## EXPLANATORY NOTES

### INTRODUCTION

- 1 This publication presents the estimates of the resident population of Western Australia by age and sex at 30 June 1996. Data have been compiled for Statistical Divisions, Subdivisions and Statistical Local Areas (SLAs). Estimates of SLA populations at 30 June 1991 are included for comparison.

### METHODOLOGY

- 2 The estimated resident populations (ERP) contained in this publication are the official Australian population estimates. They are derived from the 1991 and 1996 Censuses of Population and Housing. A detailed explanation of the conceptual basis is given in the ABS Information Paper entitled *Demographic Estimates: Concepts, Sources and Methods* (Catalogue Number 3228.0) issued on 23 June 1995.
- 3 The Census of Population and Housing place of enumeration figures are based on counts of persons at their actual location on Census night and include persons enumerated at their usual place of residence, persons usually resident elsewhere in Australia and overseas visitors temporarily in Australia.
- 4 A Post Enumeration Survey is conducted after each Census to determine the under-enumeration and calculate undercount rates. These rates take into account differences in undercount according to a person's age, sex and geographic location.
- 5 The estimated resident population for each SLA was derived by making the following adjustments:
  - a) Census counts on a place of usual residence basis are obtained by counting each person in their stated SLA of usual residence rather than where they were counted on Census night. Overseas visitors are excluded from these counts.
  - b) The usual residence Census counts are then adjusted for Census under-enumeration by applying undercount rates derived from the Post Enumeration Survey.
  - c) Australian residents temporarily overseas on Census night, excluded from Census counts, are added back into the population. Estimates of Australians temporarily overseas on Census night are obtained from passenger card data for persons returning to Australia in the year following the Census.
  - d) The above adjustments were used to derive the estimated resident populations for each SLA on the Census nights, 6 August 1991 and 6 August 1996. The ERP for each SLA for 30 June 1996 was derived by adjusting for natural increase and net migration between 1 July and 6 August.

### USUAL RESIDENCE NOT STATED

- 6 In the 1991 and 1996 Censuses those persons in Western Australia for whom the SLA of usual residence was not stated were distributed proportionally to all SLAs in the State. In previous Censuses they were allocated to the SLA in which they were enumerated.

### AREA STATISTICS

- 7 ABS area statistics are classified according to the *Australian Standard Geographical Classification, 1996 Edition* (Catalogue Number 1216.0). Figures previously published for local government areas, statistical sub-divisions and divisions are directly comparable with this classification. The Cities of Perth, Fremantle, Stirling and Wanneroo comprise a number of SLAs. However estimates for individual SLAs were not compiled for these areas prior to 1986.

BOUNDARY AND NAME  
CHANGES

8 SLAs are marked (C) for City, (T) for Town or (S) for Shire. The names and designations are as they existed at 30 June 1996.

9 A new edition of the Australian Standard Geographical Classification came into effect on 1 July 1996. The changes to the area classification have been incorporated in these estimates for 30 June 1996, which are based on the 1996 Census of Population and Housing (which used the 1996 Edition of the classification).

10 The City of Wanneroo has been split into five statistical local areas: Central Coastal, North-East, North-West, South-East and South-West. The internal boundaries delineating the three statistical local areas in the City of Stirling were revised to form three new statistical local areas. Two areas retained their names of Central and South-Eastern and the other was named Coastal. The internal boundary delineating the two statistical local areas in the City of Fremantle was redrawn, moving one mainly residential block from Fremantle (C) - Inner to Fremantle (C) - Remainder.

11 The Town of Victoria Park was transferred from the Central Metropolitan SSD to the South East Metropolitan SSD in the Perth Statistical Division.

12 The Shire of Ngaanyatjarraku was transferred from the Carnegie SSD in the Central Statistical Division to the Lefroy SSD in the South Eastern Statistical Division.

REVISIONS

13 The ERP for intercensal years are being revised to take account of the intercensal discrepancy for each SLA. The revisions will be available later this year.

RELIABILITY

14 Although estimates are calculated and presented to the nearest whole number, accuracy to this level is not claimed and should not be assumed.

