NOTES

ABOUT THIS PUBLICATION

This publication contains estimates of the resident population of Local Government Areas (LGAs), Statistical Local Areas (SLAs), Statistical Subdivisions (SSDs), Statistical Divisions (SDs), Statistical Districts (S Dists), States, Territories and Australia at 30 June 1994, 1998 and 1999. Annual and five-yearly growth rates for these areas are also provided. The estimates in this publication are preliminary for 1999, revised for 1998 and final for 1994.

ROUNDING

While unrounded figures are provided in tables, accuracy to the last digit is not claimed and should not be assumed.

MAIN FEATURES

CAPITAL CITY POPULATION GROWTH

- In the year to June 1999, 72% of Australia's population growth was in the State and Territory capital cities. At June 1999, 64% of Australians resided in the capital city Statistical Divisions (SDs) compared to 63% in 1994.
- Melbourne, Adelaide and Perth were each home to 73% of their respective State populations. This compares to 63% for Sydney, 46% each for Brisbane and Darwin and 41% for Hobart.
- Sydney and Melbourne had the largest population increases of the capital cities in the year to June 1999, growing by 59,700 and 50,200 people respectively (each up 1.5%). However, the fastest capital city growth occurred in Brisbane, Perth and Darwin, each increasing by 1.8% (28,100, 23,900 and 1,600 people respectively). In comparison, Auckland, New Zealand's largest and fastest growing city increased by 15,800 (1.4%) over the same period.

REGIONAL CENTRE GROWTH

- Growth occurred in a number of regional centres in the year to June 1999, such as the cities of Maitland, Queanbeyan, Tamworth and Griffith in NSW, the cities of Greater Geelong, Greater Bendigo, Ballarat and Mildura in Victoria and the cities of Townsville and Toowoomba in Queensland.

GROWTH ALONG THE COAST

- Numerous coastal regions continued to make population gains in 1998–99. In NSW, these included Lake Macquarie (C), Hastings (A), Wollongong (C), Tweed (A), and Shoalhaven (C). In Victoria, Surf Coast (S) was the fastest growing Victorian Local Government Area (LGA) outside of Melbourne. Queensland examples include Gold Coast (C), Maroochy (S) and Hervey Bay (C), while in SA Victor Harbour (DC) was the second fastest growing LGA in that State. The WA coastal LGAs of Busselton (S), Bunbury (C), Broome (S) and Augusta–Margaret River (S) all had considerable population gains in 1998–99.

LGA GROWTH

- In the 12 months to June 1999, around 60% of Australia's 627 LGAs experienced some population increase.
- LGAs in the State capitals produced 17 out of the 20 largest population increases. Seven were in Melbourne, six were in Sydney while Brisbane had two.
- The south east corner of Queensland had Australia's two largest LGA increases. Brisbane City, the most populous LGA in Australia added 15,700 people (1.9%) while Gold Coast (C) added 12,800 people (3.4%).
- Casey (C) in Melbourne's south east, had the third largest population increase in 1998–99, with 6,700 more people (up 4.2%). Also in outer Melbourne, Hume (C) was up by 3,400 people (ranking eighth) while Brimbank (C) and Mornington Peninsula (S) (each increasing by 3,000 people) and Melbourne (C) and Knox (C) (both up by 2,900 people), occupied the 13th to 16th places respectively.
- In Sydney, Blacktown (C) increased 6,600 people (fourth largest increase), while Liverpool (C) (up 6,400 people) and Baulkham Hills (A) (up 3,500 people) had the fifth and sixth largest increases respectively. Wyong (A) and Gosford (C) on the central coast had the ninth and 11th largest increase among Australian LGAs with increases of 3,400 and 3,200 people respectively.

MAIN FEATURES

LGA GROWTH, *continued*

- Wanneroo (C) in the north of Perth had the seventh largest population increase in 1998–99 (up 3,400 people).

LGA DECLINE

- Darwin (C) had the largest decline nationally with a loss of 820 people (−1.2%). LGAs in Sydney (the cities of Botany Bay and Canterbury) and Hobart (C) also experienced relatively large declines in population in 1998–99.
- Several mining areas (Broken Hill (C) in NSW, La Trobe (S) in Victoria, Whyalla (C) in SA, Ashburton (S), Coolgardie (S) and East Pilbara (S) in WA) suffered some of the largest population losses in Australia. La Trobe (S) recorded the second largest decline in Australia in 1998–99, down 670 people or −0.9%.
- Two LGAs in rural Victoria, the shires of Gannawarra and Corangamite, continued to experience population loss, down 260 and 250 people (−2.1% and −1.4%) respectively.

CENTRE OF POPULATION

- The centre of population in 1998 was situated just inside the LGA of Central Darling (A) in western NSW. The centre of population has moved 10 km northward since 1994, when it was in the LGA of Carrathool (A).

POPULATION CHANGE OVERVIEW

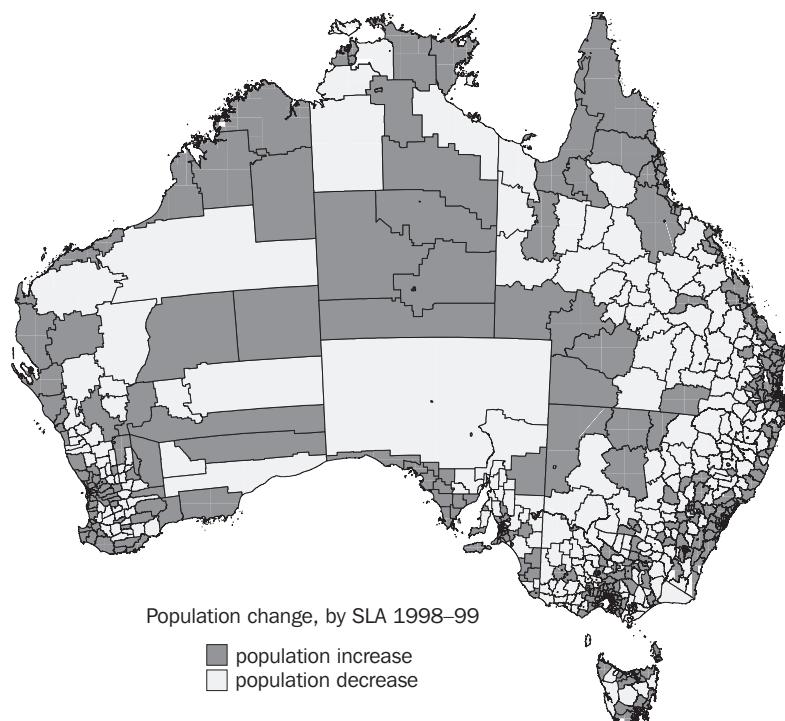

POPULATION GROWTH

Although all the States and Territories, with the exception of Tasmania, recorded gains in population in 1998–99, not all regions in Australia experienced population growth; 382 LGAs gained or had a constant population in 1998–99, while 245 LGAs experienced population loss. As in previous years, most of Australia's population growth (72%) in 1998–99 occurred in the capital cities.

At a regional level, differences in population change occur as a result of the interplay of the components of population growth; natural increase (the number of births minus the number of deaths), international and internal migration. While there are variations between regions in all these components, it is migration, especially internal migration, that mainly determines the level of population growth of many regions of Australia.

Several categories of regions experienced growth in population in 1998–99—the outer suburban of capital cities, urban–rural fringes, the inner cities, coastal regions, mining areas and regional centres. Some regions may overlap into more than one kind of category because the distinction between different types of locations is not always clear.

Population change, Australia

POPULATION CHANGE OVERVIEW *continued*

Suburban growth

Within the capital cities, population increase continued to be recorded in suburban areas. These areas contain housing developments that are attractive to families because of their relative affordability while generally being close enough to the city to allow access to employment and services. These areas generally have large populations and experience large increases, for example, Casey (C) in Melbourne and Liverpool (C) in Sydney experienced the third and fifth largest increase of all LGAs in Australia in 1998–99.

EXAMPLES OF SUBURBAN GROWTH—1998–99

State	Examples of LGAs or SLAs
NSW	Liverpool (C), Camden (A), Hornsby (A), Penrith
Vic.	Casey (C), Brimbank (C), Knox (C)
Qld	Doolandella–Forest Lake, Parkinson–Drewvale
SA	Tea Tree Gully (C), Marion (C)
WA	Wanneroo (S), Swan (S), Rockingham (C)
NT	Palmerston (T)

Growth on the urban fringe

Regions located on the edge of urban areas have continued to achieve significant population growth in 1998–99. These include: Wyong (A) and Gosford (C) in Sydney; the cities of Hume and Casey in Melbourne; Caboolture in Queensland; Mount Barker (DC) in SA; the shires of Harvey, Dardanup and Mundaring in WA; Meander Valley (M) in Tasmania; and the SLA of Litchfield (S) — Pt B near Darwin. These centres are located within commuting zones that allow access to urban employment combined with a rural or coastal lifestyle. Hobby farms and holiday homes are also popular in some of these areas.

