NOTES

ABOUT THIS PUBLICATION

For Australia, this publication contains estimates of the resident population of Statistical Local Areas (SLAs), Local Government Areas (LGAs), Statistical Subdivisions (SSDs), Statistical Divisions (SDs), Statistical Districts, states and territories at June 1997, 2001 and 2002, according to the 2002 edition of the Australian Standard Geographical Classification (ASGC). Growth rates for these areas are also provided. Estimates for 1997 and 2002 are final estimates, based on results of the 2001 Census of Population and Housing, while 2002 estimates are preliminary.

Final estimates for Statistical Local Areas for all years between 1996 and 2001, according to the 2001 edition of the Australian Standard Geographical Classification, are scheduled for release on 23 May 2003 in *Census of Population and Housing: Population Growth and Distribution, Australia, 2001* (cat. no. 2035.0).

For New Zealand, this publication contains final estimates of the resident population of Regional Councils and Territorial Authorities at June 1997 and 2001, and preliminary estimates for 2002, based on results of the New Zealand 2001 Census of Population and Dwellings. Growth rates for these areas are also provided.

CHANGES IN THIS ISSUE

For the first time, estimates of the resident population for 32 Queensland Aboriginal and Island Council Areas have been produced. For more detail see page 21 and paragraph 14 of the Explanatory Notes.

ROUNDING

In commentary based on statistics in this publication, it is recommended that the relevant statistics be rounded. All data are affected by errors in reporting and processing. While unrounded figures are provided in tables, accuracy to the last digit is not claimed and should not be assumed. No reliance should be placed on statistics with small values.

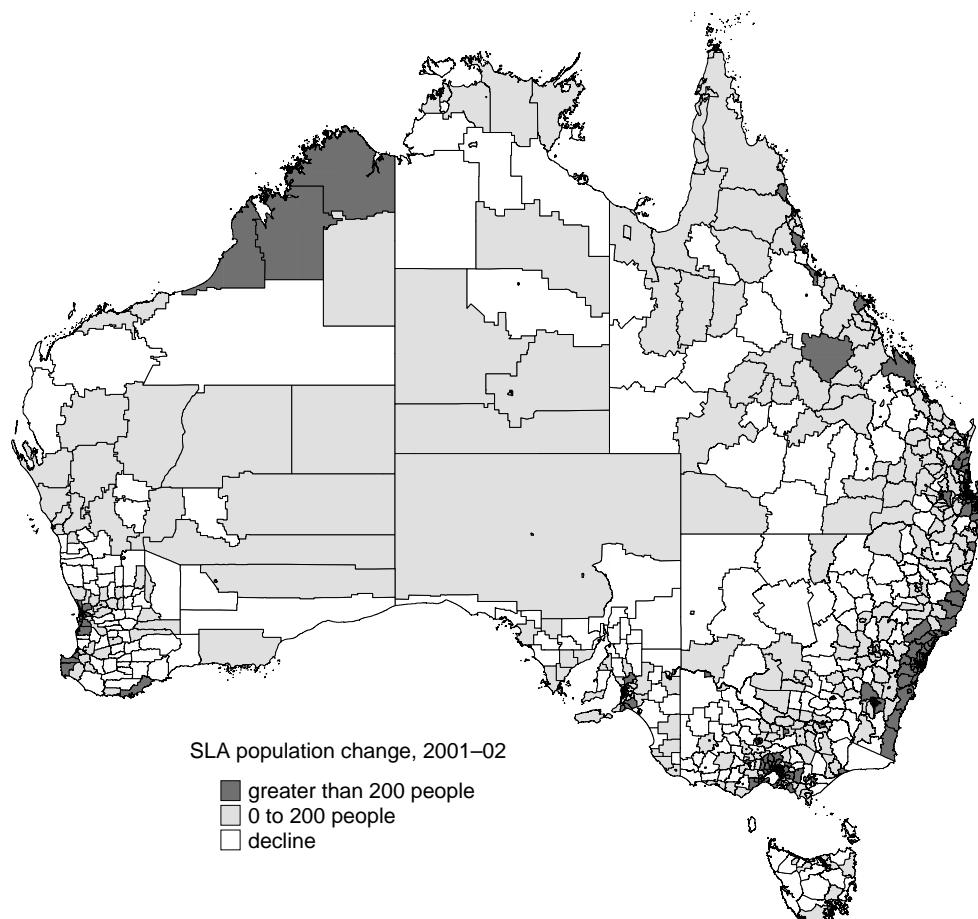

Dennis Trewin
Australian Statistician

MAIN FEATURES

POPULATION INCREASE

- Australia's estimated resident population at June 2002 was 19.7 million people, an increase of 249,500 people over June 2001. This represents an annual growth rate of 1.3%, slightly higher than the average annual growth rate of 1.2% for the five years to June 2001.
- All states and territories experienced population growth in 2001–02, with the largest increases occurring in Queensland (up 78,200 people), Victoria (up 67,800 people) and New South Wales (up 65,100 people).
- Three states recorded annual growth rates greater than Australia's overall growth rate in 2001–02. These were Queensland, which increased by 2.2%, and Victoria and Western Australia, which each increased by 1.4%.
- The remaining states and territories recorded lower annual growth rates than Australia, with New South Wales increasing by 1.0%, the Australian Capital Territory by 0.8% and South Australia by 0.6%. Tasmania and the Northern Territory recorded only small increases of 0.2% and 0.1% respectively.
- Of the 576 Local Government Areas (LGAs) in Australia with populations of greater than 1,000 people at June 2001, 59% (337 LGAs) experienced population growth of 0.3% or more in 2001–02 while 23% (134 LGAs) decreased by 0.3% or more. The remainder (18%, or 105 LGAs) experienced relatively little change in population size in 2001–02 (increasing or decreasing by 0.2% or less).

SLA population change, Australia—2001–02

MAIN FEATURES *continued*

CAPITAL CITY GROWTH

- At June 2002, capital city SDs were home to nearly two-thirds (64%, or 12.5 million people) of Australia's population. Growth in the combined capital city SDs occurred at an annual rate of 1.3% in the year to June 2002.
- Melbourne SD recorded the largest increase in population of Australia's capital city SDs in 2001–02 (up 52,500 people), followed by Sydney (up 42,700 people) and Brisbane (up 38,700 people).
- Brisbane SD was the fastest growing capital city in 2001–02, increasing by 2.3%, followed by the Melbourne and Perth SDs (each up 1.5%).

