ABOUT THIS PUBLICATION

This publication presents information about the weekly earnings and employment benefits received by employees, and their trade union membership. The statistics in this publication were compiled from the Employee Earnings, Benefits and Trade Union Membership Survey conducted throughout Australia in August 2006 as a supplement to the Australian Bureau of Statistics (ABS) monthly Labour Force Survey (LFS).

Data from the survey relate to employed persons aged 15 years and over who worked in their main job for a public or private sector employer (and either received remuneration in wages or salary, received a retainer fee from their employer while working on a commission basis, or were paid in tips or piece-rates) or operated their own incorporated enterprise with or without employees.

The survey provides statistics on the distribution of weekly earnings of employees, their entitlement to paid leave (holiday, sick, long service and maternity/paternity), superannuation coverage and trade union membership. This information can be cross-classified by a range of personal characteristics such as age, sex and family type, and by characteristics of employment such as full-time or part-time status, industry and occupation.

NOTES ABOUT THE ESTIMATES

From 2006, occupation data are classified according to the ANZSCO—*Australian and New Zealand Standard Classification of Occupations, First Edition, 2006* (cat. no. 1220.0). The new classification replaces the ASCO—*Australian Standard Classification of Occupations, Second Edition, 1997* (cat. no. 1220.0). Data classified according to the ASCO, can be obtained on request.

Also from 2006, industry data are classified according to the *Australian and New Zealand Standard Industrial Classification (ANZSIC), 2006* (cat. no. 1292.0). This new classification replaces the *Australian and New Zealand Standard Industrial Classification (ANZSIC), 1993* (cat. no. 1292.0). Data classified according to the ANZSIC 1993, can be obtained on request.

CHANGES IN THIS ISSUE

In this issue, Table 10 presents 'Weekly earnings in main job' by 'Industry' for 'all employees' only.

'Industry' is not presented in Table 16 as time series data is not available for ANZSIC 2006.

Table 18 presents 'Industry' by 'Trade union membership' for persons only (rather than cross-classified by 'Sex') as the additional detail provided by ANZSIC 2006 at the Sub-Division level does not support the sex cross-classification. However, a version of Table 18 which includes a sex cross-classification will be made available via spreadsheets on the ABS web site <<http://www.abs.gov.au>>.

ROUNDING

As estimates have been rounded, discrepancies may occur between sums of the component items and totals.

Brian Pink
Australian Statistician

SUMMARY OF FINDINGS

OVERVIEW

In August 2006, there were a total of 8,776,900 employees in Australia. Of these, 6,178,400 (70%) were full-time employees and 2,598,500 (30%) were part-time employees.

WEEKLY EARNINGS OF EMPLOYEES

In August 2006, the mean weekly earnings of employees in all jobs was \$862, an increase of \$55 (or 6.8%) since August 2005. Mean weekly earnings in all jobs was highest in the Australian Capital Territory (\$1,012) and lowest in Tasmania (\$739).

Mean weekly earnings of employees in all jobs has increased from \$532 in August 1995, an increase of 62% over the 11 years to August 2006 (note that data was not collected in August 1996). However, it should be noted that changes in average earnings may be affected not only by changes in the level of earnings but also by changes in the overall composition of the employee workforce, including changes in:

- proportions of full-time and part-time employees
- number of hours worked
- mix of occupations and industries.

The weekly earnings of employees in their main job (rather than in all jobs) is also of interest. The mean weekly earnings of employees in their main job was \$851. Mean weekly earnings of employees in their main job was higher in the public sector than in the private sector (\$951 compared with \$827). For full-time employees, the mean weekly earnings in their main job was \$1,045, while for part-time employees it was \$388 in their main job. Mean weekly earnings in main job were \$1,122 for full-time male employees and \$908 for full-time female employees.

Another useful measure of earnings is to look at median weekly earnings. The median is the amount which divides the distribution of employees into two equal parts, one having earnings above and the other below that amount. The median weekly earnings of employees in their main job was \$740. Median weekly earnings for employees in their main job was \$882 for males and \$600 for females.

In August 2006, median weekly earnings (in main job) were highest in the:

- Mining industry (\$1,500)
- Managers occupation group (\$1,100)
- 35-44 year age group (\$1,000)

LEAVE ENTITLEMENTS

In August 2006, 73% (or 6,414,100) of the 8,776,900 employees were entitled to either paid holiday leave or paid sick leave, or both, in their main job (referred to as 'employees with leave entitlements').

Full-time employees were more likely than part-time employees to have leave entitlements (86% compared with 43%), and a higher proportion of male employees had leave entitlements than female employees (76% compared with 70%). The industry with the highest proportion of employees with leave entitlements was Public administration and safety (92%), followed by Electricity, gas, water and waste services (90%). The occupation groups with the highest proportion of employees with leave entitlements were Professionals (84%) and Managers (83%).

