	13 928.9	14 003.3	0.5
	<b>Jan 2001</b>	<b>Jan 2002</b>	<b>% change</b>
	12 991.2	14 003.3	7.8

### SEASONALLY ADJUSTED ESTIMATES

Turnover at current prices (\$ millions)	<b>Dec 2001</b>	<b>Jan 2002</b>	<b>% change</b>
	13 886.1	14 085.6	1.4
	<b>Jan 2001</b>	<b>Jan 2002</b>	<b>% change</b>
	12 956.9	14 085.6	8.7

## JANUARY KEY POINTS

### TREND ESTIMATES

- The trend estimate of turnover for the Australian Retail and Hospitality/Services series recorded an increase of 0.5% for January 2002. This follows revised increases of 0.6% in December and 0.5% in November 2001.
- All states recorded increases in the trend estimate. The largest increases were recorded in Western Australia and Tasmania.
- Over the three months to January 2002 the trend estimate rose by \$226.4m. The Food retailing (+\$117.9m), Household good retailing (+\$57.0m) and Clothing and soft good retailing (+\$40.7m) industries recorded the largest increases, while the only industry to record a decrease over this period was Hospitality and services (-\$55.3m).

**TAKE CARE!**  
Trend estimates are revised as new monthly data become available.

### SEASONALLY ADJUSTED

- The seasonally adjusted estimate of turnover for the Australian Retail and Hospitality/Services series increased by 1.4% in January 2002 compared with December 2001. This follows increases of 0.2% in December and 0.5% in November 2001.

### ORIGINAL ESTIMATES

- In original terms, Australian turnover increased by 9.9% in January 2002 compared with January 2001. For this period, chains and other large retailers (which are completely enumerated) increased by 11.2%, while 'smaller' retailers (the sampled units) increased by 8.5%.

▪ For further information about these and related statistics, contact Graham Phillips on 02 6252 5625, or the National Information and Referral Service on 1300 135 070.

# NOTES

## FORTHCOMING ISSUES

<i>ISSUE</i>	<i>RELEASE DATE</i>
February 2002	4 April 2002
March 2002	3 May 2002
April 2002	30 May 2002

## CHANGES IN THIS ISSUE

There are no changes in this issue.

## SAMPLING ERRORS

Standard errors for the Australian estimates (original data) for January 2002 contained in this publication are:

<i>DATA SERIES</i>	<i>ESTIMATE</i>	<i>STANDARD ERROR</i>
Level of retail turnover (\$m)	13 972.2	143.9
Change from December to January (\$m)	-3875.7	88.9
% change from December to January	-21.7	0.4

For more information see the Explanatory notes, paragraphs 21–24, or contact Graham Phillips on 02 6252 5625 .

## TREND REVISIONS

Trend estimates can be revised as a result of revisions to the original and seasonally adjusted estimates, and due to the trending methodology itself. The graph below presents the expected range within which, based on past performance of the series, it is expected that the final trend estimates will fall around 90% of the time.

**TAKE CARE!**  
Trend estimates are revised as new monthly data become available.

Barbara Dunlop  
Acting Australian Statistician

# STATE TRENDS

## MONTHLY SEASONALLY ADJUSTED AND TREND ESTIMATES

### NEW SOUTH WALES

The trend growth rate has been slowing since March 2001, with weak growth in the last two months. Clothing and soft good retailing recorded the strongest growth over the last four months.

### VICTORIA

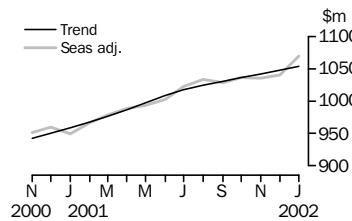

There has been moderate trend growth in each of the last eight months. The Other retailing industry has recorded strong growth in each of the last three months.

### QUEENSLAND

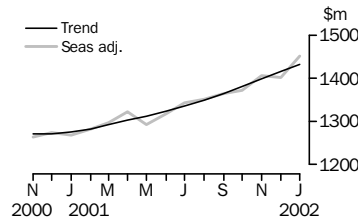

There has been moderate trend growth over the last four months. Department stores, Clothing and soft good and Household good retailing recorded strong growth in each month.

