	Tasmania, Urban Centres

This publication contains data from the 1996 Census of Population and Housing, and describes the characteristics of people in Tasmania and their housing arrangements. Similar publications are available for each State and Territory, and nationally.

The data presented in this publication relate to where people were counted on census night, and therefore data for each geographical area includes visitors to that area but exclude those people who were away on census night. The publication uses both the Urban Centre/Locality (UC/L) and the Section of State (SOS) geographic classifications which classify areas according to size of the population. Whilst the UC/L classification covers only part of the State or Territory, the SOS classification covers the State or Territory in its entirety.

This publication presents only a selection of data from the full range of census variables. For further information about other census or Australian Bureau of Statistics (ABS) data refer to the Appendix or *Directory of Census Statistics*, 1996 (Cat. no. 2910.0). Concepts and definitions used in this publication, including U/CL and SOS, are explained in the Glossary and more detailed information is available in the *Census Dictionary*, 1996 (Cat. no. 2901.0).

ABS publications draw extensively on information provided freely by individuals, businesses, governments and other organisations. Their continued cooperation is very much appreciated: without it, the wide range of statistics published by the ABS would not be available. Information received by the ABS is treated in strict confidence as required by the *Census and Statistics Act 1905*.

D. Rogers Regional Director

POPULATION AND HOUSEHOLD CHARACTERISTICS

POPULATION DISTRIBUTION

The 1996 Census of Population and Housing counted 459,659 people in Tasmania on census night, representing a growth of 1.5% in Tasmania's population count since 1991 (452,837). In 1996, 72.7% of the people counted in Tasmania were in urban areas, comprising 126,118 people in the Major Urban area and 207,881 in the Other Urban area. This was similar to 1991, reflecting Tasmania's relatively stable population.

There were 39 Urban Centres and 60 Localities in Tasmania in 1996. Apart from Hobart (which constituted the State's Major Urban area), there were two other major population centres — Launceston (67,701) and Devonport (22,299). These three areas accounted for almost half (47.0%) of the State's population.

SEX

In 1996, there were more females counted in Tasmania (50.8%). The urban areas contained proportionally more females (51.7% in Major Urban and 51.5% in Other Urban). However, there were proportionally more males in the State's Rural Balance (51.5%) and the Bounded Locality (50.3%).

Females outnumbered males in the majority (53) of UC/Ls, particularly in Oatlands (L) and Nubeena (L) (53.8% each), Deloraine (53.7%) and Woodbridge (L) (53.3%). Relatively high proportions of males were recorded in Tullah (L) (59.0%), Eaglehawk Neck (L) (56.0%) and the mining area of Rosebery (55.7%).

AGE

The population in Tasmania is ageing. The median age had increased from 32 years in 1991 to 34 years in 1996, and the proportion of people aged 65 years or more had increased from 11.5% to 12.3%.

The Major Urban area recorded the highest proportion of people aged 65 years or more (14.7%) while the Rural Balance recorded the lowest (7.9%). As well, the Major Urban area recorded a lower proportion of children (aged 0–14 years) than the State as a whole (19.3% compared to 22.7%).

The highest proportions of people aged 65 years or more were recorded in Swansea (L) (25.1%), Nubeena (L) (24.6%), Low Head (L) (24.4%) and Franklin (L) (24.2%). The highest proportions of children were recorded in Bridgewater-Gagebrook (35.6%), Maydena (L) (34.1%), Seven Mile Beach (32.1%), Hadspen (30.8%), Lilydale (L) (30.3%) and Margate (30.2%).

BIRTHPLACE

Australian-born

The majority (85.9%) of people counted in Tasmania were Australian-born. The Major Urban area (83.1%) recorded the lowest percentage, while the Bounded Locality (87.3%) recorded the highest.

Ringarooma (L), Dunalley (L) and Bothwell (L) recorded the highest proportions of Australian-born people (96.1%, 94.1% and 93.3% respectively).

