Monthly Summary of Statistics

Victoria

NOTES

FORTHCOMING ISSUES	ISSUE	RELEASE DATE
	October 1997	18 November 1997
	November 1997	18 December 1997
	December 1997	20 January 1998

ABOUT THIS PUBLICATION	<p>The aim of this publication is to provide users with a range of the latest statistics available at the end of each month of issue. Consequently, the dates and periods shown are not always the same for each table, but are in each case the latest figures available at that time.</p> <p>Commencing with the September quarter 1997, the frequency of compilation and publication of the producer and international trade price indexes (see Table 9) will be reduced from monthly to quarterly. For further information, refer to <i>Price Index of Materials Used in House Building, Six State Capital Cities, May 1997</i> (Cat. no. 6408.0).</p>	

SEASONAL ADJUSTMENT	<p>Seasonal adjustment is a means of removing the estimated effects of normal seasonal variations from economic time series so that the effects of other influences are obvious. Seasonal variations are the systematic (though not necessarily regular) intra-year movements of economic time series. These are often the result of non-economic phenomena, such as climatic changes and regular religious festivals e.g. Christmas and Easter.</p>	
TREND ESTIMATE	<p>Smoothing seasonally adjusted series produces a measure of trend by removing the impact of the irregular component of the series. The trend estimates are derived by applying a 13-term Henderson weighted moving average to the respective seasonally adjusted series. Readers are reminded that trend estimates are subject to revision as subsequent months' data become available.</p>	
SYMBOLS AND OTHER USAGES	<p>n.a. not available n.e.c. not elsewhere classified n.p. not available for publication but included in totals where applicable n.y.a. not yet available p preliminary — figure or series subject to revision r figure or series revised since previous issue * estimate has a relative standard error greater than 25% and is therefore subject to sampling variability too high for most practical uses .. not applicable — nil or rounded to zero</p>	
INQUIRIES	<p>For information about other ABS statistics and services, please refer to the back of this publication.</p> <p>For further information about these statistics, contact Information Services on Melbourne 03 9615 7000.</p>

SELECTED FEATURES

RETAIL TURNOVER

The trend estimate of the value of retail turnover for Victoria in August 1997 was \$2,566.2 million, a figure which has remained steady for the last three months. For Australia, the trend estimate of the value of retail turnover in August 1997 was \$11,087.2 million, a slight increase from the previous month.

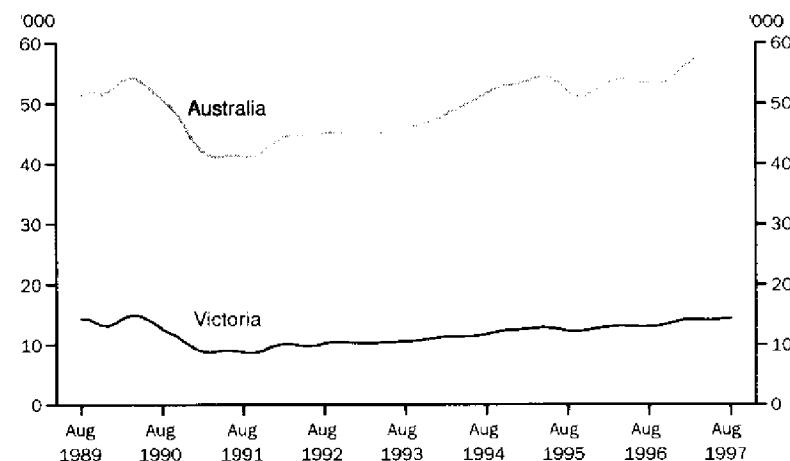

Retail turnover in Victoria accounted for 23.1% of the Australian total.

NEW MOTOR VEHICLE REGISTRATIONS

The trend estimate of the number of new motor vehicle registrations for Victoria in August 1997 was 14,433, continuing the monthly increase for the third consecutive month. For Australia, the trend estimate of the number of new motor vehicle registrations in August 1997 was 59,052, continuing the monthly increase since October 1996.

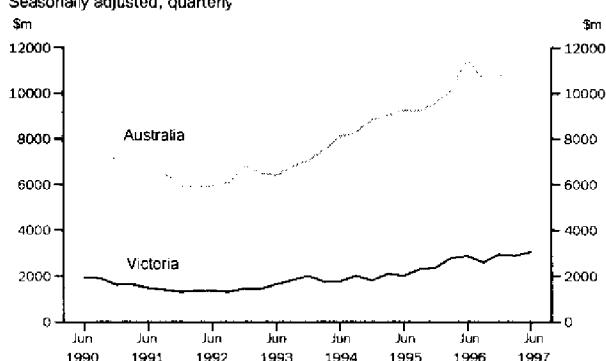

New motor vehicle registrations in Victoria accounted for 24.4% of the Australian total.