### SOUTH AUSTRALIA

Moderate trend growth has been recorded in each of the last six months. Department stores and Clothing and soft goods retailing have recorded strong growth in each of the last four

### WESTERN AUSTRALIA

Trend growth has been strong in each of the last eight months. In each of these months, growth has been moderate to strong in Food retailing, Other retailing and Hospitality and services.

### TASMANIA

Strong trend growth was recorded in each of the last three months. Clothing and soft good retailing has recorded the strongest growth while Hospitality and services has been in decline.

# INDUSTRY TRENDS

## MONTHLY SEASONALLY ADJUSTED AND TREND ESTIMATES

### FOOD RETAILING

Moderate trend growth was recorded in each of the last ten months. New South Wales, South Australia, Western Australia and the Australian Capital Territory recorded moderate to strong growth in each of these months.

### DEPARTMENT STORES

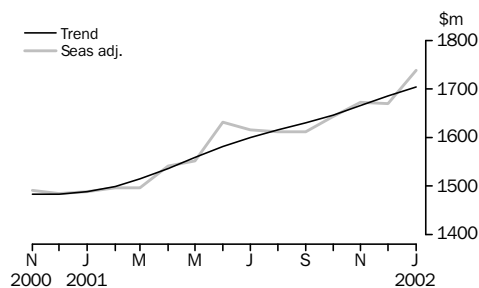

Moderate to strong trend growth has been recorded in each of the last five months. Strong growth has been recorded in Queensland and South Australia in each of the last four months.

### CLOTHING AND SOFT GOOD RETAILING

Strong trend growth has been recorded in each of the last five months. All states except Victoria and the Northern Territory have recorded strong growth in each of the last four months.

### HOUSEHOLD GOOD RETAILING

Strong growth in the trend estimate has been recorded in each of the last eleven months. Queensland has recorded strong growth in each of these months and the Northern Territory recorded strong growth in each of the last ten months.

**MONTHLY SEASONALLY ADJUSTED AND TREND ESTIMATES**

**RECREATIONAL GOOD RETAILING**

After six months of decline, the trend growth rate has increased over the last three months. In the last three months, Queensland, South Australia, Tasmania and the Northern Territory have recorded moderate to strong growth.

**OTHER RETAILING**

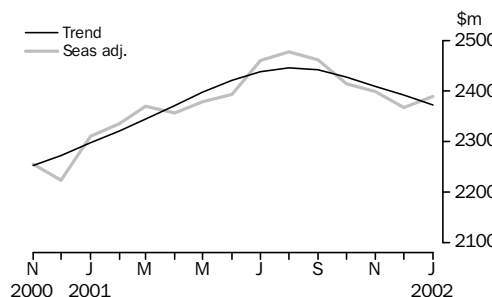

The trend growth rate has been slowing since September 2001. Victoria and Queensland recorded moderate to strong growth in each of the last four months while South Australia was in decline.

**TOTAL RETAIL (excluding Hospitality and Services)**

For the fifth month in a row, growth in the trend estimate for Total retail (excluding Hospitality and services) was stronger than that recorded for Total industries (including the Hospitality and services group).

**HOSPITALITY AND SERVICES**

The trend estimate has been in decline in each of the last five months. New South Wales recorded a decline in each of the last four months, while Queensland and Tasmania have been in decline for a longer period.

## EXPLANATORY NOTES

### INTRODUCTION

**1** This publication presents monthly estimates of the value of turnover of retail businesses classified by industry, and by State. The principal objective of the Retail Trade survey is to show month to month movement of retail turnover.

**2** Estimates of turnover contained in this publication are based on a survey of about 6,600 retail and selected service businesses (covering 20,000 outlets). All 'large' businesses are included in the survey, while a sample of about 3,800 'smaller' businesses is selected. The 'large' business' contribution of approximately 56% of the total estimate ensures a highly reliable Australian total turnover estimate.