BIRTHPLACE continued

Overseas-born

The proportion of people who stated that they had been born overseas showed little change between 1991 and 1996 (10.5% and 10.2% respectively). People born in the United Kingdom (UK), Ireland or New Zealand (NZ) constituted 5.8% of the State population in 1996 (6.1% in 1991). The Rural Balance recorded the highest proportion of people born in these countries (6.6%), followed by the Major Urban area and Bounded Locality (5.9% each). The highest proportions were noted in the UC/Ls of Lanena-Blackwall (L) (14.1%), Fern Tree (L) (14.0%) and Dilston (L) (12.7%).

A smaller proportion (4.4%) of people reported that they had been born overseas in countries other than the UK, Ireland or NZ (also 4.4% in 1991). The Major Urban area recorded the highest proportion of people born in these countries with 6.7%. High proportions were recorded in the UC/Ls of Kettering (L) (7.3%), Kingston-Blackmans Bay (6.7%) and Howden (L) (6.5%).

INDIGENOUS ORIGIN

The number of people who reported being of Indigenous origin, increased by 56.1% between 1991 and 1996, from 8,882 to 13,873. As a percentage of the population of Tasmania, this represented an increase from 2.0% to 3.0%.

In 1996, the proportion of Indigenous people was highest in the Bounded Locality (4.1%) and lowest in the Major Urban area (2.3%). This was also the case in 1991 (2.8% and 1.4% respectively).

The Localities of Cygnet, Geeveston and Dover in south-eastern Tasmania recorded the highest proportions of people who reported being of Indigenous origin (26.7%, 15.7% and 14.1% respectively). However, over half (54.5%) of UC/Ls recorded proportions equivalent to or less than the Tasmanian proportion of 3.0%.

LONE PERSON HOUSEHOLDS

In 1996, there were 42,437 lone person households in Tasmania, an increase of 24.3% on the 1991 figure of 34,150. Most of this increase occurred in the Other Urban area, which rose by 30.0% from 15,238 to 19,815.

The proportion of lone person households also increased, from 21.0% to 24.2%, with the highest proportions being in the Major Urban (28.6%) and Other Urban areas (24.8%) and the lowest being in the Rural Balance (16.8%). UC/Ls with the highest percentages of lone person households were the Localities of Primrose Sands (33.2%), Low Head (31.2%) and St Marys (30.2%).

FAMILY HOUSEHOLDS WITH DEPENDENT CHILDREN

Between 1991 and 1996, the number and proportion of family households with dependent children declined, from 62,863 (52.6%) in 1991 to 62,093 (50.6%).

The percentages of family households with dependent children ranged from 48.1% in the Bounded Locality to 53.1% in the Rural Balance. UC/Ls which recorded the highest percentages were Bridgewater-Gagebrook (71.2%), Collinsvale (L) (66.3%), Zeehan (65.2%) and Fern Tree (L) (65.2%).

LABOUR FORCE CHARACTERISTICS (For Persons Aged 15 Years and Over)

EMPLOYMENT

In 1996, there were 182,211 employed people in Tasmania compared with 178,187 in 1991, an increase of 2.3%. Over the same period, the State's labour force declined by 0.6%, from 205,913 to 204,676. As a proportion of the State's population, the percentage of employed people was 57.8%.

Full-time employment

Of the employed population in Tasmania, 117,904 (64.7%) worked full-time (67.1% in 1991). The proportions of people employed full-time was fairly similar across the State ranging from 63.0% in the Bounded Locality to 64.9% in the Rural Balance.

Over two-thirds (68.3) of full-time workers were males, a slight decrease since 1991 (69.6%). The percentage of full-time male employees varied from 64.4% in the Major Urban area to 72.0% in the Bounded Locality .

UC/Ls which recorded the highest proportions of full-time employees were located in the mining areas of Rosebery (76.6%) and Tullah (L) (73.0%), as well as Forth (L) (71.7%) and Scottsdale (69.9%). These areas also tended to report high proportions of male full-time employees.

Part-time employment

There had been a 21.5% increase in the number of employed people who worked part-time, from 49,566 (27.8%) in 1991 to 60,219 (33.0%). The proportions of people employed part-time ranged from 32.5% in the Rural Balance to 34.3% in the Bounded Locality. Over two-thirds (67.8%) of these workers were females, compared with 69.9% in 1991.

