## NOTES

### FORTHCOMING ISSUES

<i>ISSUE</i>	<i>RELEASE DATE</i>
December 2000	8 December 2000
January 2001	10 January 2001

### INTRODUCTION

1 This publication contains latest figures for a comprehensive range of economic indicators. Statistics shown in this publication are the latest available at the date of preparation and may be subject to revision in subsequent issues. Reference should therefore always be made to the latest issue or to the statistical publication on the specific subject..

### SEASONAL ADJUSTMENT AND TREND ESTIMATION

2 Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences on the series can be more clearly recognised. Seasonal adjustment does not aim to remove the irregular or non-seasonal influences which may be present in any particular month. This means that month-to-month movements of the seasonally adjusted estimates may not be reliable indicators of trend behaviour.

3 The smoothing of seasonally adjusted series reduces the impact of the irregular components of the seasonally adjusted series and creates trend estimates. These trend estimates are derived by applying a 13-term Henderson-weighted moving average to all months except the last six. The last six monthly trend estimates are obtained by applying surrogates of the Henderson average to the seasonally adjusted series.

4 While this smoothing technique enables estimates to be produced for the latest month, it does result in revisions to the most recent months as additional observations become available. Generally, subsequent revisions become smaller and after 3 months have a negligible impact on the series.

5 ABS statistical series are being impacted by varying degrees as a result of The New Tax System (TNTS), introduced in Australia from 1 July 2000. TNTS includes the removal of Wholesale Sales Tax and the introduction of a Goods and Service Tax (GST), and as a result, a number of ABS data series will reflect significant and subsequent impacts.

### SYMBOLS AND OTHER USAGES

n.a.	not available
n.p.	not available for separate publication (but included in totals where applicable)
n.y.a.	not yet available
..	not applicable
—	nil or rounded to zero
p	preliminary—figure or series subject to revision
r	figure or series revised since previous issue

Stevan R. Matheson  
Regional Director, Tasmania

## MAIN FEATURES

### THE LABOUR FORCE

Trend estimates There were an estimated 220,400 persons (based on trend estimates) in the labour force in September 2000 and an estimated 371,200 civilian Tasmanians aged 15 years or more, yielding a labour force participation rate of 59.4%. This compares with 58.7% in September 1999. The Australian labour force participation rate for September 2000 was 63.9%. This compares with 63.2% in September 1999 (see table 39 and *Labour Force, Australia, Preliminary* (Cat. no. 6202.0)).

For Tasmanian males, the trend estimate of the participation rate was 68.7%, compared with 68.3% in September 1999. For Tasmanian females, the trend estimate of the participation rate was 50.6%, compared with 49.6% in September 1999 (see table 3).

### EMPLOYMENT

State comparisons There was an increase of 1.0% in Tasmania's employment over the 12 months to September 2000. The largest percentage increase in employment was in New South Wales (4.0%), followed by Victoria (3.9%) and Queensland (3.3%). The increase in Australia's employment over the same period was 3.3% (see table 39 and *Labour Force, Australia, Preliminary* (Cat. no. 6202.0)).

Trend estimates

### UNEMPLOYMENT

Trend estimates The trend estimate of the number of unemployed persons in Tasmania for September 2000 was 21,300. This compares with 20,000 in September 1999. The trend estimate of the unemployment rate of 9.7% in September 2000 compares with 9.2% in September 1999. The Australian trend estimate of the unemployment rate of 6.3% in September 2000 compares with 7.1% in September 1999 (see table 3 and 39, and *Labour Force, Australia, Preliminary* (Cat. no. 6202.0)).

## UNEMPLOYMENT

## LIVESTOCK SLAUGHTERING

**Trend estimates** Monthly movements of trend estimates showed decreases in all three livestock slaughtering series with cattle and calves down by 5.7%, sheep and lambs down by 0.8% and pigs down by 3.2%.

In August 2000, the trend estimate of the number of cattle and calves slaughtered was 18,000. This was down 26.2% on the number for August 1999, and down 23.6% on the number for August 1998.

The trend estimate for the slaughtering of sheep and lambs was 84,400 in August 2000. This was down 1.6% on the number for August 1999, but up 23.4% on the number for August 1998.

The trend estimate of 4,800 pigs slaughtered in August 2000 was 25.2% less than for August 1999 and 31.0% less than the trend estimate for August 1998 (see table 21).