Inner city growth

The inner areas of some of Australia's largest capital cities have experienced considerable population growth in the 1990s associated with the development of medium and high density residential accommodation. Growing from relatively small population bases Sydney (C), Melbourne (C), Perth (C), and to a lesser extent Adelaide (C), have all experienced high population growth over the past five years while the inner city SLA of Fortitude Valley—Inner in Brisbane, increased by 590 people (446%) in 1998–99. Similarly the SLAs of Larrakeyah, Stuart Park and City—Inner in Darwin experienced relatively fast growth in 1998–99.

Coastal growth

Areas located along the coastline, particularly in NSW, Victoria, Queensland, and the south-west corner of WA, continued to record population gains during 1998–99. Coastal areas are popular with older people wishing to retire and with younger people wanting a lifestyle change or who are attracted by service-based employment opportunities associated with tourism.

POPULATION CHANGE OVERVIEW *continued*

EXAMPLES OF COASTAL GROWTH—1998–99

State	Examples of LGAs
NSW	Lake Macquarie (C), Shoalhaven (C), Hastings (A), Port Stephens (A) and Tweed (A)
Vic.	Mornington Peninsula (S), Surf Coast (S), Bass Coast (S)
Qld	Gold Coast (C), Maroochy (S), Pine Rivers (S), Hervey Bay (C), Cairns (C)
SA	Victor Harbor (DC)
WA	Busselton (S), Bunbury (C), Augusta–Margaret River (S), Broome (S), Harvey (S) and Albany (C)

Mining area growth

Other types of inland regions that experienced population growth in 1998–99 were those associated with the expansion of employment and services due to the development of mining activities such as Cobar (A) in NSW, Emerald (S) in Qld, Roxby Downs (M) in SA and Kalgoorlie/Boulder (C) in WA.

Regional centre growth

While most of Australia's population growth in 1998–99 occurred in coastal and metropolitan regions, growth also occurred in a number of inland regional centres which provide goods and services to surrounding regions.

EXAMPLES OF REGIONAL CENTRE GROWTH—1998–99

State	Examples of LGAs
NSW	Bathurst (C), Cessnock (C), Dubbo (C), Griffith (C), Orange (C), Queanbeyan (C), Tamworth (C)
Vic.	Ballarat (C), Greater Bendigo (C), Greater Geelong (C), Mildura (RC), Wodonga (RC)
Qld	Townsville (C), Toowoomba (C)
SA	Mount Gambier (DC)
WA	Kalgoorlie/Boulder (C)

POPULATION DECLINE

Three main types of region have experienced population decline in 1998–99; inland rural areas, mining and manufacturing areas, and some urban areas.

Rural population decline

Population loss in rural Australia has been occurring for some time and is largely a result of net migration loss. People leave rural areas and small towns because technological and economic changes have led to a lack of employment opportunities, while young people in particular may leave to continue their education.

POPULATION CHANGE OVERVIEW *continued*

EXAMPLES OF RURAL POPULATION DECLINE—1998–99

State	Examples of LGAs
NSW	Cooma-Monaro (A), Crookwell (A), Goulburn (C), Merriwa (A), Bombala (A)
Vic.	Ararat (RC), Buloke (S), Corangamite (S), Gannawarra (S), Hindmarsh (S), Yarriambiack (S)
Qld	Aramac (S), Burke (S), Flinders (S), Murweh (S)
SA	Mount Remarkable (DC), Southern Mallee (DC), Wakefield (DC)
WA	Collie (S), Katanning (S)

Mining and manufacturing-based decline

The population of mining and manufacturing areas often fluctuate in response to changing market forces and economic restructuring. A number of mining and manufacturing regions underwent population decline in 1998–99, for example, Broken Hill (C) in NSW, La Trobe (S) in Victoria, Mount Isa (C) and Banana (S) in Queensland, Whyalla (C) and Port Augusta (C) in SA, Ashburton (S) and East Pilbara (S) in WA and Burnie (C) and West Coast (M) in Tasmania.

Urban decline

A number of urban areas lost population in 1998–99. Population decline in these regions can occur for a number of reasons. It may occur in older suburbs as a result of life-cycle change when the younger generation moves away. The redevelopment of urban areas may also result in a population decline, albeit temporary, due to existing housing stock being demolished to make way for new medium or high density housing.

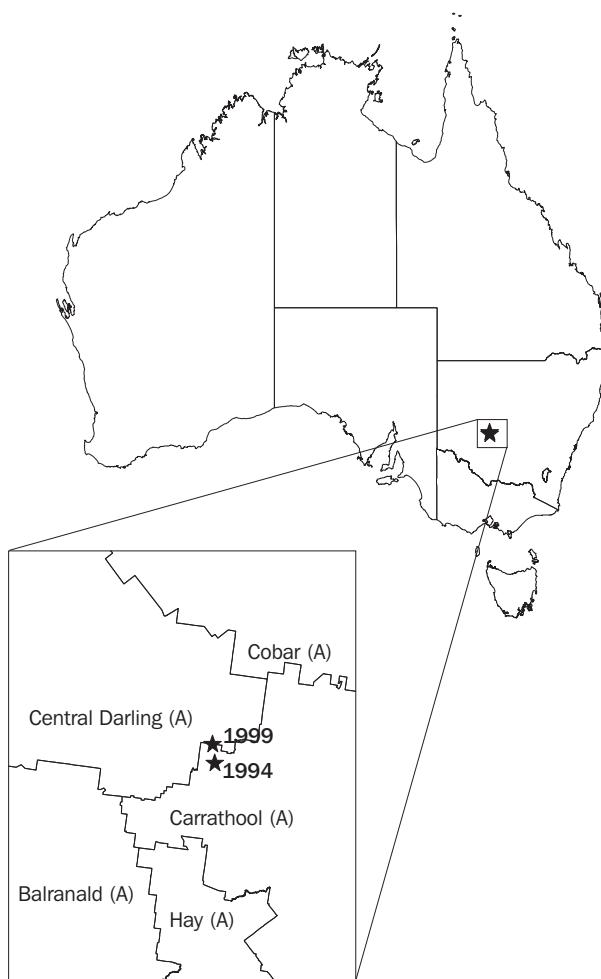

EXAMPLES OF URBAN POPULATION DECLINE —1998–99

State	Examples of LGAs or SLAs
NSW	Botany Bay (C)
Vic.	Greater Dandenong (C), Maribyrnong (C)
Qld	Inala, Acacia Ridge
SA	Playford (C) — West, Port Adel. Enfield (C) — West, Tea Tree Gully (C) — Central
Tas.	Hobart (C), Launceston (C), Clarence (C), Glenorchy (C)
WA	Vincent (T), Geraldton(C)
NT	Karama, Rapid Creek, Leanyer, Malak
ACT	O'Connor, Kaleen, Wanniassa, Kambah

POPULATION CHANGE OVERVIEW *continued*

CENTRE OF POPULATION

The centre of population is one measure to describe the spatial distribution of the population. This point marks the average latitude and longitude in which the population live. The centre of population in 1998 was situated just inside the LGA of Central Darling (A) in western NSW. The centre of population has moved 10 km northward since 1994, when it was in the LGA of Carrathool (A). This is a result of the faster population growth in Queensland than in the southern States.

Centre of Australian population, June 1999

POPULATION CHANGE NATIONAL

NATIONAL GROWTH RATE INCREASES

Australia's estimated resident population (ERP) at June 1999 was 18,966,800 persons, an increase of 236,400 from June 1998. The national growth rate in the year ending June 1999 was 1.3%, compared with 1.1% growth for the previous year, and an average annual growth rate of 1.2% for the five years to June 1999. The increased growth in the 1998–99 period is due to a 36% increase in net overseas migration from the previous year¹.

FASTEST GROWTH IN QUEENSLAND AND WA

In the year to June 1999, Queensland and WA had the fastest population growth among the States and Territories, each increasing 1.7%. Queensland added 58,900 people (the second largest increase after NSW), while WA added 31,900. The NT had the third fastest population growth with an increase of 1.6% (2,900 people). NSW and Victoria both had population increases of 1.2% in the year to June 1999. NSW contributed one-third of national growth with 78,200 more people (the largest increase) while Victoria added 57,200 more people (the third largest population increase among the States and Territories).

Tasmania was the only State or Territory to record a population decrease in the year to June 1999 with a rate of –0.3% (a loss of 1,400 people). Tasmania's population has been in decline since the 1996–97 period as a result of a net movement of people to the mainland.