UC/Ls which recorded the highest proportions of part-time employees were the seaside localities of White Beach (52.2%), Eaglehawk Neck (48.8%). Nubeena (45.2%) and Bicheno (44.7%).

Occupation

In 1996, 25.7% of employed people were Managers and administrators or Professionals, compared with 23.8% in 1991. In both census years, the Rural Balance recorded the highest percentages in this occupation grouping (32.3% and 32.1% respectively), although it should be noted that Managers and administrators include farm managers.

UC/Ls which recorded the highest percentages were the south-eastern localities of Fern Tree (L) (54.3%), Opossum Bay (L) (40.4%) and Cremorne (L) (39.2%).

In 1996, 9.5% of employed people were Labourers or related workers, compared with 9.9% in 1991. The Bounded Locality recorded the highest percentages in this occupation grouping in both census years (12.9% and 12.0% respectively).

SUMMARY OF FINDINGS continued

Industry

Over one-third (36.8%) of employed people were working in the industries of Manufacturing, Retail trade or Health and community services — the top three employing industries in the State. This represented a decline of 1.2 percentage points since 1991.

In both census years, the Other Urban area recorded the highest proportion for the State (41.5% in 1996 and 40.6% in 1991). UC/Ls which recorded high levels were Beaconsfield (53.2%), George Town (52.7%), Lilydale (L) (52.6%) and New Norfolk (52.3%).

Private sector

The proportion of people employed in the State's private sector increased considerably between 1991 and 1996, from 69.2% to 75.0%. In both census years the Rural Balance recorded the highest level (78.4% in 1996 and 73.7% in 1991).

In all UC/Ls the majority of employed people worked in private enterprise, the highest percentages being recorded in Railton (L) (88.9%), Bracknell (L) (88.5%) and Mole Creek (L) (88.0%).

UNEMPLOYMENT

In 1996 there were 22,465 unemployed people in Tasmania, down from 27,726 in 1991. The unemployment rate for the State was 11.0% (13.5% in 1991), whilst the rate for people aged 15–24 years was 19.6% (23.3% in 1991).

Both rates were highest in the Other Urban area (12.1% for people aged 15 years or over and 20.8% for those aged 15–24 years) and lowest in the Major Urban area (9.8% and 18.3% respectively).

UC/Ls which recorded comparatively high unemployment rates and numbers of people were: Bridgewater-Gagebrook (32.9% and 765), George Town (19.5% and 348) and St Helens-Stieglitz (19.3% and 125).

UC/Ls which recorded comparatively high unemployment rates and numbers for people aged 15–24 years were: Bridgewater-Gagebrook (45.5% and 307), George Town (35.0% and 124) and Dodges Ferry (29.5% and 43).

OCCUPIED PRIVATE DWELLINGS

In 1996, there were 175,197 occupied private dwellings in the State, an increase of 7.5% since 1991 (163,001).

TENURE TYPE

Fully owned

Over two-fifths (42.4%) of the occupied private dwellings in Tasmania were fully owned by their occupants, an increase from 41.8% in 1991. Tasmania's Rural Balance recorded the highest home ownership levels in both 1996 (49.2%) and 1991 (50.1%).

In 32 of the State's 99 UC/Ls, at least half of the occupied private dwellings were fully owned. Ross (L) (66.1%), Bracknell (L) (65.1%) and Queenstown (62.1%) recorded the highest rates of home ownership.

Being purchased

Over a quarter (27.0%) of the private dwellings were being purchased by their occupants, a slight decrease from 27.6% in 1991. However, the Rural Balance recorded an increase of 21.1%.

The Rural Balance also recorded the highest proportion of dwellings being purchased in 1996 (29.7%), while the Major Urban area recorded the lowest (25.8%). This was the opposite of 1991, when the major Urban area recorded the highest proportion (28.7%) and the Rural balance the lowest (26.8%).

The highest percentages of homes being purchased were recorded in Old Beach (65.8%), Seven Mile Beach (52.8%), Hadspen (47.3%) and Collinsvale (L) (46.2%).

