SUMMARY OF FINDINGS

POPULATION AT 30 JUNE 1998

The estimated resident population (ERP) in Victoria was 4,660,900, an increase of 55,700 (1.2%) since 1997 and 188,500 (4.2%) in the five years since 1993.

The population (ERP) for the Melbourne Statistical Division (MSD) was 3,371,300, an increase of 49,500 (1.5%) since 1997 and 173,400 (5.4%) since 1993.

AGE STRUCTURE

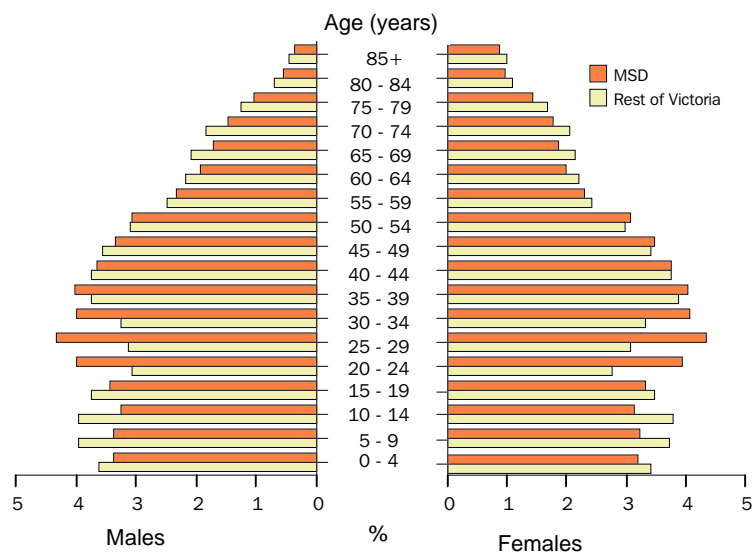

The largest numbers of Victorians were in the 20 to 44 years age group, although the largest increase during the 12 months to 30 June 1998 was in the 50 to 54 years age group, which increased by 16,600 (6.2%). The highest growth rate was in the age group 85 years or older (3,600 or 6.4%) followed by the 75 to 79 years age group with growth of 6,600 (5.8%).

The median age of Victorians has continued to rise from 33.2 years in 1993 to 34.6 years in 1997 and 34.8 years in 1998. This is slightly higher than the median age for all Australians (34.6 years).

The number of older persons (65 years and over) increased by 9,900 (1.7%) in the 12 months. As a proportion of the population, older persons have increased from 11.9% in 1993 to 12.6% in 1998.

At the same time, the number of children (aged under 15 years) in Victoria has increased at a much slower rate. As a proportion of the population, children have decreased from 21.1% of the total in 1993 to 20.4% in 1998.

Percentage of population by age group

SUMMARY OF FINDINGS *continued*

Children

The number of children (aged under 15 years) was 949,800 which represented 20.4% of Victoria's population. Within the MSD, the highest concentrations of children were found in rapidly growing areas such as Knox (C) - South (30.1%), Wyndham (C) - North-West (29.3%), Casey (C) - Cranbourne (29.1%), Hume (C) - Craigieburn (28.8%), Frankston (C) - East (28.6%) and Melton (S) - East (28.3%). The lowest proportions were in the inner city areas of Melbourne (C) -Southbank-Docklands (5.9%), Melbourne (C) - Inner (7.0%), Stonnington (C) - Prahran (8.9%), Melbourne (C) - Remainder (9.3%), Port Phillip (C) - St Kilda (9.6%) and Port Phillip (C) - West (11.0%).

Outside the MSD, the highest proportions of children were located in Greater Bendigo (C) - Strathfieldsaye (27.2%), Mitchell (S) - South (27.2%), Moorabool (S) - Ballan (27.1%), Macedon Ranges - Romsey (27.0%) and Moorabool (S) - Bacchus Marsh (26.7%). The lowest proportions were in Geelong (16.4%), Geelong West (17.8%), Bass Coast (S) - Phillip Island (18.5%), Newtown (18.6%) and Ballarat (C) - Central (18.6%).

