INTRODUCTION

INTRODUCTION

The Australian Bureau of Statistics (ABS) presents statistics on Australia's System of National Accounts which are compiled in accordance with international standards. These international standards were updated recently.

This paper focuses on the product *Australian National Accounts: State Accounts* (cat. no. 5220.0) and describes:

1. the main changes to the international standards;
2. the timing for implementing the changes in Australian statistics;
3. the impact on the presentation of statistics in the product; and
4. the structural impact on the time series spreadsheets in the product.

The first issue of *Australian National Accounts: State Accounts* (cat. no. 5220.0) that will incorporate these updated standards will be 2008-09, scheduled for release on Friday 11 December 2009.

This information paper includes previews of the publication (pdf) tables and time series spreadsheets that will be published in December.

Details of impacts of these updated standards will be covered in a further information paper, *Implementation of new international statistical standards in ABS National and International Accounts* (cat no. 5310.0.55.002) due for release on 30 September 2009.

CHANGES TO INTERNATIONAL STANDARDS

INTERNATIONAL FRAMEWORK

The international framework for economic statistics is centred around two key documents, the System of National Accounts, 1993 (SNA93) and the fifth edition of the Balance of Payments Manual (BPM5), both of which were released in 1993. Since the release of these key standards, a number of new economic phenomena has arisen or assumed greater importance as economies continue to develop in their complexity. In response to this, relevant international organisations and a range of national statistical agencies, including the ABS, have reviewed a range of conceptual and measurement issues that were either not clarified completely at the time of the release of SNA93 and BPM5, or have emerged as important measurement issues since that time. These issues are described in the *Information Paper: Introduction of revised international standards in ABS economic statistics in 2009, 2007* (cat. no. 5310.0.55.001) released 6 September 2007.

The international standards for national and international accounts were updated concurrently and the standards are compatible. The new standards are presented in the System of National Accounts, 2008 (SNA08) and the Balance of Payments and International Investment Position Manual, sixth edition (BPM6). The other major changes to the Australian System of National Accounts (ASNA) are due to the implementation of the Australian and New Zealand Standard Industrial Classification, 2006 (ANZSIC06) and changes brought about to the Standard Economic Sector Classification of Australia, 2008 (SESCA08).

The revised international standards have changed the measurement of a number of components of the ASNA, though there has been no major change to the structure of the accounts. The main changes are:

- Introduction of Research and Development as capital formation;
- Capitalisation of Expenditure on Defence Weapons Platforms; and
- The inclusion of reinvested earnings of investment funds.

A number of other changes are included and will be mentioned later in this paper. There are a number of changes stated in the SNA08 that the ABS is not implementing. These are:

- Basic Prices defined according to the System of National Accounts, 1968 (SNA68) concepts will continue to be applied through the Input-Output tables. The ABS intends to move to the SNA68 definition throughout other economic outputs over the coming years, as described in the *Information Paper: Introduction of revised international standards in ABS economic statistics in 2009, 2007* (cat. no. 5310.0.55.001).
- Repurchase Agreements where the ABS will continue to treat repurchase agreements as security trades rather than the treatment continued in the standards, which is as a loan.
- Recording of Interest on Debt Securities where the ABS will continue to measure interest in accordance with the creditor principle (interest flows are calculated with reference to market yields on the market value of the debt securities in question) and not the treatment continued in the standards, the debtor principle (interest flows calculated with reference to contractual or "coupon" rates on the nominal value of the debt securities in question).

CHANGES TO INTERNATIONAL STANDARDS *continued*

INTERNATIONAL FRAMEWORK *continued*

- Ancillary Units (Holding Companies) where the ABS is proposing to maintain its current practice, which is in line with the spirit of the recommendations but deviates in the treatment of holding companies.
- Financial Instrument Classification where there are no plans to compile separate markets for shares and units. This detail is largely covered (implicitly) by the changes to the sectoral classifications within SESCOA08.
- Reclassifications for Transactions between non-residents, as the ABS considers that by issuing a tradeable instrument, the issuer is implicitly a counterparty to any secondary trading in the instrument and that a transaction should be recorded between the vendor and the issuer extinguishing the position, and a second transaction between the purchaser and the issuer creating the position. The ABS will therefore not treat the exchange as a reclassification.

Investigation is continuing into the estimation of capital services for assets owned by the General Government sector. The results of the investigation will be published in an information paper and potentially included in the accounts, initially as a memorandum item.

More information on these areas of non-compliance can be found in the introductory *Information paper: Introduction of revised international standards in ABS economic statistics in 2009, 2007* (cat. no. 5310.0.55.001).