Rented

In 1996, about a quarter (26.3%) of occupied private dwellings in Tasmania were being rented (25.3% in 1991), with the Major Urban area recording the highest proportion in both census years (30.6% and 28.8% respectively).

The UC/Ls which recorded the highest percentages of rented dwellings were Bridgewater-Gagebrook (68.2%), Currie (L) (42.4%) and Waratah (L) (41.9%).

HOUSEHOLD INCOME

The median household income in 1996 of \$530 per week showed an increase of 10.4% on the 1991 figure of \$480. In 1996 the State median was exceeded by both the Rural Balance (\$569) and the Major Urban area (\$563).

In 1996, UC/Ls which recorded the highest median household incomes were Otago (L) (\$937), the mining area of Rosebery (\$867), Seven Mile Beach (\$842), Fern Tree (L) (\$841) and Dilston (L) (\$812) The lowest median household incomes were recorded in Campbell Town (L) (\$361), St Helens-Stieglitz (\$360) and Ross (L) (\$297).

HOUSING LOAN REPAYMENTS

Between 1991 and 1996, the median housing loan repayment for Tasmania increased by 40.0%, from \$418 to \$585 per month. This increase was widespread, ranging from 30.3% in the Bounded Locality up to 46.6% in the Major Urban area.

SUMMARY OF FINDINGS continued

HOUSING LOAN REPAYMENTS continued

The highest median housing loan repayment was recorded for the Rural Balance (\$610), closely followed by the Major Urban area (\$607). The Rural Balance also recorded the highest median payment in 1991 (\$460).

Comparatively high median housing loan repayments were calculated for Cremorne (L) (\$754), Low Head (L) (\$743) and Old Beach (\$715).

RENT PAYMENTS

The median weekly rent payment for Tasmania of \$90 in 1996 represented an increase of 21.6% on the 1991 figure of \$74. The highest median rent was recorded for the Major Urban area (\$104) and the lowest was recorded in the Rural Balance (\$65). The Major Urban area also recorded the highest median payment in 1991 (\$89).

At the UC/L level, the highest median weekly rent payments were recorded for Seven Mile Beach (\$150), Dilston (L) (\$148), Fern Tree (L) (\$145), Lauderdale and Margate (\$135 each).

SCOPE AND COVERAGE

- **1** The 1996 Census of Population and Housing was held on 6 August 1996. The first census was held in 1911 and since 1961 a census has been taken every five years, a frequency which is specified in the *Census and Statistics Act 1905*. The objective of the Census is to measure accurately the number and key characteristics of people in Australia on census night, and the dwellings in which they live.
- **2** The Census aims to count every person who spent census night in Australia. This includes Australian residents in Antarctica and people in the Territories of Jervis Bay, Cocos (Keeling) Islands and Christmas Island. The other Australian External Territories, Norfolk Island and minor islands such as Heard and McDonald Islands, are outside the scope of the Australian Census. The only people who spend census night in Australia but are excluded from the Census are foreign diplomats and their families.
- **3** The Census includes people on vessels in or between Australian ports, on board long-distance trains, buses or aircraft and on oil or gas rigs off the Australian coast. People entering Australia before midnight on census night are counted while people leaving an Australian port for an overseas destination before midnight on census night are not. Visitors to Australia are included regardless of how long they have been in the country or how long they plan to stay. However, for people who intend to be in Australia less than six months only basic demographic data are available. The Census includes people camping out and the homeless.
- **4** All private dwellings, except diplomatic dwellings, are included in the Census, whether occupied or unoccupied. Caravans in caravan parks, manufactured homes in manufactured home estates and self-care units in accommodation for the retired or aged are counted only if occupied. Occupied non-private dwellings, such as hospitals, prisons, and hotels are also included.
- **5** Details about the 1996 Census content, collection operations, confidentiality and privacy protection, processing and evaluation activities are contained in *1996 Census*—*Nature and Content* (Cat. no. 2008.0).