### SCOPE AND COVERAGE

**3** The Retail Trade survey covers all employing businesses, with at least one retail establishment. The scope of the survey (classified according to the Australian and New Zealand Standard Industrial Classification [ANZSIC]) is detailed below:

▪Food Retailing

Supermarkets and grocery stores (5110)

and non-petrol sales of identified convenience stores of petrol stations

Takeaway food retailing (5125)

Other food retailing

Fresh meat, fish and poultry retailing (5121)

Fruit and vegetable retailing (5122)

Liquor retailing (5123)

Bread and cake retailing (5124)

Specialised food retailing n.e.c. (5129)

▪Department Stores (5210)

▪Clothing and Soft Good Retailing

Clothing retailing (5221)

Other clothing related retailing

Footwear retailing (5222)

Fabric and other soft good retailing (5223)

▪Household Good Retailing

Furniture and floorcovering retailing

Furniture retailing (5231)

Floor covering retailing (5232)

Domestic hardware and houseware retailing (5233)

Domestic appliance retailing

Domestic appliance retailing (5234)

Recorded music retailing (5235)

▪Recreational Good Retailing

Newspaper, book and stationery retailing (5243)

Other recreational good retailing

Sport and camping equipment retailing (5241)

Toy and game retailing (5242)

Photographic equipment retailing (5244)

▪Other Retailing

Pharmaceutical, cosmetic and toiletry retailing (5251)

Other retailing

Antique and used good retailing (5252)

Garden supplies retailing (5253)

Flower retailing (5254)

Watch and jewellery retailing (5255)

Retailing n.e.c. (5259)

## EXPLANATORY NOTES

### SCOPE AND COVERAGE *continued*

- Hospitality and Services
  - Hotels and licensed clubs
    - Pubs, taverns and bars (5720)
    - Clubs (Hospitality) (5740)
    - Cafes and restaurants (5730)
  - Selected services
    - Video hire outlets (9511)
    - Hairdressing and beauty salons (9526).

**4** The Retail Trade survey, like most ABS economic surveys, takes its frame from the ABS Business Register which is primarily based on registrations to the Australian Taxation Office's Pay As You Go Withholding (PAYGW) scheme (and prior to 1 July 2000 the Group Employer (GE) scheme). The frame is updated quarterly to take account of new businesses, businesses which have ceased employing, changes in employment levels, changes in industry and other general business changes. The estimates include an allowance for the time it takes a newly registered business to get on to the survey frame.

**5** Businesses which have ceased employing are identified when the Australian Taxation Office cancels their PAYGW registration (or previously their GE registration). In addition, from July 1999, businesses which did not remit under the GE scheme for the previous five quarters were removed from the frame. A similar process will be adopted to remove businesses who do not remit under the PAYGW scheme. Updating the frame to take account of changes in employment levels and industry was introduced from the April 2000 reference month. The July 1999 and April 2000 changes resulted in a shift in the level of the Retail series. However, in both cases historic data have been revised to progressively phase in this shift of level. As a result of this process, month to month movements are not perceptibly affected.

### CHANGES TO ABS BUSINESS REGISTER

**6** The introduction of The New Tax System has a number of significant implications for ABS business statistics, and these are discussed in the information paper *ABS Statistics And The New Tax System* (ABS Cat. no. 1358.0). The replacement of the GE registration process by PAYGW registration resulted in a number of changes to most business survey frames. However, an adjustment has been made to the Retail Trade series so that these changes will not affect broader level estimates of level and movement.

**7** From June 2002, the ABS will make further changes to the business surveys including adopting a new units model and expanding the frames to include all units on the Australian Business Register, including non-employers. Further information will be provided before these changes are implemented.

### DEFINITION OF TURNOVER

**8** Turnover includes retail sales; wholesale sales; takings from repairs, meals and hiring of goods (except for rent, leasing and hiring of land and buildings); and commissions from agency activity (e.g. commissions received from collecting dry cleaning, selling lottery tickets, etc.) and net takings from gaming machines etc. From July 2000, turnover includes GST.

### SEASONAL ADJUSTMENT

**9** Seasonally adjusted estimates are derived by estimating and removing systematic calendar related effects from the original series. In the Retail trade series, these calendar related effects are known as seasonal (e.g. increased spending in December as a result of Christmas) and trading day influences (arising from the varying length of each month and the varying number of Sundays, Mondays, Tuesdays, etc. in each month). Each influence is estimated by separate seasonal and trading day factors which, when combined, are referred to as the combined adjustment factors.

**10** The seasonally adjusted estimates also have an allowance for an Easter proximity effect, which is caused when Easter falls late in March or early in April. This effect, when present, is combined with the seasonal and trading day factors to form the combined adjustment factors. See the Appendix of the July 2001 issue of this publication for more information.