SA had the second lowest growth rate with 0.4% (6,700 more people), while the ACT had an increase of 0.7% (2,100 people) in the year to June 1999.

CAPITAL CITIES CONTINUE TO OUTPACE STATE BALANCES

Taken together, capital city SDs grew by 1.4% (170,000) in 1998–99, considerably faster than the State balances which grew by 1.0% (66,300). The increase in capital city populations in 1998–99 was slightly faster than in the 5 years to 1999 when the capital city populations increased annually by an average of 1.3%. Growth in the State balances remained steady, averaging 1.0% per year in the five years to June 1999. In June 1999, the capital city SDs were home to 64% of the Australian population, an increase of one percentage point from the proportion in 1994 (63%).

Sydney and Melbourne SDs had the largest increases of the capital cities in the year to June 1999, growing by 59,700 and 50,200 people respectively (each up 1.5%). The fastest capital city SD growth however, occurred in Brisbane, Perth and Darwin, each increasing by 1.8% (28,100, 23,900 and 1,600 people respectively). Queensland and WA also had the fastest growing State balances in the year to June 1999 with increases of 1.6% each, although this represented a slowing of growth from the five-year period to June 1999, which saw a 2.0% per year increase for the Queensland balance of State and a 1.7% per year increase for WA balance of State.

The population decline in Tasmania was shared fairly equally by Hobart SD and the balance of State with losses of 0.4% (730) and 0.3% (710) respectively.

¹ 1998–99 population growth and the components of that growth (natural increase and net overseas migration) are preliminary.

POPULATION CHANGE LARGEST CHANGING LGAs

POPULATION INCREASES

The 20 LGAs that recorded the largest population gains in 1998–99 accounted for 40% of Australia's population growth in that year. Seventeen of these LGAs were in capital city SDs. Seven were in Melbourne, six were in Sydney and one was in Perth. Continuing the pattern of previous years, the three non-metropolitan LGAs which made large population gains were all in the south-east corner of Queensland.

In south-east Queensland the largest increases in population in 1998–99 have been in the cities of Brisbane and Gold Coast, the two most populous LGAs in Australia, with gains of 15,700 and 12,800 people respectively. As in previous years the coastal shires of Maroochy and Caboolture, located to the north of Brisbane, also recorded large population gains (3,200 and 2,800 people respectively).

The outer suburbs of Sydney and Melbourne saw some of the largest population growth in 1998–99. The large cities of Blacktown and Liverpool, located to Sydney's west and south-west, gained 6,600 and 6,400 people respectively, while in Melbourne large population increases were recorded in its south-eastern corridor in the cities of Casey (6,700) and Knox (2,900), and in the city of Brimbank in Melbourne's west (3,000).

Large increases in population were also recorded in a number of LGAs located on the urban-rural divides of Sydney and Melbourne. Wyong (A) and Gosford (C), (to Sydney's north), and Hume (C) (to Melbourne's north) each increased by approximately 3,400.

Repopulation of the inner cities of Sydney and Melbourne continued in 1998–99. Melbourne (C) and Sydney (C) each gained 2,900 people, growing by 6.6% and 14.5% respectively. Between 1994 and 1999 the average annual growth rates for these two cities have been high, partly due to their relatively small population bases, with Sydney (C) growing by an average of 19% each year and the more populous Melbourne (C) growing by 6% each year over the same period.

POPULATION DECLINES

As in previous years the largest declines in population in 1998–99 were of a much smaller magnitude than the largest increases. The largest decrease was in the city of Darwin with a loss of 820 people (-1.2%). LGAs from other capital cities (the cities of Botany Bay and Canterbury in Sydney and Hobart) also experienced relatively large declines in population.

Several mining areas in Victoria, WA and NSW (the shires of La Trobe, Ashburton, Coolgardie and East Pilbara and the cities of Broken Hill and Whyalla) suffered some of the largest population losses in Australia in the year to June 1999. For Ashburton (S) and Coolgardie (S) these losses translated into some of the fastest declines in Australia because of their relatively small populations.

Two LGAs in the wheat-sheep area of Victoria continued to lose relatively large numbers of people. The shires of Gannawarra and Corangamite recorded losses of 260 and 250 people, respectively. The declines for both of these LGAs was faster in 1998–99 than the average rate of decline in the previous five years.

POPULATION CHANGE LARGEST CHANGING LGAs *continued*

LOCAL GOVERNMENT AREAS WITH LARGEST POPULATION CHANGES

National Rank	LGA	Part of State	ERP AT 30 JUNE.....			CHANGE.....

POPULATION CHANGE FASTEST CHANGING LGAs

POPULATION INCREASES

The fastest population increases in LGAs occurred in a mix of both large and small LGAs, unlike the largest population increases which tended to occur in more populous and predominantly capital city LGAs. A mining town, inner city areas, peri-urban areas of capital cities and several non-remote rural shires all featured among the top 20 fastest growing LGAs in 1998–99.

The mining town of Roxby Downs (M) in the north of SA had the fastest population growth of all Australian LGAs, increasing by 18.0% (620) in the year to June 1999. The rapid population increase in this LGA has resulted from the expansion of the Olympic Dam project and the attendant development of the town's infrastructure and services.

The inner city LGAs of Sydney (C), Perth (C) and Melbourne (C) occupied the second, seventh and ninth fastest growing LGAs with growth rates of 14.5% (2,900 people), 7.1% (420 people), and 6.6% (2,900 people) respectively. Sydney (C) has maintained an exceptionally high growth rate, averaging 19% per year since 1994, making it Australia's fastest growing LGA over the 1994–99 period.

Among other fast growing LGAs in capital city SDs were the fringe LGAs of Camden (A) in the Sydney SD which grew by 6.5% (2,500) ranking 10th and Melton in the Melbourne SD which grew by 5.4% (2,300 people) ranking 18th. Just outside the Darwin SD, the new residential developments in Palmerston (T) produced growth of 14% (2,400), making it the third fastest LGA increase in 1998–99.

WA provided 13 of Australia's 20 fastest growing LGAs in 1998–99. Apart from Perth (C), all were outside the Perth SD. Derby–West Kimberley (S) in the north of WA was the fourth fastest growing LGA increasing by 10.4% (730 people). Also in the north of WA, Halls Creek (S) increased by 6.5% (220), and Wyndham–East Kimberley (S) increased by 5.9% (400 people) ranking 11th and 13th respectively. Further south on the WA coast, Irwin (S) was ranked sixth with growth of 7.9%. In the south west of WA, Dardanup (S) grew by 9.7%, and Busselton grew by 5.9%, ranking fifth and 12th respectively.

POPULATION DECLINES

The fastest population declines were generally from the less populated LGAs, and hence the magnitude of many of the fast population declines was quite small. Only five of the 20 fastest declining LGAs in the year to June 1999 had populations over 5,000. WA had sixteen out of the twenty fastest population decreases, with the decline of certain mining areas being the primary factor. These included the three fastest LGA declines—Carnamah (S) declining by 7.2% (70 people), Coolgardie (S) declining by 6.2% (330 people), and Ashburton (S) declining by 5.8% (400 people). The fourth and fifth fastest declines were the LGAs of Perenjori (−5.3%), and Murchison (−5.2%), although the declines were only of 40 and 10 people respectively. East Pilbara (S) was the 10th fastest declining LGA with a decline of 4.0% (290 people). West Coast (M) in Tasmania, (another mining area) was the fastest declining non-WA LGA with a decline of 4.0% (240 people).

Grafton (C) in northern NSW had the 14th fastest decline, down 3.3% or 570 people—the largest decline of the top twenty fastest declining LGAs.

(a) Average annual growth rate.

POPULATION CHANGE NEW SOUTH WALES

STATE SUMMARY

The ERP of NSW at June 1999 was 6,412,000, an increase of 78,200 since June 1998. This represents a growth rate of 1.2% for 1998–99, slightly higher than for 1997–98 and the annual average for the five years to 1999, both of which were 1.1%.

The majority of the 1998–99 population increase in NSW was produced by net overseas migration, which contributed 53,400 people (0.8% growth), while natural increase of the population contributed 39,100 people (0.6%). Interstate migration tempered the NSW population increase with a net loss of 14,300 people (−0.2%) in 1998–99 to other States and Territories.

The pattern of population increase in NSW continues to show strong growth in Sydney and the coastal regions with 94% of the LGAs in these regions experiencing population increase in the year to June 1999. In contrast, only 32% of inland LGAs (outside Sydney SD) had increases in population in 1998–99.

SYDNEY GROWTH

While the Sydney SD was home to 63% of the NSW population at June 1999, it accounted for 76% (59,700) of the total NSW population growth. During the five years to June 1999, Sydney grew by an average of 1.4% per year, twice the growth rate of the balance of State (0.7% per year).

