SYMBOLS AND OTHER USAGES

NOTE: Monthly Summary of Statistics preliminary figures are not indicated by the symbol 'p'. All revisions, however, will be indicated by the symbol 'r'.

Standard notations are used throughout this publication, with meanings as follows:

kWh	kilowatt hour
L	litre
MJ	megajoule
n.a.	not available
n.e.c.	not elsewhere classified
n.e.s.	not elsewhere specified
n.p.	not available for publication but included in totals where applicable
n.y.a.	not yet available
r	figure or series revised since previous issue
*	subject to sampling variability too high for most practical purposes.
..	not applicable
—	nil or rounded to zero
——	break in continuity of series (where a line is drawn across a column between two consecutive figures)

Where figures have been rounded, discrepancies may occur between sums of the component items and the totals shown.

SEASONALLY ADJUSTED INDICATORS

In most instances, the aim in compiling monthly or quarterly economic time series is to provide evidence of movement, in order to indicate the effects changing conditions are having on the activities being measured—and, in so doing, to signal what might be likely to occur in the near future. Seasonal adjustment is a technique designed to assist in these processes of analysis and interpretation by removing the estimated effects of normal seasonal variation from statistical series, so that the effects of other influences on the series may be more clearly recognised.

Details of the methods used in deriving the seasonally adjusted figures shown in this publication are given in the publication *Seasonally Adjusted Indicators* (1308.0), last issued in 1983 by the Central Office of the ABS.

Seasonally adjusted statistics are revised following revision to the original data and as additional data are brought into the analysis each year.

For series where one of the components and the total of the components have been seasonally adjusted (e.g. private dwellings and total dwellings), any figures derived by deduction (in the example quoted—government dwellings) do not amount to a formally seasonally adjusted series for the balance of the components.

LABOUR FORCE REVISIONS

From this issue, original Labour Force estimates (contained in Tables 3 to 5) are based on population estimates obtained from the 1991 Census of Population and Housing. Small revisions have therefore been made to many of the estimates from January 1989 to January 1994.

(a) Statistics in this table relate to vital events which occurred in each quarter and year shown, and are registered up to the release of this publication. Because of late registrations, they are likely to be revised, particularly the most recent periods. (b) Births and deaths statistics relate to events which occurred in Australia where the usual residence was within NSW. (c) Deaths under one year of age. (d) Number per 1,000 of estimated resident population at 30 June, or number of infant deaths per 1,000 live births.

NOTE: The tables on pages 2 to 5 contain estimates derived from the Monthly Population Survey which is conducted on a sample basis throughout Australia. Explanatory notes and a technical note about the estimates and further detailed estimates (including industry and occupation details) are contained in *The Labour Force, New South Wales* (6201.1) which is issued quarterly and is available from the Sydney Office of the ABS.

(a) Full-time employees are permanent, temporary and casual employees who normally work the agreed or award hours for a full-time employee in their occupation and received pay for any part of the reference period. If agreed or award hours do not apply, employees are regarded as full-time if they ordinarily work 35 hours or more per week. (b) Part-time employees are permanent, temporary and casual employees who are not full-time employees as previously defined.

NOTE: The tables on pages 6 and 7 contain estimates derived from the Survey of Employment and Earnings, an Australia-wide employer-based survey. Explanatory notes are contained in *Employed Wage and Salary Earners, Australia* (6248.0), which is issued quarterly and is available from the Sydney Office of the ABS. Estimates derived from the Survey of Employment and Earnings will differ from labour force estimates derived from the Monthly Population Survey for the reasons set out in the Information Paper *Comparison of Employment Estimates from the Labour Force Survey and the Survey of Employment and Earnings* (6263.0).

(a) Overtime is time worked in excess of award, standard or agreed hours of work for which payment is received. Overtime hours represent the number of hours of overtime paid for. (b) The figures shown are based on the last pay period ending on or before the third Friday of the month shown. (c) Calculated by dividing total overtime hours paid for in each group by the total number of employees in the same group. (d) Calculated by dividing total overtime hours paid for by the number of employees who were paid for overtime. (e) The number of employees who were paid for overtime as a percentage of the total number of employees.