Outer suburban growth

- Much of Australia's growth occurred in the outer LGAs of capital city SDs. In Sydney SD, the LGAs of Blacktown (C), Baulkham Hills (A) and Liverpool (C) experienced large growth (up 5,300, 4,500 and 4,400 people respectively), while the largest growth within Melbourne SD occurred in the fringe LGAs of Casey (C), Melton (S) and Wyndham (C) (up 10,100, 5,900 and 5,500 people respectively).
- Outer suburban areas in the smaller capital cities also experienced significant growth, such as occurred in the Brisbane Statistical Local Areas (SLAs) of Parkinson-Drewvale and Doolandella-Forest Lake. In South Australia the largest growth in LGA populations was recorded in the outer suburban LGAs of Salisbury (C) and Onkaparinga (C), while in Perth the fringe LGAs of Wanneroo (C), Swan (C) and Rockingham (C) experienced large growth. Palmerston (C), on the outskirts of Darwin, recorded the largest growth of any Northern Territory LGA, while Amaroo, on the northern fringe of Canberra, and Dunlop, to the north-west, experienced the largest growth amongst SLAs in the Australian Capital Territory.

Inner city growth

- Many of Australia's inner city areas experienced high levels of growth during 2001–02. The LGA of Perth (C) recorded Australia's highest annual growth rate of 11.8%, while the LGAs of Sydney (C) and Melbourne (C) also experienced rapid growth, increasing by 6.8% and 6.5% respectively in 2001–02. Elsewhere in Australia, other inner city areas to experience high levels of growth were the Brisbane SLAs of City - Inner and Newstead, the Darwin SLA of City - Inner and the Canberra SLA of Braddon.

GROWTH ALONG THE COAST

- Generally, the largest growth outside capital city SDs occurred in coastal Australia. The city of Gold Coast in Queensland recorded the second largest increase in population of all LGAs in Australia during 2001–02 (up 14,800 people), while strong growth continued in many other Queensland coastal areas, such as Pine Rivers (S), Maroochy (S) and Caloundra (C).
- In New South Wales, increases in population were recorded in every coastal LGA outside the Sydney SD, with the largest occurring in Shoalhaven (C), Hastings (A) and Tweed (A), while the Victorian LGAs of Bass Coast (S) and Surf Coast (S) continued to experience strong growth in 2001–02. In South Australia, the populations of Alexandrina (DC) and Victor Harbor (C) continued to grow, and in Western Australia the coastal LGAs of Busselton (S), Mandurah (C) and Broome (S) experienced continuing strong growth.

MAIN FEATURES *continued*

GROWTH IN REGIONAL CENTRES

- Various regional centres throughout Australia continued to gain population during 2001–02, such as the New South Wales LGAs of Maitland (C) and Queanbeyan (C), the statistical district of Albury-Wodonga on the New South Wales/Victorian border, and the Victorian LGAs of Greater Geelong (C), Greater Bendigo (C) and Ballarat (C). A number of coastal regional centres, such as Cairns (C) in Queensland and Port Lincoln (C) in South Australia, also experienced growth in 2001–02.

SMALL AREA DECLINE

- All of the twenty fastest decreasing LGA populations in Australia in 2001–02 were located in state and territory balances. The five fastest declining LGAs were Coober Pedy (DC) and Peterborough (DC) in the balance of South Australia (down 4.2% and 3.3% respectively), Bruce Rock (S) and Dalwallinu (S) in the balance of Western Australia (down 3.8% and 3.7% respectively), and West Coast (M) in the balance of Tasmania (down 3.0%).
- The largest decline in population in 2001–02 occurred in the Sydney LGA of Canterbury (C), which decreased by 690 people, followed by Geraldton (C) in the balance of Western Australia (down 400 people), Waverley (A) in the Sydney SD (down 380 people), Mount Isa (C) in the balance of Queensland (down 360 people), and Whitehorse (C) in the Melbourne SD (down 330 people).

POPULATION CHANGE AUSTRALIA

NATIONAL GROWTH

Australia's estimated resident population at June 2002 was 19.7 million, up 249,500 people over the June 2001 population. This represents an annual growth rate of 1.3% since June 2001, slightly higher than the annual average growth rate of 1.2% for the five years to June 2001.

Natural increase (the excess of the number of births over the number of deaths) contributed 115,900 people to Australia's population in 2001–02, while net overseas migration contributed 133,700 people.

FASTEST AND LARGEST GROWTH IN QUEENSLAND, WHILE NORTHERN TERRITORY GROWTH DROPS

The fastest population growth of the states and territories in 2001–02 was recorded in Queensland, which increased by 2.2%. This was Queensland's highest annual growth rate since 1996 when the population increased by 2.3%. Queensland's increase in population of 78,200 people in 2001–02 was also the largest population increase of the states and territories, and resulted from net interstate migration of 29,000 people, net overseas migration of 24,900 people and natural increase of 24,300 people.

The Northern Territory's annual growth rate has declined since 1997, reaching 0.1% in 2001–02. This was the lowest growth rate of the states and territories, and was the lowest recorded in the Northern Territory since 1974–75 when the population decreased by over ten thousand people due to large net migration losses as a result of Cyclone Tracy in December 1974.

NEW SOUTH WALES AND VICTORIA

New South Wales (NSW), with a population of 6.6 million people, experienced the third largest increase in population in 2001–02, up 65,100 people (or 1.0%). Net overseas migration added 51,300 people, natural increase added 37,600 people and net interstate migration removed 23,800 people from NSW's population.

Population growth in Victoria has accelerated in recent years, reaching 1.4% in 2001–02 compared to an average annual growth rate of 1.1% for the five years to June 2001. In 2001–02 net overseas migration added 34,200 people to Victoria's population, natural increase added 27,300 people and net interstate migration added 6,200 people, resulting in a total increase in population of 67,800 people, the second largest increase of the states and territories.

POPULATION CHANGE IN THE SMALLER STATES AND TERRITORIES

The population of Western Australia increased by 1.4% (or 26,200 people) during 2001–02, slightly less than the average annual growth rate of 1.5% recorded during the five years to June 2001. South Australia increased by 0.6% (or 8,500 people).

Tasmania's population increased by 930 people (or 0.2%) in 2001–02, after declining by 2,600 people (or down 0.1% per year) between June 1996 and June 2001.

The Australian Capital Territory (ACT), with a population of 321,800 people, recorded an 0.8% increase in population (or 2,500 people) during 2001–02, similar to the average annual growth rate of 0.7% recorded during the five years to June 2001.

POPULATION CHANGE AUSTRALIA *continued*

CAPITAL CITY AND STATE BALANCE POPULATION CHANGE

At June 2002 capital city SDs were home to 12.5 million people, around two-thirds (64%) of Australia's population. This was the same proportion as in 1997. Altogether the capital city SDs increased by 164,500 people in 2001–02, accounting for 66% of Australia's growth for the year.

The population of the combined state balances (those areas outside the capital city SDs) was 7.1 million people at June 2002, accounting for 36% of Australia's population, and increased by 85,000 people in 2001–02.

The annual growth rate of the population of the combined capital city SDs during 2001–02 was 1.3%, while the combined state balances grew by 1.2%. Capital city growth was higher than state balance growth in all states and territories.