The largest population increases in NSW LGAs in 1998–99 occurred within the Sydney SD. The most populous NSW LGA, Blacktown (C), in Sydney's central west had the largest population increase in the year to June 1999 with 6,600 more people, up 2.7% to 254,800 people. In the southwest of Sydney, Liverpool (C) had the second largest population increase, up 6,400 (4.7%), while the third largest increase occurred in Baulkham Hills (A) with an increase of 3,500 (2.7%). The fourth and fifth largest increases in LGA populations occurred in the north of the Sydney SD with Wyong (A) increasing by 3,400 people (2.7%), and Gosford (C) by 3,200 (2.1%).

LGAs WITH LARGEST AND FASTEST POPULATION GROWTH, NSW

LGA	1998–99.....		LGA	1998–99.....	
	no.	%		no.	%
LARGEST GROWTH					
Blacktown C)	6 609	2.7	Sydney (C)	2 886	14.5
Liverpool (C)	6 390	4.7	Camden (A)	2 461	6.5
Baulkham Hills (A)	3 543	2.7	Willoughby (C)	2 781	4.8
Wyong (A)	3 363	2.7	Liverpool (C)	6 390	4.7
Gosford (C)	3 226	2.1	Hunters Hill (A)	587	4.5

In addition to the largest population increases, LGAs in the Sydney SD also had the fastest population increases. The inner city LGA of Sydney (C) continued to grow rapidly with a 14.5% increase (2,900 people) in the year to June 1999 associated with newly developed apartments. The second fastest LGA growth occurred in Camden (A), up 6.5% (2,500 people), followed by Willoughby (A), up 4.8% (2,800), Liverpool (C), up 4.7% (6,400) and Hunter's Hill (A), up by 4.5% (590).

POPULATION CHANGE NEW SOUTH WALES *continued*

SYDNEY GROWTH *continued*

Only two of Sydney's LGAs experienced a population decline in 1998–99. Botany Bay (C) lost 560 people (−1.5%) and Canterbury (C) lost 490 people (−0.3%). The size of these declines made them the second and fourth largest LGA decreases in NSW respectively, although in percentage terms the reductions were relatively small.

COAST DOMINATES GROWTH IN NSW BALANCE

Outside the Sydney SD, the NSW coast had population growth of 1.4% in the year to June 1999, compared to inland NSW which grew by just 0.1%. Lake Macquarie (C) had the largest growth, increasing by 2,400 people (1.3%). Hastings (A) increased by 1,500 (2.4%), while Wollongong (C), Tweed (A) and Shoalhaven (C) each increased by 1,400 people (0.8%, 2.0% and 1.7% respectively). Other coastal LGAs to experience substantial population increase include Port Stephens (A), up 1,200 people (2.3%) and Newcastle up 1,000 people (0.7%). Further north, Ballina (A) increased by 960 people (2.7%) and Byron (A) grew by 620 people (2.2%), while Coffs Harbour (C) added 610 people (1.0%).

INLAND POPULATION GROWTH

Despite the overall lack of population growth in the inland NSW (outside of the Sydney SD), several regional centres experienced considerable increases in the year to June 1999. Wingecarribee (A), in the Southern Highlands increased by 1,000 people (2.6%), while Maitland (C) gained 820 people (1.6%). Queanbeyan (C) and Tamworth (C) each grew by 600 (2.1% and 1.7% respectively), and Griffith (C) grew by 550 people (2.4%). Increases were also recorded in several other centres with populations of over 20,000 people: Dubbo (C) and Cessnock (C) (each up 500); Orange (C) (up 460) and Bathurst (C) increased by 410 people. Some rapid population increases were also recorded in the smaller LGAs of Murray (A) (up 3.0%), and Cobar (A) and Mulwaree (A) (each up 2.9%).

INLAND POPULATION DECLINE

Population decline was recorded in 72 out of 110 inland LGAs (outside Sydney SD). The largest and fastest decline was recorded in Grafton (C), down 570 (−3.3%). Other large declines were Broken Hill (C), down 320 (−1.5%) and Cooma-Monaro (A) and Wellington (A) each down 260 (−2.7% and −2.9% respectively). Although Albury (C) declined by 550 people (−1.3%) in 1998–99, over the Victorian border Wodonga (RC) increased by 610 people.

Other population centres of over 20,000 people experiencing declines were: Goulburn (C) and Wagga Wagga (C) (each down 190 people); Lismore (C) (down 180) and Armidale (C) (down 160). The fastest declining inland LGAs (following Grafton) were Merriwa (A) (−3.2%), Bombala (A) (−3.1%), and Crookwell (A) (−3.0%).

POPULATION CHANGE VICTORIA

STATE SUMMARY

The ERP of Victoria at June 1999 was 4,712,200, an increase of 57,200 or 1.2% since June 1998. Victoria's growth rate has continued to rise since 1993–94, averaging an annual growth rate of 1.0% over the five years since 1994. Most of Victoria's population growth in 1998–99 came from net overseas migration (27,000) and natural increase (26,200). For the last two years Victoria has also experienced positive net interstate migration (4,000 in 1998–99), a turnaround from the large net interstate migration losses experienced in the early 1990s.

In 1998–99 the growth areas in Victoria were located in the outer suburban and inner city LGAs of Melbourne, while outside Melbourne growth occurred in regional centres and areas along the coast.

CONTINUING HIGH GROWTH FOR MELBOURNE

At June 1999 there were an estimated 3,417,200 people resident in Melbourne SD. Melbourne grew by 1.5% (50,200) in the year ending June 1999, compared to an average annual growth rate of 1.2% for the five years to June 1999. Melbourne's share of Victoria's population continues to increase. At June 1999, 73% of Victoria's residents lived in Melbourne, compared to 72% at June 1994—along with Perth and Adelaide, the highest in Australia.

GROWTH IN THE OUTER SUBURBS

In 1998–99, continuing the pattern of recent years, the LGAs which experienced the largest growth in population were located on the outer suburban fringes of Melbourne. Within these LGAs much of the population growth was often concentrated in just one SLA. The largest (16,700 people) and one of the fastest (4.2%) population increases in Victoria occurred in the city of Casey, located on Melbourne's south-eastern outskirts. Three-quarters of Casey's population growth was due to a large increase in the SLA of Casey (C) — Berwick, which gained 5,000 people (9.4%) during 1998–99.

Within the city of Hume, located in Melbourne's north, two-thirds (65%) of that city's population growth was accounted for by the SLA of Hume (C) — Craigieburn which grew by 7.2% in the year to June 1999. Similarly more than four-fifths (84%) of the population gain in the city of Brimbank, located in Melbourne's outer west, was due to population growth in the SLA of Brimbank (C) — Keilor which grew by 3.1% in 1998–99. Casey (C), Hume (C) and Brimbank (C) are popular with young families.

The Shire of Mornington Peninsula, located in Melbourne's south, attracts older people (retirees). In 1998–99 this LGA gained 3,000 people (or 2.5%). Half of the population growth in this shire was accounted for by growth in the SLA of Mornington Peninsula (S) — West which grew by 3.3% over the same period.

LGAs WITH LARGEST AND FASTEST POPULATION GROWTH, Victoria

1998–99.....			1998–99.....		
LGA	no.	%	LGA	no.	%
<hr/>					
LARGEST GROWTH			FASTEST GROWTH		
Casey (C)	6 687	4.2	Melbourne (C)	2 947	6.6
Hume (C)	3 400	2.7	Melton (S)	2 341	5.4
Brimbank (C)	3 001	1.9	Casey (C)	6 687	4.2
Mornington Peninsula (S)	2 985	2.5	Surf Coast (S)	598	3.2
Melbourne (C)	2 947	6.6	Hume (C)	3 400	2.7

POPULATION CHANGE VICTORIA *continued*

...AND GROWTH IN THE INNER CITY

Continuing the trend of recent years, Melbourne's inner city experienced large gains in population over the past year. This LGA gained 2,900 people in the year to June 1999, growing by 6.6%, making it the fastest growing LGA in Victoria and the ninth fastest in Australia. In the five years to June 1999 this LGA recorded an average annual growth rate of 5.9%. This growth is associated with an increase in the number of young people, including many students, living in the City and inner suburbs.

The largest increase in this LGA (1,400 or 3.6 % growth) occurred in the SLA of Melbourne (C) — Remainder while the much smaller SLAs of Melbourne (C) — Southbank–Docklands and Melbourne (C) — Inner also experienced very rapid population gains during the past year, growing by 33.9% and 18.9%, respectively.

SLOWER GROWTH OVERALL IN THE BALANCE OF STATE

The population of Victoria balance grew by 7,000 in 1998–99 to 1,295,000. In the five years to June 1999, the population of Victoria balance increased on average by 0.3% a year while in 1998–99 the population grew by 0.5%. As in previous years, Victoria balance grew more slowly than Melbourne.