SUMMARY OF FINDINGS *continued*

LEAVE ENTITLEMENTS

continued

In August 2006, employees with leave entitlements earned an average of \$960 per week in their main job, compared with \$539 per week for employees without leave entitlements. The difference in average weekly earnings is due to the underlying characteristics of employees with and without leave entitlements. For example:

Of the 6,414,100 (73%) employees with leave entitlements in August 2006:

- 17% were part-time employees
- 45% were female
- 3% were aged 15–19
- 25% were aged 35–44
- 24% were Professionals
- 8% were Sales workers
- 8% were Labourers.

Of the 2,362,800 (27%) employees without leave entitlements in August 2006:

- 63% were part-time employees
- 53% were female
- 19% were aged 15–19
- 18% were aged 35–44
- 12% were Professionals
- 19% were Sales workers
- 20% were Labourers.

LEAVE BENEFITS

In August 2006, 76% of employees were provided with one or more types of paid leave (i.e. holiday, sick, long service or maternity/paternity leave). Employees in the public sector were more likely to have one or more of these leave benefits than those in the private sector (91% compared with 72%), as were full-time employees than part-time employees (88% compared with 47%).

The most commonly reported paid leave benefits were sick leave and holiday leave (both 72%), followed by long service leave (63%) and maternity/paternity leave (39%). The proportion of employees who were provided with all four leave benefits was 35%.

Accommodation and food services was the industry with the highest proportion of employees without leave benefits (61%). Sales workers and Labourers were the occupation groups with the highest proportion of employees without leave benefits (45% and 44% respectively).

SUPERANNUATION COVERAGE

In August 2006, 90% of employees had superannuation provided by their current employer. A higher proportion of full-time employees were provided with superannuation by their current employer than part-time employees (95% and 79% respectively). Employees in the public sector were also more likely to be provided with superannuation by their current employer (98%) than employees in the private sector (89%). It should be noted that under the Superannuation Guarantee Act, employers are obliged to make superannuation contributions on behalf of most employees. There are some exempt employees: for example, employers are not obliged to contribute to superannuation for employees aged less than 18 years who are not working more than 30 hours a week, for employees aged 70 years and over, or for employees who are paid less than \$450 in a calendar month.

SUMMARY OF FINDINGS *continued*

TRADE UNION MEMBERSHIP

In August 2006, there were 1,786,000 employees who were trade union members in conjunction with their main job, a 6.6% decrease on the 1,911,900 trade union members recorded in August 2005. The proportion of employees who were trade union members also decreased during this period from 22% to 20%.

The proportion of full-time employees who were trade union members was higher than for part-time employees (22% and 16% respectively). A higher proportion of public sector employees were trade union members (43%) than private sector employees (15%).

LIST OF TABLES

page

EMPLOYEES IN MAIN JOB, WEEKLY EARNINGS IN ALL JOBS

- 1** Mean weekly earnings in all jobs, by full-time or part-time status,
August 1995 to August 2006, by state or territory of usual residence, by
sex 8
- 2** Weekly earnings in all jobs, by full-time or part-time status, by sex 11
- 3** Weekly earnings in all jobs, by relationship in household, by full-time
or part-time status 12

EMPLOYEES IN MAIN JOB, WEEKLY EARNINGS IN MAIN JOB

- 4** Mean weekly earnings in main job, age group, country of birth,
industry, occupation, sector of main job and size of location in main
job, by full-time or part-time employees in main job, by sex, 14
- 5** Age group, country of birth, industry, occupation, sector of main job
and size of location in main job, by full-time or part-time employees in
main job, by sex 15
- 6** Sex, industry, occupation and size of location in main job, by whether
owner managers of incorporated enterprises, by full-time or part-time
employees in main job 16
- 7** Weekly earnings in main job, by hours paid for in main job, by sex 17
- 8** Weekly earnings in main job, by leave entitlements in main job, by sex,
by full-time or part-time employees in main job 19
- 9** Weekly earnings in main job and sex, by occupation, sector of main
job, by full-time and all employees in main job 21
- 10** Weekly earnings in main job and sex, by industry 23

EMPLOYEES WHO WERE FULL-TIME IN THEIR MAIN JOB

- 11** Weekly earnings in main job, by age group, by sex 26

LEAVE BENEFITS

- 12** Weekly earnings in main job, industry, occupation, full-time or
part-time employees in main job and sector of main job, by type of
leave benefit of employees in main job, by sex (proportions) 28
- 13** Sex, age group and full-time or part-time employees in main job, by
leave entitlements in main job, by whether owner managers of
incorporated enterprises 31
- 14** Industry, occupation, age group, sector of main job and weekly
earnings in main job, by employees without leave entitlements in their
main job, by full-time or part-time employees in main job, by sex 32

SUPERANNUATION COVERAGE

- 15** Weekly earnings in main job and sector of main job, by full-time or
part-time employees in main job, by superannuation coverage, by sex 34

(a) See paragraphs 17–30 of the Explanatory Notes for information about the calculation of mean weekly earnings and factors affecting comparability between surveys.

(b) For multiple job-holders, earnings in second job were only obtained from people who were employees in that job.