The largest growth among capital cities in 2001–02 occurred in the Melbourne SD (up 52,500 people), followed by Sydney SD (up 42,700 people) and Brisbane SD (up 38,700 people). Brisbane SD was the fastest growing capital city in Australia in 2001–02, increasing by 2.3%, followed by the Melbourne and Perth SDs (each up 1.5%).

Greater Hobart SD recorded the lowest growth rate of Australia's capital city SDs in 2001–02, increasing by 0.4%. Darwin SD recorded the second lowest annual growth rate of 0.5%, in contrast to the five years to June 2001 when it was the fastest growing capital city SD in Australia with an average annual growth rate of 2.2%.

POPULATION DENSITY

Australia's population density at June 2002 was 2.6 people per square kilometre, compared to 2.4 people per square kilometre in 1997. The ACT had the highest population density of the states and territories at June 2002 with 137 people per square kilometre, followed by Victoria with 21 people per square kilometre. The Northern Territory had a population density of only 0.1 people per square kilometre, the lowest of the states and territories.

Population density at June 2002 was highest in the city centres, particularly in the Sydney SD, where the three most densely populated SLAs in Australia were located. These were Sydney (C) - Remainder (8,000 people per square kilometre), Waverley (A) (6,800 people) and North Sydney (5,600 people). Fourth on the list, and the most densely populated SLA in Victoria, was Port Phillip (C) - St. Kilda, with 5,500 people per square kilometre. At the other extreme, there were around 250 SLAs in Australia with less than 1 person per square kilometre.

POPULATION CHANGE AUSTRALIA *continued*

CENTRE OF POPULATION

The centre of population is one measure to describe the spatial distribution of the population. This point marks the average latitude and longitude around which the population is distributed. At June 2002 the centre of Australia's population was located around 55 kilometres east of the town of Ivanhoe in the LGA of Central Darling (A), reflecting the concentration of the population in the south-east of Australia, particularly in Sydney and Melbourne.

Between June 1997 and June 2002 the centre of Australia's population moved around 5.5 kilometres northward, from within the LGA of Carrathool (A) to the LGA of Central Darling (A), as a result of population growth in northern Australia.

Centre of population, Australia—June 1997 and June 2002

(b) Based on population change between 2001 and 2002.

(c) Average annual growth rate.

POPULATION CHANGE NEW ZEALAND

NATIONAL GROWTH

The estimated resident population of New Zealand at June 2002 was 3.9 million people, up 58,600 people since June 2001. New Zealand's annual growth rate of 1.5% during 2001–02 was the highest recorded rate since 1995–96, and was almost double the average annual growth rate recorded for the period June 1997 to June 2002.

Fourteen of New Zealand's seventy-four territorial authorities (six cities and eight districts) had annual growth rates which exceeded the national rate of 1.5% from June 2001 to June 2002, three territorial areas had the same growth rate as New Zealand overall, and fifty-seven had growth rates less than the national rate.

GREATEST GROWTH IN THE NORTH ISLAND

During 2001–02 the population of the North Island increased by 47,300 people (or 1.6%), while the population of the South Island increased by 11,500 people (or 1.2%). At June 2002 an estimated 3.0 million people lived in the North Island, accounting for just over three-quarters of New Zealand's population, and 0.9 million people lived in the South Island, accounting for just under one-quarter of New Zealand's population.

Auckland continues strong growth

The four cities within the Auckland Region continued to experience strong population growth in 2001–02, with Auckland City itself increasing by 12,700 people (or 3.3%), Manukau City by 8,900 people (3.0%), North Shore City by 4,800 people (2.5%) and Waitakere City by 4,600 people (2.6%). These increases were the first, second, fourth and fifth largest increases in territorial authority populations in New Zealand during 2001–02. Overall the population of the Auckland Regional Council increased by 34,600 people, by far the largest increase recorded amongst New Zealand's sixteen regional councils and accounting for almost three-quarters (73%) of population growth in the North Island during 2001–02.

GROWTH WITHIN TERRITORIAL AUTHORITIES

The city of Christchurch, in the South Island, experienced the third largest increase in population (up 5,000 people or 1.5%) of New Zealand's territorial authorities in the year to June 2002, while the adjacent districts of Selwyn (up 3.2% or 900 people) and Waimakariri (up 2.6% or 1,000 people) experienced high rates of growth.

The city of Wellington increased in population by 3,500 people (or 2.0%), while other North Island areas to experience high growth rates in 2001–02 were Rodney District (up 3.3% or 2,600 people), Hamilton City (up 2.1% or 2,500 people) and Tauranga District (up 2.5% or 2,300 people).

Queenstown-Lakes District continued as New Zealand's fastest growing territorial authority, with growth accelerating to 8.1% (up 1,450 people) during 2001–02, compared to an average annual growth rate of 4.6% over the five years to June 2002.

POPULATION DECLINE

Twenty-four of New Zealand's seventy-four territorial authorities experienced population decline in 2001–02. The largest losses were located in the North Island, in the districts of Ruapehu (down 450 people or -3.0%), South Waikato (down 400 people or -1.7%), and Gisborne, South Taranaki and Wanganui (each down 300 people).

POPULATION CHANGE NEW SOUTH WALES

STATE SUMMARY

At June 2002 the estimated resident population of New South Wales (NSW) was 6.6 million, an increase of 65,100 people since June 2001. The annual growth rate of 1.0% was less than the average annual growth rate of 1.2% recorded in the five years to June 2001.

Natural increase contributed 37,600 people to NSW's population during 2001–02 while net overseas migration added 51,300 people. In contrast, 23,800 people left NSW for another part of Australia. The increase in interstate migration to other states, compared to previous years, was the main cause of NSW's lower growth rate in 2001–02.

SYDNEY SD

Growth in Sydney SD

Sydney's population of 4.2 million people represented nearly two-thirds (63%) of NSW's population. During the year to June 2002, the population of Sydney SD increased by 42,700 people (or 1.0%).

The five largest increases in population in NSW in 2001–02 occurred in the Sydney SD, with the population of Blacktown (C) increasing by 5,300 people, Baulkham Hills (A) by 4,500, Liverpool (C) by 4,400, South Sydney (C) by 2,800 and Wyong (A) by 2,700.

High annual growth rates were also recorded in many of Sydney's LGAs in 2001–02, with six of the ten fastest growing LGAs in NSW being located within the Sydney SD. The population of the inner city LGA of Sydney (C) continued to grow rapidly, with the fastest annual growth rate in NSW of 6.8% (or 2,000 people). Camden (A), the second fastest growing LGA in NSW, increased by 5.3% (or 2,400 people), while South Sydney (C) experienced the third highest annual growth rate, increasing by 3.2% (or 2,800 people).

LGAs WITH LARGEST AND FASTEST POPULATION GROWTH, New South Wales

Wyong (A)	2 700	2.0	Murray (A)	170	2.8

Population losses in Sydney SD

Only five of Sydney's LGAs experienced population decline during 2001–02. Canterbury (C) experienced the largest loss in NSW, down 690 people. Waverley (A) declined by 380 people, Marrickville (A) by 160 people, Fairfield (C) by 150 people and Ashfield (A) by 120 people.