ABS POPULATION ESTIMATES

- **6** This publication contains population counts based on where people were counted on census night, which may not have been where they usually lived. However, the Census can provide person counts based on place of usual residence.
- **7** Official ABS population estimates (estimated resident population (ERP)) are also separately available from the ABS. The estimates are based on census counts which have been adjusted to:
- include people who were in Australia on census night but were missed in the Census;
- include Australian residents who were temporarily overseas on census night (these people were not within scope of the Census); and
- exclude overseas visitors counted in the Census who were not usual residents of Australia.
- **8** The adjusted census count is then updated quarterly using demographic statistics. These are statistics on births, deaths, and overseas and internal migration.
- **9** ABS population estimates are published in *Australian Demographic Statistics* (Cat. no. 3101.0), produced quarterly, and in *Estimated Resident Population by Sex and Age: States and Territories of Australia* (Cat. no. 3201.0) produced annually.

ABS POPULATION ESTIMATES continued

10 The ABS also provides projections (based on different assumptions as to future fertility, mortality and migration) of the resident population of Australia, States and Territories. These projections are published biennially in *Population Projections* (Cat. no. 3222.0).

DATA LIMITATIONS

- **11** Census data are subject to a number of inaccuracies resulting from errors by respondents or mistakes in collection or processing. Whilst many of these are corrected by careful processing procedures, some still remain. The effect of the remaining errors is generally slight, although it may be more important for small groups in the population. The main kinds of error to keep in mind are:
- Partial non-response: In some cases where an answer is not provided to a question an answer is imputed (often from other information on the form). In other cases a 'Not stated' code is allocated.
- Processing error: While such errors can occur in any processing system, quality management is used continuously to improve the quality of processed data, and to identify and correct data of unacceptable quality.
- *Random adjustment*: Table cells containing small values are randomly adjusted or suppressed to avoid releasing information about particular individuals, families, or households. The effects of these adjustments are statistically insignificant.
- Respondent error: Because processing procedures cannot detect or repair all
 errors made by people in completing the forms, some remain in final data.
- Undercount: Although the Census aims to count each person, there are some people who are missed and others are counted more than once. The data in this publication are not adjusted for the net undercount.
- **12** Further information on data quality is provided progressively in *Census Update* (Cat. no. 2902.0) and in *1996 Census Data Quality Working Papers*.

OVERSEAS VISITORS

13 Data for overseas visitors (who intend to be in Australia for less than six months) are restricted to age, sex and marital status. In this publication overseas visitors contribute only to the age, sex and total person counts.

CALCULATION OF PROPORTIONS

14 When calculating the proportion of the population with a particular characteristic, 'Not stated' responses are included in the denominator. For example, in the Summary of Findings, the proportion who are of indigenous origin has been calculated by dividing the number of persons who stated that they were of indigenous origin by the total population (including those who did not respond to the relevant question) and expressing the result as a percentage.

CALCULATION OF MEDIANS

15 A median is a measure of central tendency. It is a mid-value which divides a population distribution into two, with half the observations falling below it and half above it. Unlike averages (means), medians are not usually skewed by extreme observations.

CALCULATION OF MEDIANS continued

16 There are several issues to be aware of:

- The categories 'Not stated', 'Overseas visitor', and 'Not applicable' are not included in the population distribution when calculating medians.
- If a median falls into a category that has a text only label then the median is set to zero. For this publication this is only relevant to the calculation of median household income, as the income classification includes the categories 'Nil income' and 'Negative income'.
- If the median is calculated on a classification containing ranges and a range is open-ended and the median falls within that category, the median is set to the number in the label. For example, in the calculation of the median household income, if the median falls in the last range \$2,000 or more, \$2,000 is allocated as the median.

UNADJUSTED DOLLARS

17 The 1991 Census dollar values for Median Household Income, Median Housing Loan Repayments and Median Rent paid have not been adjusted into 1996 dollars.