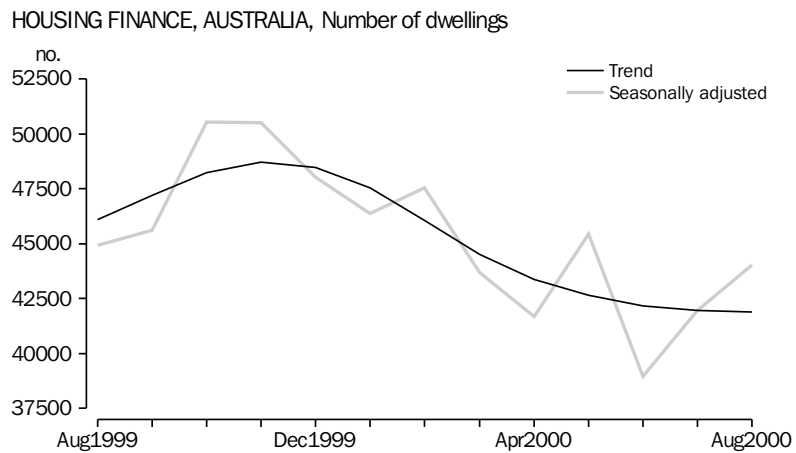

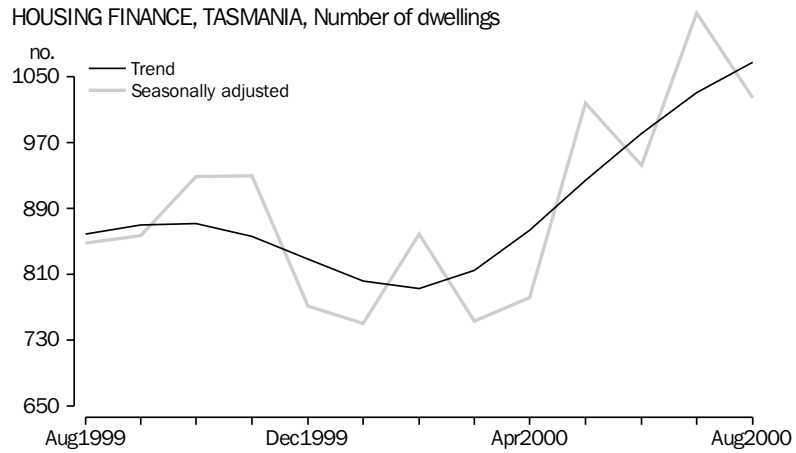

## BUILDING APPROVALS

**Original terms** There were 83 dwelling units approved during August 2000, of which 82 were new houses, and 1 a conversion. The number of dwelling units approved during August compared with 84 for July 2000 and 118 in August 1999.

At current prices, the value of total building was \$23.7 million in August 2000, 33.9% above the July 2000 figure of \$17.7 million and 8.1% below the August 1999 figure of \$25.8 million. Residential building contributed \$13.0 million and non-residential building \$10.7 million in August 2000 (see table 27 and *Building Approvals, Australia* (Cat. no. 8731.0)).

## HOUSING FINANCE

**Trend estimates** Trend figures for the number of Housing Finance Commitments in Tasmania rose from 1,031 in July 2000 to 1,068 in August 2000. Tasmania has recorded a trend increase in the number of housing finance commitments in each month since February 2000. The number of commitments has also risen 24.3% between August 1999 and August 2000.

Trend estimates  
continued

The total value of commitments for Tasmania in August 2000 was \$80 million. This shows a 2.6% increase over the previous month, and a 19.4% increase over the August 1999 figure. Nationally, the value of commitments has decreased 12.9% between August 1999 and August 2000. (see table 28 and *Housing Finance for Owner Occupation, Australia* (Cat. no. 5609.0)).

## GOVERNMENT FINANCIAL ESTIMATES

*Government Financial Estimates, Australia* (Cat no. 5501.0) released 2 November, features Government Finance Statistics (GFS) forward estimates for Commonwealth, State and Territory levels of government and their respective consolidated Non-Financial Public Sectors. Data is formatted as an economic representation of financial reports with operating statements and cash flows for the 2000–01 financial year. Preliminary data is also presented for the 1999–2000 financial year and includes balance sheets.

Government financial estimates  
*continued*

It is estimated that the Tasmanian State General Government sector returned an \$82 million Net Operating Balance (NOB) for the 1999–2000 financial year, followed by a \$–23 million NOB for the 2000–01 financial year. The turn around is due to abnormal occurrences in both years. In 1999–2000 Forestry Tasmania returned to State Government an abnormal \$40 million dividend resulting from the joint venture sale of 50% of northern Tasmania's softwood plantation resources.

The 2000–01 year reflects the transition to The New Tax System (TNTS). Tasmania's 'transitional payment' from the Commonwealth is estimated at \$90.7 million for the 2000–01 financial year, over \$65.1 million of these payments were provided as advances, and are therefore not included as operating revenue.