POPULATION CHANGE NEW SOUTH WALES *continued*

COASTAL GROWTH

All LGAs in coastal NSW outside the Sydney SD experienced population growth during 2001–02. Their aggregated population of 1.3 million people made up almost one-fifth of NSW's total population, and increased by 16,100 people at a slightly lower rate of 1.3% during 2001–02 than during the five years to June 2001 (an average increase of 1.5% per year).

The LGA of Shoalhaven (C) recorded the largest increase in population of NSW's coastal LGAs outside Sydney SD in 2001–02, up 1,800 people (or 2.0%). Hastings (A) experienced the second largest increase, up 1,700 people or 2.6%, which was also the fastest increase in population of NSW's coastal LGAs. Tweed (A) also increased by 1,700 people, with an annual growth rate of 2.2%. Other increases in population occurred in Wollongong (C) (up 1,500 people), Port Stephens (A) and Coffs Harbour (C) (each up 1,200 people), and Newcastle (C) (up 1,100 people). Great Lakes (A) recorded the second fastest increase in population of NSW's coastal LGAs, up 2.3% or 730 people.

INLAND POPULATION CHANGE

In the year to June 2002 the combined population of NSW's inland LGAs outside Sydney SD increased by 6,400 people or 0.5%. This growth rate was slightly lower than the average annual growth rate of 0.6% over the period June 1996 to June 2001. Just over half (54%) of NSW's inland LGAs experienced population growth in 2001–02.

The largest population increases in inland LGAs in 2001–02 occurred in Maitland (C) (up 1,300 people or 2.3%), Queanbeyan (C) (up 880 people or 2.7%, making it the second fastest growing inland LGA in NSW in 2001–02), Wingecarribee (A) (up 780 people), Albury (C) (up 450 people) and Wagga Wagga (C) (up 410 people). The fastest growing inland LGA was Murray (A) which increased by 2.8% (or 170 people) during 2001–02.

Inland LGAs to record the fastest decreases in population in 2001–02 were Barraba (A) and Bingara (A) (each down 1.3%), Central Darling (A) and Coonabarabran (A) (each down 1.1%) and Broken Hill (C) (down 0.9%). Broken Hill (C) also recorded the largest numerical decrease in population of inland LGAs in 2001–02, down 190 people.

POPULATION CHANGE VICTORIA

STATE SUMMARY

The estimated resident population of Victoria at June 2002 was 4.9 million, an increase of 67,800 people since June 2001. This represents an annual growth rate of 1.4%, Victoria's highest annual growth rate since 1990 when the population increased by the same proportion.

GROWTH IN MELBOURNE

At June 2002 there were an estimated 3.5 million people resident in Melbourne SD, representing an increase of 52,500 people between June 2001 and June 2002.

Melbourne's annual growth rate of 1.5% over this period was greater than the average annual growth rate recorded between June 1996 and June 2001 of 1.1%.

Growth in the outer suburbs

Continuing the trend of the 1990s, the areas to experience the largest population growth in Victoria in 2001–02 were located on the outer suburban fringe of the Melbourne SD.

Casey (C) experienced the largest population growth of all LGAs in Victoria, increasing by 10,100 people (or 5.5%). The majority of growth occurred within the SLA of Casey (C) - Berwick, which grew by 6,400 people (or 9.5%), while the SLA of Casey (C) - Cranbourne increased by 3,100 people (or 6.1%).

The population of Melton (S) increased by 5,900 people, the second largest increase recorded in Victoria during 2001–02. With an annual growth rate of 11.2%, Melton (S) was the fastest growing LGA in Victoria and the second fastest growing LGA in Australia. The majority of the growth in Melton (C) occurred in the SLA of Melton (S) - East (including suburbs such as Caroline Springs, Burnside and Hillside) which increased by 5,300 people (or 33%).

Wyndham (C), to the south-west of the Melbourne city centre, experienced the third largest increase in population in Victoria, up 5,500 people (or 6.3%) in 2001–02.

Growth in the inner city

Strong growth in the LGA of Melbourne (C) continued during 2001–02, which increased by 3,300 people (or 6.5%). Almost half of the growth occurred in the SLA of Melbourne (C) - Southbank-Docklands, which increased by 1,500 people (or 34%). The population of the SLA of Melbourne (C) - Inner also experienced strong growth, up 1,000 people (or 16%).

POPULATION CHANGE VICTORIA *continued*

GROWTH IN REGIONAL VICTORIA

In the year to June 2002, the balance of Victoria's population increased by 15,300 people (or 1.2%) to 1.3 million people. This was a continuation of the acceleration in growth experienced since the mid-1990s. The average growth rate of the balance of Victoria between June 1996 and June 2001 was 0.9% per year.

During the year to June 2002, all statistical divisions in Victoria experienced population growth, with the exception of the Wimmera SD which experienced a slight decrease (down 70 people or 0.1%). Barwon SD grew by 4,800 people (or 1.9%) while the populations of the Goulburn and Loddon SDs increased by 2,500 and 2,100 people respectively.

Of Victorian regional centres, Greater Geelong (C) experienced the largest increase in the year to June 2002, up 3,700 people (or 1.9%), followed by Greater Bendigo (C) (up 1,400 people) and Ballarat (C) (up 1,200 people).

Continuing recent trends, two of the fastest growing areas in Victoria in the year to June 2002 were the coastal LGAs of Bass Coast (S), which increased by 4.5% (or 1,100 people), and Surf Coast (S) which increased by 3.6% (or 750 people). Both areas include popular tourist and retirement destinations, notably Phillip Island in Bass Coast (S), and the Great Ocean Road in Surf Coast (S).

POPULATION DECLINE

The largest decline in population in Victoria in the year to June 2002 was recorded in the LGA of Whitehorse (C), which decreased by 330 people. The populations of Greater Dandenong (C) and Monash (C) decreased by 320 and 230 people respectively.

The fastest population declines in regional Victoria during the year to June 2002 were recorded in the LGAs of West Wimmera (S) and Buloke (S), both of which decreased by 1.0%, and Yarriambiack (S) which declined 0.9%. These losses were less severe than the declines that occurred between June 1996 and June 2001, when West Wimmera (S) decreased on average by 1.2% per year, Buloke (S) decreased by 1.6% per year and Yarriambiack (S) decreased by 1.4% per year.

POPULATION CHANGE QUEENSLAND

STATE SUMMARY

The estimated resident population of Queensland increased by 78,200 people in the year to June 2002, to reach 3.7 million people. The corresponding annual growth rate of 2.2% was the highest of all states and territories.