OTHER SERVICES

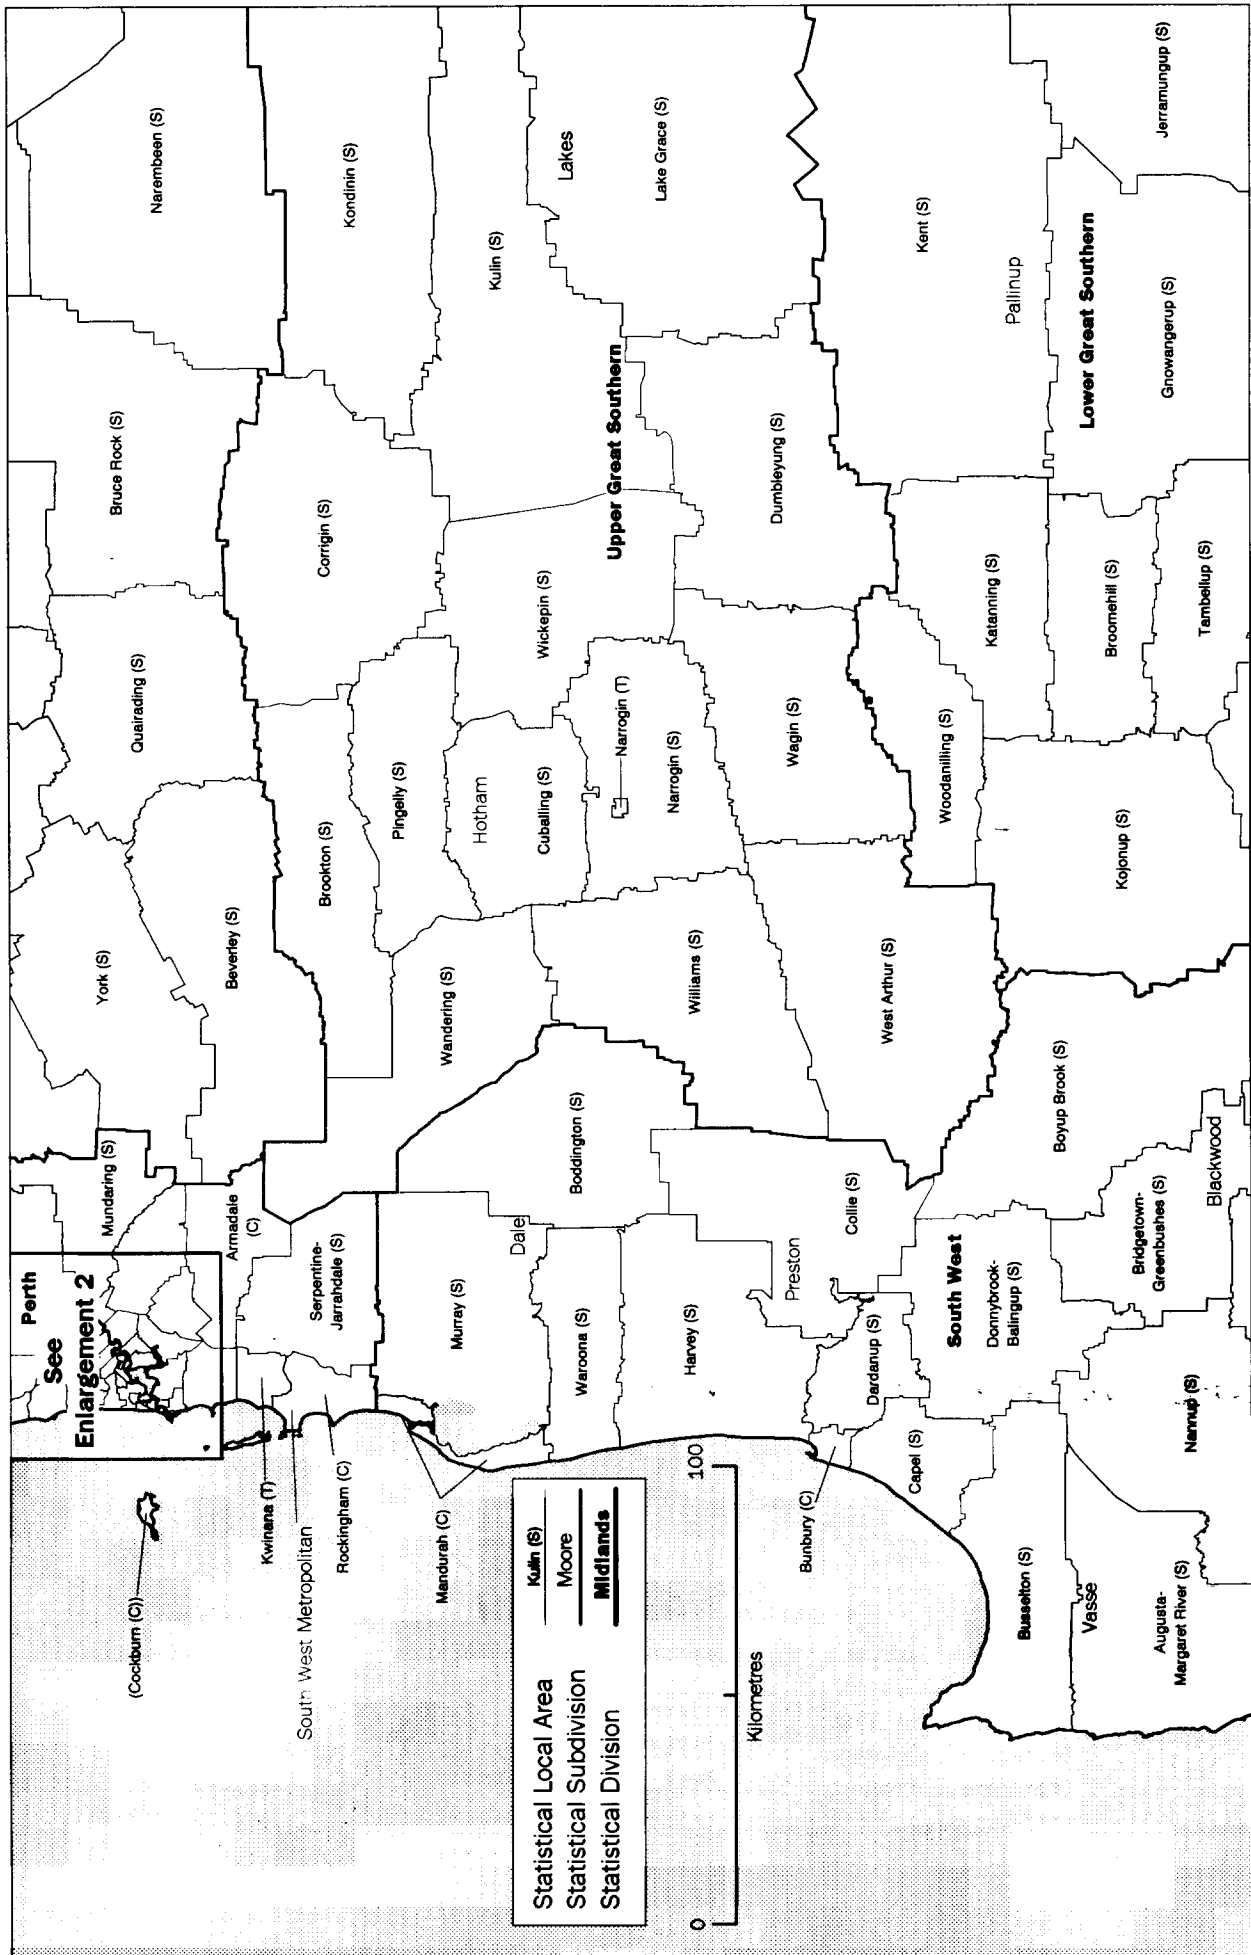

- 16** From 1 January 1988 most ABS products and services became chargeable. All publications produced by the ABS are listed in *Catalogue of Publications and Products* (1101.0) which is available from any ABS Office for a charge of \$5.
- 17** The ABS has available estimates of the resident population by age and sex from June 1991 to June 1994 based on 1991 postcode areas. There are also estimates available by census collection districts (CDs) and SLAs based on the 1991 census boundaries. Prices start from \$100 for 1 year and depend on the level of detail requested.
- 18** Population projections data at the CD, SLA or postcode level are available on a standard or customised basis. Standard projections are by sex and 5-year age groups and project to the year 2012. Prices commence at \$100 per SLA or postcode based region with discounts for multiple regions. Customised projections can project to the year 2041 and prices range from \$300 to \$500 per region, depending on the level of detail requested. Discounts also apply for multiple regions.
- 19** Selected demographic statistics for Western Australia are available on floppy disk.
- 20** Further information on the above services can be obtained by ringing Peter Ruthven on (08) 9360 5367.