Population aged 15–64 years

The population aged 15–64 years made up 67.0% of Victoria's population. The inner city areas had the highest proportion of this age group with the highest concentration being in Melbourne (C) -Southbank-Docklands (90.1%), Melbourne (C) - Inner (86.5%) followed by Melbourne (C) - Remainder (80.9%), Port Phillip (C) - St Kilda (78.3%), Yarra (C) - Richmond (78.3%) and Yarra (C) -North (78.2%). The lowest proportion was in Mornington Peninsula (S) - South (55.0%).

Outside the MSD, the proportion of the population in this age group was lower, 63.3% compared to 68.4% in the MSD. Statistical Local Areas (SLAs) where the proportion of the population in this age group was lowest were Queenscliffe (54.0%), Yarriambiack (S) - North (54.9%) and Bass Coast (S) - Phillip Island (55.5%). The highest proportion in this age group was in Greater Geelong (C) - Part C (73.7%).

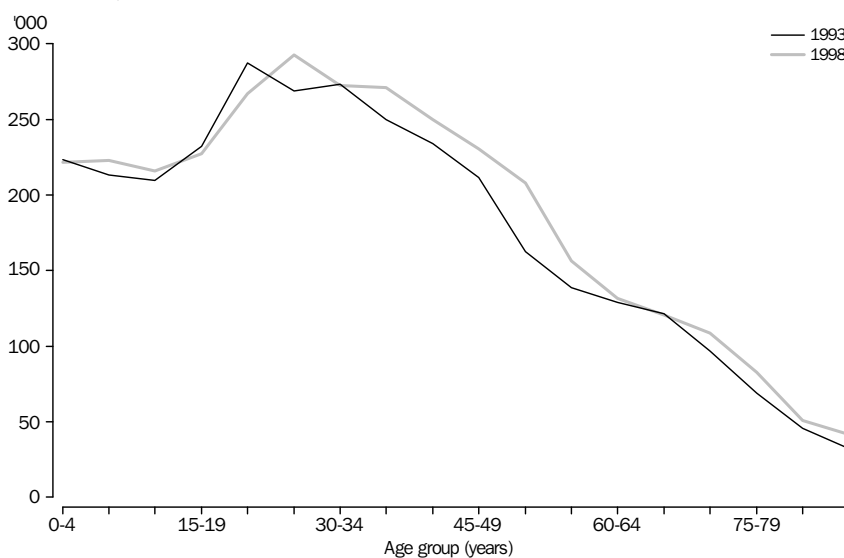

Older persons

The number of older persons (65 years and over) was 588,500 which represented 12.6% of Victoria's population. Within the MSD, the highest concentrations of older persons were found in Mornington Peninsula (S) - South (27.7%) and Moreland (C) - North (18.8%), Boroondara (C) - Camberwell N. (18.5%) and Glen Eira (C) - South (18.5%). Newer areas in the outer parts of Melbourne had the lowest proportion of this age group, the lowest being Melton (S) - East (2.4%), Hume (C) - Craigieburn (3.2%), Knox (C) - South (3.8%), Melbourne (C) - Southbank-Docklands (4.0) and Nillumbik (S) - South-West (4.3%).