THE SOUTH-EAST

The south-east corner of Queensland, consisting of the Moreton and Brisbane SDs, experienced an increase in population of 61,900 people in 2001–02, accounting for almost four-fifths (79%) of Queensland's total population growth. Almost two-thirds (66%) of Queensland's population resides in this region.

Moreton SD, which includes the Gold Coast and Sunshine Coast, recorded the highest annual growth rate of all Queensland statistical divisions during 2001–02, increasing by 3.2% (or 23,100 people). The population of Brisbane SD increased by 2.3% (or 38,700 people) to reach 1.7 million people at June 2002.

LARGE INCREASES IN BRISBANE AND GOLD COAST

Brisbane and Gold Coast LGAs

The two largest LGAs in Queensland again experienced the largest increases in population in Queensland, and in Australia, in 2001–02. Brisbane (C), with a population of 917,200 people, increased by 20,600 people (or 2.3%) and the Gold Coast (C), with a population of 438,500 people, increased by 14,800 people (or 3.5%).

Within the Brisbane LGA itself, new housing estates in a number of SLAs accounted for large increases in population. The southern SLAs of Parkinson-Drewvale and Doolandella-Forest Lake again experienced the largest increases in population in Brisbane, up 1,400 people (or 21.8%) and 880 people (or 6.1%) respectively in 2001–02.

Robina recorded the largest increase in population of all SLAs within the city of Gold Coast in the year to June 2002, up 2,300 people. This was followed by the low-density SLAs of Guanaba-Currumbin Valley and Coomera-Cedar Creek which increased by 2,000 and 1,100 people respectively.

Pine Rivers and Redland shires

The shires of Pine Rivers and Redland in the Brisbane SD recorded population increases of 5,100 and 3,100 people respectively in 2001–02, reflecting the continuing high growth of new housing estates in these areas. The Pine Rivers SLA of Griffin-Mango Hill was the fastest growing SLA in Queensland, increasing by 47% in 2001–02 (or 1,500 people).

POPULATION CHANGE QUEENSLAND *continued*

DECLINING POPULATIONS

Some of the largest declines in population in Queensland in 2001–02 were in mining areas, with the largest and fastest decline recorded in the large north-western centre of Mount Isa (C) (down 360 people or 1.7%). The mining-related LGAs of Duaringa (S) (down 80 people or 1.2%), Banana (S) (down 70 people or 0.5%) and Taroom (S) (down 50 people or 1.7%) all recorded decreases in population associated with changes in the mining industry and the completion of various construction and related projects.

(a) Excludes LGAs with an ERP of less than 1,000 at June 2001.

ABORIGINAL AND ISLAND COUNCIL AREAS

For the first time, the Australian Bureau of Statistics (ABS) has produced estimates of the resident population for 32 Queensland Aboriginal and Island Council Areas. In previous years, the populations of these areas were included in the estimates of the LGAs in which they were previously incorporated. For example, estimates for the Aboriginal Council Areas of Hope Vale, Lockhart River, Mapoon, Napranum and Pormpuraaw were included in Cook Shire. For further details see Appendix 1 and paragraph 14 of the Explanatory Notes.

The populations of Aboriginal and Island Council Areas are relatively small, with the largest being Palm Island (2,400 people at June 2002) and Yarrabah (2,300 people), and the smallest Ugar (60 people). Most of the areas recorded small population increases in the year to June 2002, the largest being Palm Island's increase of 60 people. Small declines were recorded in Lockhart River and Ugar.

POPULATION CHANGE SOUTH AUSTRALIA

STATE SUMMARY

South Australia's estimated resident population at June 2002 was 1.5 million, an increase of 8,500 people since June 2001. South Australia's annual growth rate of 0.6% was slightly higher than the average annual growth rate recorded between June 1996 and June 2001 of 0.5%.

POPULATION GROWTH IN ADELAIDE

Adelaide SD

The population of the Adelaide SD was 1.1 million people at June 2002, an increase of 6,300 people (or 0.6%, the same annual growth rate as South Australia overall) since June 2001. Adelaide's share of South Australia's population has remained steady over the past five years at 73%.

The four largest increases in LGA populations in South Australia in 2001–02 occurred within the Adelaide SD. These were Salisbury (C) which increased by 1,300 people (or 1.2%), Onkaparinga (C) which increased by 1,100 people, and Port Adelaide Enfield (C) and Playford (C), each of which increased by 730 people.

The fastest growing LGA in the Adelaide SD was Gawler (M), which increased by 1.7% (310 people) during 2001–02.

Outer Adelaide SD

The Outer Adelaide SD continued to record the highest annual growth rate of South Australia's SDs in 2001–02, increasing by 2.0% (or 2,300 people).

The five fastest growing LGAs in South Australia in the year to June 2002 were all part of the Outer Adelaide SD. The population of Victor Harbor (C) increased by 2.9% (or 330 people), followed by Alexandrina (DC), Kangaroo Island (DC) and Light (RegC), each up by 2.7%, and Mount Barker (DC) which increased by 2.4%. Mount Barker's increase of 560 people was the fifth largest gain in population in South Australia.

The only LGA within the Adelaide and Outer Adelaide SDs to record a decrease in population in 2001–02 was Unley (C), which lost 30 people (or –0.1%).

POPULATION CHANGE SOUTH AUSTRALIA *continued*

POPULATION CHANGE IN THE REMAINDER OF SOUTH AUSTRALIA

Population growth

Increases in population in the remainder of South Australia in 2001–02 were generally smaller than those recorded within the Adelaide and Outer Adelaide SDs.

Murray Bridge (RC) increased by 180 people, Port Lincoln (C) increased by 150 people and Grant (DC) gained 90 people. Growth in Roxby Downs (M) slowed in 2001–02 to 1.8% (or 70 people), compared to an average growth rate of 6.1% per year for the five years to June 2001 (the highest average annual growth rate of all South Australian LGAs for the period).

Population decline

The largest decreases in population in South Australia in 2001–02 occurred in Whyalla (C) which lost 240 people, Port Augusta (C) which lost 160 people, and Coober Pedy (DC) which lost 100 people. Coober Pedy's annual growth rate of -4.2% was the fastest decrease in population of all South Australian LGAs in 2001–02.

FASTEST DECLINE					

POPULATION CHANGE WESTERN AUSTRALIA

STATE SUMMARY

The estimated resident population of Western Australia at June 2002 was 1.9 million, an increase of 26,200 people (or 1.4%) since June 2001.

In the year to June 2002 the population of the Perth SD increased at a higher rate than the remainder of Western Australia (1.5% compared to 1.1% respectively).

PERTH SD

The population of Perth SD increased by 20,600 people during 2001–02 to reach 1.4 million people, accounting for almost three-quarters (73%) of the total population of Western Australia.

Four of the five largest increases in LGA populations in Western Australia in 2001–02 were recorded in the Perth SD, as more land on the metropolitan fringe was made available for urban development. These were the LGAs of Wanneroo (C) (up 4,300 people or 5.1%, continuing the strong growth apparent over the last decade), Swan (C) (up 2,300 people or 2.7%), Rockingham (C) (up 2,200 people or 3.0%) and Cockburn (C) (up 1,900 people or 2.8%).