SYMBOLS AND OTHER USAGES

18 The following abbreviations and symbols are used in this publication:

General abbreviations and symbols

ABS	Australian Bureau of Statistics
CD	Collection Districts
ERP	Estimated Resident Population
NZ	New Zealand
UK	United Kingdom
	not applicable
_	nil or rounded to zero
т	Locality

Spatial units

L	Locality
SLA	Statistical Local Area
SOS	Section of State
S/T	State/Territory
UC/L	Urban Centre/Locality

APPENDIX CENSUS PRODUCTS AND SERVICES

There is a wide range of products and services developed from the 1996 Census of Population and Housing, details of which are listed in brief below. For more detailed information on the 1996 Census range of products and services, please refer to the *Directory of Census Statistics*, 1996 (Cat. no. 2910.0), or call our Client Services Officers in your State or Territory (refer to the telephone numbers listed on the back page of this publication).

CENSUS REFERENCE PRODUCTS

Census Dictionary

The *Census Dictionary*, 1996 (Cat. no. 2901.0) is a comprehensive reference guide to the concepts and terms used in the 1996 Census of Population and Housing. It includes a complete listing of the 1996 Census classifications and a glossary of census terms.

How Australia Takes a Census

How Australia Takes a Census, 1996 (Cat. no. 2903.0) provides information about the history of the Census, the planning process and the way in which the Census is conducted.

Geographic classifications and codes

Statistical Geography: Volume 1 — Australian Standard Geographical Classification (ASGC), July 1996 (Cat. no. 1216.0) provides information about the names and codes of the geographic areas used in the 1996 Census.

1996 Census Statistical Local Area maps

These reference maps show the Statistical Local Areas (SLA) from the 1996 Census. Each map shows the boundary of an SLA and the Collection District (CD) boundaries contained within.

Digital Boundaries

All of the census boundaries are available electronically in industry formats through a range of secondary providers.

CENSUS DATA PRODUCTS

Estimated Resident Population

The ERP is the official population figure and is based on adjusting the results of the Census to provide more accurately the numbers of people usually living in an area.

Two publications containing ERP data, based on 1996 Census figures are:

- Australian Demographic Statistics, December Quarter 1996 (Cat. no. 3101.0); and
- Regional Population Growth, Australia, 1996 (Cat. no. 3218.0).

Selected characteristics

This series of publications contains data and commentary on various person, family and dwelling characteristics from the 1996 Census at selected geographic levels. There are three publications in the series:

- Census of Population and Housing: Selected Social and Housing Characteristics for Statistical Local Areas (Cat. nos 2015.0–7) (released 15 July 1997)
- Census of Population and Housing: Selected Characteristics for Urban Centres and Localities (Cat. nos 2016.0-7); and
- Census of Population and Housing: Selected Family and Labour Force Characteristics for Statistical Local Areas (Cat. nos 2017.0–8), (indicative release date: March 1998).

APPENDIX CENSUS PRODUCTS AND SERVICES continued

Community Profile series

The series *Census of Population and Housing: Community Profiles* (Cat. nos 2020.0–8) provide detailed and comprehensive census characteristics of people, families and dwellings for small areas. This series is available for all standard census geographic areas, and is available in hardcopy and electronic formats.

The series comprises six community profiles:

- Basic Community Profile contains 32 tables of detailed data covering dwelling, household and family topics. This profile is available for all standard census geographic areas, Commonwealth and State Electoral Divisions, Postal Areas, and Suburbs, for the States/Territories and Australia.
- Time Series Community Profile contains 21 tables of variables from the Basic Community Profile comparing data from the 1986, 1991 and 1996 Censuses where the classifications are comparable.
- Usual Residents Profile contains 25 tables based on the usual residents of SIAs. This
 is the only community profile based on place of usual residence.
- Expanded Community Profile contains 41 tables available for SLAs and larger areas, comprising more detailed versions of some of the basic profile tables, plus new tables.
- Working Population Profile contains 17 tables of labour force and related characteristics of people who work and are counted in SLAs within the journey to work study areas — usually capital cities.
- Summary Indigenous Profile contains selected characteristics of Indigenous people in two tables which are available at the Indigenous Location level.
- Detailed Indigenous Profile contains selected characteristics of Indigenous people in 26 tables which are available for Indigenous Areas, Aboriginal and Torres Strait Island Regions, States and Territories.