(c) Refers to earnings in main job and second job.

(d) This survey was not conducted in 1996.

(e) Refers to mainly urban areas only. For more information see paragraph 7 of the Explanatory Notes.

(f) See the Glossary for definition.

Total	1 866.7	23.0	1 842.1	22.7	1 911.9	22.4	1 786.0	20.3	8 776.9

(a) Percentages represent trade union members as a proportion of all employees within that population group. The total used to calculate the proportion includes those who did not know their trade union membership status.

(b) See paragraphs 19–30 of the Explanatory Notes for factors affecting comparability between surveys.

(c) Refers to mainly urban areas only. For more information see paragraph 7 of the Explanatory Notes.

(d) Includes 26,200 people for whom sector of main job could not be determined.

(e) Refers to the entitlement of employees to either paid holiday leave or paid sick leave, or both, in their main job.

(f) See paragraph 18 of the Explanatory Notes.

(a) See paragraph 17 of the Explanatory Notes.

(b) Includes 224,700 people (153,300 men and 71,400 women) who did not know their trade union membership status.

(c) Refers to mainly urban areas only. For more information see paragraph 7 of the Explanatory Notes.

(d) This data item is classified according to ANZSIC 2006. See paragraph 14 of the Explanatory Notes for more information.

(e) This data item is classified according to ANZSCO First Edition. See paragraph 13 of the Explanatory Notes for more information.

(f) Refers to the entitlement of employees to either paid holiday leave or paid sick leave, or both, in their main job.

(g) See paragraph 18 of the Explanatory Notes.

EXPLANATORY NOTES

INTRODUCTION

1 The statistics in this publication were compiled from data collected in the Employee Earnings, Benefits and Trade Union Membership Survey conducted throughout Australia in August 2006 as a supplement to the Australian Bureau of Statistics (ABS) monthly Labour Force Survey (LFS). Respondents to the LFS who fell within the scope of the supplementary survey were asked further questions.

2 The publication *Labour Force, Australia* (cat. no. 6202.0) contains information about survey design, sample redesign, scope, coverage and population benchmarks, which also apply to supplementary surveys. LFS also contains definitions of demographic and labour force characteristics, and information about telephone interviewing which are relevant to both the monthly LFS and supplementary surveys.

3 From April 2001 the LFS has been conducted using a redesigned questionnaire containing additional questions and some minor definitional changes. These changes also affect the supplementary surveys. For further details, see *Information Paper: Implementing the Redesigned Labour Force Survey Questionnaire* (cat. no. 6295.0) and *Information Paper: Questionnaires Used in the Labour Force Survey* (cat. no. 6232.0).

CONCEPTS, SOURCES AND METHODS

4 The conceptual framework used in Australia's LFS aligns closely with the standards and guidelines set out in Resolutions of the International Conference of Labour Statisticians. Descriptions of the underlying concepts and structure of Australia's labour force statistics, and the sources and methods used in compiling these estimates, are presented in *Labour Statistics: Concepts, Sources and Methods* (cat. no. 6102.0.55.001) which is available on the ABS web site <<http://www.abs.gov.au>> (Methods, Classifications, Concepts and Standards).

SCOPE

5 The scope of the LFS was restricted to people aged 15 years and over and excluded the following people:

- members of the permanent defence forces
- certain diplomatic personnel of overseas governments, customarily excluded from census and population estimates
- overseas residents in Australia
- members of non-Australian defence forces (and their dependants).

6 Students at boarding schools, patients in hospitals, residents of homes (e.g. retirement homes, homes for people with disabilities), and inmates of prisons are excluded from all supplementary surveys.

7 This supplementary survey was conducted in both urban and rural areas in all states and territories, but excluded approximately 120,000 people living in very remote parts of Australia who would otherwise have been within the scope of the survey. The exclusion of these people will have only a minor impact on any aggregate estimates that are produced for individual states and territories, except the Northern Territory where such people account for around 23% of the population.

8 In addition to those already excluded from the LFS, employees who worked solely for payment in kind in their main job are excluded from this survey.

COVERAGE

9 The estimates in this publication relate to people covered by the survey in August 2006. In the LFS, coverage rules are applied which aim to ensure that each person is associated with only one dwelling and hence has only one chance of selection in the survey. See *Labour Force, Australia* (cat. no. 6202.0) for more details.

SAMPLE SIZE

10 The initial sample for the August 2006 LFS consisted of 41,725 private dwelling households and special dwelling units. Of the 33,880 private dwelling households and special dwelling units that remained in the survey after sample loss (e.g. households selected in the survey which had no residents in scope for the LFS, vacant or derelict dwellings and dwellings under construction), approximately 31,620 or 93.3% were fully

EXPLANATORY NOTES *continued*

SAMPLE SIZE *continued*

responding to the Employee Earnings, Benefits and Trade Union Membership Survey. The number of completed interviews obtained from these private dwelling households and special dwelling units (after taking into account scope, coverage and subsampling exclusions) was 28,981.

