

BUILDING APPROVALS, NORTHERN TERRITORY, OCTOBER 1994

MAIN FEATURES

Residential

- A total of 166 dwelling units (69 houses and 97 other residential buildings) were approved for October 1994 having a combined value of \$20.5m. Of the 69 houses approved, 23 were for Palmerston, 21 for Darwin Rural Areas and 12 for various Aboriginal Communities. Of the other residential buildings approved 93 were for Darwin City.
- For the four months to October 1994, 707 dwellings were approved, a 10.6 per cent increase on the 639 dwellings approved for the same period last year.

Non-residential

- Approvals for the month of October 1994 totalled \$7.6m. For the four months to October 1994 approvals totalled \$27.8m, a 47.0 per cent decrease on the \$52.5m total for the same period last year.

Total

- For the four months to October 1994 approvals totalled \$143.4m, a 22.3 per cent increase on the \$117.3m total for the same period last year.

NEW DWELLING UNIT APPROVALS

VALUE OF BUILDING APPROVED

Introduction

This publication contains monthly details of building work approved. Statistics of building work approved are compiled from:

- Permits issued by licensed Private Building Certifiers or the Building Branch, Northern Territory Department of Lands and Housing, in areas subject to building control by this authority;
- Contracts let or day labour work authorised by Commonwealth, State, semi-government and local government authorities.

Major building activity which takes place in areas not subject to the normal administrative approval process (e.g. buildings on remote mine sites) is also included.

Explanatory notes are published at the back of this publication.

BOB HARRISON
Statistician, Northern Territory.

PHONE INQUIRIES

- for more information about *these statistics* and *other inquiries*, including copies of publications — contact **Information Services** on Darwin (089) 432111, or any of our State offices.
- for information about *other ABS statistics and services* please refer to the back page of this publication.

NOTE: (i) Buildings for Aboriginal Communities are included in the Private Sector. However, if the building is owned by a Community Government Council it will be included in the Public Sector (See paragraph 14). (ii) The number of self-contained dwelling units approved as part of the construction of non-residential building and alterations and additions to existing buildings (including conversions to dwelling units) are excluded from this table. There were no such dwelling units approved in October 1994.

EXPLANATORY NOTES

Scope and coverage

The statistics relate to *building* activity which includes construction of new buildings and alterations and additions to existing buildings. Construction activity not defined as building (e.g. construction of roads, bridges, railways, earthworks etc.) is excluded.

2. In relation to work carried out on existing buildings, the statistics include details of non-structural renovation and refurbishment work and the installation of integral building fixtures, for which building approval was obtained.

3. From July 1990, the statistics cover:

- (a) all approved new residential building jobs valued at \$10,000 or more (previously \$5,000 or more).
- (b) all approved alterations and addition of residential buildings valued at \$10,000 or more.
- (c) all approved non-residential building jobs valued at \$50,000 or more (previously \$30,000 or more).

These changes in coverage do not have a statistically significant effect on broad building approvals aggregate data. However, care should be taken in interpreting data for specific classes of non-residential building.

Definitions

4. A *building* is defined as a rigid, fixed and permanent structure which has a roof. Its intended purpose is primarily to house people, plant, machinery, vehicles, goods or livestock. An integral feature of a building's design, to satisfy its intended use, is the provision for regular access by persons.

5. A *dwelling unit* is defined as a self-contained suite of rooms, including cooking and bathing facilities and intended for *long term* residential use. Units (whether self-contained or not) within buildings offering institutional care, such as hospitals; or temporary accommodation such as motels, hostels and holiday apartments, are not defined as dwelling units. The value of units of this type is included in the appropriate category of "non-residential buildings" approved.

6. A *residential building* is defined as a building predominantly consisting of one or more dwelling units. Residential buildings can be either *houses* or *other residential buildings* as follows:

- (a) A *house* is defined as a detached building predominantly used for long term residential purposes and consisting of only one dwelling unit. Thus, detached 'granny flats' and detached dwelling units (such as caretakers' residences)

associated with "non-residential buildings" are defined as houses for the purpose of these statistics.

- (b) An *other residential building* is defined as a building which is predominantly used for long term residential purposes and which contains (or has attached to it) more than one dwelling unit (e.g. includes townhouses, duplexes, apartment buildings etc.).

7. The number of dwelling units created by alterations and additions to existing buildings and through the construction of new "non-residential buildings" is not included in the tables but is shown as a footnote to Table 1.

8. Value data are derived by aggregation of the estimated value (when completed) of building work (excluding value of land and landscaping but including site preparation) as reported on approval documents. For 'houses' these estimates are usually a reliable indicator of the value of the completed building. However, for 'other residential buildings' and 'non-residential buildings' these estimates can and often do differ significantly from the value of the completed building.

Building classification

9. *Functional classification of buildings.* A building is classified according to its intended major function. Hence, a building which is ancillary to other buildings, or forms a part of a group of related buildings, is classified to the function of the building and not to the function of the group as a whole. An example of this can be seen in the treatment of building work approved for a factory complex. In this case, a detached administration building would be classified to Offices, a detached cafeteria building to Shops, while factory buildings would be classified to Factories. An exception to this rule is in the treatment of group accommodation building where, for example, a student accommodation building on a university campus would be classified to Educational.