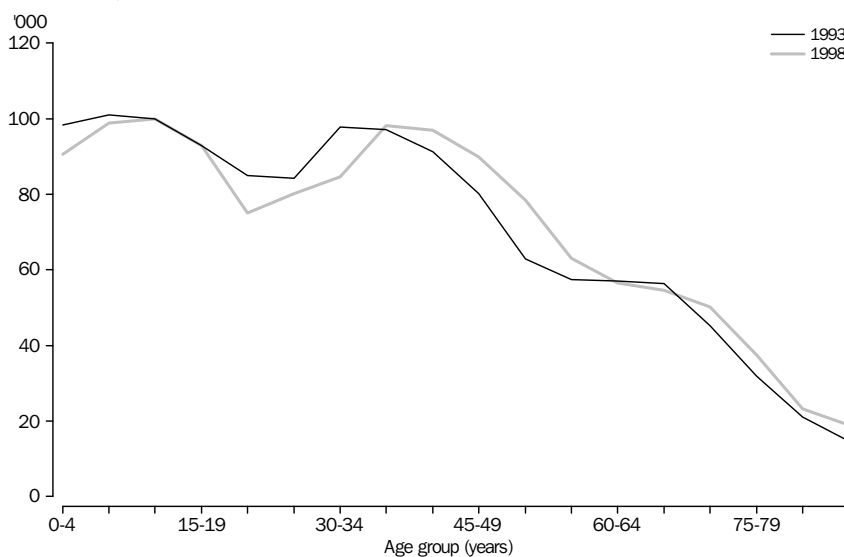

SUMMARY OF FINDINGS *continued*

Outside the MSD, the highest concentrations of older persons were located in Queenscliffe (B) (27.0%), Bass Coast (S) - Phillip Island (26.0%), Yarriambiack (S) - South (22.6%), Central Goldfields - Maryborough (21.9%), Bass Coast (S) Bal (21.9) and Mount Alexander (S) - Castlemaine (21.8%), while the lowest proportions were located in La Trobe (S) Bal (5.6%), Macedon Ranges (S) - Romsey (6.4%) and Greater Geelong - Pt C (6.8%).

EXPLANATORY NOTES

INTRODUCTION

1 This publication contains preliminary estimated resident population by age and sex of Statistical Local Areas (SLAs), Statistical Subdivisions (SSDs) and Statistical Divisions (SDs) of Victoria at 30 June 1998.

2 The estimated resident population is compiled according to the place of usual residence of the population.

METHODOLOGY

3 The estimated resident population of an area is the estimate of the number of persons who usually reside in that area, irrespective of where they were on the date of the estimate.

4 The total population of each SLA is based on results of the 1996 Census of Population and Housing date and calculated for intercensal years by a linear regression model. The model uses independent indicators of population change, such as occupied dwellings and Medicare enrolments.

5 The age and sex estimates were obtained using the demographic cohort component method. Estimates for 1998 were updated from 1997 using SLA population estimates by age and sex at June 1997, recorded births and deaths during the year 1997–98 and the total population estimates at 30 June 1998. The total population growth for an SLA during 1997–98 was split into natural increase and net migration components, the latter being the difference between the total growth and natural increase during 1997–98. Age–sex estimates of natural increase were obtained from vital registrations (i.e. births and deaths), and those for net migration were derived as follows:

- the net migration component was subdivided into internal arrivals and departures and overseas arrivals and departures, and proportionate age–sex distributions were allocated to each of these subdivisions for each SLA.
- SLA specific migration profiles (the proportionate age–sex distributions) for inter SLA arrival, inter-SLA departure and overseas arrival to each SLA were obtained from the 1996 Census data on usual residence one year prior to the Census data, and
- age–sex migration profiles for overseas departures were based on an average of overseas departures from the State/Territory which incorporated the SLA as recorded on passenger cards completed by incoming and outgoing travellers for the Department of Immigration and Multicultural Affairs.

6 A detailed explanation of the concept of estimated resident population, as adopted by the Australian Bureau of Statistics (ABS) for official population estimates, is contained in the *ABS Information Paper: Demographic Estimates, Concepts, Sources and Methods* (Cat no. 3228.0).

EXPLANATORY NOTES *continued*

RELIABILITY

7 Population figures over 1,000 in the text of this publication are rounded to the nearest hundred, and figures less than 1,000 are rounded to the nearest 10. While unrounded figures are provided in tables, accuracy to the last digit is not claimed and should not be assumed.

AUSTRALIAN STANDARD GEOGRAPHIC CLASSIFICATION

8 The geographic areas used in this publication are defined in the *Australian Standard Geographical Classification (ASGC) 1998 Edition* (Cat. no. 1216.0). The Appendix shows changes to SLA boundaries that have taken place since 1 July 1996. There was no 1997 edition of ASGC.

ELECTRONIC DATA

9 Estimated resident population classified by age and sex for 30 June of each year from 1986 to 1998 is available electronically (Cat. no. 3227.2). A separate file for each year is available.

POPULATION PROJECTIONS

10 The ABS compiles and publishes population projections for Australia, States and Territories (Cat no. 3222.0).

11 For further details regarding the population projections service contact the ABS Demographic Analysis Unit on (03) 9615 7982.
