NOTES

FORTHCOMING ISSUES

ISSUE (Quarter) RELEASE DATE

March 2004 8 July 2004

June 2004 8 October 2004

INTRODUCTION

This publication presents results from the quarterly Survey of Tourist Accommodation (STA). The scope of the regular, annual STA includes hotels, motels and guest houses and serviced apartments with 15 or more rooms.

For the four quarters of 2003 the scope of the STA has been expanded to include:

- holiday flats, units and houses of letting entities with 15 or more rooms or units
- caravan parks with 40 or more powered sites
- visitor hostels with 25 or more bed spaces.

HOTELS, MOTELS AND
GUEST HOUSES AND
SERVICED APARTMENTS

DATA QUALITY IMPROVEMENTS

In the June quarter 2003 the ABS identified 132 hotels, motels and guest houses and serviced apartments which had been operating for a number of quarters but were not on the STA frame. These additional establishments were included in the STA from the June quarter 2003.

BREAK IN TIME SERIES

The addition of the 132 tourism establishments resulted in a break in time series between the March and June quarters 2003. The impact of the break in time series is explained in Appendix 1. Particular care needs to be taken for all calculations of percentage changes that cross the break in series.

HOLIDAY FLATS, UNITS AND HOUSES, CARAVAN PARKS AND VISITOR HOSTELS The ABS has collected data for holiday flats, units and houses, caravan parks and visitor hostels for all quarters in 2003. These data will be released after December quarter 2003 data has been collected and processed.

DATA REVISIONS

Revisions have been made to the September quarter 2003 data in Table 2. Revision tables 19 to 21 are included on pages 42 to 47 of this publication. These provide revisions to Australia, Victoria and Melbourne Tourism Region for persons employed in hotels for the September quarter 2003.

Dennis Trewin Australian Statistician

SUMMARY OF FINDINGS

BREAK IN TIME SERIES

The addition of 132 tourism establishments has resulted in a break in time series between the March and June quarters 2003. The impact of the break in time series is explained in Appendix 1.

Particular care needs to be taken for all calculations of percentage changes that cross the break in series. Where appropriate the effect of the break is taken into account in the analysis below.

(a) Break in time series between the March and June quarters 2003. See Appendix 1 for details.

Room occupancy rate

The room occupancy rate, being derived from number of rooms and number of nights occupied, is not subject to a break in series. This is explained in Appendix 1.

Room occupancy rate continued

ROOM OCCUPANCY RATE(a), SEASONALLY ADJUSTED AND TREND—AUSTRALIA

(a) Room occupancy rates are not subject to a break in series.

The trend estimate of the room occupancy rate for hotels, motels and guest houses and serviced apartments combined reached a record level in the December quarter 2003. It rose 1.4 percentage points from 60.5% in September quarter 2003 to 61.9% in December quarter 2003. The trend estimate has been increasing since the March quarter 2002.

The seasonally adjusted estimate of the room occupancy rate rose by 1.2 percentage points in December quarter 2003 compared with September quarter 2003, to 62.2%.

Accommodation takings

In December quarter 2003, accommodation takings for hotels, motels and guest houses and serviced apartments combined were \$1,499.3 million. This was an increase of 9.2% (\$125.9 million) from September quarter 2003. The average takings per room night occupied for hotels, motels and guest houses and serviced apartments combined was \$126.00.

Hotels were the highest contributor to accommodation takings with \$759.6 million (50.7%). Takings per room night occupied in the December quarter 2003 were highest for hotels at \$152.00.

(a) Break in time series between the March and June quarters 2003. See Appendix 1 for details

The contributions of accommodation takings in the December quarter 2003 for hotels, motels and guest houses and serviced apartments combined were highest in New South Wales (35.1%) and Queensland (27.5%) and lowest in the Northern Territory (2.3%).

Room nights occupied

Total room nights occupied were 11.9 million in December quarter 2003 for hotels, motels and guest houses and serviced apartments combined. Room nights occupied increased by 2.1% (0.2 million) from September quarter 2003 to December quarter 2003.