RELIABILITY OF THE ESTIMATES

- 11** Estimates in this publication are subject to sampling and non-sampling errors:
- Sampling error is the difference between the published estimate and the value that would have been produced if all dwellings had been included in the survey. For more information see the Technical Note.
 - Non-sampling errors are inaccuracies that occur because of imperfections in reporting by respondents and interviewers and errors made in coding and processing data. These inaccuracies may occur in any enumeration, whether it be a full count or a sample. Every effort is made to reduce the non-sampling error to a minimum by careful design of questionnaires, intensive training and supervision of interviewers and efficient processing procedures.

SEASONAL FACTORS

- 12** The estimates are based on information collected in the survey month and, due to seasonal factors, may not be representative of other months of the year.

CLASSIFICATIONS USED

- 13** From 2006, occupation data are classified according to ANZSCO — *Australian and New Zealand Standard Classification of Occupations, First Edition, 2006* (cat. no. 1220.0). This new classification replaces ASCO — *Australian Standard Classification of Occupations, Second Edition, 1997* (cat. no. 1220.0). Data classified according to ASCO will be made available via spreadsheets on the ABS web site <<http://www.abs.gov.au>> or can be obtained on request.

- 14** Also from 2006, industry data are classified according to the *Australian and New Zealand Standard Industrial Classification (ANZSIC), 2006* (cat. no. 1292.0). This new classification replaces the *Australian and New Zealand Standard Industrial Classification (ANZSIC), 1993* (cat. no. 1292.0). Data classified according to ANZSIC 1993 will be made available via spreadsheets on the ABS web site <<http://www.abs.gov.au>> or can be obtained on request.

- 15** Country of birth data are classified according to the *Standard Australian Classification of Countries (SACC), 1998* (cat. no. 1269.0).

NOTES ON ESTIMATES

- 16** Information relating to main job earnings and second job earnings not provided by the respondent have been imputed. In August 2006 there were 2,279 cases where information relating to main job earnings was not provided by the respondent, and 70 cases where information relating to second job earnings was not provided by the respondent. Where this was the only information missing from the record, a value has been imputed based on answers provided from another respondent with similar characteristics (referred to as the donor). Donor records were selected for main job imputation by matching information on sex, age, state or territory of usual residence and labour force characteristics (full-time or part-time in main job, industry, occupation, hours worked in main job) of the person with missing information. Donor records were selected for second job imputation by matching information on sex, age, state or territory of usual residence, area of usual residence and owner manager status. Depending on which values were to be imputed, donors were chosen from the pool of individual records with complete information for the block of questions where the missing information occurred.

- 17** Care should be taken when using estimates of mean or median weekly earnings. Employees who did not draw a wage or salary are excluded from estimates of mean or median weekly earnings. This group consists of people working in their own incorporated enterprise.

EXPLANATORY NOTES *continued*

NOTES ON ESTIMATES

continued

18 People who said 'yes' to either of the following questions:

- 'Does your employer/business provide you with paid sick leave?'
 - 'Does your employer/business provide you with paid holiday leave?'
- are categorised as 'with leave entitlements'. In all other cases, respondents are categorised as 'without leave entitlements'.

COMPARABILITY OF TIME SERIES

19 Revisions are made to population benchmarks for the LFS after each five-yearly Census of Population and Housing. The last such revision was made in February 2004 to take account of the results of the 2001 Census of Population and Housing. Estimates from supplementary surveys conducted from and including February 2004 are therefore based on these revised population benchmarks.

20 Supplementary surveys are not conducted on the full LFS sample. Since August 1994 the sample for supplementary surveys has been restricted to no more than seven-eighths of the LFS sample. As a result of the reduction in sample size, standard errors for this survey differ from those applicable to previous surveys.

21 Care should be taken when comparing movements in mean weekly earnings and employment benefits estimates that include the July 1991 and August 1997 surveys. The usual period between surveys is 12 months; however, in 1991 the elapsed time was 11 months (August 1990 to July 1991), and in 1992 it was 13 months (July 1991 to August 1992). In 1997, the elapsed time was 2 years (August 1995 to August 1997).

22 A change was made in 2002 to the method used to determine whether an employee works full-time or part-time in their main job. Prior to 2002, 'full-time or part-time employees in main job' was derived from a self-perception question in which all employees were asked 'Is your job full-time or part-time?'. Following the redesign in 2001 of the LFS questionnaire, actual hours worked in main job in the reference week is now collected. From August 2002, data on hours worked in main job are used to derive full-time or part-time status of employees in main job.

23 This approach is consistent with the method used in the LFS to derive full-time or part-time status in all jobs. For further details see Glossary entries 'Full-time employees in main job' and 'Full-time workers'.

Imputation

24 The current imputation method has been used since the 2005 survey. A similar method of imputation was used for the 2004 survey. The differences between the 2004 and current imputation methods are that donors were matched where possible on a finer level of detail, and second job earnings are now imputed whereas in 2004 they were not. These changes in methodology are expected to have improved the imputed earnings data at the unit record level, but should not have had much impact on aggregate estimates.

