CHANGES TO THIS ISSUE

Following ongoing quality assurance work a number of data quality issues have been identified with table 37 – National capital accounts by sector and subsector. This table will be unavailable until further notice. However, capital accounts by sector will continue to be published as part of table 22 – flow of funds matrix.

SIGNIFICANT EVENTS

During the December quarter 2011, the investment activity of some units have been confidentialised to maintain the anonymity of those units that have not yet given approval to publish their investment activity and in the case where they may be identifiable. Included are state and local public non-financial corporations, life insurance institutions, money market investment funds and listed other financial institutions. As a consequence of suppressing estimates directly impacted, it has been necessary to consequentially suppress other series in the affected table to preserve confidentiality. Statistics published in this issue reflect these changes.

The Central bank, banks, securitisers and bond market tables include estimates for internally securitised paper. Please refer to *December Quarter 2008 release for ABS treatment of internally securitised paper* for the ABS treatment of these securities.

REVISIONS IN THIS ISSUE

There have been revisions back to March 2010 to previously published aggregates due to quality assurance work undertaken with data providers to the ABS Survey of Financial Information, ABS Survey of International Investment and APRA administrative data sets. Major revision work has been carried out to instrument and total assets in the pension funds sector for the purposes of better alignment between the *ABS Managed Funds, Australia* publication (cat no. 5655.0) and the quarterly APRA superannuation publications.

Significant revision work has been carried out in the banks sector to reflect amendments to source data. As a result, there are a number of series breaks between December 2009 and March 2010.

During the quarter, households had liability transactions of \$25.0b, of which \$17.9b was borrowed in the form of loans and a \$7.5b increase of accounts payable. On the asset side, net contributions to life insurance and pension fund reserves were \$25.9b. Household's transactions in deposits were \$17.0b, net transactions on prepayment of premiums and reserves were \$0.2b, while net claims on unfunded superannuation were \$1.1b. These were offset by a reduction in accounts receivable of \$4.5b and sales of equities of \$0.6b.

At the end of the quarter, households' stock of financial assets was \$2,672.2b. This was an increase of \$33.8b from the previous quarter, following net transactions of \$40.9b and valuation decrease of \$7.1b. Major asset holdings were net equity in reserves of \$1,333.6b, deposits of \$682.6b, equities of \$212.4b, unfunded superannuation claims of \$267.3b and other accounts receivable of \$93.1b.

Household net borrowing and debt to liquid asset ratio

Of the net \$17.9b loans borrowed by households during the December quarter 2011, bank loans accounted for \$20.7b and loans from other depository corporations accounted for \$1.1b. These were offset by net loan repayments of \$2.6b to securitisers, \$0.6b to the rest of world, \$0.5b to national general government, and \$0.2b to state and local public non-financial corporations.

The graph below illustrates that the debt to liquid assets ratio at the end of December 2011 was at 172.8%, a decrease of 1.5 percentage points on revised September 2011 data. The ratio was influenced by an increase of 1.0% in total outstanding household borrowings, which was offset by a greater increase in total liquid assets of 1.9%. The major contributor to the increase in liquid assets was deposits which increased by 2.5%.

HOUSEHOLD DEBT TO LIQUID ASSETS RATIO

EXPLANATORY NOTES

INTRODUCTION

1 The Australian Financial Accounts (ABS Cat. No. 5232.0) contains financial profiles of each subsector of the economy and the market for each conventional financial instrument. There are also tables showing inter-sectoral financial transactions and measures of sectoral financial surpluses and deficits.

2 Financial accounts of various types – which are also called flow of funds statistics – are published by many Organisation for Economic Cooperation and Development (OECD) countries, including the United States of America (from 1945), the United Kingdom (from 1952) and Canada (from 1962). In Australia, the Reserve Bank produced annual flow of funds accounts for the reference years 1953–54 to 1988–89. The final edition of these was published in the Reserve Bank's Bulletin for November 1989. The Australian Bureau of Statistics (ABS) has published quarterly estimates commencing with experimental estimates of inter-sectoral financial transactions for the March and June quarters 1989. From the June 1998 reference quarter, the financial accounts dataset was produced according to a revised international standard, the System of National Accounts, released in 1993 (SNA93) under the auspices of five international organisations: Commission of the European Communities – Eurostat, International Monetary Fund, Organisation for Economic Co-operation and Development, United Nations, and World Bank.