Of the total, hotels contributed 5.0 million (42.0%) while motels and guest houses contributed 4.4 million (36.8%). Serviced apartments had the lowest room nights occupied at 2.5 million (21.2%) room nights.

Room occupancy rate

The room occupancy rate for hotels, motels and guest houses and serviced apartments combined was 63.5% in December quarter 2003 compared with 62.5% in September quarter 2003. This was an increase of 1.0 percentage point. Hotels recorded the largest increase in the room occupancy rate at 2.3 percentage points. Serviced apartments recorded a decrease of 0.2 percentage points.

The Australian Capital Territory recorded the highest room occupancy rate for hotels, motels and guest houses and serviced apartments combined with 70.3%. This was followed by Queensland (67.3%) and New South Wales (64.6%).

EXPLANATORY NOTES

INTRODUCTION

SCOPE

DEFINITIONS OF ACCOMMODATION ESTABLISHMENTS

- **1** This publication presents data from the quarterly Survey of Tourist Accommodation (STA). The STA is a mailout collection that completely enumerates all in-scope accommodation establishments within Australia.
- **2** On a quarterly basis the STA includes hotels, motels, guest houses and serviced apartments with 15 or more rooms or units.
- **3** For 2003 the scope of the STA has been expanded to include:
 - holiday flats, units and houses of letting entities with 15 or more rooms or units
 - caravan parks with 40 or more powered sites
 - visitor hostels with 25 or more bed spaces.
- **4** Short-term non-residential accommodation, which is in scope of the STA, is accommodation which is not leased, and which is provided to guests who would generally stay for periods of less than two months.
- **5** Some establishments also provide long-term residential accommodation. For hotels, motels, guest houses and serviced apartments, the amount of such activity is considered to be insignificant and is included in the data presented in this publication.
- **6** For 2003 the STA includes the following categories of establishments which provide predominantly short-term non-residential accommodation to the general public:
 - hotels and resorts with facilities establishments with 15 or more rooms which are licensed to operate a public bar and which provide accommodation on a room/suite basis, with a bath/shower and toilet in most guest rooms, but which do not have full cooking facilities (i.e. hot plates and oven/microwave) in most guest rooms
 - motels, private hotels and guest houses with facilities establishments with 15 or more rooms which are not licensed to operate a public bar, and which provide accommodation on a room/suite basis, with a bath/shower and toilet in most guest rooms, but which do not have full cooking facilities (i.e. hot plates and oven/microwave) in most guest rooms
- serviced apartments establishments with 15 or more units which mostly comprise self-contained units at the same location, and which are available on a unit/apartment basis to the general public for a minimum of one night. The units should have full cooking facilities (i.e. hot plates and oven/microwave), refrigerator and bath/shower and toilet facilities; all bed linen and towels should be provided, and daily servicing (i.e. cleaning and bed making) must be available through the on-site management, although this service may not necessarily be used
- holiday flats, units and houses (excluding establishments predominantly operated on a time-share basis) which are operated by owners, managers or real estate agents who have sole letting rights to at least 15 flats, units or houses for short-term letting. These flats, units or houses should be mainly self-contained in terms of cooking, bath (or shower) and toilet facilities and should not have breakfast available for guests. Data for holiday flats units or houses include short-term owner operators as well as paying guest occupation
- caravan parks establishments with 40 or more powered sites and cabins which
 provide either short-term or long-term accommodation to the general public and
 which provide powered sites for caravans and toilet, shower and laundry facilities
 for guests
- visitor hostels establishments with 25 or more bed spaces which provide accommodation to visitors on a bed basis (rather than by room). This category does not include establishments providing charity type accommodation (e.g. Salvation Army hostels) nor hotels, motels and guest houses without in-room facilities which provide accommodation on a per room basis.

EXPLANATORY NOTES continued

COVERAGE

7 The ABS has collected data for holiday flats, units and houses, caravan parks and visitor hostels for all quarters in 2003. These data will be released after December quarter 2003 data has been collected and processed.

