WHAT IF...? REVISIONS TO TREND ESTIMATES

EFFECT OF NEW SEASONALLY ADJUSTED ESTIMATES ON TREND ESTIMATES

TREND REVISIONS

Recent seasonally adjusted and trend estimates are likely to be revised when original estimates for subsequent months become available. The approximate effect of possible scenarios on trend estimates are presented below. Generally, the greater the volatility of the original series, the larger the size of the revisions to trend estimates. Analysis of the building approval original series has shown that they can be revised substantially. As a result, some months can elapse before turning points in the trend series are reliably identified.

The graphs and tables which follow present the effect of two possible scenarios on the previous trend estimates: that the March seasonally adjusted estimate is higher than the February estimate by 2.8% for the number of private sector houses approved and 14% for private sector dwellings excluding houses approved; and that the March seasonally adjusted estimate is lower than the February estimate by 2.8% for the number of private sector houses approved and 14% for private sector dwellings excluding houses approved. These percentages represent the average absolute monthly percentage change for these series over the last ten years.

APPROVED PRIVATE SECTOR HOUSES

| | Trend as published | | WHAT IF NEXT MONTH'S SEASONALLY ADJUSTED ESTIMATE: | | | |
|-------------|--------------------|----------|--|----------|-------------------------------|----------|

EXPLANATORY NOTES

INTRODUCTION

1 This publication presents details of building work approved.

SCOPE AND COVERAGE

2 Statistics of building work approved are compiled from:

- permits issued by local government authorities and other principal certifying authorities;
- contracts let or day labour work authorised by commonwealth, state, semi-government and local government authorities; and
- major building approvals in areas not subject to normal administrative approval e.g. building on remote mine sites.

3 The scope of the collection comprises the following:

- construction of new buildings;
- alterations and additions to existing buildings;
- approved non-structural renovation and refurbishment work; and
- approved installation of integral building fixtures.

4 Construction activity not defined as building (e.g. roads, bridges, railways, earthworks, etc.) are excluded. Statistics for this activity can be found in Engineering Construction Activity, Australia (cat. no. 8762.0).

5 The coverage of these statistics has changed over time:

- From July 1990, the statistics include all approved residential building valued at \$10,000 or more and all approved non-residential building valued at \$50,000 or more.
- From July 1988 to June 1990, the statistics include all approved residential building valued at \$10,000 or more and all approved non-residential building valued at \$30,000 or more.
- From July 1975 to June 1988, the statistics include all approved residential and non-residential building valued at \$10,000 or more.
- Up to June 1975, the statistics include all approved new building, and alterations and additions involving a structural change or floor area expansion.

ROUNDING

6 Estimates in this publication are rounded and this may result in discrepancies between the sums of component items and their totals. Rounding may also cause differences between the movements (e.g. percentage changes) shown in this publication and the movements calculated by users from unrounded data. Where a discrepancy occurs, the published movement will be more accurate.

REVISIONS TO ORIGINAL DATA

7 The information provided to the Australian Bureau of Statistics (ABS) and included in estimates for any month may be revised or corrected in later months. This can occur as a result of corrections made by a provider of data, the late provision of approval records and, occasionally, by approvals being identified after construction work has commenced. Where revisions or corrections are made to the original data for prior months, the aggregate impact on dwelling approval estimates are provided on page 2 under 'REVISIONS THIS MONTH'.

VALUE DATA

8 Statistics on the value of building work approved are derived by aggregating the estimated 'value of building work when completed' as reported on building approval documents provided to local councils or other building approval authorities. Conceptually these value data should exclude the value of land and landscaping but include site preparation costs associated with building activity. These estimates are usually a reliable indicator of the completed value of 'houses'. However, for other buildings they can differ significantly from the completed value of the building as final costs and contracts have often not been established before council approval is sought and gained.

EXPLANATORY NOTES *continued*

VALUE DATA *continued*

9 The ABS generally accepts values provided by approving bodies. Every effort is made to ensure data are provided on a consistent basis, however, there may be instances where value reported does not reflect the building completion value. For example, the reported value for most project homes is the contract price, which may include the cost of site preparation and landscaping. In other cases where a builder is contracted to construct a dwelling based on the owner's plans, the value may only be the builder's costs. Some data providers do not use the value on approval documents, instead deriving a value based on floor area and type of structure.

10 From July 2000, value data includes the Goods and Services Tax (GST) for residential and non-residential building approvals.

BUILDING JOB DATA

11 In these statistics a 'building job' is a construction project comprising work to one or more buildings. Building jobs data are based on the building approval records within the scope of the collection received each month.