25 Prior to 2004 imputation was not used, hence employees whose weekly earnings could not be determined were excluded from estimates of mean or median weekly earnings. Care should therefore be taken when comparing earnings data from 2004 onwards with earnings data prior to 2004. To compare the change in method from 2003 to 2004 please see paragraph 28 of the Explanatory Notes in *Employee Earnings, Benefits and Trade Union Membership, August 2004* (cat. no. 6310.0).

26 Prior to 2006, the 'Did not draw a wage or salary' category also included cases where information related to weekly earnings was not provided by the respondent. Such cases are now imputed.

COMPARABILITY WITH MONTHLY LFS STATISTICS

27 Due to differences in the scope and sample size of this supplementary survey and that of the LFS, the estimation procedure may lead to some small variations between labour force estimates from this survey and those from the LFS.

EXPLANATORY NOTES *continued*

COMPARABILITY WITH EMPLOYER-BASED AVERAGE WEEKLY EARNINGS SURVEY

28 Caution should be exercised when comparing estimates of mean weekly earnings in this publication with estimates of average weekly earnings included in the quarterly publication *Average Weekly Earnings, Australia* (cat. no. 6302.0), which are compiled from a survey of employers. There are important differences in the scope and methodology of the two surveys.

29 The quarterly Survey of Average Weekly Earnings excludes employees in the industries of Agriculture, forestry and fishing (ANZSIC 1993 Division A) and Private households employing staff (ANZSIC 1993 Subdivision 97), both of which are included in this household survey. The quarterly Survey of Average Weekly Earnings collects information from employers who complete a mailed questionnaire with details of their employees' total gross earnings and the total number of employees. For this household survey, respondents are either interviewed personally, or another adult member of their household responds on their behalf.

30 The methodology used in this household survey may result in non-sampling error not evident in surveys of employers (and vice versa). This may account for some of the differences between the results of the two surveys.

PREVIOUS SURVEYS OF WEEKLY EARNINGS

31 Similar surveys have been conducted annually since August 1975, except 1991 when the survey was conducted in July, and in 1996 when the survey was not conducted.

32 Prior to 1998, this publication was titled *Weekly Earnings of Employees (Distribution), Australia* (cat. no. 6310.0). The change in title reflects the inclusion of employment benefits and trade union membership data previously released in other publications.

PREVIOUS SURVEYS OF EMPLOYMENT BENEFITS

33 Results of previous surveys on employment benefits have been published in:

- *Employment Benefits, Australia, August 1983 to August 1992* (cat. no. 6334.0)
- *Employment Benefits, Australia, August 1994* (cat. no. 6334.0.40.001)
- *Weekly Earnings of Employees (Distribution), Australia, August 1995* (cat. no. 6310.0.40.001)
- *Weekly Earnings of Employees (Distribution), Australia, August 1997* (cat. no. 6310.0)

PREVIOUS SURVEYS OF TRADE UNION MEMBERS

34 Information on trade union membership was first collected in 1976, then biennially in its current format, from 1986 to 1992. From this time it was conducted annually (with limited data available every second year). Results of previous surveys were published in:

- *Labour Force, Australia, December 1994, December 1995* (cat. no. 6203.0)
- *Trade Union Members, Australia, August 1986, August 1988, August 1990, August 1992, August 1996* (cat. no. 6325.0)

NEXT SURVEY

36 The ABS plans to conduct this survey again in August 2007.

ACKNOWLEDGMENT

37 ABS surveys draw extensively on information provided by individuals, businesses, governments and other organisations. Their continued cooperation is very much appreciated: without it, the wide range of statistics published by the ABS would not be available. Information received by the ABS is treated in strict confidence as required by the *Census and Statistics Act 1905*.

EXPLANATORY NOTES *continued*

PRODUCTS AND SERVICES

Spreadsheets

38 Additional tables are available in spreadsheet format with time series data. These tables will be made available with the publication from the ABS web site <<http://www.abs.gov.au>>.

Unit record file

39 It is expected that a confidentialised unit record file (CURF) will be produced from the Employee Earnings, Benefits and Trade Union Membership Survey subject to the approval of the Australian Statistician. The Basic CURF will be available on CD-ROM, and via the ABS Remote Access Data Laboratory (RADL). The Expanded CURF will be accessible only through the RADL. The CURF will be available in SAS, STATA and SPSS format. A full range of up-to-date information about the availability of ABS CURFs and about applying for access to CURFs is available via the ABS web site <<http://www.abs.gov.au>> (see Services We Provide - CURF Microdata). Inquiries to the ABS CURF Management Unit should e-mail <curf.management@abs.gov.au>, or telephone (02) 6252 7714.

APPENDIX 1 POPULATIONS AND DATA ITEMS LIST

POPULATIONS

The ABS has a range of data available on request from the Employee Earnings, Benefits and Trade Union Membership Survey. This section lists the data items and populations which relate to the survey. More detailed breakdowns of some data items may also be available on request.