8 The main source of coverage is from the Australian Automobile Association through AAA Tourism. This is supplemented by notification of new tourism developments and their likely opening dates in selected guides, major tourism journals and periodicals and newspapers. Periodic comparison with lists of accommodation establishments provided by the various tourism commissions and industry associations is also undertaken.

DATA QUALITY

- **9** The survey does not have a sample component and the data are not subject to sampling variability. However, other inaccuracies collectively referred to as non-sampling error may affect the data. These non-sampling errors may arise from a number of sources, including:
 - errors in the reporting of data by providers
 - errors in the process of capturing data
 - estimation for missing data
 - definition and classification errors
 - incomplete coverage.
- **10** Every effort has been made to reduce non-sampling error to a minimum by careful design and testing of questionnaires, and efficient operating procedures and systems used to compile statistics.
- **11** The December quarter 2003 response rates were:
 - 94% licensed hotels
 - 94% motels and guest houses
 - 92% serviced apartments.

BREAK IN TIME SERIES

- **12** In the June quarter 2003 the ABS identified 132 hotels, motels and guest houses and serviced apartments which had been operating for a number of quarters but were not on the STA frame. These additional establishments were included in the STA from the June quarter 2003.
- **13** The addition of the 132 tourism establishments resulted in a break in time series between the March and June quarters 2003. The impact of the break in time series is explained in Appendix 1. Particular care needs to be taken for all calculations of percentage changes that cross the break in series.
- TAKINGS FROM ACCOMMODATION
- **14** From 1 July 2000, takings from accommodation include gross revenue from the provision of accommodation, including GST. Takings from meals are excluded. Where businesses are unable to provide the data inclusive of GST, it is automatically adjusted by the ABS prior to aggregation and release in output.

STATISTICAL GEOGRAPHY

- **15** Small area statistics for 2003 are classified to the *Australia Standard Geographical Classification (ASGC), 2001 Edition* (cat. no. 1216.0). Data are coded to the statistical local area (SLA) level.
- 16 These SIA data are aggregated to tourism regions as defined by relevant state and territory tourist commissions. Tourism regions are reviewed annually and are subject to boundary and name changes. Where changes have occurred care should be taken when making comparisons with previously published data at this level.
- **17** Details of SLAs, the composition of tourism regions, major changes to tourism regions and outline maps of tourism regions are provided on the Tourism Theme Page of the ABS web site <www.abs.gov.au>.

EXPLANATORY NOTES continued

SEASONAL ADJUSTMENT

- **18** Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the original time series so that the effect of other influences on the series may be more clearly recognised. Seasonal adjustment procedures do not aim to remove the irregular or non-seasonal influences which may be present in any particular month. Irregular influences that are highly volatile can make it difficult to interpret the movement of the series even after adjustment for seasonal variation, and cannot be assumed to indicate changes in the trend.
- 19 The way in which seasonally adjusted and trend estimates were calculated changed from a Forward Factor methodology to a Concurrent methodology in March quarter 2003. The Forward Factor method relied on an annual analysis of the original time series to estimate seasonal factors that were to be applied in the forthcoming four quarters. Under this method the projected seasonal factors, or forward factors, were not updated until the next annual analysis. The Concurrent methodology uses the most up to date original time series available at each reference period to estimate seasonal factors thus eliminating the need to use projected seasonal factors.

TREND ESTIMATES

- 20 Smoothing the seasonally adjusted series reduces the impact of the irregular component of the seasonally adjusted series and creates the trend estimates. The trend estimates are derived by applying a 7-term Henderson moving average to the quarterly seasonally adjusted series. The Henderson moving average used in the middle of the time series is symmetric but, as the end of a time series is approached, asymmetric forms of the symmetric moving average are applied. Unlike the weights of the standard 7-term Henderson moving average, the weights used with the quarterly data have been tailored to suit the particular characteristics of individual series.
- **21** While these techniques enable trend estimates for the latest period to be produced, the process does result in revisions to the trend estimates in recent months, particularly as additional original estimates become available. For further information refer to *Information Paper: A Guide to Interpreting Time Series Monitoring Trends*, 2003 (cat. no. 1349.0) available at the ABS web site <www.abs.gov.au>.