10. From July 1992, an expanded functional classification of buildings based on the *Dwelling Structure Classification (DSC)* has been introduced by the ABS to provide more detailed information on residential building approvals.

11. The DSC has been developed by the ABS to provide a standard classification of the different types of dwelling structures (houses, flats, townhouses, etc.). The DSC will be implemented across all major collections of housing data in the ABS. The DSC has the same overall scope as the classification used in previous collections but provides more detail than previously available to reflect the current interest in medium to high density housing.

12. In particular, for Building Approvals, DSC allows new *other residential building* to be classified as follows:

- (a) *Semi-detached, row or terrace houses, etc.* (dwellings having their own private grounds and no other dwellings above or below) with:
- one storey;
 - two or more storeys;
- (b) *Flats, units or apartments, etc.* (dwellings not having their own private grounds and usually sharing a common entrance, foyer or stairwell) in a building of:
- one or two storeys;
 - three storeys;
 - four or more storeys.

13. More details on the DSC are contained in the ABS Information paper, *Dwelling Structure Classification (DSC)* (1296.0).

14. *Ownership.* The ownership of a building is classified at the time of approval as either *private* sector or *public* sector according to expected ownership of the completed building as evident at the time of approval. Residential buildings being constructed by private sector builders under government housing authority schemes whereby the authority has contracted, or intends to contract, to purchase the buildings on or before completion, are classified as public sector.

Aboriginal Communities

15. The table relating to building approvals on Aboriginal communities has been removed from the Publication due to possible undercoverage of sources.

General

16. For purposes of comparison, it should be noted that statistics of building approvals are affected from month to month by large projects (such as blocks of flats and multi-storey buildings) approved in particular months and also by the administrative arrangements of government authorities.

Australian Standard Geographical Classification

17. Statistics presented in Tables 4, 5, and 7 of this publication have been classified according to the Australian Standard Geographical Classification (ASGC). Revisions affecting the N.T. were introduced in Edition 2.1, released in January 1991.

For additional information concerning other changes to the ASGC, users are referred to the manual *Australian Standard Geographical Classification, Edition 2.1* (1216.0).

Estimates at constant prices

18. Estimates of the quarterly value of building approvals at average 1989-90 prices are presented in Table 6 (Note: monthly value data at constant prices are not available).

19. Constant price estimates measure changes in value after the direct effects of price changes have been eliminated. The deflators used to revalue the current price estimates in this publication are derived from the same price data underlying the deflators compiled for the dwellings and non-dwelling construction components of the national accounts, aggregate 'gross fixed capital expenditure'.

20. Estimates at constant prices are subject to a number of approximations and assumptions. Further information on the nature and concepts of constant price estimates is contained in Chapter 4 of the *Australian National Accounts: Concepts, Sources and Methods* (5216.0).

Unpublished data and related publications.

21. The ABS can also make available certain building approvals data which are not published. Where it is not practicable to provide the required information by telephone, data may be provided in the following forms: microfiche, photocopy, computer printout, floppy disk and clerically extracted tabulation. A charge may be made for providing unpublished information in these forms.

22. Users may also wish to refer to the following building and construction publications which are available on request:

Building Approvals, Australia (8731.0) — issued monthly.

Building Activity, Australia: Dwelling Unit Commencements (Preliminary Estimates) (8750.0) — issued quarterly.

Construction Activity at Constant Prices, Australia - - (8782.0) issued quarterly.

Building Activity, Australia (8752.0) — issued quarterly.

Building Activity, Northern Territory (8752.7) — issued quarterly.

Engineering Construction Survey, Australia (8762.0) — issued quarterly.

23. Current Publications produced by the ABS are listed in the *Catalogue of Publications and Products, Australia* (1101.0). The ABS also issues, on Tuesdays and Fridays, a *Publications Advice* (1105.0) which lists publications to be released in the next few days. The Catalogue and Publications Advice are available from any ABS office.

Symbols and other usages:

SD	Statistical Division
SSD	Statistical Subdivision
(T)	town
—	nil or rounded to zero
r	figure revised since previous issue

24. Where figures have been rounded, discrepancies may occur between sums of the component items and totals.

For more information ...

The ABS publishes a wide range of information on Australia's economic and social conditions. A catalogue of publications and products is available from any of our Offices (see below for contact details).

Information Consultancy Service

Special tables or in-depth data investigations are provided by the ABS Information Consultancy Service in each of our Offices (see below for contact details).

National Dial-a-Statistic Line

0055 86 400

(Steadycom P/L: premium rate 25c/21.4 secs.)

Electronic Data Services

A large range of data is available via on-line services, diskette, magnetic tape, tape cartridge and CD ROM. For more details about our electronic data services, contact any ABS Office (see below).

Bookshops and Subscriptions

There are over 400 titles available from the ABS Bookshops in each of our Offices. You can also receive any of our publications on a regular basis. Join our subscription mailing service and have your publications mailed to you in Australia at no additional cost. Telephone our Publications Subscription Service toll free on 008 02 06 08 Australia wide.