OWNERSHIP

12 Building ownership is classified as either public or private sector and is based on the sector of the intended owner of the completed building at the time of approval. Residential buildings constructed by private sector builders under government housing authority schemes are classified as public sector when the authority has contracted, or intends to contract, to purchase the building on or before completion.

BUILDING CLASSIFICATIONS

13 Building approvals are classified by Type of Building (e.g. 'residential', 'non-residential') and by Type of Work.

14 Type of Building is the building's intended predominant function according to the *ABS Functional Classification of Buildings 1999 (Revision 2011)* (cat. no. 1268.0.55.001).

- Except where specified in the Functional Classification of Buildings, a building which is ancillary to other buildings, or forms a part of a group of related buildings, is classified to the function of the building and not to the function of the group as a whole. For example, in the case of a factory complex, a detached administration building would be classified to Offices, a detached cafeteria building to Retail/wholesale trade, while factory buildings would be classified to Factories. An exception to this rule is the treatment of group accommodation buildings where, for example, a student accommodation building on a university campus would be classified to Educational.
- For a significant multi-function building which at the time of approval is intended to have more than one purpose (e.g. a hotel/shops/casino project), the ABS endeavours to split the approval details according to each main function. Where this is not possible because separate details cannot be obtained, the building is classified to the predominant function of the building.

15 Type of Work consists of 'new', 'alterations and additions', and 'conversions'. Conversions are considered to be a special type of alteration, and these jobs have been separately identified as such from the July 1996 reference month, though they have only appeared separately in this publication from the January 1998 issue. Prior to that issue, conversions were published as part of the 'Conversions, etc.' category or included elsewhere within a table.

SEASONAL ADJUSTMENT AND TREND ESTIMATES

16 Seasonal adjustment is a means of removing the estimated effects of seasonal and calendar related variation from a series so that the effects of other influences can be more clearly recognised. It does not remove the effect of irregular or other influences (e.g. the approval of large projects or a change in the administrative arrangements of approving authorities).

EXPLANATORY NOTES *continued*

SEASONAL ADJUSTMENT AND TREND ESTIMATES *continued*

17 State/territory series are seasonally adjusted independently of the Australian series. In general, the sum of the state/territory estimates are reconciled to equal the Australian total estimates.

18 Seasonally adjusted estimates are produced by a seasonal adjustment method which takes account of the latest available original estimates. A detailed review of seasonal factors is conducted annually, generally prior to the release of data for May. The timing of this review may vary and when appropriate will be notified in the 'Data Notes' section of this publication.

19 The ABS produces trend estimates to best represent the underlying behaviour in a series. Trend estimates are created by smoothing seasonally adjusted series to reduce the impact of the irregular component of the seasonally adjusted series. Abnormally high or low values (outliers) are discounted or excluded from the trend estimates.

20 Seasonally adjusted and trend estimates may be revised as new periods of data become available. Generally, revisions become smaller over time. Revisions to original data may also lead to revisions to seasonally adjusted and trend estimates.

21 Further information on seasonally adjusted and trend estimates can be found in the ABS Information papers *An Introductory Course on Time Series Analysis - Electronic Delivery, January 2005* (cat. no. 1346.0.55.001) and *A Guide to Interpreting Time Series - Monitoring Trends, 2003* (cat. no. 1349.0). Queries may also be directed to the Time Series Analysis Section on (02) 6252 6345 or email <time.series.analysis@abs.gov.au>.

CHAIN VOLUME MEASURES

22 Chain volume estimates reflect changes in the volume of building work approved after the direct effects of price changes have been eliminated. The chain volume measures appearing in this publication are annually reweighted chain Laspeyres indexes referenced to current price values in a chosen reference year.

23 Chain volume measures are released quarterly in the April, July, October and January issues. The reference year is updated annually in the October issue.

24 Chain volume measures do not, in general, sum exactly to the extrapolated total value of the components. Further information on the nature and concepts of chain volume measures is contained in the ABS Information Paper *Australian National Accounts, Introduction of Chain Volume Measures and Price Indexes, September 1997* (cat. no. 5248.0).

EXPLANATORY NOTES *continued*

GEOGRAPHIC CLASSIFICATION

25 Building approvals are classified to the *Australian Statistical Geography Standard (ASGS), 2011 Edition* (cat. no. 1270.0.55.001) effective from July 2011.

26 From 1 July 2002, approvals in the Territories of Jervis Bay, Christmas Island and Cocos (Keeling) Islands are included in these statistics. Jervis Bay is included in New South Wales, while Christmas Island and Cocos (Keeling) Islands are included in Western Australia. This differs to their treatment in the ASGC and ASGS, where these Territories are included in 'Other Territories'.