## EXPLANATORY NOTES

SEASONAL ADJUSTMENT *continued*

**11** The Retail series uses a concurrent seasonal adjustment methodology to derive the combined adjustment factors. This means that data from the current month are used in estimating seasonal and trading day factors for the current and previous months. Concurrent seasonal adjustment replaced the forward factor methodology from the April 2000 reference month. For more information see *Information Paper: Introduction of Concurrent Seasonal Adjustment into the Retail Trade Series* (Cat. no.8514.0).

**12** Concurrent adjustment can result in revisions each month to estimates for earlier periods. However, in most instances, the only noticeable revisions will be to the combined adjustment factors for the current month, the previous month and the same month a year ago. The following table shows how the combined adjustment factor for these months, at the total Australian Retail, hospitality and services level, evolved under the concurrent seasonal adjustment methodology. The table presents two different estimates of the combined adjustment factors. The first row gives the combined adjustment factors estimated following the last annual reanalysis in July 2001 using data up to and including the June 2001 reference month. The second row gives the most recent combined adjustment factors estimated and used in this month's calculation of the concurrent seasonally adjusted series.

### COMBINED ADJUSTMENT FACTORS

	<i>Jan 2001</i>	<i>Dec 2001</i>	<i>Jan 2002</i>
Factors as estimated at last reanalysis (June 2001 reference month)	0.97697	1.28881	0.98911
Factors as estimated with current month's data (January 2002 reference month)	0.98082	1.28531	0.99195

**13** The seasonal adjustment methodology is able to produce combined adjustment factors for future months. The latest factors for some future months are shown in the following table. While these factors represent the best current estimate, the actual factors used for estimating the seasonally adjusted estimates in these months will differ because they will incorporate subsequent month's data as it becomes available.

### COMBINED ADJUSTMENT FACTORS

	<i>Feb 2002</i>	<i>Mar 2002</i>	<i>Apr 2002</i>
Factors as estimated with current month's data (January 2002 reference month)	0.88467	0.97784	0.95079

**14** The seasonal and trading day factors are reviewed annually at a more detailed level than possible in the monthly processing cycle. The annual reanalysis will not normally result in significant changes. For Retail Trade, the results of the latest review are shown in the July issue each year.

**15** In the seasonal adjustment process, both the seasonal and trading day factors evolve over time to reflect changes in spending and trading patterns. Examples of this evolution include the slow move in spending from December to January; and, increased trading activity on weekends and public holidays. The seasonally adjusted estimates still reflect the sampling and non-sampling errors to which the original estimates are subject.

**16** As a result of the different treatment of Australian and State totals in the seasonal adjustment process, the Australian total for an industry group may not necessarily equal the sum of the State totals for that industry group.

## EXPLANATORY NOTES

### TREND ESTIMATES

**17** Most monthly trend estimates in this publication have been obtained by smoothing the seasonally adjusted series using a centred 13-term Henderson weighted moving average (7-term for quarterly series). However, to estimate the last six monthly trend values (or the last three quarters) a set of asymmetric moving averages is used that have been tailored to reduce a small bias associated with estimating these recent values when the trend growth is increasing or decreasing.

**18** Trend estimates are used to analyse the underlying behaviour of the series over time. As a result of the introduction of The New Tax System, a break in the monthly trend series has been inserted between June 2000 and July 2000. Care should therefore be taken in comparing the series over time. For more details refer to the Appendix in the December 2000 issue of this publication.

**19** For further information on trend estimates, see *Information Paper: A Guide to Interpreting Time Series — Monitoring 'Trends': an Overview* (Cat. no. 1348.0) or contact the Assistant Director, Time Series Analysis on Canberra 02 6252 6345.

### CHAIN VOLUME MEASURES

**20** The chain volume measures of retail turnover appearing in the quarterly issue of this publication are annually reweighted chain Laspeyres indexes referenced to current price values in a chosen reference year (currently 1999–2000). The reference year will be updated in the June quarter publication each year. Each year's data in the Retail chain volume series are based on the prices of the previous year, except for the quarters of the latest incomplete year (i.e. for the 2001–2002 financial year) which are based upon the 1999–2000 financial year. Comparability with previous years is achieved by linking (or chaining) the series together to form a continuous time series.