EFFECTS OF ROUNDING

22 Where figures have been rounded, discrepancies may occur between totals and the sum of the component items.

RELATED PUBLICATIONS

23 Other ABS publications and products which may be of interest are outlined below. Please note, older publications may no longer be available through ABS bookshops but are available through ABS libraries. All publications released from 1998 onwards are available on the ABS web site <www.abs.gov.au> (charges apply).

Directory of Tourism Statistics, 2001 cat. no. 1130.0 (irregular)

Overseas Arrivals and Departures, Australia cat. no. 3401.0 (issued monthly)

Short-term Visitor Arrivals Estimates, Australia cat. no. 3401.0.55.001 (issued monthly)

Tourism Indicators, Australia cat. no. 8634.0 (discontinued from September quarter 2002 - previously issued quarterly)

Electronic release Tourist Accommodation, Small Area Data cat. no. 8635.n.55.001 (data cubes for each state/territory - issued quarterly).

24 Current publications and other products released by the ABS are listed in the *Catalogue of Publications and Products* (cat. no. 1101.0). The catalogue is available from any ABS office or the ABS web site <www.abs.gov.au>. The ABS also issues a daily Release Advice on the web site which details products to be released in the week ahead.

ABS DATA AVAILABLE ON REQUEST

25 As well as the statistics included in this publication, the ABS has other relevant data available on request. Inquiries should be made to the National Information and Referral Service on 1300 135 070.

INTRODUCTION

- **1** The Survey of Tourist Accommodation (STA) frame is based on an electronic file supplied each quarter by AAA Tourism. Since December 2002, AAA Tourism have been more active in maintaining their listing of accommodation establishments on this electronic file.
- **2** This active maintenance has resulted in a large number of hotels, motels and guest houses and serviced apartments being identified for the first time in both the March quarter 2003 and the June quarter 2003. While these establishments were identified in these quarters, they actually commenced operations prior to these time periods. The number of establishments identified in the March quarter was 115 and in the June quarter 17 (132 in total).
- **3** These additional 132 establishments were added to the STA frame in the June quarter 2003. The addition of these 132 establishments added \$31.9 million (2.7%) to the total takings from accommodation for the June quarter, 285,689 room nights occupied (2.8%) and 5,918 guest rooms available (2.9%).
- **4** The most significant impact was in serviced apartments, which added \$18.6 million to total takings. This is 1.6% of the total accommodation takings for the June quarter 2003 and 7.3% of takings from serviced apartments. Serviced apartments also contributed 164,274 room nights occupied. This was 1.6% of the total room nights occupied for the June quarter 2003 and 7.8% of room nights occupied in serviced apartments.
- **5** The addition of the 132 tourism establishments resulted in a break in time series between the March and June quarters 2003. The impact of the break in time series is explained below.

THE IMPACT OF THE BREAK

6 The extent of the impact varies by geographic region. As can be seen in the table below the major additions occurred in New South Wales, Victoria and Queensland and within those states/territories for serviced apartments.

TABLE 1: NUMBER OF ESTABLISHMENTS ADDED AS A RESULT OF FRAME MAINTENANCE, State/territory, June quarter 2003

	Hotels	Motels and guest houses	Serviced apartments	Total
New South Wales	2	15	27	44
Victoria	3	8	17	28
Queensland	3	10	25	38

Western Australia	1	4	6	11
Tasmania	1	1	1	3
Northern Territory	1	_	1	2
Australian Capital Territory	1	_	_	1
Australia	13	39	80	132

- nil or rounded to zero (including null cells)
- **7** The effect of the break in series on key data items for the separate activity types of hotels, motels and guest houses and serviced apartments is shown in the following tables. Some information is suppressed due to confidentiality.
- **8** Table 2 shows that 1,058 additional guest rooms were added to hotels in Australia in June quarter 2003. This was 1.4% of the 78,089 hotel rooms in Australia. The most significant addition was for serviced apartments with 3,262 guest rooms added, which was 8.3% of total serviced apartments rooms available.