GLOSSARY

| | |
|-------------------------------------|---|
| Accommodation | Buildings primarily providing short-term or temporary accommodation on a commercial basis. Includes: <ul style="list-style-type: none">■ Self-contained, short-term apartments (e.g. serviced apartments);■ Hotels (predominantly accommodation), motels, boarding houses, cabins; and■ Other short-term accommodation n.e.c. (e.g. migrant hostels, youth hostels, lodges). |
| Aged care facilities | Building used in the provision or support of aged care facilities, excluding dwellings (e.g. retirement villages). Includes aged care facilities with and without medical care. |
| Agriculture/aquaculture | Buildings associated with agriculture and aquaculture activities, including bulk storage of produce (e.g. shearing shed, hay shed, shearers' quarters). |
| Alterations and additions | Building activity carried out on existing buildings. Includes alterations and additions to floor area, the structural design of a building, and affixing rigid components which are integral to the functioning of the building. |
| Building | A building is a rigid, fixed and permanent structure which has a roof. Its intended purpose is primarily to house people, plant, machinery, vehicles, goods or livestock. An integral feature of a building's design is the provision for regular access by persons in order to satisfy its intended use. |
| Building job | A building job is a construction project comprising work to one or more buildings. |
| Commercial | Buildings primarily occupied with or engaged in commercial trade or work intended for commercial trade, including buildings used primarily in wholesale and retail trades, office and transport activities. |
| Conversion | Building activity which converts a non-residential building to a residential building (e.g. conversion of a warehouse to residential apartments). |
| Dwelling | A dwelling is a self-contained suite of rooms, including cooking and bathing facilities, intended for long-term residential use. A dwelling may comprise part of a building or the whole of a building. Regardless of whether they are self-contained or not, rooms within buildings offering institutional care (e.g. hospitals) or temporary accommodation (e.g. motels, hostels and holiday apartments) are not defined as dwellings. Such rooms are included in the appropriate category of non-residential building approvals. Dwellings can be created in one of four ways: through new work to create a residential building; through alteration/addition work to an existing residential building; through either new or alteration/addition work on non-residential building; or through conversion of a non-residential building to a residential building. |
| Dwellings excluding houses | Dwellings in other residential buildings and dwellings created in non-residential buildings. |
| Educational | Buildings used in the provision or support of educational services, including group accommodation buildings (e.g. classrooms, school canteens, dormitories). |
| Entertainment and recreation | Buildings used in the provision of entertainment and recreational facilities or services (e.g. libraries, museums, casinos, sporting facilities). |
| Factories | Buildings housing, or associated with, production and assembly processes of intermediate and final goods. |
| Flats, units or apartments | Dwellings not having their own private grounds and usually sharing a common entrance, foyer or stairwell. |
| Health | Buildings used in the provision of non-aged care medical services (e.g. nursing quarters, laboratories, clinics). |
| House | A detached building primarily used for long term residential purposes consisting of one dwelling unit. Includes detached residences associated with a non-residential building, and kit and transportable homes. |

GLOSSARY *continued*

| | |
|--|--|
| Industrial | Buildings used for warehousing and the production and assembly activities of industrial establishments, including factories and plants. |
| New | Building activity which will result in the creation of a building which previously did not exist. |
| Non-residential building | Buildings primarily intended for purposes other than long term residence. |
| Offices | Buildings primarily used in the provision of professional services or public administration (e.g. offices, insurance or finance buildings). |
| Other residential building | Buildings other than houses which are primarily used for long-term residential purposes. Other residential buildings includes: semidetached, row or terrace houses or townhouses; and flats, units or apartments. |
| Religious | Buildings used for or associated with worship or in support of programs sponsored by religious bodies (e.g. church, temple, church hall, religious dormitories). |
| Residential building | Buildings primarily used for long-term residential purposes. Residential buildings are categorised as houses or other residential buildings. |
| Retail/wholesale trade | Buildings primarily used in the sale of goods to intermediate and end users. |
| Semidetached, row or terrace houses, townhouses | Dwellings having their own private grounds with no other dwellings above or below. |
| Total residential building | Total residential building is comprised of houses and other residential building. It does not include dwellings in non-residential buildings. |
| Transport | Buildings primarily used in the provision of transport services. Includes: <ul style="list-style-type: none">■ Passenger transport buildings (e.g. passenger terminals);■ Non-passenger transport buildings (e.g. freight terminals);■ Commercial car parks (excluded are those built as part of, and intended to service, other distinct building developments); and■ Other transport buildings n.e.c. |
| Warehouses | Buildings primarily used for storage of goods, excluding produce storage. |