CDATA96

Census of Population and Housing: CDATA96 (Cat. nos 2019.0–8) is a CD-ROM product which provides a large volume of tabulated census data, digital boundaries and base map data. It includes software capable of producing tables, maps and graphs of the data.

KEYDATA

Census of Population and Housing: CENSUS KEYDATA (Cat. no. 2023.0.30.001) is a CD-ROM product which provides access to 1996 Census Community Profiles, Classification Counts data and Digital Boundaries, using a specially encrypted CD-ROM.

Classification Counts

Census of Population and Housing: Classification Counts (Cat. nos 2022.0–8) provides frequency counts for 1996 Census variables in complete classificatory detail, for every State, Territory and capital city.

Census Household Sample File

Census of Population and Housing: 1996 Census Household Sample File (Cat. no. 2913.0) provides a comprehensive unit record database of census characteristics, containing a sample of private households and associated persons, and persons in non-private dwellings.

Social Atlas Series

The *Social Atlas* (Cat. nos 2030.1–8) publications feature colour maps of the key social, demographic and economic characteristics of each capital city.

APPENDIX CENSUS PRODUCTS AND SERVICES continued

Australia in Profile — A Regional Analysis

Australia in Profile — A Regional Analysis (Cat. no. 2032.0) provides commentary and data on a number of key social indicators from the 1996 Census, with the focus on regional distributions and comparisons.

CONSULTANCY SERVICES

The following census specific services are available:

Thematic Profile Service

The *Thematic Profiles Service* provides profiles on request, covering the themes of the Family, Young People, Older People and Ethnicity, on a variety of media.

Customised Profile Service

The *Customised Profiles Service* provides community profile data tailored to your needs on a variety of media.

Customised Tables Service

The *Customised Tables (Matrix) Service* provides detailed cross-classified tables tailored to your needs on a variety of media.

Customised Geographic Data Reports Service

The *Customised Geographic Data Reports Service* provides tabular geographic data which relate specifically to the census Geographic Areas and their characteristics (e.g. area).

Customised Mapping Service

Through the *Customised Mapping Service* you are able to purchase both Customised Thematic Maps and Customised Reference Maps on request.

General descriptions of terms and concepts used in this publication are provided below. Tables are also footnoted where applicable for additional clarity. Detailed definitions of classifications and concepts are available in the *Census Dictionary*, 1996 (Cat. no. 2901.0).

Dependent child

A dependent child is an individual who is either a child under 15 or a dependent student, which is any child in a family under 15 years of age or aged 15–24 years who is a full-time student. To be regarded as a child the individual can have no partner or child of his/her own usually resident in the same household.

Dwelling

A dwelling is a building or structure in which people live. This can be a building, such as a house; part of a building, such as a flat; or it can be a caravan or tent, humpy or park bench. Houses under construction, derelict houses, vacant tents, or converted garages, are not counted in the Census.

There are private and non-private dwellings.

A *private dwelling* is normally a house, flat, part of a house, or even a room; but can also be a house attached to, or rooms above, shops or offices; an occupied caravan or unit in a caravan park or craft in a marina; occupied dwelling in a Manufactured Home Estate; occupied self-care unit in Accommodation for the Retired or Aged; a houseboat; or tent if it is standing on its own block of land. An occupied caravan situated on a residential allotment is also classed as a private dwelling. Private dwellings can be either occupied or unoccupied.

Non-private dwellings are those dwellings not included above, which provide a communal or transitory type of accommodation. These dwellings include hotels, motels, guest houses, prisons, religious and charitable institutions, defence establishments, hospitals and other communal dwellings. Only occupied non-private dwellings are included in the Census.

Employed

Employed people are those aged 15 years or more who, during the week prior to census night, worked for payment or profit; who had a job from which they were on leave or otherwise temporarily absent; were on strike or stood down temporarily; or worked as unpaid helpers in a family business.

Family household

A family household is defined by the ABS as two or more persons, one of whom is at least 15 years of age, who are related by blood, marriage (registered or de facto), adoption, step or fostering, and who are usually resident in the same household.