TABLE 2: CONTRIBUTION OF ADDITIONAL ESTABLISHMENTS TO ACTIVITY, Australia, June quarter 2003

	GUEST ROOMS (NO.)		ROOM NIGHTS OCCUPIED ('000)			TAKINGS FROM ACCOM- MODATION (\$'000)

⁽a) Includes contribution of additional establishments.

THE IMPACT OF THE BREAK continued

9 Table 3 shows that New South Wales had \$9.4 million added to total takings for hotels, motels and guest houses and serviced apartments combined. This was 2.5% of the total takings for New South Wales. Overall, the additional 132 establishments added \$31.9 million (2.7%) to total takings from accommodation for Australia.

TABLE 3: CONTRIBUTION OF ADDITIONAL ESTABLISHMENTS TO SELECTED DATA ITEMS , Hotels, motels and guest houses and serviced apartments, State/territory, June quarter 2003

	GUEST ROOMS (NO.)			OCCUPIED	ROOM NIGHTS OCCUPIED ('000)			TAKINGS FROM ACCOM- MODATION (\$'000)

Australian Capital Territory(b)	5 055	n.p.	n.p	292.0	n.p.	n.p.	32 736	n.p.	n.p.	
Australia	202 419	5 918	2.9	10 183.8	285.7	2.8	1 159 500	31 850	2.7	

⁽a) Includes contribution of additional establishments.

- **10** Table 5 in Appendix 2 shows how the 132 establishments which were added to June quarter 2003 were distributed at the Tourism Region level. Also supplied is the AAA Tourism count of rooms available.
- **11** Where releasable, the contribution of the 132 establishments to key data items at the Tourism Region level is shown in Tables 6 to 12 in Appendix 2. These tables present factors which can be used to take into account the break in series.
- **12** Some factors are suppressed due to confidentiality. In these cases the number of rooms available information shown in Table 5 in Appendix 2 will provide an indication of the significance of the change.
- **13** Almost all SLAs have had less than three establishments added, therefore most factors at this level are confidential. Releasable factors for six SLAs are contained in Table 13 in Appendix 2. Factors for these SLAs are only available for hotels, motels and guest houses and serviced apartments combined.

DERIVED ITEMS

- **14** A number of STA data items are calculated by the ABS after data has been collected from providers. These items are derived by dividing one collected data item into another. The data items are:
 - Bed occupancy rate

⁽b) Suppressed due to confidentiality

DERIVED ITEMS continued

- Room occupancy rate
- Average takings per room night occupied
- Average takings per room night available
- Average length of stay
- **15** Both the numerator and denominator used to calculate these items have been affected by the additional 132 establishments to a similar extent. Therefore the addition of the 132 establishments has a minimal effect on the calculation of these data items. Thus a break in series is not likely to have occurred for the derived data items.

PERCENTAGE CHANGES

- **16** The addition of the 132 establishments increased the level of the series from the June quarter 2003. When calculating percentage changes over time care needs to be taken to ensure the effect of the break in series is taken into account.
- 17 Tables 6 to 14 in Appendix 2 contain factors for use when calculating percentage changes. These factors were calculated by dividing June quarter 2003 figures including the 132 additional establishments, by the June quarter 2003 figures excluding the additional establishments. These factors adjust the level of the series prior to June quarter 2003 to take account of the missing 132 establishments.
- **18** Care should be taken when calculating percentage changes as not all 132 additional establishments may have been open in the quarter to which the factor is being applied. By using the factor to add the 132 establishments to the data, the estimate may be increased to a figure which is more than it should be. This will result in the percentage change between that quarter and June quarter 2003 being under-estimated.
- **19** Users should contact the Transport and Tourism Business Statistics Centre for further information on the contribution of the additional establishments to earlier quarters.
- 20 The method for calculating the percentage change is shown by the example below. Takings from accommodation data can be found in Tables 1 and 2 of this publication. Factors for original data can be found in Table 12 in Appendix 2. Seasonally adjusted and trend factors are contained in Table 14 in Appendix 2.