The fastest growing LGA in the Perth SD, and Western Australia and Australia overall, was the city of Perth, where population increased by 11.8% in the year to June 2002. This high level of growth can be attributed to an increase in the desire for inner-city living which has seen the conversion of commercial buildings into residential apartments and the redevelopment of commercial/industrial areas for residential use.

REGIONAL WESTERN AUSTRALIA

South West SD

The South West SD continued to experience strong growth in 2001–02, increasing by 4,800 people or 2.5%. This growth rate was lower than that recorded during the five years to June 2001, when the population increased by an average 3.0% per year. Large increases in population were recorded in Mandurah (C) (up 2,000 people or 4.0%), Busselton (S) (up 1,300 people or 5.5%) and Capel (S) (up 530 people or 7.4%, the second highest annual growth rate of all LGAs in Western Australia).

POPULATION CHANGE WESTERN AUSTRALIA *continued*

REGIONAL WESTERN AUSTRALIA *continued*

Kimberly SD

The population of the Kimberley SD increased by 1,100 people (or 3.3%) during 2001–02, with all four LGAs that make up the region recording high levels of growth relative to their population sizes. Halls Creek (S) increased by 4.4% (170 people), Broome (S) by 3.6% (480 people), and both Derby-West Kimberley (S) and Wyndham-East Kimberley (S) by 2.8% (230 and 200 people respectively).

Decreasing populations

During 2001–02, almost all Western Australian LGAs to experience a decrease in population were located in the balance of Western Australia; that is, outside the capital city SD of Perth. The largest decline occurred in Geraldton (C) (down 400 people or 2.0%) in the Central SD, while decreases were also recorded in the mining-related LGAs of Kalgoorlie/Boulder (C) and Coolgardie (S) (down 150 and 90 people respectively) in the South Eastern SD, Ashburton (S) (down 130 people) in the Pilbara SD, and Manjimup (S) (down 110 people) in the South West SD.

POPULATION CHANGE TASMANIA

.....

TASMANIA'S POPULATION INCREASES

The estimated resident population of Tasmania was 472,700 people at June 2002, an increase of 930 people (or 0.2%) since June 2001. This was Tasmania's largest increase in population since 1993–94, when the population increased by 1,300 people (or 0.3%).

HOW THE REGIONS FARED

In 2001–02 the Greater Hobart, Northern and Southern SDs experienced increases in population, up by 740, 480 and 120 people respectively. Their growth rates during 2001–02 (0.4% each for the Greater Hobart and Northern SDs, and 0.3% for the Southern SD) were all higher than their average annual growth rates over the five years to June 2002.

Mersey-Lyell SD was the only SD in Tasmania to experience a decrease in population during 2001–02, down by 410 people (or –0.4%).

GROWTH IN LESS THAN HALF OF TASMANIAN LGAs

In the year to June 2002 less than half of Tasmania's LGAs increased in population. Kingborough (M), a fringe urban area in Hobart's south, experienced the largest and fastest increase in population of all LGAs in Tasmania, up 570 people or 1.9%, while West Tamar (M), a fringe urban area in Launceston's west, experienced the second largest increase, up 190 people or 0.9%. Other increases in population were recorded in Meander Valley (M) (up 150 people), Huon Valley (M) (up 140) and Latrobe (M) (up 110).

POPULATION CHANGE TASMANIA *continued*

POPULATION DECREASES

The four largest decreases in LGA populations in Tasmania all occurred in the Mersey-Lyell SD. These were West Coast (M), a mining and tourism LGA, which experienced the largest and fastest population decrease in Tasmania (down 160 people or 3.0%), Central Coast (M) (down 110 people), and Waratah/Wynyard (M) and Burnie (C) (both down 60 people).

(a) Excludes LGAs with an ERP of less than 1,000 at June 2001.

POPULATION CHANGE NORTHERN TERRITORY

.....

SMALL INCREASE IN NORTHERN TERRITORY POPULATION

The estimated resident population of the Northern Territory at June 2002 was 198,000, an increase of 250 people (or 0.1%) since June 2001. This was the smallest increase recorded in the Northern Territory since 1974–75, when the population decreased by over ten thousand people due to large net migration losses as a result of Cyclone Tracy in December 1974.

DARWIN SD

Around 54% (107,400 people) of the Northern Territory's population resided in the Darwin SD at June 2001. Darwin SD's annual growth rate of 0.5% (or 530 people) during 2001–02 was lower than the average annual growth rate of 2.2% recorded over the five years to June 2001.

Darwin City SSD experienced an overall decrease in population in 2001–02, down by 330 people, with losses recorded in most of the older and more established SLAs such as Leanyer (down 70 people) and Karama and Larrakeyah (each down 60 people). These were partly offset by population growth in the inner areas of City - Inner (up 250 people, the third largest SLA increase in the Northern Territory) and Stuart Park (up 80 people).

Palmerston - East Arm SSD was the main growth area in the Northern Territory in 2001–02, with an overall increase in population of 700 people. The largest increases in SLA populations in the Northern Territory occurred in Bakewell (up 410 people or 14.6%) and Palmerston (C) Bal (up 320 people or 11.0%), which includes the newer suburbs of Rosebery, Gunn and Farrar.

The Litchfield Shire SSD continued to grow in 2001–02, although at a slower rate than in recent years. The population of the SLA of Litchfield (S) - Pt B increased by 160 people (the fourth largest increase in SLA population in the Northern Territory) while the population of Litchfield (S) - Pt A remained the same.

NORTHERN TERRITORY - BAL SD

The population of the balance of the Northern Territory decreased by 290 people (or 0.3%) during 2001–02. This was mainly due to population decreases in Alice Springs (T) (down 210 people or 0.8%) and Katherine (T) (down 130 people or 1.5%).

Following large declines in recent years, due mostly to mine closures, the population of Tennant Creek (T) remained steady in 2001–02, at 3,000 people. Similarly, the population of Jabiru (T) decreased only slightly during the same period, after experiencing rapid population losses during the five years to 2001.

POPULATION CHANGE AUSTRALIAN CAPITAL TERRITORY

ACT SUMMARY

The estimated resident population of the Australian Capital Territory (ACT) increased by 2,500 people in the year to June 2002, to 321,800 people. The ACT's annual growth rate of 0.8% during 2001–02 was slightly higher than the average annual growth of 0.7% for the five years to June 2001, but lower than Australia's overall growth of 1.3% during 2001–02.

Natural increase was the main contributor to population growth in the ACT in 2001–02, adding 2,600 people, while net overseas migration added 840 people and net interstate migration removed 980 people to the rest of Australia in the year to June 2002.

