

TableBuilder

Cat. no.: 2065.0

Media: Online

Cost: \$1655.00 for the 2006 Census dataset

The possibilities are endless with Census TableBuilder

TableBuilder is a new and innovative online tool which completes the suite of products from the 2006 Census. TableBuilder allows you to create your own custom tables of Census data including person, family and dwelling classifications in the one table. You decide to count either persons, families or dwellings, how to structure the data and which variables to include. Almost all variables from the 2006 Census Dictionary are available plus some additional popular requests. All person, family and dwelling data in TableBuilder is available by Place of Enumeration (location on Census night); person data is also available by Place of Usual Residence and Place of Work.

TableBuilder's large table function makes creating tables with up to five million cells of Census data a breeze! Small tables are available immediately, while larger tables are submitted for processing, allowing you to create additional tables while your large table is being prepared.

Who would benefit from using TableBuilder?

TableBuilder is a product aimed at clients with a high level of experience in Census data and concepts, who have the need for customised Census data on a regular basis.

Which geographic areas are available in TableBuilder?

All main Australian Standard Geographic Classification (ASGC) and Census specific geographies are available in TableBuilder. You can access data for areas as small as a Collection District (approximately 225 households) or as large as an entire state or territory or all of Australia. TableBuilder also allows you to customise your own geographic areas. Mesh Block data will not be available in TableBuilder.

What format is the data available in?

Tables built in TableBuilder can be exported in either CSV or Excel format. Maps and graphs can be exported in either PDF or PNG format. Tables can also be saved within the product so they can be retrieved in future sessions.

Sample of TableBuilder

The screenshot shows the TableBuilder interface with a table titled "Statistical Local Area (SLA) by SEXP Sex, LANP Language Spoken at Home and STRD Dwelling Structure". The table is in large table mode and displays data for two SLAs: Botany Bay (C) and Leichhardt (A). The columns are categorized by SEXP Sex (Male and Female), LANP Language Spoken at Home (French, Greek, etc.), and STRD Dwelling Structure (Separate house, Caravan, cabin, houseboat, etc.).

SEXP Sex	Male						Female					
	French		Greek		..		French		Greek		..	
LANP Language Spoken at Home	Separate house	Caravan, cabin, houseboat	Separate house	Caravan, cabin, houseboat	Separate house	Caravan, cabin, houseboat	Separate house	Caravan, cabin, houseboat	Separate house	Caravan, cabin, houseboat	Separate house	Caravan, cabin, houseboat
Statistical Local Area (SLA)												
Botany Bay (C)	-	-	-	-	-	-	-	-	-	-	-	-
Leichhardt (A)	-	-	-	-	-	-	-	-	-	-	-	-
..	-	-	-	-	-	-	-	-	-	-	-	-

Pricing

TableBuilder is available exclusively by subscription. Access to the 2006 Census is at a cost of \$1655.00 inclusive of GST per licence. This price includes helpline support and an online training package which explains some Census data concepts and provides you with an overview on how to use this innovative product.

To subscribe to TableBuilder, simply visit the ABS website at www.abs.gov.au/tablebuilder or phone the National Information and Referral Service on 1300 135 070 between 9.00am and 5.00pm, Monday to Friday. Please note that all TableBuilder subscribers will be asked to complete an undertaking form outlining obligations when using TableBuilder.