NOTE: These indexes are on a net sector basis. The All Manufacturing Industry Index relates to materials used by establishments classified to the Manufacturing Division of the Australian Standard Industrial Classification (ASIC), which have been purchased or transferred in from establishments outside that Division. The Subdivision/Group indexes relate to materials used by establishments classified to that Subdivision/Group of the Manufacturing Division which originated from outside that Subdivision/Group. Therefore, materials produced by other Subdivisions of Australian manufacturing industry, other Divisions of Australian industry (e.g. 'Agriculture, forestry, fishing and hunting' or 'Mining') and materials produced overseas are included. Further details of the indexes are contained in the publication *Price Indexes of Materials Used in Manufacturing Industries, Australia* (6411.0).

(a) From September 1991 this index has been published on a monthly basis (the monthly series going back to April 1991) using a new reference base (1989-90 = 100) and primary classification system, SITC. Further information about these changes and referencing to the former quarterly series is contained in the *Import Price Index* (6414.0) September 1991 issue.

NOTE: The Import Price Index is a fixed weights index. The items included in the index were selected on the basis of the value of merchandise imports landed in Australia during 1988-89 and 1989-90. Ninety-three per cent of these imports are directly represented with a further two per cent indirectly covered. The index groups above relate to commodities defined in terms of selected divisions of the Standard International Trade Classification (SITC), Revision 3. Further details of the index are contained in the publication *Import Price Index* (6414.0).

NOTE: The Export Price Index is a fixed weights index. The weights of the commodities directly represented in the index have been derived from values of exports in 1988-89, revalued to reflect 1989-90 prices except that for some commodities the weights assigned have been adjusted to reflect increases in exports since 1988-89 deemed to be of a long term nature. Further details of the index are contained in the publication *Export Price Index* (6405.0). The index groups above relate to commodities defined in terms of selected divisions of the Australian Harmonised Export Commodity Classification (AHECC).

(a) These are gross contents of metallic minerals produced, as determined by assay, and make no allowance for losses in smelting and refining. The quantities shown are therefore, in general, greater than those actually recoverable. (b) Includes the metallic contents (when finally separated) of zircon-rutile concentrates recovered in NSW and finally separated in Queensland. Excludes the metallic contents of zircon-rutile concentrates recovered in Queensland or imported into Australia and finally separated in NSW. (c) Content of fine metal.

(a) Prior to July 1991, refinancing was included in Purchase of established dwellings. The value of refinancing in December was \$167.5 m and is included in Total lending commitments. (b) From October 1989 the savings and trading bank series are combined. This is in line with changes to the *Banking Act 1959* which effectively removes the distinction between savings and trading banks. (c) The type of lender statistics reflect the change of the St George Building Society, in New South Wales and the Australian Capital Territory, and the Victorian Savings and Loans Society, in Victoria, to the St George Bank. Lending activity data reported by St George Bank are included from July 1992 onwards under the 'Banks' classification.

Details of what is available in various publications and other products can be found in the *ABS Catalogue of Publications and Products* available at all ABS Offices (see below for contact details).

Information Consultancy Service

Information tailored to special needs of clients can be obtained from the Information Consultancy Service available at ABS Offices (see Information Inquiries below for contact details).

National Dial-a-Statistic Line

0055 86 400

This number gives you 24 hour access, 365 days a year for a range of statistics.

Electronic Data Services

A wide range of ABS data are available on electronic media. Selections of most frequently requested statistics are available, updated daily, on DISCOVERY (Key *656#). The ABS PC TELESTATS service delivers major economic indicator main features ready to download into personal computers on the day of release. The PC AUSSTATS service enables on-line access to a data base of thousands of up-to-date time series. Selected datasets are also available on diskette or CD-ROM. For more details on electronic data services available, contact Information Services in any of the ABS Offices (see Information Inquiries below for contact details).

Bookshops and Subscriptions

There are over 500 titles of various publications available from ABS bookshops in all ABS Offices (see below Bookshop Sales for contact details). The ABS also provides a subscription service through which nominated publications are provided by mail on a regular basis at no additional cost (telephone Publications Subscription Service toll free on 008 02 0608 Australia wide).