#### NEW MOTOR VEHICLE REGISTRATIONS

Original terms     There were 1,472 new motor vehicles (excluding motorcycles) registered in Tasmania during August 2000. This was 22.2% above the 1,205 registered in July 2000 and 15.9% above the August 1999 figure of 1,270 (see table 34).

#### RETAIL

Original terms     In original terms, the estimate of retail turnover in Australia for August 2000 was \$12,306.8 million, 6.4% above the figure recorded in August 1999. In original terms, the estimate of retail turnover in Tasmania for August 2000 was \$261.6 million, 0.9% above the figure for August 1999.

Seasonally adjusted terms     In seasonally adjusted terms, the estimate of retail turnover in Australia for August 2000 was \$12,662.8 million, 4.2% above the figure recorded in August 1999. In seasonally adjusted terms, the estimate of retail turnover in Tasmania for August 2000 was \$271.2 million, 1.6% below the figure recorded in August 1999 (see table 35 and *Retail Trade, Australia* (Cat. no. 8501.0)).

#### OVERSEAS TRADE

The total value of Tasmania's overseas exports for the 1999–2000 financial year was \$2,215 million. This contributed 2.3% to the Australian total of \$97,274 million.

The value of Tasmania's exports for the month of August 2000 was \$179 million, an increase of 9% over the month of July. Australia's exports for August totalled \$9,372 million, an increase of 0.1% over the July figure.

Tasmania's major export destinations for the month of August 2000 were Japan (\$48.2m), United States of America (\$20.6m) and Hong Kong (\$20.0m). Major commodity groups exported for the month were non-ferrous metals (\$61.2m) and fish, crustaceans and molluscs (\$15.4m). For the financial year 1999–2000, major commodity groups exported were non-ferrous metals (\$681.9m), wood and woodchips (\$303.4m) and metallic ores and metal scrap (\$243.2m).

(a) Usual residents of Tasmania.

(b) Deaths of children under one year of age.

(c) Total fertility rate. The sum of age specific fertility rates (live births at each age of a mother per female population of that age). It represents the number of children a woman would bear during her lifetime if she experienced age-specific fertility rates at each age of her reproductive life.

(d) Standardised death rate. The overall death rate, per 1,000 persons, that would have prevailed in a standard population if it had experienced at each age the death rates of the population being studied. The standard population used in these calculations is all persons in the 1991 Australian population.

(e) Rate per 1,000 live births.

(f) Crude marriage rate is the number of marriages registered during the financial year, per 1,000 estimated resident population at 31 December of that year.

(a) Source: Australian Dairy Corporation.

(b) Includes the whole milk equivalent of farm cream intake.

(c) Includes butter equivalent of butter oil.

(d) Includes spinning, weaving and carpet making. Reported by establishments which manufacture textiles only, or manufacture clothing and textiles in the one plant.

(e) Metallurgical refining index (Base year: 1979-80 = 100.0). Output from selected establishments covering the smelting and refining of ferro-alloys, zinc and aluminium. The weighting pattern is based on the establishments' value added as derived from the 1979-80 manufacturing Census. For multi product establishments, value added was apportioned to products on the basis of gross receipts from each product.

(f) Collected on a quarterly basis as from 1997.

(a) Numbers include only walkers who registered and represented their intention.

(b) Sum of registrations at Cradle Mt and Lake St Clair.

(c) Sum of registrations to walk the length of the track in any direction, irrespective of starting point.

(d) All overnight walkers registered in the park.

(a) Includes State and Commonwealth Government owned motor vehicles and other than those belonging to the defence services. Excludes tractors, plant and equipment, caravans and trailers.

(b) Comprises utilities, panel vans, rigid and articulated trucks and other truck type vehicles (i.e. motor vehicles designed for purposes other than freight carrying, e.g. campervans, tow trucks, ambulances and hearses) and buses.

(c) These figures are included in previous columns.

(a) Excludes motor vehicles, parts, petrol, etc.

(b) For April 2000, changed frame maintenance procedures have resulted in an increase in the level of retail turnover, but the increases have been phased in so that current and historical month to month movements have been limited.

(c) Includes Department stores and Other retailing.

(d) Data from July 2000 reference month onwards are recorded inclusive of GST. The trend series on current price terms has been suspended as at June 2000. See Cat no. 8501.0 and page 2 of this publication for more details.

(a) It is difficult to get a complete picture of Tasmania's trade performance as imports recorded by the ABS include only goods imported directly into the State from overseas, and reported by the Australian Customs Service. Many of Tasmania's goods imported for direct consumption, or input into further processing industries, arrive via interstate ports, and are not included in this table.

(b) Includes re-exports.