TABLE 4: TOTAL TAKINGS FROM ACCOMMODATION, Hotels, motels and guest houses and serviced apartments, Australia

	Original \$'000	Seasonally Adjusted \$'000	Trend \$'000
December quarter 2002 March quarter 2003 June quarter 2003 September quarter 2003 December quarter 2003	1 314 053 1 244 695 1 159 500 1 373 488 1 499 344	1 245 637 1 239 822 1 268 874 1 341 249 1 421 472	1 221 651 1 229 687 1 294 322 1 342 248 1 399 262
Factors	1.02824	1.02997	1.02997

Original data

- **21** To calculate the percentage change between December quarter 2002 and December quarter 2003 for takings from accommodation the following steps are undertaken:
- **22** Step 1:

Multiply the December quarter 2002 figure by the appropriate factor to obtain an adjusted December quarter 2002 figure $\,$

 $1,314,053 \times 1.02824 = 1,351,162$

Original data continued

23 Step 2:

Calculate the percentage change in the usual manner except in this case use the adjusted December quarter 2002 figure $(\$1,499,344/\$1,351,162 - 1) \times 100 = 11.0\%$

24 This same methodology applies for all calculations of percentage changes that cross the break in series (ie June quarter 2003). Factors are not needed when calculating percentage changes before the break in series.

Seasonally Adjusted and Trend Estimates

- 25 Seasonally adjusted and trend estimates are subject to the same break in series. Care should be taken when calculating percentage changes to ensure the effect of the break in series is taken into account. The same methodology as described above should be applied to these data to calculate percentage changes, although a different factor should be used. These factors are contained in Table 14 in Appendix 2.
- **26** Note that seasonally adjusted and trend estimates are only produced for the data items of takings from accommodation and room occupancy rate. As the break in series does not impact on derived data items, the factors in Table 14 in Appendix 2 need only be applied to takings from accommodation.

Monthly data

- **27** The additional 132 establishments have been added into each month of the June quarter 2003 (ie April, May, June). Therefore the break in series has occurred between the months of March and April 2003. When calculating percentage changes, the appropriate quarterly factor should be used to adjust monthly data in respect of the break in series.
- **28** Users should contact the Transport and Tourism Business Statistics Centre if they have any queries on the break in series.

TABLES

- **29** Appendix 2 which follows contains tables for use when calculating percentage changes:
 - Table 5 shows the geographic distribution of the additional 132 establishments
 - Tables 6 14 contains factors for use when calculating percentage changes.

GLOSSARY

Average length of stay	Average length of stay is expressed in numbers of days and calculated: for hotels, motels and guest houses and serviced apartments, by dividing guest nights by guest arrivals for holiday flats, units and houses, by dividing unit nights occupied by unit lettings.
Average takings per available room night	The takings from accommodation divided by the total number of guest nights for the survey period, $Avge.TakingsPerAvailableRoomNight(\$) = \frac{TakingsFromAccommodation}{(GuestRooms)*(No.OfDaysInThePeriod)}$
Average takings per room night occupied	The takings from accommodation divided by the total number of room nights occupied for the survey period.
Bed occupancy rate	The bed occupancy rate represents bed occupancy expressed as a percentage of total capacity available during the survey period, $BedOccupancyRate~(\%) = \frac{GuestNightsOccupied}{(BedSpaces)*(No.OfDaysInThePeriod)}*100$
Bed spaces	Three-quarter beds are counted as one bed space; double beds as two bed spaces. Cots are excluded.
Capacity	Capacity in terms of guest rooms/units, visitor hostel bed spaces, holiday units or caravan park sites is the maximum number available to accommodate paying guests during the survey period. Capacity closed temporarily for seasonal reasons is included.
Caravan park sites	Includes on-site vans, other powered sites, unpowered sites and cabins.
Establishments	The number of hotels, motels and guest houses and serviced apartments, caravan parks and visitor hostels within the scope of the survey which operated for any part of the survey period, or which closed temporarily for the quarter for seasonal reasons.
Guest arrivals	The total number of paying guests counted only on the first night they stayed at the accommodation establishment during the survey period.
Guest nights	The total number of paying guests counted on each night they stayed at the accommodation establishment during the survey period.
Guest rooms	The maximum number of rooms available at each establishment during the survey period for accommodating short-term paying guests. Units and apartments within serviced apartments are treated as rooms in these survey results.
Letting entities	For holiday flats, units and houses, the number of owners, managers or real estate agents within the scope of the survey who operated for any part of the survey period.
Long-term caravan parks	Caravan parks where the majority of paying guests occupied sites for periods of more than two months.
Occupancy	Occupancy in terms of room nights, unit nights or site nights occupied refers to the total number of nights each guest room/unit or caravan park site was occupied during the survey period.
	Occupancy in terms of guest nights refers to the total number of paying guests counted on each night they stayed at the accommodation establishment during the survey period.
Other sites permanently reserved	The total number of powered and unpowered sites, on-site vans and cabins, etc. continuously let for two months or more of the survey period to tenants who occupy the sites only on a casual or sporadic basis.
Persons employed	The total number of persons working at each accommodation establishment at the end