REGIONAL AND COASTAL GROWTH AREAS

In 1998–99, just over half of the LGAs in Victoria balance (26 out of 48) gained or had a constant population. Regional centres and coastal areas dominated in terms of population growth.

The City of Greater Geelong recorded the largest increase in population in Victoria balance, gaining 2,500 people (1.3%) in 1998–99, followed by the Cities of Greater Bendigo (960 people or 1.1%), Ballarat (840 or 1.0%) and Mildura (710 or 1.5%) and the Shire of Macedon Ranges (650 or 1.8%).

The fastest growing LGAs in the balance of Victoria were the Shires of Surf Coast, an area not far from Geelong (growing by 3.2% or 600 people), followed by Moorabool (2.0% or 480), Bass Coast (2.0% or 450) and the Rural City of Wodonga (2.0% or 600).

DECLINING RURAL AND MINING AREAS

As in previous years the LGAs experiencing the largest and fastest declines, largely as a result of outmigration, were shires located in mining areas or in the wheat–sheep producing areas of far western and north-western Victoria. The mining shire of La Trobe recorded the largest population decline in Victoria in 1998–99 while the fastest declines were experienced by the Mallee shires of Gannawarra and Buloke.

LGAs WITH LARGEST AND FASTEST POPULATION DECLINE, Victoria

POPULATION CHANGE QUEENSLAND

STATE SUMMARY

The ERP of Queensland at June 1999 was 3,512,400, representing an increase of 58,900 people since June 1998. Queensland's population growth rate in 1998–99 (1.7%) was similar to 1997–98 but lower than the average annual growth rate of 2.0% for the five years ending June 1999. Natural increase was the largest component of population growth (24,500) in Queensland in 1998–99, followed by net interstate migration (17,200) and net overseas migration (17,100).

HIGH GROWTH CONTINUES IN THE SOUTH-EAST

In 1998–99, most of Queensland's population growth occurred in the populous south-east SDs of Brisbane and Moreton, where an increase of 47,300 people accounted for 80.4% of the population growth of Queensland. As a result, the share of the Queensland population living within this corner of the State increased from 63.4% at June 1994 to 64.8% at June 1999.

In June 1999 there were an estimated 1,601,400 people resident in the Brisbane SD. Brisbane grew by 1.8% between June 1998 and June 1999 (an increase of 28,100 people). Brisbane's share of the State population has remained relatively stable, representing 45.6% of Queensland's June 1999 resident population.

The adjacent Moreton SD continued to experience large population gains, increasing by 19,200 people (2.9%) in 1998–99, although growth over the past year was slower than the average annual growth rate for the five years ending June 1999 (3.6%).

GROWING LOCAL GOVERNMENT AREAS

Not surprisingly, the largest increases in population occurred in the two largest LGAs in Australia, the City of Brisbane (an increase of 15,700 people or 1.9%) and the City of the Gold Coast (an increase of 12,800 or 3.4%). The City of Brisbane's 1998–99 growth rate (1.9%) was similar to its average annual growth rate for the five years to June 1999 (1.8%).

Within the city of Brisbane, the southern SLA of Doolandella–Forest Lake had the largest increase of 1,980 people (20.3%) during 1998–99, and the nearby SLA of Parkinson–Drewvale had an increase of 820 people (22.2%). Both areas experienced continuing high growth of young families in new housing estates. The fastest growth in the city of Brisbane occurred in the inner-city SLA of Fortitude Valley — Inner, where one large unit development, accounted for most of the increase of 590 people, representing a growth rate of 446%, for the year 1998–99.

In 1998–99 Gold Coast City gained an extra 12,800 people although its growth rate was slower (3.4%) than the average annual rate of growth experienced over the five years

LGAS WITH LARGEST AND FASTEST POPULATION GROWTH, Queensland

POPULATION CHANGE QUEENSLAND *continued*

GROWING LOCAL GOVERNMENT AREAS *continued*

ending June 1999 (3.9%). Within Gold Coast (C), the largest population increase was recorded in the large rural/residential SLA of Guanaba–Currumbin Valley, where an extra 2,110 people represented an 11.5% increase. The SLA of Coomera–Cedar Creek, also with a low population density, had a similar growth rate (11.5%) resulting from an increase of 810 people. The LGA with the fastest growth in 1998–99 was Miriam Vale (S) (increasing by 220 people or 5.0%) followed by the Sunshine Coast shire of Noosa which grew by 1,650 people or 4.2%.

DECLINING RURAL POPULATIONS

In 1998–99, the trend of falling populations in rural areas continued, with the three western SDs of South West, Central West and North West all recording net population declines, although the rates of decline were less than the average annual rate for the previous five years. Areas dependent on mining also recorded declining populations.

LGAs WITH LARGEST AND FASTEST POPULATION DECLINE, Queensland

1998–99.....			1998–99.....		
LGA	no.	%	LGA	no.	%
LARGEST DECLINE			FASTEST DECLINE		
Broadsound (S)	-163	-2.2	Monto (S)	-65	-2.3
Belyando (S)	-147	-1.4	Mount Morgan (S)	-64	-2.3
Mount Isa (C)	-142	-0.6	Broadsound (S)	-163	-2.2
Banana (S)	-131	-1.0	Richmond (S)	-21	-1.9
Duarina (S)	-122	-1.4	Aramac (S)	-16	-1.9

Four of the five LGAs showing the largest decline in population were neighbouring shires within the Mackay and Fitzroy SDs. Broadsound (S) (loss of 160 people or -2.2%) and Belyando (S) (loss of 150 people or -1.4%) showed the largest declines. Their 1998–99 rate of decline was higher than their 1994–99 average annual rate of decline. The large north-western mining centre of Mount Isa (C) also experienced a decline (-0.6%) in 1998–99 although the decline was less than the average annual rate of decline over the previous five years (-1.1%).

PRISON POPULATIONS IN QUEENSLAND

The estimated resident population of an area includes the residents of prisons and other long-term institutions. For a few SLAs, the prison population forms a significant proportion of the total SLA population. For example, in the SLA of Wacol 1,760 prisoners accounted for 31% of the ERP in June 1999. There are two prison populations in Queensland which were previously not included in their correct SLA. The Woodford Correctional Institution, which began to receive prisoners in March 1997, has a capacity of 600 male prisoners. The June 1999 estimate of resident population for Caboolture (S) — Pt B includes for the first time the prisoners within the Woodford Correctional Institution. The Townsville Correctional Centre is located 13 kms south of Townsville's central business district, within the SLA of Stuart–Roseneath. The prisoners were previously miscoded to SLAs throughout Queensland. This situation has been corrected in the resident population estimates for June 1999, when 520 prisoners were added to the SLA of Stuart–Roseneath.

POPULATION CHANGE SOUTH AUSTRALIA

STATE SUMMARY

The ERP of SA at June 1999 was 1,493,100 people, representing an increase of 6,700 (0.4%) since 30 June 1998. In the last five years SA's population growth has been steady, increasing by 26,900 persons with an average annual growth rate of 0.4% during this period.

During 1998–99 SA gained population through natural increase (6,600 people) and net overseas migration (2,900 people) but lost population (2,900 people) through net interstate migration.

INCREASING POPULATION GROWTH IN ADELAIDE

Between June 1998 and June 1999, the population of the Adelaide SD grew by 5,100 (0.5%) to 1,092,900. This growth rate was slightly higher than the average annual rate of the past five years (0.4%). Adelaide's share of SA's population has remained steady over the past five years with 73% of South Australians resident within the capital city, along with Perth and Melbourne, the highest in Australia.

Within Adelaide SD the LGA with the highest percentage increase in population between 1998 and 1999 was Adelaide (C) (2.3%) increasing by 300 people. Apartment developments within the city of Adelaide have been associated with a resurgence in inner city living.

ADELAIDE'S COMMUTING ZONE EXPANDS

In 1998–99, the population in the balance of SA grew by 1,500 to 400,200, an increase of 0.4% compared to an average annual growth rate of 0.3% for the five years ending June 1999. As in previous years the Outer Adelaide SD continued to have the fastest population increase of all SDs in the State and the second largest increase behind Adelaide SD. Between June 1998 and 1999 the population of this area increased by 1,400 people or 1.3%. Within this SD, substantial population growth continued in the Fleurieu SSD (2.3%), located to the south of the Adelaide metropolitan area, and in the Mt Lofty Ranges SSD (1.3%), located to the east of the Adelaide metropolitan area. Continuing high growth in these urban fringe areas in recent years reflects the expansion of Adelaide's commuting zone. In contrast, growth in the Barossa SSD in the past year has slowed from 1.4% a year in the five years to June 1999 to 0.5%.

