division;
- (b) In other cases where the dual boundary concept is employed, the nomenclature shall be (using Newcastle as the example) –
 - (i) Urban Newcastle, and
 - (ii) Newcastle Statistical District;
- (c) In cases where only a single boundary is delineated, the nomenclature shall be (using Cairns as the example) Urban Cairns;
- (d) Where an urban centre is formed by the coalescence of two or more named localities, the urban centre shall be assigned a name agreed upon after consultation with the Deputy Commonwealth Statistician of the State concerned.

COMPARISON WITH 1966 CENSUS

In determining comparable 1966 population and dwellings for urban centres the following rules have been followed:

- (a) For urban centres the boundaries of which were, in 1971, determined by using the density criteria, the 1966 population and dwellings shown are those which result from the application of the amended criteria for the 1966 situation.
- (b) For centres the boundaries of which were, in 1971, *not* determined by the density criteria, the 1966 population and dwellings are those encompassed by the 1966 boundary, with the following exceptions:
 - (i) Where a centre has absorbed another centre with a population greater than its own population, the totals shown represent the combined totals for the two centres in 1966.
 - (ii) Where an urban centre coincides with a local government area which has changed its boundary change intercensally, the 1966 population and dwellings are those which have been contained within the new boundary in 1966.
 - (iii) Where information gained after the 1966 Census indicated that the 1966 boundary was faulty and excluded significant urban population the 1966 totals are those of the population and dwellings contained within a revised 1966 boundary.

Where it has not been possible to determine comparable 1966 totals, N/A has been shown.

APPENDIX A

MAJOR CHANGES TO LOCAL GOVERNMENT AREAS, 1966 TO 1971, NORTHERN TERRITORY

For 1971 Census purposes, the use of Police Districts as tabulation areas has been abandoned. The only local government area in the Northern Territory is the City of Darwin. For census purposes two areas have been treated as local government areas : Proposed Greater Darwin and the Balance of the Territory.

The Municipality of Alice Springs, with an area of 21.00 square miles, was created on 25 June 1971, but too late for separate identification at the 1971 Census.

APPENDIX A

MAJOR CHANGES TO LOCAL GOVERNMENT AREAS, 1966 TO 1971, AUSTRALIAN CAPITAL TERRITORY

The boundaries of the Canberra City District were extended in December 1966 to encompass the Weston Creek and Belconnen development complexes. As there is no system of local government in the Australian Capital Territory, suburbs have been treated as local government areas for 1971 Census purposes. The following suburbs were not separately identified at the 1966 Census:

Aranda, Belconnen Other (including Belconnen, Bruce, Charnwood, Flynn, Hawker, Holt, MacGregor, Melba, and areas not yet designated as suburbs), Cook, Farrer, Fisher, Higgins, Isaacs, Latham, Macquarie, Mawson, O'Malley, Page, Pearce, Phillip, Rivett, Scullin, Torrens, Waramanga, Weetangera, Weston and Weston Creek Other (including Chapman, Holder, Duffy, Stirling, and areas not yet designated as suburbs).