The population(s) for a particular data item refers to the persons in the survey to whom the data relates. Where alternative output categories are available for the same data item, these are shown and the data item name is followed by a bracketed numeral (e.g. Country of birth (2)).

To obtain data available on request, or for more information about our customised data service contact Rick Leach on Canberra (02) 6252 5783, or by facsimile on (02) 6252 7512, or by email to <rick.leach@abs.gov.au>.

<i>Population 1</i>	Employees in main job.
<i>Population 2</i>	Employees who were full-time in their main job.
<i>Population 3</i>	Employees in main job who were full-time workers.
<i>Population 4</i>	Employees who worked as an employee in the reference week in their second job.
<i>Population 5</i>	Employees in main job who were members of a trade union in their main job.
<i>Population 6</i>	Employees in main job excluding owner managers of incorporated enterprises.
<i>Population 7</i>	Owner managers of incorporated enterprises in main job.

<i>Data items</i>	<i>Populations</i>	<i>Data items</i>	<i>Populations</i>
1 State or territory of usual residence	All	6 Relationship in household	All
New South Wales		Family member	
Victoria		Husband, wife or partner	
Queensland		With dependants	
South Australia		Without dependants	
Western Australia		Lone parent	
Tasmania		With dependants	
Northern Territory		Without dependants	
Australian Capital Territory		Dependent student	
2 Area of usual residence	All	Non-dependent child	
State capital city		Other family person	
Balance of state/territory		Non-family member	
3 Region of usual residence	All	Lone person	
Standard labour force dissemination regions		Not living alone	
4 Sex	All	Relationship not determined	
Males		7A Country of birth and period of arrival	All
Females		Born in Australia	
5 Marital status	All	Born overseas	
Married		Arrived before 1971	
Not married		Arrived 1971–1980	
		Arrived 1981–1990	
		Arrived 1991–2000	
		Arrived 2001 to survey date

Labour Force Experience, Australia	6206.0	Biennial	February 2005
Labour Force Status and Educational Attainment, Australia	6235.0	Discontinued	Final issue 1994
Labour Force Status and Other Characteristics of Families, Australia(a)	6224.0	Discontinued	Final issue 2000
Labour Force Status and Other Characteristics of Migrants, Australia	6250.0	Irregular	November 2004
Labour Mobility, Australia	6209.0	Biennial	February 2006
Locations of Work, Australia	6275.0	Irregular	November 2005
Multiple Jobholding, Australia(b)	6216.0	Irregular	August 1997
Participation in Education, Australia	6272.0	Discontinued	Final issue 1999
Persons Not in the Labour Force, Australia	6220.0	Annual	September 2006
Persons Who had Re-entered the Labour Force, Australia	6264.0.40.001	Discontinued	Final issue 1995
Persons Who Have Left the Labour Force, Australia	6267.0.40.001	Discontinued	Final issue 1994
Retirement and Retirement Intentions, Australia	6238.0	Biennial	2004–2005
Retrenchment and Redundancy, Australia	6266.0	Discontinued	Final issue 2001
Successful and Unsuccessful Job Search Experience, Australia	6245.0	Discontinued	Final issue 2000
Superannuation, Australia	6319.0	Discontinued	Final issue 1995
Underemployed Workers, Australia	6265.0	Annual	September 2006
Working Arrangements, Australia	6342.0	Irregular	November 2003
Work-Related Injuries, Australia	6324.0	Irregular	2005–06

(a) Latest data available June 2006, from the ABS web site cat. no. 6224.0.55.001 annual, or on request.

(b) Latest data available on request July 2001.

INTRODUCTION

1 Since the estimates in this publication are based on information obtained from occupants of a sample of dwellings, they are subject to sampling variability. That is, they may differ from those estimates that would have been produced if all dwellings had been included in the survey. One measure of the likely difference is given by the standard error (SE), which indicates the extent to which an estimate might have varied by chance because only a sample of dwellings was included. There are about two chances in three (67%) that a sample estimate will differ by less than one SE from the number that would have been obtained if all dwellings had been included, and about 19 chances in 20 (95%) that the difference will be less than two SEs. Another measure of the likely difference is the relative standard error (RSE), which is obtained by expressing the SE as a percentage of the estimate.

2 Due to space limitations, it is impractical to print the SE of each estimate in the publication. Instead, a table of SEs is provided to enable readers to determine the SE for an estimate from the size of that estimate (see table T1). The SE table is derived from a mathematical model, referred to as the 'SE model', which is created using data from a number of past Labour Force Surveys. It should be noted that the SE model only gives an approximate value for the SE for any particular estimate, since there is some minor variation between SEs for different estimates of the same size.