RECOVERY IN EYRE SD

The Eyre SD has shown signs of recovery in the past year, increasing by 0.9% or 300 people between June 1998 and June 1999. In particular, the LGAs of Elliston (DC), Cleve (DC) and Franklin Harbour (DC) have all shown small increases in population, after having declined between 1994 and 1998.

POPULATION CHANGE SOUTH AUSTRALIA *continued*

INCREASES IN ADELAIDE AND FAR NORTH

Most fast growing LGAs, both in terms of percentage and numerical growth, tended to be located within the Adelaide and Outer Adelaide SDs. Tea Tree Gully (C), located in the north east of Adelaide metropolitan area, was the LGA with the largest growth in ERP between June 1998 and June 1999, increasing by 740 persons (0.8%). This LGA has been the site of some of the more significant housing developments which have occurred in the Adelaide metropolitan area in recent years.

LGAs WITH LARGEST AND FASTEST POPULATION GROWTH, SA

LGA	1998–99.....		1998–99.....		
	no.	%	LGA	no.	%
LARGEST GROWTH			FASTEST GROWTH		
Tea Tree Gully (C)	740	0.8	Roxby Downs (M)	619	18.0
Onkaparinga (C)	676	0.5	Victor Harbor (DC)	320	3.2
Roxby Downs (M)	619	18.0	Tumby Bay (DC)	65	2.4
Marion (C)	571	0.7	Robe (DC)	31	2.3
West Torrens (C)	568	1.1	Adelaide (C)	297	2.3

As was the case in the previous year, the mining town of Roxby Downs (M) in the State's far north was the LGA with the fastest population growth in Australia in 1998–99 with an increase of 620 persons (18.0%). Between 1994 and 1999 Roxby Downs (M) had the highest average annual growth rate in SA (9.5%), resulting from the expansion of the Olympic Dam project and increases in the number of families moving into the area following recent developments to the town's infrastructure and services.

DECLINE IN REMOTE RURAL AREAS OF THE STATE

Population decline was recorded in 20 LGAs, just under a third of all LGAs in SA. Eighteen of these 20 LGAs were located within three SDs, Northern (9 LGAs), Murray lands (5 LGAs), and Yorke and Lower North (4 LGAs) SDs. The LGAs that recorded the greatest declines in population were located in more remote rural areas in the State's north.

The LGAs of Whyalla (C) (−320) and Wakefield (DC) (−150) experienced the largest declines in population between June 1998 and June 1999. Both of these LGAs are located in the north of the State. The LGAs of Mount Remarkable (DC) (−2.5%) and Peterborough (DC) (−2.5%), also located in the north of the State, recorded the fastest decline in population.

POPULATION CHANGE WESTERN AUSTRALIA

STATE SUMMARY

The WA population increased by 31,900 (1.7%) in the year to June 1999 to 1,861,000.

This growth rate was the fastest in Australia (equal with Queensland), although was slightly slower than WA's average growth of 1.8% per year for the five years to June 1999.

In 1998–99, overseas migration accounted for half of WA's growth, and for the first time since 1989–90 exceeded growth from natural increase. Natural increase accounted for 45% of the growth, while net interstate migration accounted for the remainder (6%).

Three-quarters of all WA population growth occurred in Perth (SD) in 1998–99. The extra 23,900 people in the year to June 1999 produced a growth rate of 1.8% and a total Perth population of 1,364,200 people, or 73% of the total WA population. The population in the balance of State increased by 7,900 (1.6%) in the year to June 1999, with two-thirds of this growth coming from the South West SD.

The Kimberley accounted for almost one-quarter (23%) of the growth outside Perth and was WA's fastest growing SD, increasing by 6.7% (1,800 people) in 1998–99. The rapid growth has resulted from increases in employment opportunities associated with tourism and the development of an irrigation scheme (Ord Project Phase 2).

LARGEST GROWTH IN PERTH FRINGE

WA's highest population growth LGAs were associated with the low-density residential housing developments in the Perth Metropolitan fringe areas. Wanneroo (C) and Swan (C) in the north were the LGAs with the first and second largest increases, up 3,400 people (4.8%) and 2,700 people (3.5%) respectively. In the south west fringe, Cockburn (C) and Rockingham (C) had the State's third and fifth largest LGA growth with increases of 2,600 (4.0%) people and 2,100 (3.2%) people respectively. Gosnells (C) in the south east had the fourth largest increase, adding 2,370 (or 3.0%) people. Over half (55%) of Perth's growth in 1998–99 was accounted for by these five LGAs.

The established inner city areas generally had less growth than the outer areas, the main exception being the City of Perth which had a population increase of 420 (7.1%) in the year to June 1999. This is associated with medium and high density housing developments, particularly on the eastern edge of the CBD.

POPULATION CHANGE WESTERN AUSTRALIA *continued*

.....

HIGH GROWTH CONTINUES IN SOUTH WEST

The South West SD contained some of the highest growth LGAs in the State after those in the Perth SD, continuing the pattern of strong growth seen throughout the 1990s. Busselton (S) had the highest growth from this region, increasing by 1,200 people (5.9%) in 1998–99. This was followed by Harvey (S) 870 (5.1%), Dardanup (S) 760 (9.7%), Mandurah (C) 600 (1.4%) and Bunbury (C) with 550 (2%) more people.

GROWTH IN WESTERN AUSTRALIA OTHER REGIONS

In the Kimberley, all LGAs recorded growth. The Shire of Derby–West Kimberley was the fastest growing LGA in the State with a 10.4% (730 people) increase in the year to June 1999. Other fast growing LGA populations in the Kimberley were: Halls Creek (S) with a 6.5% increase (220 people); Wyndham–East Kimberley (S) up 5.9% (400 people) and Broome (S) up 4.7% (490 people).

In the Central SD, the shires of Greenough and Irwin grew by 320 (2.8%) and 220 people (7.9%) respectively. In Lower Great Southern SD, Albany (C) grew by 470 people (1.6%), followed by Denmark (S) with an additional 230 people (5.6%).

In the Midlands SD, most growth occurred in the LGAs to the north of the Perth SD. Chittering (S) increased by 140 (5.7%), Dandaragan (S) was up 150 (5.5%) and Gingin (S) added 130 people (3.4%).

In the South Eastern SD, Kalgoorlie–Boulder (C) growth slowed to 1.9% (from 2.9% in the previous year) with a population increase of 590. Esperance (S) increased by 260 (2.0%), slightly slower than the average annual growth over the 1994–99 period (2.2%).

DECLINING LGAS

Population decreases were recorded in 52 of WA's 142 LGAs in the year to June 1999, with 50 of these being ex-metropolitan LGAs. Geraldton (C) had the largest decline, falling by 470 people (-2.3%). This decline is associated with a number of factors, including: the demolition of some State housing dwellings; the movement of families from Geraldton to housing developments in the adjacent LGA of Greenough (S) and the postponement of the proposed Oakajee mining project.

After Geraldton, the LGAs with the largest declines were predominantly mining areas. Reductions in iron ore mining in the more remote areas of the Pilbara resulted in Ashburton (S) declining by 400 (-5.8%) and East Pilbara (S) falling 290 (-4.0%). Coolgardie (S) in the South Eastern SD had the third largest decline, down 330 people (-6.2%). Vincent (T) in central Perth had the fifth largest decline with 190 less people in 1998–99, although this was a small decline in percentage terms (-0.7%).

.....

POPULATION CHANGE TASMANIA

POPULATION DECLINE CONTINUES

For the third year in a row, Tasmania was the only State in Australia to experience a decline in population. At June 1999 the ERP of Tasmania was 470,300, a decline of 1,400, or -0.3% since June 1998. Population decline for the year ending June 1999 was faster than the average annual growth rate for the five years to June 1999 (-0.1%). Since June 1994 the population of Tasmania has declined by 2,700 people.

In 1998-99 Tasmania's population decline was due to a net loss through interstate (-3,700 people) and overseas migration (-230 people) which outweighed the gain made through natural increase (2,500 people).

HOW THE REGIONS FARED

In 1998-99, the Southern SD was the only region in Tasmania whose population increased by 80 people (or 0.2%). In recent years, Southern SD has had consistently higher population growth than any other SD in Tasmania, with an average annual growth rate of 0.3% over the past five years. In contrast, Greater Hobart experienced the largest decline (a loss of 730 or -0.4%) while the Mersey-Lyell region continued to experience the fastest population decline in 1998-99 (a loss of 630 or -0.6%).

GROWTH IN HALF OF TASMANIAN LGAS

In the year to June 1999, half (14 out of 29) of Tasmania's LGAs increased their population, although all grew at a lower rate than Australia as a whole (1.3%).