In addition, the ABS will incorporate the results of a number of changes that were not included from SNA93 implementation in 1998, including:

- implementation of orchard growth in the capital and production accounts which is generally included in the category 'Cultivated biological resources'; and
- moving Financial Auxiliaries to the financial sector.

The ABS is incorporating changes arising from SNA into Australian Standards and Classifications. The changes to SNA08 have introduced some new elements to the Standard Economic Sector Classification for Australia, 2008 (SESCOA08). The change is mainly from the introduction of Money Market Funds and Non-Money Market Funds in the Standard Institutional Sector Classification for Australia (SISCA08). Further information can be found in *Discussion Paper: Proposed Standard Economic Sector Classifications of Australia (SESCA), 2008* (cat. no. 1218.0.55.001).

KEY CHANGES TO OUTPUTS

KEY CHANGES TO OUTPUTS

Backcasting

From the 2008-09 issue of *Australian National Accounts: State Accounts* (cat. no. 5220.0), data will be presented on a SNA08, BPM6, ANZSIC06 and SESCOA08 basis. The changes being implemented with these new standards will impact on the value of some key aggregates. However, data quality improvements will result in a shift in the level of some series. To maintain the integrity of time series, level shifts will be backcast to the same start dates as previously published.

System of National Accounts, 2008

GROSS FIXED CAPITAL FORMATION

Significant changes to the private gross fixed capital formation component of Expenditure on Gross State Product are:

- 'Cultivated biological resources', which replaces the previously published 'Livestock' but includes a new component of 'Orchard growth'; and
- 'Intellectual property products', which replaces the previously published 'Intangible fixed assets' but includes a new component of 'Research and development'.

The order in which the various private sector assets are displayed has also changed to better align with SNA08. This has also meant that the category of 'Private business investment' has been dropped from the pdf tables, but has been retained in the time series spreadsheets.

Affected tables are:

- pdf tables 5 to 22, relating to 'Expenditure components of gross state product' and 'Expenditure components of gross domestic product'; and
- time series spreadsheets 2 to 10, relating to 'Expenditure, income and industry components of GSP'.

KEY CHANGES TO OUTPUTS *continued*

Australian and New Zealand Industrial Classification, 2006

A joint project between the ABS and Statistics New Zealand has developed a new standard classification of industrial activity, the Australian and New Zealand Standard Industrial Classification, 2006 (ANZSIC06). This will replace the existing classification, ANZSIC93, with a more contemporary classification system. This new classification is in response to changes in the structure and composition of the economy, changing user demands, and enhancing compatibility with other major international classification standards. The result of implementing this new classification is a significant change to the layout of industry representation in the ASNA. In particular these changes have brought about:

- changes to the ANZSIC06 division structure which will include 19 divisions compared to 17 in ANZSIC93;
- adaptation to the emergence of 'new economic' activities including internet publishing and broadcasting, computer retailing and communication equipment manufacturing;
- an introduction of a new industry division, 'Information Media and Telecommunications'. This new division groups activity mainly engaged in creating and storing information products in media that allow for their dissemination. This is an industry that has grown rapidly in both Australian and New Zealand since ANZSIC93 was developed;
- the splitting of 'Property and Business Services' division to its component parts of:
 - Rental, Hiring and Real Estate Services;
 - Professional, Scientific and Technical Services; and
 - Administrative and Support Services.

Affected tables are:

- pdf tables 23 to 31, relating to 'Industry gross value added';
- pdf tables 33 to 41, relating to 'Total factor income by industry and principal components'; and
- time series spreadsheets 2 to 10, relating to 'Expenditure, income and industry components of GSP'.

Further information about the changes to ANZSIC can be found in Information Paper: *ANZSIC 2006 Implementation, 2006* (cat. no. 1295.0) and Information Paper: *Update on ANZSIC 2006 Implementation, 2008* (cat.no.1295.0.55.001).