CALCULATION OF STANDARD ERROR

3 An example of the calculation and the use of SEs in relation to estimates of persons is as follows. Table 5 shows the estimated number of female part-time employees in main job was 1,903,200. Since this estimate is between 1,000,000 and 2,000,000, table T1 shows that the SE for Australia will lie between 11,600 and 17,150 and can be approximated by interpolation using the following general formula:

$$\begin{aligned}
 &SE \text{ of estimate} \\
 &= \text{lower SE} + \left(\left(\frac{\text{size of estimate} - \text{lower estimate}}{\text{upper estimate} - \text{lower estimate}} \right) \times (\text{upper SE} - \text{lower SE}) \right) \\
 &= 11,600 + \left(\left(\frac{1,903,200 - 1,000,000}{2,000,000 - 1,000,000} \right) \times (17,150 - 11,600) \right) \\
 &= 16,600 \text{ (rounded to the nearest 100)}
 \end{aligned}$$

4 Therefore, there are about two chances in three that the value that would have been produced if all dwellings had been included in the survey will fall within the range 1,886,600 to 1,919,800 and about 19 chances in 20 that the value will fall within the range 1,870,000 to 1,936,400. This example is illustrated in the diagram below.

5 In general, the size of the SE increases as the size of the estimate increases. Conversely, the RSE decreases as the size of the estimate increases. Very small estimates are thus subject to such high RSEs that their value for most practical purposes is unreliable. In the tables in this publication, only estimates with RSEs of 25% or less are considered reliable for most purposes. Estimates with RSEs greater than 25% but less than or equal to 50% are preceded by an asterisk (e.g. *3.4) to indicate they are subject to high SEs and should be used with caution. Estimates with RSEs of greater than 50%, preceded by a double asterisk (e.g. **0.3), are considered too unreliable for general use.

CALCULATION OF STANDARD ERROR *continued*

MEANS AND MEDIANS

and should only be used to aggregate with other estimates to provide derived estimates with RSEs of less than 25%.

6 The RSEs of estimates of mean and median weekly earnings (see paragraphs 18 and 19 of the Explanatory Notes) are obtained by first finding the RSE of the estimate of the total number of persons contributing to the estimate (see table T1) and then multiplying the resulting number by the following factors:

- mean weekly earnings: 0.9
- median weekly earnings: 1.0

7 The following is an example of the calculation of SEs where the use of a factor is required. Table 5 shows an estimate of 1,903,200 female part-time employees in main job and table 4 shows mean weekly earnings for the same group as \$392. The SE of 1,903,200 was calculated previously as 16,600. To convert this to an RSE we express the SE as a percentage of the estimate, or $16,600/1,903,200 = 0.9\%$.

8 The RSE of the estimate of mean weekly earnings is calculated by multiplying this number (0.9%) by the appropriate factor shown in paragraph 6 (in this case 0.9): $0.9 \times 0.9 = 0.8\%$. The approximate SE of this estimate of mean weekly earnings of female part-time employees in main job is therefore 0.8% of \$392, that is about \$3.14. Therefore, there are two chances in three that the mean weekly earnings for female part-time employees that would have been obtained if all dwellings had been included in the survey would have been within the range \$388.86 to \$395.14, and about 19 chances in 20 that it would have been within the range \$385.72 to \$398.28.

PROPORTIONS AND PERCENTAGES

9 Proportions and percentages formed from the ratio of two estimates are also subject to sampling errors. The size of the error depends on the accuracy of both the numerator and the denominator. A formula to approximate the RSE of a proportion is given below. This formula is only valid when x is a subset of y.

$$RSE\left(\frac{x}{y}\right) = \sqrt{[RSE(x)]^2 - [RSE(y)]^2}$$

10 Considering the example from the previous page, the 1,903,200 females who were part-time employees in their main job represent 46% of the 4,109,000 female employees. The SE and RSE of 1,903,200 were calculated previously as 16,600 and 0.9% respectively. The SE for 4,109,000 calculated by interpolation is 25,700, which converted to a RSE is $25,700/4,109,000 = 0.6\%$. Applying the above formula, the RSE of the proportion is:

$$RSE = \sqrt{(0.9)^2 - (0.6)^2} = 0.7\%$$

11 Therefore, the SE for the proportion (46%) is 0.3 percentage points ($= (46/100) \times 0.7$). Therefore, there are about two chances in three that the proportion of female part-time employees was between 45.7% and 46.3%, and 19 chances in 20 that the proportion is within the range 45.4% to 46.6%.

DIFFERENCES

12 Published estimates may also be used to calculate the difference between two survey estimates (of numbers or percentages). Such an estimate is subject to sampling error. The sampling error of the difference between two estimates depends on their SEs and the relationship (correlation) between them. An approximate SE of the difference between two estimates (x-y) may be calculated by the following formula:

$$SE(x-y) = \sqrt{[SE(x)]^2 + [SE(y)]^2}$$

13 While this formula will only be exact for differences between separate and uncorrelated characteristics or subpopulations, it is expected to provide a good approximation for all differences likely to be of interest in this publication.