In 1998-99 Meander Valley, a fringe urban area near Launceston, experienced the largest increase in population of all LGAs in Tasmania. This LGA increased by 190 people or 1.1% in the year to June 1999, compared to an average annual growth rate of 0.9% over the past five years. The second largest increase in population occurred in Latrobe (an increase of 60 people or 0.8%), a 'lifestyle' and retirement area just outside Devonport.

Sorell (M)	53	0.5	Kentish (M)	29	0.5

POPULATION CHANGE TASMANIA *continued*

DECLINING LGAS

The four largest LGAs in Tasmania, the cities of Launceston, Clarence, Hobart and Glenorchy, also experienced the largest population declines in Tasmania in 1998–99. Hobart had the largest loss in population (down 360). The decline of Hobart's population was faster in 1998–99 (−0.8%) than the annual average decline for the last five years (−0.5%). Of the LGAs to experience both large and fast declines in population, all experienced a more rapid rate of decline in the year to June 1999 than over the past five years. One of the major reasons for the decline in population in these areas has been interstate migration.

West Coast (M), a relatively small LGA, continued to experience one of the largest and fastest population declines in Australia, declining at a faster rate in 1998–99 (−4.0%) than over the past five years (with a five year average annual growth rate of −3.6%).

POPULATION CHANGE NORTHERN TERRITORY

GROWTH SLOWS IN THE TERRITORY

The ERP of the NT in June 1999 was 192,900, an increase of 2,900 since June 1998.

Population growth in the NT slowed in 1998–99 to 1.6%, from an average annual growth rate of 2.2% experienced for the five years to June 1999. Nevertheless, the NT had the third fastest growth rate in Australia in 1998–99, after WA and Queensland.

Much of the NT's population growth comes from natural increase (2,800 people), followed by net overseas migration (an increase of 1,100 people). The NT experienced a net interstate migration loss of 900 people in 1998–99.

POPULATION LOSS IN DARWIN CITY

Population growth was faster in Darwin SD in 1998–99 (1.8%) than in the balance of the Territory (1.3%). Despite the positive population growth of Darwin SD, the population of Darwin City SSD experienced negative growth, declining from 69,300 in 1998 to 68,500 in 1999. The decline in 1998–99 (−1.2%) contrasts with an average annual growth rate of 0.2% for the five years to June 1999.

Some of the biggest population declines in the NT in 1998–99 occurred in the Darwin City SLAs of Karama, Rapid Creek, Leanyer and Malak. In 1998–99 almost all (24 out of 29) SLAs in Darwin City SSD experienced negative growth, ranging from −0.2% for Winnellie to −4.7% for Rapid Creek. The decline in the population of these Darwin City SLAs can be partially explained by the trend for Darwin residents to move out to the newer and more affordable suburbs of Palmerston.

In contrast, Larrakeyah, Stuart Park and City — Inner recorded high growth (8.6%, 6.6% and 6.5%, respectively) in 1998–99. This growth reflects the promotion and construction of new residential housing (flats) in the city centre and new estates (flats and houses) overlooking Darwin Harbour.

POPULATION CHANGE NORTHERN TERRITORY *continued*

HIGH POPULATION GROWTH IN PALMERSTON-EAST ARM AREA

Palmerston–East Arm SSD was the largest growth area in the Territory, which alone contributed 81.2% (2,400) of the 2,900 increase in population in the Territory in 1998–99.

Since June 1998 Palmerston LGA (which includes Driver, Gray, Moulden, Woodroffe, Palmerston (T) Bal) has increased by 14% (2,400) to 19,500 in June 1999. Palmerston is a new residential area which provides affordable housing to a broad range of socioeconomic groups.

Palmerston (T) Balance SLA (which includes the newly developed suburbs of Bakewell, Rosebery, Marlow Lagoon, Durack and Gunn) also experienced large gains in population, increasing from 3,800 in June 1998 to 5,900 in June 1999 (an increase of 54.2%).

The second highest population increase in Palmerston was Gray SLA which grew from 3,400 to 3,600 (5.5%) in 1998–99.

GROWTH IN DARWIN RURAL AREAS

In 1998–99 the population of Darwin Rural Areas SSD increased by 590 people, or 3.5%. Since June 1996 this SSD has increased its population by 14.1%, from 15,400 to 17,600 in June 1999. About one-third of this increase can be explained by the growth in Defence personnel at the Robertson Barracks. Litchfield (S) — Pt A increased by 11.9% (190) in 1998–99 reflecting the transfer of the 5th/7th Mechanised Infantry Battalion from Holsworthy in Sydney to the Robertson Barracks.

The remainder of the increase in Darwin Rural Areas is primarily associated with the subdivision of land for low density residential housing throughout Litchfield (S) — Pt B, particularly in Humpty Doo, Virginia, Bees Creek and Noonamah. Litchfield (S) — Pt B increased by 320 people in 1998–99, or 2.4%.

POPULATION CHANGE IN OTHER MAJOR NT TOWNS

Alice Springs (Town) continued to grow marginally increasing from 25,500 in June 1998 to 25,600 (0.2%) in June 1999.

Tennant Creek (Town) and Katherine (Town) both showed low growth between 1998–99 of 1.3% and 0.8% respectively.

POPULATION CHANGE AUSTRALIAN CAPITAL TERRITORY

ACT SUMMARY

The ACT population increased by 2,100 people (or 0.7%) in the year to June 1999, to be 310,200. Although significantly less than the national growth rate of 1.2%, the ACT's growth was up on the level for the previous year (0.0%), and higher than the average annual growth for the five years to June 1999 (0.6%). The increase in growth in 1998–99 has resulted from a reduction in the substantial net outflow of ACT residents which began in 1996–97.

As for the previous year, the Gungahlin–Hall SSD was the principal site of the ACT's population growth, with an increase of 1,700 people (10.6%). Smaller increases in population were recorded in South Canberra, (up 240 people), North Canberra (up 150 people), Tuggeranong and Weston Creek–Stromlo (each up by 40 people). A small population decline was recorded in Belconnen (falling 70 people).

SLA GROWTH

Population increases were recorded in 38 of the ACT's 106 SLAs in 1998–99, with the most significant increases coming from the residential development in Gungahlin–Hall SSD. Nicholls had the largest population increase of 760 people (27.6%), followed by Ngunnawal (up 510 people or 8.3%). Amaroo had the third biggest increase (up 410 people or 28.5%), while Dunlop increased by 330 people (29.5%).

Continuing growth in newer suburbs of Tuggeranong provided the fifth and ninth largest population increases with Conder up 280 people (6.8%), and Gordon up by 140 people (1.9%) in 1998–99.

Urban infill in some older suburbs provided the remainder of the significant population growth. Medium density housing developments in Watson, Griffith, and Narrabundah were associated with population increases of 200 people (6.0%), 160 people (4.2%) and 150 people (2.6%) respectively in 1998–99.

SLA DECREASE

The largest population declines in the year to June 1999 occurred in O'Connor and Wanniassa which each lost 130 people, (−2.9% and −1.4% respectively). The third and fourth largest decreases were recorded in the ACT's largest and third largest SLAs respectively. Kambah and Kaleen each lost 90 people (−0.5% and −1.1% respectively).

POPULATION CHANGE NEW ZEALAND

POPULATION GROWTH

New Zealand's resident population at June 1999 totalled 3,811,000 people. The four northern-most regions (Northland, Auckland, Waikato and Bay of Plenty) together contained just over half (50.6%) of New Zealand's resident population at June 1999, with the remainder being spread between the southern part of North Island (25.1%) and the South Island (24.3%).

The growth rate for the year ending June 1999 was 0.5% compared to an increase of 0.8% for the previous year. In 1998–99 New Zealand's growth rate was less than half the rate of Australia (1.2%), reflecting the effect of the loss due to net overseas migration.

In 1998–99, the population of the North Island grew at a much faster rate (0.6%) than the population of the South Island (0.1%) with population growth in the North Island accounting for 96% of New Zealand's population gain in 1998–99, although the southern half of North Island lost population overall. The Auckland Region, the most populous region in New Zealand, had much larger and faster gains in population than the rest of the country, increasing by 15,800 people (or 1.4%). With a population of 1,175,400, the Auckland Region is home to almost one-third (31%) of the New Zealand population and two-fifths (41%) of people living in the North Island.

(a) The population base for these estimates is the number of New Zealand residents in New Zealand on Census night, 5 March 1996, adjusted for the estimated undercount at the 1996 Census (45,000) and for the estimated number of New Zealand residents temporarily overseas on 5 March 1996 (40,000).

(b) Includes the population of Kermadec Island and people on oil rigs.

(c) Includes the population of Chatham Islands District and Campbell Island.

Source: Statistics New Zealand News Release on subnational population estimates as at 30 June 1999.
Released on 17 November 1999.

