

**BUILDING APPROVALS, TASMANIA, JUNE 1994**

**MAIN FEATURES**

- There were 306 new dwelling units approved in June 1994, a decrease of 12 per cent on the 348 approved in May 1994, and a 15 per cent decrease on June 1993 (360).
- For the 12 months ended June 1994 there were 4147 new dwelling units approved, one per cent higher than the 4094 recorded for the 12 months ended June 1993.
- The latest trend estimates available for the number of new dwelling units approved show seven consecutive months of decrease.
- The highest number of dwelling units approved in June 1994 was recorded by the City of Hobart with 57, followed by the Municipality of Kingborough with 27 and the Municipality of Meander Valley with 26.
- The value of all buildings approved, at current prices, for June 1994 was \$38.0m, compared with \$42.2m in May 1994 and \$41.4m in June 1993.
- The value of new residential building approved, at current prices, for June 1994 was \$23.3m, compared with the May 1994 figure of \$24.6m and the June 1993 figure of \$23.7m.

**RESIDENTIAL BUILDING APPROVALS,  
TASMANIA  
TREND SERIES**

**VALUE OF ALL BUILDING APPROVED**

**WILLIAM P. McREYNOLDS**  
Deputy Commonwealth Statistician and  
Statistician of the State of Tasmania

**INQUIRIES**

*For inquiries concerning these statistics and other unpublished data, telephone David Verrier on Hobart (002)20 5878.*  
*For other inquiries including copies of publications, telephone the Information Officer on Hobart (002)20 5800.*  
The Tasmanian Office of the Bureau is located on the 1st Floor, 175 Collins Street, Hobart (GPO Box 66A, Hobart, 7001).

(a) Seasonally adjusted series smoothed by application of a 13-term Henderson moving average. Trend estimates for the most recent months are provisional and can be revised as data for additional months become available. NOTE: The number of self-contained dwelling units approved as part of the construction of non-residential building and alterations and additions to existing buildings (including conversions to dwelling units) are excluded from this table. There were no such dwelling units approved in June 1994.

## EXPLANATORY NOTES

**Introduction**

This publication contains monthly details of building work approved. From 1985 there has been a change in terminology used by the ABS in presenting building statistics. The terms 'residential buildings', and 'non-residential building' have replaced 'dwellings' and 'other building' respectively and 'other residential buildings' replaces 'other dwellings'. It should be noted that these are only changes in terminology and do not affect the classification of the various types of buildings or the statistics.

**Scope and coverage**

2. The statistics relate to BUILDING activity which includes construction of new buildings and alterations and additions to existing buildings. Construction activity not defined as building (construction of roads, bridges, railways, earthworks etc.) is excluded.

3. The statistics include details of non-structural renovation and refurbishing work and the installation of integral building fixtures for which building approval was obtained.

4. Statistics of building work approved are compiled from:  
 (a) permits issued by local government authorities in areas subject to building control by those authorities and  
 (b) contracts let, or day labour work authorised, by Federal, State, semi-government and local government authorities.

Major building activity which takes place in areas not subject to the normal administrative approval processes (e.g. buildings on remote mine sites) is also included.

5. From July 1990, the statistics cover:  
 (a) all approved new residential building jobs valued at \$10 000 or more (previously \$5000 or more);  
 (b) approved alterations and additions to residential buildings valued at \$10 000 or more and  
 (c) all approved non-residential building jobs valued at \$50 000 or more (previously \$30 000 or more).

These changes mainly affect non-residential building data. In particular, care should be taken in interpreting data for specific classes of non-residential building.

**Definitions**

6. A **building** is defined as a rigid, fixed and permanent structure which has a roof. Its intended purpose is primarily to house people, plant, machinery, vehicles, goods or livestock. An integral feature of a building's design, to satisfy its intended use, is the provision for regular access by persons.

7. A **dwelling unit** is defined as a self-contained suite of rooms including cooking and bathing facilities and intended for long-term residential use. Units (whether self-contained or not) within buildings offering institutional care (such as

hospitals) or temporary accommodation (such as motels, hostels and holiday apartments) are not defined as dwelling units. The value of units of this type is included in the appropriate category of 'non-residential building' approved.

8. A **residential building** is defined as a building predominantly consisting of one or more dwelling units. Residential buildings can be either houses or other residential buildings.

(a) A **house** is defined as a detached building predominantly used for long-term residential purposes and consisting of only one dwelling unit. Thus, detached 'granny flats' and detached dwelling units associated with non-residential buildings (such as caretaker's residences) are defined as houses for the purpose of these statistics.

(b) An **other residential building** is defined as a building which is predominantly used for long-term residential purposes and which contains (or has attached to it) more than one dwelling unit (includes townhouses, duplexes, apartment buildings etc.).

9. The number of dwelling units created by alterations and additions to existing buildings, and through the construction of new non-residential buildings, is not included in the tables but is shown as a footnote to Table 1.

10. **Values** are derived from approval documents and represent the estimated value, when completed, of building work (excluding the value of land and landscaping). Site preparation costs are included.

**Building classification**

11. **Ownership.** The ownership of a building is classified at the time of approval as either private sector or public sector according to expected ownership of the completed building. Residential buildings being constructed by private sector builders under government housing authority schemes, whereby the authority has contracted, or intends to contract, to purchase the buildings on or before completion, are classified as public sector.