CONCEPTS, SOURCES AND METHODS

3 From the September 2009 reference quarter the financial accounts dataset has been produced according to the SNA08. There are significant conceptual differences between the SNA93-based ABS Financial Accounts and the SNA08 Financial Accounts (see Information Paper: cat. no. 5232.0.55.003). The dataset prior to September 2009 has been converted to the revised standard and backcast to June 1988 (stocks data) and September quarter 1988 (transactions data).

4 Australian National Accounts: Concepts, Sources and Methods (cat. no. 5216.0) provides detailed descriptions of the concepts, data sources and methodologies used in compiling the Australian national accounts, including the financial accounts, on an SNA93 basis. More detailed explanations can be obtained from the contact on the front cover of this publication. An updated version (SNA08) is due out in 2010.

STOCK AND FLOW CONCEPTS

5 Tables 1 to 21 and 23 to 33 present balance sheet data at market prices at the end of each calendar quarter. Balance sheet data are also known as stock, level or position data. These tables also now show net inter-sectoral financial transactions during the quarters. These are flow data. In this publication, the net transactions or flows are defined as active dealing in a financial instrument.

THE CLASSIFICATION OF INSTITUTIONAL SECTORS AND SUBSECTORS

6 The institutional sectors are based on the Standard Economic Sector Classifications of Australia, 2008 (cat.no. 1218.0) and are the same as the sectors used in national income and expenditure accounts.

7 The basic unit that is classified by sector is the institutional unit, which is defined as an economic entity that is capable, in its own right, of owning assets, incurring liabilities and engaging in economic activities and transactions with other entities.

SOURCES OF DATA

8 Most of the financial data in this publication are derived from statistical surveys conducted by the ABS and from information collected by the Australian Prudential Regulation Authority (APRA). Some other data sources are used, particularly for valuation adjustments.

9 The quarterly sectoral capital accounts in the flow of funds matrices are prepared using a variety of indicators to dissect annual estimates based on survey data. Some of the indicators used are known to be of poor quality; these are footnoted in tables to note the quality concerns and should be used with caution.

EXPLANATORY NOTES *continued*

COMPILATION METHODS

10 The levels (stock) tables are prepared by gathering together balance sheet information from various sources and selecting the better estimates. A choice is often possible because different data sources provide alternative or counterpart measures of the same item. For example, borrowing by state owned non-financial corporations will be reported by the state central borrowing authorities or Treasuries as assets and by the non-financial corporations as liabilities. The subsector aggregates derived from these data do not agree because the ABS does not survey all state owned non-financial corporations. In this case, the data from the central borrowing authorities and Treasuries are therefore used to estimate both the asset and liability aspects of these borrowings.

11 In some cases, transactions data are directly collected. In other cases transactions must be derived from the difference in consecutive levels. These net financial transactions are derived by taking the difference between closing and opening levels of balance sheet items and, where possible, eliminating changes on the balance sheet caused by valuation effects such as exchange rate movements.

ACCOUNTING BASIS

12 SNA08 states explicitly that the national accounts should record transactions on an accrual basis (as opposed to a cash or 'due for payment' basis), to reflect the time when economic value is transferred rather than when cash relating to the transaction is paid or falls due for payment. For practical reasons complete implementation of accrual accounting throughout the national accounts is not yet possible. Some areas where accrual accounting has not been adopted include:

- accrual of household income tax; and
- accrual of certain employee entitlements, including recreation and long service leave.

13 In these statistics tradeable securities, which include shares listed on the Australian Stock Exchange (ASX) and debt securities traded on organised markets, are valued at market prices.

14 Other securities are assigned estimated market values. For example, equity not listed on ASX is valued on the basis of value of total assets of the enterprise in question less the value of any repayable liabilities.

15 Deposits, loans and other accounts payable/receivable are recorded at their face value.

16 Net equity of pension funds in life office reserves are valued on the basis of market value of total assets (including non financial assets) of the funds less any repayable liabilities..
