

Cat. no.: 2068.0

Media: Online

Cost: Free

First Release - 27 June 2007

Second Release - October 2007

Additional data will become available progressively after Second Release.

Interested in a specific Census topic? Want data on a particular area?

Choosing from key Census characteristics of persons, families and dwellings, Census Tables provides you with a single table of Census data for a chosen location. Select an area, pick a topic, it's really just that simple.

Census Tables are designed to assist you in researching, planning and analysing topical issues or areas of interest. It also enables comparisons to be made between different areas on a number of social, economic, and demographic topics.

Who would benefit from using Census Tables?

Aimed at intermediate users, Census Tables will appeal to you if you wish to access a single topic/table rather than a complete profile.

Which Geographic Areas are Census Tables Available for?

All Australian Standard Geographical Classification (ASGC) areas and Census Geographic areas are available. Note: Not all topics may be available for every geography.

What Format are Census Tables Available in?

Census Tables are available in Excel worksheet format from the ABS web site (www.abs.gov.au/census). You have the ability to save and print these files.

18	27,379	26,148	53,527
19	27,793	27,403	55,196
15-19 years	139,345	132,993	272,338
20	28,885	28,176	57,061
21	29,645	29,000	58,645
22	29,547	29,547	59,094

What is the basis of the data?

An important change for the 2006 Census is the switch to 'Place of Usual Residence (where a person usually lives) as the primary basis for releasing Census data. This has replaced data based on Place of Enumeration as the primary method of release.

Place of Enumeration is the location where someone was counted on Census night, 8 August 2006. This count gives a snapshot in any given area. Although the Census is timed to capture the typical situation, holiday areas such as the Gold Coast and snowfields may show a large enumeration count compared to the usual residence count.

Where do I go for more information about Census Tables?