Gungahlin-Hall SSD continued as the ACT's main region of growth, with an increase of 1,400 people (or 5.6%) in the year to June 2002. Increases in population were also recorded in North Canberra (up 740 people), Belconnen (up 600), and South Canberra (up 220). Weston Creek-Stromlo SSD increased only slightly (up 10 people), while the population of Tuggeranong decreased by 370 people and Woden Valley by 70.

POPULATION GROWTH

SLA growth in the ACT

SLAs in the Gungahlin-Hall SSD continued to experience high levels of growth during 2001–02. Amaroo recorded the largest increase in population, up by 720 people (or 21.7%), while Nicholls and Ngunnawal increased by 330 and 270 people respectively.

The population of Dunlop, on the north-western fringe of Canberra, increased by 710 people in 2001–02, while the Belconnen SLA of Bruce increased by 290.

In Canberra's inner north, the SLAs of Braddon, O'Connor and Turner experienced strong population growth in 2001–02, increasing by 270, 170 and 130 people respectively, while Conder, on the southern fringe of Canberra, increased by 210 people.

Growth in the surrounding region

The NSW LGAs of Queanbeyan (C) and Yarrowlumla (A), adjacent to the ACT, continued to experience growth during 2001–02, in part due to their close proximity to Canberra. The population of Queanbeyan increased by 880 people (or 2.7%) and Yarrowlumla by 250 people (or 2.3%).

SLA DECREASE

The largest decrease in population in the ACT in the year to June 2002 occurred in Kambah (down 130 people). Lyons and Wanniassa each decreased by 100 people, while Monash and Kaleen each decreased by 80 people.

(a) Average annual growth rate.

EXPLANATORY NOTES

INTRODUCTION

- 1** For Australia, this publication contains estimates of the resident population of SLAs, LGAs, SSDs, SDs, Statistical Districts, states and territories, and Australia. For New Zealand, this publication contains estimates of the resident population of Regional Councils, Territorial Authorities and New Zealand.
- 2** LGAs are ranked within states and territories according to both largest growth (in number) and fastest growth (in percentage terms) between June 2001 and June 2002, allowing this publication to identify, in two ways, areas in Australia with the largest and fastest increases and decreases in population. Largest growth is based on the absolute change in population while fastest growth is based on the rate of change in population.
- 3** Following the 1992 amendment to the *Acts Interpretation Act 1901–1973* to include the Indian Ocean Territories of Christmas Island and Cocos (Keeling) Islands as part of geographic Australia, population estimates at dates commencing from July 1993 include estimates for these two territories. To reflect this change, another category of the state/territory classification was created, known as Other Territories. Other Territories include Jervis Bay Territory, Christmas Island and the Cocos (Keeling) Islands. Prior to July 1993, Jervis Bay Territory was included in estimates for the Australian Capital Territory.
- 4** To meet the conflicting demands for accuracy and timeliness there are three estimates of sub-state/territory populations. Preliminary estimates are normally available eight months after the reference date (i.e. February), revised estimates a year later and final estimates after the following census. The Australian estimates in this publication are final for 1997 and 2001, based on results of the 2001 Census of Population and Housing. The 2002 estimates are preliminary and have been released in April such that they are based upon the recently available final 2001 estimates rather than preliminary 2001 estimates.
- 5** In recognition of the inherent inaccuracy involved in population estimation, population figures less than 1,000 in the text and accompanying summary tables are rounded to the nearest ten, figures over 1,000 are rounded to the nearest hundred, and figures over 1 million are rounded to the nearest 100,000. While unrounded figures are provided in the main tables, accuracy to the last digit is not claimed and should not be assumed.

ESTIMATED RESIDENT POPULATION — AUSTRALIA

- 6** Estimated resident population (ERP) are estimates of the Australian population obtained by adding to the estimated population at the beginning of each period the components of natural increase (on a usual residence basis) and net overseas migration.
- 7** For the states and territories, account is also taken of estimated interstate movements involving a change of usual residence. After each census, estimates for the preceding intercensal period are revised by incorporating an additional adjustment (intercensal discrepancy) to ensure that the total intercensal increase agrees with the difference between the ERPs at the two respective census dates.
- 8** Estimates of the resident population are based on census counts by place of usual residence, with an allowance for net census undercount, to which are added the number of Australian residents estimated to have been temporarily overseas at the time of the census. Overseas visitors in Australia are excluded from this calculation.

EXPLANATORY NOTES *continued*

ESTIMATED RESIDENT POPULATION — AUSTRALIA *continued*

9 The concept of ERP links people to a place of usual residence within Australia. Usual residence is that place where each person has lived or intends to live for six months or more from the reference date for data collection.

Estimation of sub-state/territory populations

10 In census years the ERP as at 30 June for each Statistical Local Area (SLA)/Local Government Area (LGA) is based on usual residence census counts, with an allowance for net census undercount and the number of residents temporarily overseas at the census date. Overseas visitors in Australia are excluded from this calculation. As the census is held at a date other than 30 June (6 August in both 1991 and 1996, and 7 August in 2001), further adjustments taking into account births, deaths and net migration for the intervening period are made to obtain the ERP at 30 June.

11 For post-censal years, the absence of migration data at the SLA level means that it is not possible to estimate SLA populations by taking into account natural increase and net migration. Instead, ERPs are calculated using a mathematical model. Local knowledge, including that advised by local governments, may be used to adjust the outcome of the model for a particular SLA.

12 In the mathematical model a relationship is established between changes in population and changes in other indicators over the period between the two most recent censuses.

13 The choice of indicators varies across the states and territories, depending on availability, and includes dwelling approvals, electricity connections, Medicare enrolments and drivers' licences. Changes in these indicators are then used to estimate changes in the population of each area since the last census. The choice of indicators also varies across SLAs depending on aspects such as whether the SLA is urban or rural, is growing or declining, and whether the area has a high or low proportion of houses or medium and high density dwellings.

14 For the first time, the Australian Bureau of Statistics has produced ERPs for Queensland Aboriginal Council and Island Council Areas. In previous years, population estimates for these areas were included in the estimates for the LGAs in which they were previously incorporated. Census year ERPs for these areas are based on usual residence census counts, adjusted for net undercount, residents temporarily overseas, natural increase and net migration. As a result of difficulties in measuring small populations, particularly those of Aboriginal and Torres Strait Islander communities, mathematical models have not been used in calculating post-census year ERPs for these areas. Instead, the ERPs are derived using a number of indicators including electoral roll enrolments, housing surveys and school enrolments, with account taken of advice provided by Council representatives and area contacts. Estimates for these areas have also been produced for intercensal years to enable comparisons over time. These were derived by age-cohort interpolation between census year ERPs.

15 A more detailed explanation of the concept of ERP, as adopted by the ABS for official population estimates, is contained in *Demographic Estimates and Projections: Concepts, Sources and Methods, Statistical Concepts Library*, ABS web site <www.abs.gov.au>.