KEY CHANGES TO OUTPUTS *continued*

IMPLEMENTATION TIMING	<p>The first National and International Accounts products incorporating these updated standards will be released according to the following schedule:</p> <ul style="list-style-type: none">■ Tuesday 8 December 2009<ul style="list-style-type: none">■ <i>Balance of Payments and International Investment Position, Australia</i>, Sep qtr 2009 (cat. no. 5302.0)■ <i>Australian System of National Accounts, 2008-09</i> (cat. no. 5204.0)■ Wednesday 9 December 2009<ul style="list-style-type: none">■ <i>International Trade in Goods and Services, Australia</i>, October 2009 (cat. no. 5368.0)■ Friday 11 December 2009<ul style="list-style-type: none">■ <i>Australian National Accounts: State Accounts, 2008-09</i> (cat. no. 5220.0)■ Wednesday 16 December 2009<ul style="list-style-type: none">■ <i>Australian National Accounts: National Income, Expenditure and Product</i>, Sep qtr 2009 (cat. no. 5206.0)■ Thursday 24 December 2009<ul style="list-style-type: none">■ <i>Australian National Accounts: Financial Accounts</i>, Sep qtr 2009 (cat. no. 5232.0)
PUBLICATION TABLES AND TIME SERIES SPREADSHEETS	<p>Available from the Downloads tab of this publication are:</p> <ul style="list-style-type: none">■ an Adobe pdf file that includes a preview of the full of tables that will be published in <i>Australian National Accounts: State Accounts, 2008-09</i> (cat. no. 5220.0) on Friday 11 December 2009;■ previews of the set of time series spreadsheets that will be published in <i>Australian National Accounts: State Accounts, 2008-09</i> (cat. no. 5220.0) on Friday 11 December 2009;■ a data cube that describes the series by series changes made to each of the time series spreadsheets.
TIME SERIES IDENTIFIERS	<p>The changes described above will result in new SeriesIDs for some series in the time series spreadsheets. SeriesIDs for main aggregates have not changed.</p>
CONCEPTS, SOURCES AND METHODS	<p>The underlying concepts and structure of the national accounts and the sources, methods and terms used in compiling the estimates are described in the product <i>Australian National Accounts: Concepts, Sources and Methods</i> (cat. no. 5216.0). The current version of this product reflects SNA93 concepts and a number of references to data sources and methods are, or will be, out of date.</p> <p>A revised Concepts, Sources and Methods product is scheduled for release in late 2010.</p>

FURTHER INFORMATION

RELATED PRODUCTS

The publications impacted by the implementation of SNA08, BPM6, ANZSIC06 and SESCOA08 include:

- the annual *Australian System of National Accounts* (cat. no. 5204.0) which presents a detailed presentation of annual national accounts data;
- the quarterly *Australian National Accounts: National Income, Expenditure and Product* (cat. no. 5206.0) which presents current price and chain volume estimates on income, expenditure and production as well as current price data on the capital account;
- the quarterly *Australian National Accounts: Financial Accounts* (cat. no. 5352.0) which presents information on change in Australia's assets and liabilities.

INTERNATIONAL STANDARDS

The international standards are described in:

- System of National Accounts, 2008; and
- Balance of Payments and International Investment Position Manual, sixth edition.

RELATED INFORMATION PAPERS

Related information papers to be released or already released include:

- *Revisions to international standards in monthly international trade in goods and services statistics from August 2009* (cat. no. 5368.0.55.012) released on 17 June 2009;
- *Revisions to international standards in quarterly Balance of Payments and International Investment Position statistics from September 2009* (cat. no. 5302.0.55.002) released on 22 July 2009;
- *Product changes to Australian System of National Accounts following revisions in international standards* (cat. no. 5204.0.55.005) which will be released on 21 August 2009;
- *Product changes to National Income, Expenditure and Product following revisions in international standards* (cat. no. 5206.0.55.002) which will be released on 18 August 2009;
- *Product changes to Financial Accounts following revisions in international standards* (cat. no. 5232.0.55.003) which will be released in September 2009;
- Information Paper: *Introduction of revised international standards in ABS economic statistics in 2009* (cat. no. 5310.0.55.001) released on 6 September 2007;
- Discussion Paper: *Proposed Standard Economic Sector Classifications of Australia (SESCA), 2008* (cat. no. 1218.0.55.001) released on 26 March 2009;
- *Update on ANZSIC 2006 Implementation, 2008* (cat. no. 1295.0.55.001) released on 20 June 2008;
- Information Paper: *Implementation of new international statistical standards in ABS National and International Accounts* (cat. no. 5310.0.55.002) which will be released in September 2009.

— nil or rounded to zero (including null cells)

(a) Reference year for chain volume measures is 2006—07.

(b) Calculated as the residual of GSP less state final demand less international trade in exports of goods and services, plus international trade in imports of goods and services. The balancing item implicitly comprises changes in inventories, total net interstate trade and balancing item discrepancy.

Statistical discrepancy (E)	—	—	—	—	—	—	—	—	—
Gross domestic product	—	—	—	—	—	—	—	—	—

— nil or rounded to zero (including null cells)

(a) Calculated as the residual of GDP less domestic final demand less international trade in exports of goods and services, plus international trade in imports of goods and services. The balancing item implicitly comprises changes in inventories and statistical discrepancy (E).