POPULATION CHANGE NEW ZEALAND *continued*

POPULATION GROWTH *continued*

Four other regions (Tasman, Bay of Plenty, Northland and Canterbury) also recorded growth rates exceeding the national average of 0.5% in 1998–99. The Tasman Region recorded an increase in population of 1.3%, followed by Bay of Plenty (1.0%), Canterbury (0.6%) and Northland (0.8%). The Canterbury Region is the most heavily populated region in the South Island and is home to almost 53% of South Island residents.

Marlborough's growth was the same as that of New Zealand as a whole (0.5%). Both Waikato (0.4%) and Wellington (0.1%) recorded growth lower than the national figure, while the population of Nelson did not change.

POPULATION DECLINE

Just under half (7 out of 16) of New Zealand's regions experienced population decline in the year ending June 1999. The largest and fastest decline was recorded by the Southland Region which had a loss of 1,700 people (−1.8%), followed by Manawatu–Wanganui (in the North Island) with a decrease of 1,300 people (−0.6%).

EXPLANATORY NOTES

INTRODUCTION

- 1** This publication contains estimates of the resident population of LGAs, SLAs, SSDs, SDs, Statistical Districts, States, Territories and Australia.
- 2** LGAs are ranked within States and Territories according to both largest and fastest growth between 1998 and 1999, allowing this publication to identify, in two ways, areas in Australia with the largest and fastest increases and decreases in population.
- 3** Following the 1992 amendment to the Acts Interpretation Act to include the Indian Ocean Territories of Christmas Island and Cocos (Keeling) Islands as part of geographic Australia, population estimates at dates commencing from July 1993 include estimates for these two Territories. To reflect this change, another category of the State/Territory classification was created, known as Other Territories. Other Territories include Jervis Bay Territory as well as Christmas Island and the Cocos (Keeling) Islands. Data for Other Territories are not separately identified in this publication although their total is included in the Australia population. Prior to July 1993, Jervis Bay Territory was included in estimates for the Australian Capital Territory.

ACCURACY

- 4** To meet the conflicting demand for accuracy and timeliness there are three estimates of sub-State populations. Preliminary estimates are available seven months after the reference date, revised estimates are available a year later and final estimates after the following census. The estimates in this publication are preliminary for 1999, revised for 1998 and final for 1994.
- 5** In recognition of the inherent inaccuracy involved in population estimation, population figures over 1,000 in the text are rounded to the nearest hundred, and figures less than 1,000 are rounded to the nearest ten. While unrounded figures are provided in tables, accuracy to the last digit is not claimed and should not be assumed.

ESTIMATED RESIDENT POPULATION

- 6** Estimated resident population (ERP) are estimates of the Australian population obtained by adding to the estimated population at the beginning of each period the components of natural increase (on a usual residence basis) and net overseas migration.
- 7** For the States and Territories, account is also taken of estimated interstate movements involving a change of usual residence. After each census, estimates for the preceding intercensal period are revised by incorporating an additional adjustment (intercensal discrepancy) to ensure that the total intercensal increase agrees with the difference between the ERPs at the two respective census dates.
- 8** Estimates of the resident population are based on adjusted (for underenumeration) census counts by place of usual residence, to which are added the number of Australian residents estimated to have been temporarily overseas at the time of the Census. Overseas visitors in Australia are excluded from this calculation.
- 9** The concept of ERP links people to a place of usual residence within Australia. Usual residence is that place where each person has lived or intends to live for six months or more from the reference date for data collection.

EXPLANATORY NOTES *continued*

ESTIMATION OF STATISTICAL LOCAL AREA POPULATIONS

10 In Census years the estimated resident population (ERP) as at 30 June for each Statistical Local Area (SLA)/Local Government Area (LGA) is based on usual residence census counts. To these counts are added an adjustment for net census undercount and the number of residents temporarily overseas at the Census date. As the 1996 Census was held on 6 August, further adjustments were made to obtain the ERP at 30 June 1996.

11 For post-censal years, the absence of migration data at the SLA level means that it is not possible to estimate SLA populations by taking into account natural increase and net migration. Instead, ERPs are calculated using a mathematical model. Local knowledge, including that advised by local governments, may be used to adjust the outcome of the model for a particular SLA.

12 In the mathematical model a relationship is established between changes in population and changes in other indicators over the period between the two most recent censuses.

13 The choice of indicators varies across the States and Territories, depending on availability, and includes dwelling approvals, electricity connections, Medicare enrolments and drivers licenses. Changes in these indicators are then used to estimate changes in the population of each area since the last census. The choice of indicators also varies across SLAs depending on aspects such as whether the SLA is urban or rural, is growing or declining, and whether the area has a high or low proportion of houses or medium and high density dwellings.

14 A more detailed explanation of the concept of ERP, as adopted by the ABS for official population estimates, is contained in the ABS *Information Paper: Demographic Estimates — Concepts, Sources and Methods*. The paper is available via the Themes/Demography section of the ABS website:
<http://www.abs.gov.au>

STATISTICAL AREAS

15 This publication contains data presented according to the Australian Standard Geographical Classification 1999 Edition (ASGC). Under this classification, statistical areas are defined as follows:

- *Legal Local Government Areas (LGAs)*. These areas are the spatial units which represent the geographical areas of incorporated local government councils and incorporated Community Government Councils (CGCs) where the CGC is of sufficient size and statistical significance. The various types of LGAs are cities (C), areas (A), rural cities (RC), towns (T), shires (S), district councils (DC) and municipalities (M).
- *Statistical Local Areas (SLAs)*. These geographical areas are, in most cases, identical with, or have been formed from a division of, whole LGAs. In other cases, they represent unincorporated areas. In aggregate, SLAs cover the whole of a State or Territory without gaps or overlaps. In some cases legal LGAs overlap statistical subdivision boundaries and therefore comprise two or three SLAs (Part A, Part B and, if necessary, Part C).

EXPLANATORY NOTES *continued*

STATISTICAL AREAS *continued*

- *Statistical Subdivisions (SSDs)*. These are of intermediate size, between SLAs and SDs. In aggregate, they cover the whole of Australia without gaps or overlaps. They are defined as socially and economically homogeneous regions characterised by identifiable links between the inhabitants. In the non-urban areas an SSD is characterised by identifiable links between the economic units within the region, under the unifying influence of one or more major towns or cities.
- *Statistical Divisions (SDs)*. These consist of one or more SSDs. The divisions are designed to be relatively homogeneous regions characterised by identifiable social and economic units within the region, under the unifying influence of one or more major towns or cities.
- *Statistical Districts (S Dists)*. These consist of selected, significant, predominantly urban areas in Australia which are not located within a Capital City SD. S Dists enable comparable statistics to be produced about these selected urban areas.

16 Further information concerning statistical areas is contained in *Australian Standard Geographical Classification (ASGC), 1998* (Cat. no. 1216.0).

17 For the purposes of this publication, all data refer to bounded areas as defined at 1 July 1999, and as incorporated in the 1999 ASGC.

18 Changes to LGA boundaries that have occurred between 5 August 1995 and 1 July 1998 are documented in Appendix A. Appendix B contains SLA changes incorporated in ASGC 1998, not included in Appendix A. Changes to LGA boundaries that have occurred since 1 July 1998 are documented in Appendix C. Appendix D contains SLA changes that have occurred since 1 July 1998, not included in Appendix C.

MAPS

19 A complete series of maps showing the SLAs mentioned in this publication is available in *Australian Standard Geographical Classification (ASGC), July 1998* (Cat. no. 1216.0)

AVERAGE ANNUAL RATE OF GROWTH

20 The average annual rate of population growth, r , is calculated as a percentage using the formula:

$$r = \left(5 \sqrt{\frac{P_{99}}{P_{94}}} - 1 \right) \times 100$$

where P_{94} is the ERP at 30 June 1994 and P_{99} is the ERP at 30 June 1999.

CALCULATION OF AREAS

21 The area figures quoted in this publication are calculated from the 1996 Census Collection District Record Database. Large water areas have been excluded. Where necessary, adjustments have been made to reflect changes that have occurred in spatial unit boundaries between 1996 and 1999.

EXPLANATORY NOTES *continued*

ELECTRONIC DATA

22 Annual population estimates at 30 June for all SLAs in Australia are available electronically. This information can be customised to provide data for any choice of years, and any combination of States and Territories. Telephone inquiries should be made to Information Services (see the back cover of this publication for telephone numbers).

ACKNOWLEDGMENT

23 ABS publications draw extensively on information provided freely by individuals, businesses, governments and other organisations. Their continued cooperation is very much appreciated; without it, the wide range of statistics published by the ABS would not be available. Information received by the ABS is treated in strict confidence as required by the *Census and Statistics Act 1905*.
