* The number of Births and Deaths given for 1853 are all of which there is any record, but they are known to be considerably under the mark. It is supposed that each is really amounted to not less than 8,000. The deficiency has arisen owing to the system of registering Births and Deaths having been entirely changed during the year 1853, and to the new system not having been at first properly understood. In consequence of this, and also owing to the unsettled state of the gold-field population, it is known that many children born were neither baptised nor registered, and many persons who died were buried without registration or funeral service.

† The figures of Revenue and Expenditure given for 1863 are only the receipts and disbursements during 1863, on account of that year. The whole returns of Revenue and Expenditure, *for the service of* 1863, will also include the receipts and payments on account of that year, down to the end of 1864. These statements had not been made up in the Treasury when this sheet was sent to the press.

NOTE.

The principle adopted last year has been adhered to in compiling the above return, namely, to obtain from one person, where possible, returns for a whole district, using the other returns only as a check.

The above figures must be taken as approximations only. It would be very difficult and expensive to take a census yearly, and no good purpose would be served if it were done.

There is apparently a reduction in the total numbers amounting to 257, which is accounted for thus:—The Taa-Tatty and Lutchye-lutchye tribes, numbering 180, improperly included in Mr. Goodwin's return last year, are omitted in this; and at Swan Hill Mr. Green could find only 171 blacks, less by 44 than last year's return. The reduction, therefore, in the total sum is only 33.

Comparing the tables district by district, it will be seen that the Southern is 1 less than last year. In the South-western there is an increase of 71, which is thus accounted for: Franklynford, numbering 23, was omitted last year; and in other cases more recently careful returns made by the Honorary Correspondents have been substituted for those obtained by Mr. Green during his hasty visit to the Western district. The difference in the numbers for the North-western district have been already explained; and those observed in the Northern, South-eastern, and North-eastern districts do not call for remark.

The figures in the table are sufficient to show that the aborigines are not decreasing so rapidly as is generally supposed. If, instead of looking at the totals, which are liable to error, for reasons already explained, we compare the returns made by Honorary Correspondents who have a complete knowledge of the blacks under their charge, and who keep accurate accounts of the births and deaths, we shall see that in no case is the diminution very startling, having regard to the habits and present condition of this people.

It is to be regretted that it has been necessary to use last year's returns for some localities; but it is almost unreasonable to expect the Honorary Correspondents to make elaborate returns every year.

The Central Board are now in possession of the names and other particulars of 1738 aborigines; those respecting whom such information is wanting amount to 120, and they are located principally at Wickliffe, Mount Rouse, Hexham, Bacchus Marsh, and Warrnambool.

As the above return is imperfect, the Central Board would be glad if Honorary Correspondents and others possessing information would communicate with the Secretary. There is reason to believe that some aborigines in the central part of Victoria are not included.

R. BROUGH SMYTH,
Secretary to the Central Board for the Protection of Aborigines

[1] In addition to this amount, £2,000 was received from Government for the construction of a reservoir dam for Clunes water supply.
[2] In addition, about £4,800 was expended in kerbing and channelling public streets, the funds being derived from a loan of £5,000 undertaken for public improvements.
[3] This return is for the year ending 30th June, 1863.
[4] In addition, the council borrowed £750 towards the erection of a Town Hall, which is to be repaid out of the rates during three years.
[5] A special grant of £2,000 for water supply is included in this return.
[6] These figures are taken from last year's returns. No return from the Rutherglen municipality has been received for 1863, although it has been repeatedly applied for.
[7] This borough was only established on the 16th July, 1863.
[8] This return is for the year ending 18th October, 1863.

WILLIAM HENRY ARCHER,
Registrar-General.

LIVE STOCK.—GENERAL SUMMARY.

RETURN of the Number of Horses, Cattle, Sheep, and Pigs upon Farms, and the Number upon Stations, on the 31st March, 1864.

Description of Land.	Description of Live Stock.						
	Horses.	Cattle.			Sheep.	Pigs.	Total.
		Milch Cows.	Exclusive of Milch Cows.	Total.			
Farms and Land unconnected with Stations	72,938	101,557	200,495	302,052	728,696	75,594	1,179,280
Crown and Alienated Land connected with Stations	30,390	25,229	347,991	373,220	6,387,247	4,061	6,794,918
Total	103,328	126,786	548,486	675.272	7,115,943	79,655	7,974,198

NOTE.—The Return of Sheep represents very nearly the entire number in the Colony. The Returns of Horses, Cattle, and Pigs are less complete, inasmuch as many of the Collectors were unable to form estimates of the numbers kept in Towns and upon Gold Fields in their respective districts, nor of the Horses and working Bullocks used by carriers upon the roads.

No Decennial Return of Live Stock is given, as the information is supplied in the Statistical Summary of Victoria at the commencement of this work.

WILLIAM HENRY ARCHER,
Registrar-General.

QUARTZ REEFS AND EXTENT OF GOLD WORKINGS.

RETURN of the Number of Quartz Reefs actually proved to be Auriferous, and of the Total Extent in Square Miles of Auriferous Alluvial and Quartz Ground actually worked upon in the various Mining Districts.

Mining Districts.	Number of Quartz Reefs proved to be Auriferous.	Extent in Square Miles of Auriferous Alluvial and Quartz Ground worked upon.
Ararat District	36	$65\frac{1}{2}$
Ballarat District	133	$100\frac{3}{8}$

NOTE.—This Table does not show the total quantity of quartz crushed in the several localities, but only the yield of certain "crushings" respecting which the Surveyors and Registrars have been able to obtain accurate information. The average yield per ton (12 dwts. 8½ grs.) is low, although slightly in advance of that for 1862. When, however, it is considered that through the exertions of the Surveyors for the Ballarat district they have been enabled to furnish returns of several large parcels of quartz, amounting in the aggregate to more than half of the whole quantity reported for all the districts for the year, and which only yielded the small average of 4 dwts. 22 grs. per ton, it will be seen that, had quantities been reported upon in proportion in the other districts, the average would have been considerably higher. For, if the 286,577 tons crushed in the former district be omitted, the returns from the other gold fields of the colony give 1 oz. 1 dwt. 8 grs. per ton. Since the first publication of the statistics there have been 1,566,471·8 tons crushed, yielding an average of 13 dwts. 13·66 grs.

Secretary for Mines.

NOTE.—As regards some of the denominations, the year 1859 shows an apparent falling off in the number of buildings used for public worship and in the amount of accommodation provided. This is in consequence of those denominations having for that year given returns only of the regular churches and chapels, and not of the other buildings in which services were held.

* From 1854 to 1860, the Estates of Deceased Persons were collected by the Curator. They are not included in the returns of Property sworn to for those years. In 1860 the new Act (24 Vict. No. 99) came in force; since that period the property administered to by the Curator has been included in the returns.

FREDERICK WILKINSON,
Master-in-Equity.

The year is divided into five-day periods; therefore the results given for each month refer not to calendar months. The following is the arrangement of the months:—

January 1st to January 30th.	May 1st to May 30th.	September 3rd to October 2nd.
January 31st to March 1st.	May 31st to July 4th.	October 3rd to November 1st.
March 2nd to March 31st.	July 5th to August 3rd.	November 2nd to December 1st.
April 1st to April 30th.	August 4th to September 2nd.	December 2nd to December 31st.

The blanks occurring in this Report are owing to incomplete returns from the respective Stations.

NOTE.—This Return was compiled at the Melbourne Observatory.