12. **Functional classification of buildings.** A building is classified according to its intended major function. Hence a building which is ancillary to other buildings, or forms a part of a group of related buildings, is classified to the function of the building and not to the function of the group as a whole. An example of this can be seen in the treatment of building work approved for a factory complex. In this case a detached administration building would be classified to Offices, and a detached cafeteria building to Shops, while factory buildings would be classified to Factories. An exception to this rule is in the treatment of group accommodation buildings where, for example, a student accommodation building on a university campus would be classified to Educational.

## EXPLANATORY NOTES - continued

13. For Building Approvals from July 1992 an expanded functional classification of buildings based on the Dwelling Structure Classification (DSC) has been introduced by the ABS to provide a standard classification of residential buildings.

14. The DSC is a classification recently developed by the ABS to provide a standard classification of the different types of dwelling structures (houses, flats, townhouses, etc.). The DSC has been used in the 1990 Survey of Income and Housings Costs and Amenities and the 1991 Census of Population and Housing. It will be implemented across all major collections of housing data in the ABS. The DSC has the same overall scope as the classification used in previous Censuses and household surveys but provides more categories than previously to reflect the current need to provide separate details on medium to high density housing.

15. In particular, for Building Approvals, DSC allows new other residential building to be classified as follows:

(a) Semi-detached, row or terrace houses, townhouses, etc. (dwellings having their own private grounds and no other dwellings above or below) with:

- one storey;
- two or more storeys.

(b) Flats, units or apartments, etc. (dwellings not having their own private grounds and usually sharing a common entrance, foyer or stairwell) in a building of:

- one or two storeys;
- three storeys;
- four or more storeys.

16. More details on the DSC are contained in the ABS Information Paper, Dwelling Structure Classification (DSC) (1296.0).

#### General

17. For purposes of comparison, it should be noted that statistics of building approvals are affected from month to month by large projects (such as blocks of flats and multi-storey office buildings) approved in particular months and also by the administrative arrangements of government authorities.

#### Constant Price Estimates

18. Constant price estimates measure changes in value after the direct effects of price changes have been eliminated. The deflators used to revalue the current price estimates are derived from the same price data underlying the deflators compiled for the dwellings and non-dwelling construction components of the national accounts aggregate 'Gross fixed capital expenditure'. (Note: monthly value data at constant prices are not available.)

19. Estimates at constant prices are subject to a number of approximations and assumptions. Further information on the nature and concepts of constant price estimates is contained in Chapter 4 of *Australian National Accounts: Concepts, Sources and Methods* (5216.0).

20. Statistics in this publication are presented using the *Australian Standard Geographical Classification (ASGC)* which has been prepared by the ABS for use in its collection, compilation and publication of statistics. For additional information about ASGC, users are referred to the manual *Australian Standard Geographical Classification* (1216.0) Edition 4.

#### Unpublished data and related publications

21. The ABS can also make available certain building approvals data which are not published. Where it is not practicable to provide the required information by telephone, data can be provided in the following forms: microfiche, photocopy, computer printout and clerically extracted tabulation. A charge may be made for providing unpublished information in these forms.

Users may wish to refer to the following priced publications which are available.

*Building Activity, Tasmania* (8752.6), quarterly.  
*Dwelling Unit Commencements Reported by Approving Authorities, Tasmania* (8741.6), monthly.  
*Building Approvals, Australia* (8731.0), monthly.  
*Building Activity, Australia: Dwelling Unit Commencements Preliminary* (8750.0), quarterly.  
*Engineering Construction Survey Australia*, (8762.0), quarterly.  
*Building Activity, Australia* (8752.0), quarterly.  
*Construction Industry Survey - Private Sector Construction Establishments, Details of Operations, Tasmania, 1984-85* (8772.6), five-yearly.

All publications produced by the ABS are listed in the annual *Catalogue of Publications* (1101.0) which is available from any ABS Office.

Where figures have been rounded, discrepancies may occur between sums of the component items and totals.

#### Symbols and Other Usages

-	nil or rounded to zero.
n.a.	not available
n.y.a.	not yet available
r	figure or series revised since previous issue.

## For more information ...

The ABS publishes a wide range of statistics and other information on Australia's economic and social conditions. Details of what is available in various publications and other products can be found in the *ABS Catalogue of Publications and Products* available at all ABS Offices (see below for contact details).

### Information Consultancy Service

Information tailored to special needs of clients can be obtained from the Information Consultancy Service available at ABS Offices (see Information Inquiries below for contact details).

### National Dial-a-Statistic Line

0055 86 400

(Steadycom P/L: premium rate 25c/21.4 secs)

This number gives 24-hour access, 365 days a year for a range of statistics.

### Electronic Data Services

Selections of most frequently requested statistics are available, updated daily, on DISCOVERY (Key \*656#). For more details on electronic data services available, contact Information Services in any of the ABS Offices (see Information Inquiries below for contact details).

### Bookshops and Subscriptions

There are over 400 titles of various publications available from ABS bookshops in all ABS Offices (see below Bookshop Sales for contact details). The ABS also provides a subscription service through which nominated publications are provided by mail on a regular basis at no additional cost (telephone Publications Subscription Service toll free on 008 02 0608 Australia wide).