of the survey period (including working proprietors and those working on other than

accommodation activities).

GLOSSARY continued

Room nights available The number of guest rooms/units available multiplied by the number of days for which

> they were available during the survey period. For establishments closing (other than for seasonal reasons) or opening during this period, operating periods only are included.

Room nights occupied The number of nights each guest room/unit was occupied by a paying guest during the

survey period.

Room occupancy rate The room occupancy rate represents room occupancy expressed as a percentage of total

capacity available during the survey period,

RoomNightsOccupied RoomOccupancyRate (%) = $\frac{RoomAvgnisSecupeu}{(GuestRooms) * (No.OfDaysInThePeriod)} * 100$

providing that, for establishments closing (other than for seasonal reasons) or opening during the survey period, the denominator of the above expression includes only

operating periods.

Short-term caravan parks Caravan parks where the majority of paying guests occupy sites for periods of less than

two months.

Site nights available The total number of nights each caravan park site was occupied during the survey

period.

Sites occupied by long-term The total number of sites, etc. occupied at the end of the survey period by guests who guests

have stayed continuously for 2 months or more.

Star grading The grading of hotels, motels and guest houses with facilities and serviced apartments is

based on the classification system owned by AAA Tourism Pty Ltd. The gradings are allocated according to a points system based on the amenities and facilities available to guests. Details of the grading scheme are contained in the publication Accommodation Guide published by AAA Tourism Pty Ltd for each of the individual Australian Motoring Organisations. For the purpose of classifying establishments to a star grading in this publication, 'half' star gradings are ignored (e.g. a two and a half star grading has been

shown as two star).

Takings from accommodation Since 1 July 2000, takings from accommodation include gross revenue from the

> provision of accommodation, including GST. Takings from meals are excluded. In cases where takings from accommodation data cannot be provided inclusive of GST the

amount of GST payable is estimated and the data revised accordingly.

Takings from accommodation for each month generally represent the takings received during that month. Where payments are received in advance of, or after the provision of accommodation to guests, the monthly figure for takings from accommodation may not necessarily bear a direct relationship to the number of guests accommodated during the

month.

Unit lettings The total number of times a holiday flat, unit or house was occupied by a new tenant,

counted only on the first night it was occupied by the new tenant.

Unit nights The total number of nights each holiday flat, unit or house was occupied during the

survey period.

FOR MORE INFORMATION

INTERNET www.abs.gov.au the ABS web site is the best place to

start for access to summary data from our latest publications, information about the ABS, advice about upcoming releases, our catalogue, and Australia Now—a

statistical profile.

LIBRARY A range of ABS publications is available from public and

tertiary libraries Australia-wide. Contact your nearest library to determine whether it has the ABS statistics you require,

or visit our web site for a list of libraries.

CPI INFOLINE For current and historical Consumer Price Index data, call

1902 981 074 (call cost 77c per minute).