EXPLANATORY NOTES *continued*

ESTIMATED RESIDENT POPULATION — AUSTRALIA *continued*

16 Service population estimates are a different measure of population. They take into account seasonal itinerant populations which are not included in the ERP. Currently the ABS does not produce service population estimates but two working papers are available which investigate the concept and feasibility of such estimates. The working papers are available on the ABS web site <www.abs.gov.au> by selecting Themes, then Demography, then ABS Demography Working Papers (numbers 96/4 and 99/3).

ESTIMATED RESIDENT POPULATION — NEW ZEALAND

17 The estimated resident population of New Zealand, and any area of New Zealand, at 30 June in the year of the latest census is based on the latest census usually resident population counts updated for net census undercount, the number of residents temporarily overseas on census night, births, deaths and net migration between census night and 30 June, and reconciliation with demographic estimates at ages 0–9 years.

18 Subsequent national population estimates are produced by updating previous estimates using births, deaths and external migration data for the current quarter.

Subnational population estimates

19 Subnational population estimates are produced annually, as at 30 June. The estimation of subnational resident population uses the same component methodology as is used for estimates of the total national population, but with the addition of an extra component — internal migration between the subnational areas of New Zealand.

20 As no data on current internal migration is available, internal migration is estimated indirectly, using 'symptomatic' data, including building consents, occupancy rates, full-time equivalent employment, numbers of people in institutions (e.g. prisons), armed forces data, and past internal migration (from the most recent intercensal period). This information is supplemented by information from Territorial Authorities and universities. More details are available on request from Chief Demographer, Demography Division, Private Bag 4741, Christchurch, New Zealand.

AUSTRALIAN STATISTICAL AREAS

21 This publication contains data presented according to the Australian Standard Geographical Classification 2002 Edition (ASGC). Under this classification, statistical areas are defined as follows:

- *Legal Local Government Areas (LGAs)*. These areas are the spatial units which represent the geographical areas of incorporated local government councils and incorporated Community Government Councils (CGCs) where the CGC is of sufficient size and statistical significance. The various types of LGAs are Aboriginal Councils (AC), Areas (A), Boroughs (B), Cities (C), District Councils (DC), Island Councils (IC), Municipalities (M), Regional Councils (RegC), Rural Cities (RC), Shires (S), and Towns (T).
- *Statistical Local Areas (SLAs)*. These geographical areas are, in most cases, identical with, or have been formed from a division of, whole LGAs. In other cases they represent unincorporated areas. In aggregate, SLAs cover the whole of a state or territory without gaps or overlaps. In some cases legal LGAs overlap Statistical Subdivision boundaries and therefore comprise two or three SLAs (Part A, Part B and, if necessary, Part C).

EXPLANATORY NOTES *continued*

AUSTRALIAN STATISTICAL AREAS *continued*

- *Statistical Subdivisions (SSDs)*. These are of intermediate size, between SLAs and SDs. In aggregate, they cover the whole of Australia without gaps or overlaps. They are defined as socially and economically homogeneous regions characterised by identifiable links between the inhabitants. In the non-urban areas an SSD is characterised by identifiable links between the economic units within the region, under the unifying influence of one or more major towns or cities.
- *Statistical Divisions (SDs)*. These consist of one or more SSDs. The divisions are designed to be relatively homogeneous regions characterised by identifiable social and economic units within the region, under the unifying influence of one or more major towns or cities.
- *Statistical Districts*. These consist of selected, significant, predominantly urban areas in Australia which are not located within a Capital City SD. Statistical Districts enable comparable statistics to be produced about these selected urban areas.

22 Further information concerning statistical areas is contained in *Australian Standard Geographical Classification (ASGC), 2002* (cat. no. 1216.0).

23 For the purposes of this publication, all data refer to bounded areas as defined at 1 July 2002, and as incorporated in the 2002 ASGC.

MAPS

24 A complete series of maps showing the SLAs mentioned in this publication is available in *Australian Standard Geographical Classification (ASGC), 2002* (cat. no. 1216.0) and is freely available on the ABS web site <www.abs.gov.au> by selecting About Statistics.

AVERAGE ANNUAL RATE OF GROWTH

25 The average annual growth rate, r , is calculated as a percentage using the formula:

$$\left[\left(\frac{P_n}{P_o} \right)^{\frac{1}{n}} - 1 \right] \times 100$$

where P_o is the population at the start of the period, P_n is the population at the end of the period and n is the length of the period between P_n and P_o in years.

CALCULATION OF AREAS

26 The area figures quoted in this issue are based upon the SLA level of the *Australian Standard Geographical Classification (ASGC), 2002* (cat. no. 1216.0). The areas of the SLAs were calculated using ABS standard Geographic Information Systems software from the digital boundaries of the ASGC 2002. Higher level spatial unit area figures are subtotals of the SLA areas.

EXPLANATORY NOTES *continued*

ELECTRONIC DATA

27 Annual population estimates at 30 June for all SLAs in Australia are available electronically. This information can be customised to provide data for any choice of years and any combination of states and territories. Electronic copies of this publication (in .pdf format), plus current and earlier year estimates for all SLAs in Australia, are available from the ABS web site <www.abs.gov.au>. These and other downloadable products are available for purchase online using a credit card. They can be downloaded (with no credit card needed) by AusStats and ABS@ subscribers, Australian universities and at some public libraries. If you are not an AusStats subscriber inquiries can be made to Information Services (see the back cover of this publication for contact details). Inquiries for New Zealand data should be directed to Statistics New Zealand (email info@stats.govt.nz).

ACKNOWLEDGMENT

28 ABS publications draw extensively on information provided freely by individuals, businesses, governments and other organisations. Their continued cooperation is very much appreciated; without it, the wide range of statistics published by the ABS would not be available. Information received by the ABS is treated in strict confidence as required by the *Census and Statistics Act 1905*.

RELATED RELEASES

29 Other ABS releases that may be of interest to users of this publication include:

FOR MORE INFORMATION . . .

INTERNET

www.abs.gov.au the ABS web site is the best place to start for access to summary data from our latest publications, information about the ABS, advice about upcoming releases, our catalogue, and Australia Now—a statistical profile.

LIBRARY

A range of ABS publications is available from public and tertiary libraries Australia-wide. Contact your nearest library to determine whether it has the ABS statistics you require, or visit our web site for a list of libraries.

CPI INFOLINE

For current and historical Consumer Price Index data, call 1902 981 074 (call cost 77c per minute).

DIAL-A-STATISTIC For the latest figures for National Accounts, Balance of Payments, Labour Force, Average Weekly Earnings, Estimated Resident Population and the Consumer Price Index call 1900 986 400 (call cost 77c per minute).

INFORMATION SERVICE

Data which have been published and can be provided within five minutes are free of charge. Our information consultants can also help you to access the full range of ABS information—ABS user-pays services can be tailored to your needs, time frame and budget. Publications may be purchased. Specialists are on hand to help you with analytical or methodological advice.