### RELIABILITY OF ESTIMATES

**21** There are two types of error possible in estimates of retail turnover:

*Sampling error* which occurs because a sample, rather than the entire population, is surveyed. One measure of the likely difference resulting from not including all establishments in the survey is given by the standard error, see below.

*Non sampling error* which arises from inaccuracies in collecting, recording and processing the data. The most significant of these errors are: misreporting of data items; deficiencies in coverage; non-response; and processing errors. Every effort is made to minimise reporting error by the careful design of questionnaires, intensive training and supervision of interviewers, and efficient data processing procedures.

### STANDARD ERRORS

**22** Seasonally adjusted and trend estimates and chain volume measures are also subject to sampling variability. For seasonally adjusted estimates, the standard errors are approximately the same as for the original estimates. For trend estimates, the standard errors are likely to be smaller. For chain volume measures, the standard errors may be up to 10% higher than those for the corresponding current price estimates because of the sampling variability contained in the prices data used to deflate the current price estimates.

**23** To assist users in assessing the reliability of estimates, each data series has been given a grading of A to E. Where:

- A represents a relative standard error on level of less than 2%. The published estimates are highly reliable for movement analysis;
- B represents a relative standard error on level between 2 and 5%, meaning the estimate is reliable for movement analysis purposes;
- C represents a relative standard error on level between 5 and 10%, meaning users are advised to exercise some caution in interpreting movements for such series;
- D represents a relative standard error on level between 10 and 15% meaning users are advised to exercise caution in interpreting movements for such series; and
- E represents a relative standard error on level greater than 15% (mainly affects unpublished state by industry series).

## EXPLANATORY NOTES

STANDARD ERRORS *continued*

**24** The table below provides an indicator of reliability for key retail turnover estimates.

	<i>Food retailing</i>	<i>Department stores</i>	<i>Clothing and soft good retailing</i>	<i>Household good retailing</i>	<i>Recreational good retailing</i>	<i>Other retailing</i>	<i>Hospitality and services</i>	<i>Total</i>

ABS DATA AVAILABLE ON REQUEST

**25** Retail Survey Special Data Service provides additional retail trade statistics which include further State industry dissections through to 'top ten' industry reports. For more information, contact the Retail Trade Special Data Services manager on Canberra 02 6252 5220.

RELATED PUBLICATIONS

**26** Current publications produced by the ABS are listed in the *Catalogue of Publications and Products, Australia* (Cat. no. 1101.0). The ABS also issues, on Tuesdays and Fridays, a *Release Advice* (Cat. no. 1105.0) which lists publications to be released in the next few days. The Catalogue and Release Advice are available from any ABS office.

## FOR MORE INFORMATION...

- INTERNET* **www.abs.gov.au** the ABS web site is the best place to start for access to summary data from our latest publications, information about the ABS, advice about upcoming releases, our catalogue, and Australia Now—a statistical profile.
- LIBRARY* A range of ABS publications is available from public and tertiary libraries Australia-wide. Contact your nearest library to determine whether it has the ABS statistics you require, or visit our web site for a list of libraries.
- CPI INFOLINE* For current and historical Consumer Price Index data, call 1902 981 074 (call cost 77c per minute).
- DIAL-A-STATISTIC* For the latest figures for National Accounts, Balance of Payments, Labour Force, Average Weekly Earnings, Estimated Resident Population and the Consumer Price Index call 1900 986 400 (call cost 77c per minute).

## INFORMATION SERVICE

Data which have been published and can be provided within five minutes are free of charge. Our information consultants can also help you to access the full range of ABS information—ABS user-pays services can be tailored to your needs, time frame and budget. Publications may be purchased. Specialists are on hand to help you with analytical or methodological advice.

- PHONE* **1300 135 070**
- EMAIL* **client.services@abs.gov.au**
- FAX* 1300 135 211
- POST* Client Services, ABS, GPO Box 796, Sydney 1041

## WHY NOT SUBSCRIBE?

ABS subscription services provide regular, convenient and prompt deliveries of ABS publications and products as they are released. Email delivery of monthly and quarterly publications is available.

- PHONE* 1300 366 323
- EMAIL* subscriptions@abs.gov.au
- FAX* 03 9615 7848
