1329.0

ADDENDUM

AUSTRALIAN WINE AND GRAPE INDUSTRY

EMBARGO: 11:30AM (CANBERRA TIME) THURS 15 MAR 2001

ADDENDUM

This publication is an addendum to the publication Australian Wine and Grape Industry 2000 (Cat. no. 1329.0) released on 20 December 2000. It contains final data from the 2000 Vineyards Survey to replace the preliminary data which was included in the publication.

Generally, final data from the survey are little different to the preliminary data. However, for a small subset of items from the 2000 Survey, the differences between preliminary and final data were larger than usual. The figures in question relate to the data item of 'intended planting 2000 to 2001', in the tables in Chapter 2 of the above publication entitled Vine Planting, Gains and Losses — By variety, 2000p (page 12) and Vine Planting, Gains and Losses — By State, 2000p (page 13).

All figures relating to the other data items in those tables or in other tables of the publication are within normal tolerances for preliminary data. However, all of the final figures for the Vineyards 2000 collection have been included in this addendum.

Tim Skinner

Acting Australian Statistician

(a) Fresh weight.

(c) Yield represents the quantity of grapes produced per hectare of bearing vines

(b) Wine grape production data are less than grape-crushings data in chapter 4 (see Explanatory Notes, paragraph 4).

(d) Includes Australian Capital Territory and Northern Territory from and including 1997.