The basis of a family is formed by identifying the presence of either a couple relationship, lone parent-child relationship or other blood relationship. Some households therefore, contain more than one family. Due to processing limitations a maximum of three families can be coded to a household.

Full-time/Part-time employment

This variable is based on the number of hours worked in all jobs held by employed people during the week before census night. It excludes any time off but includes any overtime or extra time worked:

Part-time workers: employed people who worked up to 34 hours; and

Full-time workers: employed people who worked 35 hours or more.

Household

A household is a group of people who usually reside in the same private dwelling.

Income

People aged 15 years or more are asked to state their usual gross weekly income, which is the income before tax, superannuation, health insurance, or other deductions are made. Gross income includes family allowance, family allowance supplement, pensions, unemployment benefits, student allowances, maintenance (child support), superannuation, wages, salary, overtime, dividends, rents received, interest, business or farm income (less operation expenses) and worker's compensation.

Household income is the sum of the personal incomes of each resident present in the dwelling.

Indigenous

A person is defined to be of Indigenous origin if he or she identifies himself or herself as of Aboriginal and/or Torres Strait Islander origin.

Industry (of employment)

This variable describes the industries in which employed people (aged 15 years and over) work, and is coded to the *Australian and New Zealand Standard Industrial Classification (ANZSIC)*, 1993 (Cat. no. 1292.0).

Labour force

The labour force comprises employed and unemployed people aged 15 years and over.

Locality

See definition under Urban Centre/Locality.

Lone person household

A person who usually lives alone in a private dwelling.

Occupation (of main job)

This variable describes the main job held by employed people (aged 15 years and over) during the week prior to census night, and is coded using the *ASCO — Australian Standard Classification of Occupations, Second Edition* (Cat. no. 1220.0)

Overseas-born

Overseas-born people are those who state that they were born in a country other than Australia, including those born at sea.

Section of State

The SOS category classification uses population counts from the Census to define CDs as either urban or rural. Unlike the UC/L Structure, the SOS Structure relates to all CDs and therefore, in aggregate, the SOS Structure covers all of Australia.

Within S/Ts, each SOS represents an aggregation of non-contiguous geographical areas of a particular urban/rural type. The five categories are:

- Major Urban: urban areas (Urban Centres in the UC/L Structure) with populations of 100,000 or more;
- Other Urban: urban areas (Urban Centres in the UC/L Structure) with populations of 1.000 to 99,999;
- Bounded Locality: rural areas (Localities in the UC/L Structure) with populations of 200 to 999;
- Rural Balance: the remainder of the S/T; and
- Migratory: areas composed of off-shore, shipping and migratory CDs.

Student

A student is an individual who attends a secondary or tertiary educational institution on a full-time/part-time basis.

Unemployed

Unemployed people are those who, during the week prior to census night, did not have a job but were actively looking for work (either full-time or part-time) and were available to start work.

Unemployment rate

The unemployment rate is the number of unemployed persons expressed as a percentage of the labour force.

Urban Centre/Locality

This geographical structure is defined by the 1996 Census edition of the Australian Standard Geographical Classification. Population counts (place of enumeration) from the latest census are used to define the Urban Centre/Locality Structure, which means this classification structure is only current at the time of the Census.

The UC/L classification groups census CDs to form defined areas according to population size criteria. In broad terms an Urban Centre is a population cluster of 1,000 or more people, while a Locality is a population cluster of between 200 and 999 people. The delimitation criteria for UC/Ls are based on those developed in 1965 by Dr G. J. R. Linge.

For statistical purposes, people living in Urban Centres are classified as urban, while those in Localities are classified as rural. As the UC/L Structure relates to CDs within defined areas only, the Structure, in aggregate, does not cover all of Australia.

When Urban Centres cross State or Territory boundaries, the separate portions are uniquely identified and reported in their relevant S/Ts.

More information about definitions, a full description of the method of delimitation of UC/Ls as well as a listing of UC/L Codes and Labels may be found in *Statistical Geography: Volume 3 — Australian Standard Geographical Classification (ASGC) Urban Centres/Localities*, 1996 (Cat. no. 2909.0).