GLOSSARY

Employee	A person who works for a public or private employer and receives remuneration in wages, salary, a retainer fee by their employer while working on a commission basis, tips or piece-rates, or a person who operates his or her own incorporated enterprise with or without hiring employees. In this publication, employee relates to employee in his/her main job and excludes payment in kind.
Full-time employees in main job	Persons who were employees in their main job and: <ul style="list-style-type: none"> ■ (for single job holders) usually work 35 hours or more a week, or usually work less than 35 hours but worked 35 hours or more in the reference week. ■ (for multiple job holders) usually work 35 hours or more in their main job and those who, although usually working less than 35 hours in their main job, worked 35 hours or more in the reference week.
Full-time workers	Employed persons who usually worked 35 hours or more a week (in all jobs) and those who, although usually working less than 35 hours a week, worked 35 hours or more during the reference week. In this publication full-time workers relates to full-time workers who were employees in their main job.
Holiday leave	The entitlement of an employee to paid holiday, vacation or recreation leave.
Hours paid for in main job	The number of hours for which employees were paid in their main job, not necessarily the number of hours actually worked during the reference week (e.g. an employee on paid leave for the week was asked to report the number of hours for which they were paid).
Hours worked	The number of hours actually worked during the reference week.
Incorporated enterprise	An enterprise which is registered as a separate legal entity to its members or owners (also known as a limited liability company).
Industry	In this publication, industry relates to main job and is classified according to the <i>Australian and New Zealand Standard Industrial Classification (ANZSIC), 2006</i> (cat.no. 1292.0).
Leave benefits	The entitlement of employees to paid holiday leave, sick leave, long service leave or maternity/paternity leave in their main job.
Leave entitlements	The entitlement of employees to either paid holiday leave or paid sick leave (or both) in their main job.
Long service leave	The entitlement of an employee to long service leave in their main job.
Main English-speaking countries	The United Kingdom, Ireland, South Africa, Canada, the United States of America and New Zealand.
Main job	The job in which a person usually works the most hours.
Maternity/paternity leave	The entitlement of an employee to paid maternity/paternity leave in their main job.
Mean weekly earnings	The amount obtained by dividing the total earnings of a group by the number of employees in that group.
Median weekly earnings	The amount which divides the distribution of employees into two equal groups, one having earnings above and the other below that amount.
Multiple jobholder	Employed persons who, during the reference week, worked in a second job or held a second job from which they were absent because of holidays, sickness or any other reason. Multiple jobholders exclude those who changed employer. In this publication, a multiple jobholder relates to only those who were employees in their main job, however information on earnings relates to only those multiple jobholders who were employees in both their main and second jobs.

GLOSSARY *continued*

Occupation	In this publication, occupation relates to main job and is classified according to the ANZSCO— <i>Australian and New Zealand Standard Classification of Occupations, First Edition, 2006</i> (cat.no. 1220.0).
Owner managers of incorporated enterprises	Persons who work in their own incorporated enterprise, that is, a business entity which is registered as a separate legal entity to its members or owners (also known as a limited liability company).
Part-time employees in main job	Persons who were employees in their main job and: <ul style="list-style-type: none"> ■ (for single job holders) usually work less than 35 hours a week, and did so in the reference week ■ (for multiple job holders) actually worked less than 35 hours in their main job in the reference week, or were away from their main job but usually work less than 35 hours a week in their main job.
Part-time workers	Employed persons who usually worked less than 35 hours a week (in all jobs) and either did so during the reference week, or were not at work in the reference week. In this publication part-time workers relates to part-time workers who were employees in their main job.
Reference week	The week preceding the week in which the interview was conducted.
Second job	A job, other than the main job, in which some hours were worked during the reference week.
Sector of main job	Is used to classify a respondent's employer as a public or private enterprise. The public sector includes all government units, such as government departments, non-market non-profit institutions that are controlled and mainly financed by government, and corporations and quasi-corporations that are controlled by government.
Share benefit	Receipt or provision of shares, share rights or options in the employer's business as an employee entitlement.
Sick leave	The entitlement of an employee to paid sick leave in their main job.
Size of location in main job	The number of persons employed at the location of the respondent's main job.
Standard benefit	The entitlement of an employee to paid holiday leave, sick leave, long service leave, maternity/paternity leave or a superannuation benefit.
Superannuation benefit	Membership of a superannuation or retirement benefits scheme, arranged or provided by the person's current employer even if the employer did not contribute to the fund.
Superannuation coverage	Membership of a superannuation or retirement benefits scheme regardless of whether the scheme was arranged or provided by the person's current employer.
Trade union	An organisation consisting predominantly of employees, the principal activities of which include the negotiation of rates of pay and conditions of employment for its members.
Trade union member	Employees with membership in a trade union in conjunction with their main job.
Weekly earnings	Amount of 'last total pay' (i.e. before taxation and other deductions had been made) from wage and salary jobs prior to the interview. For persons paid other than weekly, earnings were converted to a weekly equivalent. No adjustment was made for any back payment of wage increases, prepayment of leave or bonuses, etc.
With leave entitlements in main job	Employees who were entitled to either paid holiday leave or paid sick leave (or both) in their main job.
Without leave entitlements in main job	Employees who were entitled to neither paid holiday leave nor paid sick leave in their main job.
